Federal Register

12–3–01 Monday
Vol. 66 No. 232 Dec. 3, 2001
Pages 60139–61124

The **FEDERAL REGISTER** is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see http://www.nara.gov/fedreg.

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge as one of the databases on GPO Access, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6 a.m. each day the **Federal Register** is published and it includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward.

GPO Access users can choose to retrieve online **Federal Register** documents as TEXT (ASCII text, graphics omitted), PDF (Adobe Portable Document Format, including full text and all graphics), or SUMMARY (abbreviated text) files. Users should carefully check retrieved material to ensure that documents were properly downloaded.

On the World Wide Web, connect to the **Federal Register** at http://www.access.gpo.gov/nara. Those without World Wide Web access can also connect with a local WAIS client, by Telnet to swais.access.gpo.gov, or by dialing (202) 512-1661 with a computer and modem. When using Telnet or modem, type swais, then log in as guest with no password.

For more information about GPO Access, contact the GPO Access User Support Team by E-mail at gpoaccess@gpo.gov; by fax at (202) 512–1262; or call (202) 512–1530 or 1–888–293–6498 (toll free) between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $699, or $764 for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $264. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $10.00 for each issue, or $10.00 for each group of pages as actually bound; or $2.00 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 66 FR 12345.

Printed on recycled paper.

Rules and Regulations

Federal Register
Vol. 66, No. 232
Monday, December 3, 2001

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF TRANSPORTATION

5 CFR Part 6001

RINs 2105–AD08, 3209–AA15

Supplemental Standards of Ethical Conduct for Employees of the Department of Transportation

AGENCY: Department of Transportation.

ACTION: Final rule; amendment.

SUMMARY: The Department of Transportation, with the concurrence of the Office of Government Ethics (OGE), amends the Supplemental Standards of Ethical Conduct for Employees of the Department of Transportation (Transportation Ethics Regulations). The amendment adds authority to waive the general prohibition against Federal Aviation Administration (FAA) employees holding stock or other securities interests in airlines, aircraft manufacturing companies or suppliers of components or parts to those entities. The exercise of this waiver authority will be conditioned in each case upon a determination that the waiver is not inconsistent with the standards of ethical conduct for employees of the Executive Branch and that application of the general FAA prohibition is not necessary to avoid the appearance of misuse of position or loss of impartiality.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: William R. Register, Senior Ethics Counsel, Office of the General Counsel, Department of Transportation, Room 10102, Washington, DC 20590, (202) 366–9154; or John Walsh, Associate Chief Counsel for Ethics, (202) 366–4099, FAA General Law Division, 400 7th Street, SW., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

I. Background

The Transportation Ethics Regulations were issued in 1996 to minimize potential conflicts of interest and supplement OGE's Standards of Ethical Conduct for Employees of the Executive Branch (5 CFR part 2635) (Standards). *See* 61 FR 39901–39904 (July 31, 1996), as codified at 5 CFR part 6001. The FAA-pertinent part of the Transportation Ethics Regulations, at 5 CFR 6001.104(b), generally prohibits FAA employees from holding any stock or other securities interest in an airline or aircraft manufacturing company, or in a supplier of components or parts to an airline or aircraft manufacturing company. The requirement prevents employees from taking actions that may violate conflict of interest laws or that may appear to do so. Exceptions to the general prohibition permit FAA employees to invest in certain mutual funds that hold the prohibited interests. *See* 5 CFR 6001.104(c).

The FAA's experience has shown, however, that the absolute prohibition in the current regulation is not needed to preserve the integrity of FAA operations. Also, employees for whom a waiver may be granted will nevertheless be subject to the conflict of interest laws and ethics regulations that apply to all Federal employees. These laws and regulations prohibit employees from taking action in any matter affecting a company in which they have any stock or other financial interest unless a regulatory exemption or a written waiver is obtained. Therefore, an amendment is being adopted to include in the regulation waiver language such as has been used for years by other agencies. See, for example, the regulations of the Department of the Interior at 5 CFR 3501.104(b)(5).

Under new § 6001.104(d), an agency designee, as defined in 5 CFR 6001.102, may grant a waiver from the regulatory restriction in § 6001.104(b) based on a determination that the waiver is not inconsistent with 5 CFR part 2635 or otherwise prohibited by law and that, under the particular circumstances, application of the restriction is not necessary to avoid the appearance of misuse of position or loss of impartiality and objectivity with which agency programs are administered. An FAA employee may be required under the waiver to disqualify himself from a particular matter or take other appropriate action. Initially, this new waiver authority will permit the FAA to consider a broader pool of applicants currently under consideration for temporary security positions at the nation's airports.

In addition, the Department is revising the authority citation of the Transportation Ethics Regulations to add reference to 5 U.S.C. 7353 concerning restrictions on gifts to Federal employees.

II. Matters of Regulatory Procedure

Administrative Procedure Act

Pursuant to 5 U.S.C. 553(a)(2), (b), and (d), the Department has found that good cause exists for waiving the regular notice of proposed rulemaking, and opportunity for public comment. The Department also finds that good cause exists for making this final rule effective immediately upon publication in the **Federal Register**. We make these findings because it is in the public interest that this rule, which concerns matters of agency management, personnel, organization, practice and procedure, and which relieves certain restrictions placed on FAA employees, become effective on the date of publication.

Regulatory Flexibility Act Analysis

Pursuant to section 605(b) of the Regulatory Flexibility Act, the Department certifies that this rule will not have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). Accordingly, no regulatory flexibility analysis is required.

Executive Order 12866 Determination

The Department has determined that this final rule does not constitute a "significant regulatory action" for the purposes of Executive Order 12866, nor is the rule significant as defined in DOT's Regulatory Policies and Procedures.

Unfunded Mandates Reform Act of 1995 Determinations

Section 202 of the Unfunded Mandates Reform Act of 1995 (Unfunded Mandates Act)[1] requires that an agency prepare a budgetary impact statement before promulgating a rule

[1] Pub. L. 104–4, 109 Stat. 48 (codified at 2 U.S.C. Chs. 17A–25)

that includes a Federal mandate that may result in expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (as adjusted for inflation) in any one year. If a budgetary impact statement is required, section 205 of the Unfunded Mandates Act also requires an agency to identify and consider a reasonable number of regulatory alternatives before promulgating a rule. As discussed in the preamble, this rule limits the restrictions on FAA employees holding financial interests in aviation industry entities. The Department therefore has determined that the rule will not result in expenditures by State, local or tribal governments or by the private sector of $100 million or more. Accordingly, the Unfunded Mandates Act does not apply to this rulemaking.

List of Subjects in 5 CFR Part 6001

Conflict of interests, Ethics, FAA employees, Government employees.

Dated: November 21, 2001.

Norman Y. Mineta,

Secretary of Transportation.

Approved: November 27, 2001.

Amy L. Comstock,

Director, Office of Government Ethics.

For the reasons set forth in the preamble, the Department, with the concurrence of OGE, amends 5 CFR part 6001 as follows:

PART 6001—SUPPLEMENTAL STANDARDS OF ETHICAL CONDUCT FOR EMPLOYEES OF THE DEPARTMENT OF TRANSPORTATION

1. The authority citation for part 6001 is revised to read as follows:

Authority: 5 U.S.C. 301, 7301, 7353; 5 U.S.C. App. (Ethics in Government Act of 1978); 49 U.S.C. 322; E.O. 12674, 54 FR 15159, 3 CFR, 1989 Comp., p. 215, as modified by E.O. 12731, 55 FR 42547, 3 CFR, 1990 Comp., p. 306; 5 CFR 2635.105, 2635.203(a), 2635.403(a), 2635.807.

2. Section 6001.104 is amended by:

a. Revising paragraph (b);

b. Redesignating paragraph (d) as paragraph (e); and

c. Adding new paragraph (d).

The revision and addition read as follows:

§ 6001.104 Prohibited financial interests.

* * * * *

(b) *Federal Aviation Administration (FAA).* Except as provided in paragraphs (c) and (d) of this section, no FAA employee, or spouse or minor child of the employee, may hold stock or have any other securities interest in an airline or aircraft manufacturing company, or in a supplier of components or parts to an airline or aircraft manufacturing company.

* * * * *

(d) *Waiver.* An agency designee may grant a written waiver from the prohibition contained in paragraph (b) of this section, based on a determination that the waiver is not inconsistent with 5 CFR part 2635 or otherwise prohibited by law, and that, under the particular circumstances, application of the prohibition is not necessary to avoid the appearance of misuse of position or loss of impartiality, or otherwise to ensure confidence in the impartiality and objectivity with which FAA programs are administered. A waiver under this paragraph may be accompanied by appropriate conditions, such as requiring execution of a written statement of disqualification. Notwithstanding the granting of any waiver, an employee remains subject to the disqualification requirements of 5 CFR 2635.402 and 2635.502.

RIN 2120–AA64

Airworthiness Directives; GARMIN International GNS 430 Units

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that applies to certain GARMIN International (GARMIN) GNS 430 units that are installed on aircraft. This AD requires you to modify the unit to incorporate circuitry changes to the GNS 430 unit's deviation and flag outputs. This AD is the result of reports of inaccurate course deviations caused by external electrical noise to the GNS 430 unit's course deviation indicator (CDI). The actions specified by this AD are intended to prevent such external noise from causing inaccurate course deviation displays in the GNS 430 unit's CDI or horizontal situation indicator (HSI). Such displays could result in the pilot making flight decisions that put the aircraft in unsafe flight conditions.

DATES: This AD becomes effective on December 28, 2001.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in the regulations as of December 28, 2001.

ADDRESSES: You may obtain the service information referenced in this AD from GARMIN International, 1200 East 151st Street, Olathe, Kansas 66062. You may view this information at the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket No. 99–CE–87–AD, 901 Locust, Room 506, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Roger A. Souter, FAA, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Wichita, Kansas 67209; telephone: (316) 946–4134; facsimile: (316) 946–4407; e-mail: *roger.souter@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

What events have caused this AD? The FAA has received information that external electrical noise to the course deviation indicator (CDI) of GARMIN GNS 430 units could result in the CDI or horizontal situation indicator (HSI) displaying inaccurate course deviations. This could prompt the pilot to make flight decisions that put the aircraft in unsafe flight conditions.

Certain GNS 430 installations have received electrical noise between 1 and 3 volts alternating current (AC) peak-peak (induced into the GNS 430 CDI input) from other items installed on the aircraft. This high level of noise causes an undesirable oscillation of the CDI outputs, which results in inaccurate course deviation displays in the GNS 430 unit's CDI/HSI.

The condition is installation dependent. The GNS 430 units continue to meet all requirements in the technical standard order (TSO). The condition occurs in aircraft with installations that impose large noise spikes upon the CDI D-bar control wiring. Such installations are autopilots, fan motors, or similar accessories.

What is the potential impact if FAA took no action? As described above, such external noise could cause inaccurate course deviation displays in the GNS 430 unit's CDI/HSI. This could result in the pilot making flight decisions that put the aircraft in unsafe flight conditions.

Has FAA taken any action to this point? We issued a proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include

an AD that would apply to certain GARMIN GNS 430 units that are installed on aircraft. This proposal was published in the **Federal Register** as a notice of proposed rulemaking (NPRM) on August 6, 2001 (66 FR 40926). The NPRM proposed to require you to modify the unit to incorporate circuitry changes to the GNS 430 unit's deviation and flag outputs. The proposed actions would be accomplished in accordance with GARMIN Service Bulletin No.: 9905, Revision A, dated September 17, 1999.

Was the public invited to comment? The FAA encouraged interested persons to participate in the making of this amendment. The paragraphs that follow present the comment received on the proposal and FAA's response to this comment.

Comment Disposition

What is the commenter's concern? The commenter states that the majority of, if not all, the owners/operators of aircraft with the GARMIN GNS 430 units installed have already complied with the proposed AD through the manufacturer's warranty program. The commenter recommends that FAA withdraw the NPRM.

What is FAA's response to the concern? We do not concur with withdrawing the NPRM. Many of the airplanes equipped with the GARMIN GNS 430 units may actually incorporate the modification. However, AD action is the only way we can mandate that all units currently installed either have the modification incorporated or keep the modification incorporated and that all units installed in the future incorporate this modification.

We are not changing the final rule as a result of this comment.

FAA's Determination

What is FAA's final determination on this issue? After careful review of all available information related to the subject presented above, we have determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. We have determined that these minor corrections:

—Provide the intent that was proposed in the NPRM for correcting the unsafe condition; and

—Do not add any additional burden upon the public than was already proposed in the NPRM.

Cost Impact

How many airplanes does this AD impact? We estimate that 2,010 affected GARMIN GNS 430 units could be installed on aircraft in the U.S. registry.

What is the cost impact of this AD on owners/operators of the affected airplanes? GARMIN will cover all workhours and parts costs associated with this modification under warranty. This AD will not impose any cost impact upon the owners/operators of any aircraft incorporating one of the affected GNS 430 units.

Compliance Time of This AD

What is the compliance time of this AD? The compliance time of this AD is within the next 6 months after the effective date of this AD.

Why is the compliance time presented in calendar time instead of hours time-in-service (TIS)? The compliance time for this AD is presented in calendar time instead of hours TIS because the condition exists regardless of aircraft operation. The external noise outputs could occur and cause the inaccurate CDI/HSI displays regardless of the number of times and hours the aircraft was operated or the age of the GNS 430 unit. For these reasons, we have determined that a compliance based on calendar time should be utilized in this AD in order to ensure that the unsafe condition is addressed within a reasonable time period on all aircraft with an affected GNS 430 unit installed.

Regulatory Impact

Does this AD impact various entities? The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

Does this AD involve a significant rule or regulatory action? For the reasons discussed above, I certify that this action (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. FAA amends § 39.13 by adding a new AD to read as follows:

2001–23–17 GARMIN International: Amendment 39–12516; Docket No. 99–CE–87–AD.

(a) *What airplanes are affected by this AD?* This AD applies to the GNS 430 units that are specified in paragraph (a)(1) of this AD and are installed on aircraft. These GNS 430 units are installed in, but not limited to, aircraft that are certificated in any category and presented in paragraph (a)(2) of this AD:

(1) GNS 430 Units, part number 011–00280–00: serial numbers 9630001, 96300002, 96300017, 96300028, 96300034, 96300040, 96300068, 96300104, 96300108, 96300122, 96300125, 96300130, 96300142, 96300149, 96300161, 96300165, 96300218, 96300222, 96300232, 96300269, 96300272, 96300308, 96300333, 96300340, 96300348, 96300354, 96300369, 96300372, 96300382, 96300394, 96300411, 96300413, 96300429, 96300437, 96300451, 96300484, 96300485, 96300489, 96300504, 96300506, 96300513, 96300522, 96300549, 96300563, 96300585, 96300587, 96300618, 96300621, 96300624, 96300628, 96300641, 96300653, 96300664, 96300713, 96300734, 96300756, 96300766, 96300781, 96300785, 96300786, 96300808, 96300831, 96300837, 96300842, 96300846, 96300866, 96300870, 96300872, 96300899, 96300916, 96300923, 96300925, 96300929, 96300941, 96300961, 96300984, 96300987, 96301021, 96301108, 96301130, 96301280, and 96301296 through 96303200.

(2) Aircraft with the GNS 430 Unit Installation (other aircraft could have field approval installations):

(b) *Who must comply with this AD?* Anyone who wishes to operate any aircraft with one of the affected GNS 430 units installed must comply with this AD.

(c) *What problem does this AD address?* The actions specified by this AD are intended to prevent external noise from causing inaccurate course deviation displays in the GNS 430 unit's course deviation indicator (CDI) or horizontal situation indicator (HSI). Such displays could result in the pilot making flight decisions that put the aircraft in unsafe flight conditions.

(d) *What actions must I accomplish to address this problem?* To address this problem, you must accomplish the following:

Actions	Compliance	Procedures
(1) Modify the affected GNS 430 unit to incorporate circuitry changes to the deviation and flag outputs.	Within the next 6 months after December 28, 2001 (the effective date of this AD).	In accordance with the MODIFICATION INSTRUCTIONS section of GARMIN Service Bulletin No.: 9905, Revision A, dated September 17, 1999.
(2) Do not install an affected GNS 430 unit unless it has been modified as required by paragraph (d)(1) of this AD.	As of December 28, 2001 (the effective date of this AD).	In accordance with the MODIFICATION INSTRUCTIONS section of GARMIN Service Bulletin No.: 9905, Revision A, dated September 17, 1999.

(e) *Can I comply with this AD in any other way?* You may use an alternative method of compliance or adjust the compliance time if:

(1) Your alternative method of compliance provides an equivalent level of safety; and

(2) The Manager, Wichita Aircraft Certification Office (ACO), approves your alternative. Submit your request through an FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Wichita ACO.

Note: This AD applies to any aircraft with the equipment installed as identified in paragraph (a) of this AD, regardless of whether the aircraft has been modified, altered, or repaired in the area subject to the requirements of this AD. For aircraft that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (e) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if you have not eliminated the unsafe condition, specific actions you propose to address it.

(f) *Where can I get information about any already-approved alternative methods of compliance?* Contact Roger A. Souter, FAA, Wichita Aircraft Certification Office (ACO), 1801 Airport Road, Room 100, Wichita, Kansas 67209; telephone: (316) 946–4134; facsimile: (316) 946–4407, e-mail: roger.souter@faa.gov.

(g) *What if I need to fly the airplane to another location to comply with this AD?* The FAA can issue a special flight permit under sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate your airplane to a location where you can accomplish the requirements of this AD.

(h) *Are any service bulletins incorporated into this AD by reference?* Actions required by this AD must be done in accordance with GARMIN Service Bulletin No.: 9905, Revision A, dated September 17, 1999. The Director of the Federal Register approved this incorporation by reference under 5 U.S.C. 552(a) and 1 CFR part 51. You may obtain copies from GARMIN International, 1200 East 151st Street, Olathe, Kansas 66062. You may view this information at FAA, Central Region, Office of the Regional Counsel, 901 Locust, Room 506, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(i) *When does this amendment become effective?* This amendment becomes effective on December 28, 2001.

Issued in Kansas City, Missouri, on November 14, 2001.

Michael K. Dahl,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

14 CFR Part 39

[Docket No. 2001–SW–23–AD; Amendment 39–12524; AD 2001–24–08]

RIN 2120–AA64

Airworthiness Directives; Eurocopter France Model EC 120 Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD) that applies to Eurocopter France (ECF) Model EC120B helicopters and currently requires adjusting the clearance of the cabin sliding door if necessary. This amendment requires adding an end stop to the front rail and modifying the rear stop of the middle rail to increase its adjustment range for certain cabin sliding doors. This amendment is prompted by an in-flight loss of a cabin sliding door, which had been locked in the open position. The actions specified by this AD are intended to prevent in-flight loss of a cabin sliding door, impact with the horizontal stabilizer or fenestron tail rotor, and subsequent loss of control of the helicopter.

DATES: Effective January 7, 2002.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 7, 2002.

ADDRESSES: The service information referenced in this AD may be obtained from American Eurocopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75053–4005, telephone (972) 641–3460, fax (972) 641–3527. This information may be examined at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Richard Monschke, Aviation Safety Engineer, FAA, Rotorcraft Directorate, Rotorcraft Standards Staff, Fort Worth, Texas 76193–0110, telephone (817) 222–5116, fax (817) 222–5961.

SUPPLEMENTARY INFORMATION: A proposal to amend 14 CFR part 39 by superseding AD 2000–17–07, Amendment 39–11881 (65 FR 52012, August 28, 2000), which applies to ECF Model EC120B helicopters, was published in the **Federal Register** on August 23, 2001 (66 FR 44319). That action proposed to supersede AD 2000–17–07 to require, within 90 days or before the next flight with a door open, whichever occurs first, adding a stop to the front rail and modifying the rear stop of the middle rail of the cabin sliding doors.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposal or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed.

The FAA estimates that 24 helicopters of U.S. registry will be affected by this AD, that it will take approximately 2 work hours per helicopter to add and modify the cabin sliding door stops, and that the average labor rate is $60 per work hour. Required parts will cost approximately $25 per helicopter. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $3480.

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended].

2. Section 39.13 is amended by removing Amendment 39–11881 (65 FR 52012, August 28, 2000), and by adding a new airworthiness directive (AD), Amendment 39–12524, to read as follows:

2001–24–08 Eurocopter France: Amendment 39–12524. Docket No. 2001–SW–23–AD. Supersedes AD 2000–17–07, Amendment 39–11881, Docket No. 2000–SW–33–AD.

Applicability: Model EC120B helicopters, serial number 1169 and below, with a cabin sliding door rail, part number C533C8102201, C533C8102202, C533C8103201, or C533C8103202, installed, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required within 90 days or before the next flight with the door open, whichever occurs first, unless accomplished previously.

To prevent in-flight loss of a cabin sliding door, impact with the horizontal stabilizer or fenestron tail rotor, and subsequent loss of control of the helicopter, accomplish the following:

(a) Add a stop to the front rail and modify the rear stop of the middle rail in accordance with the Operational Procedure, paragraph 2.B., of Eurocopter France Alert Service Bulletin No. 52A004, Revision 1, dated April 19, 2001.

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Regulations Group, Rotorcraft Directorate, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Regulations Group.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Regulations Group.

(c) Special flight permits may be issued in accordance with 14 CFR 21.197 and 21.199 to operate the helicopter with the sliding

cabin doors closed or removed to a location where the requirements of this AD can be accomplished.

(d) The modification shall be done in accordance with the Operational Procedure, paragraph 2.B., of Eurocopter France Alert Service Bulletin No. 52A004, Revision 1, dated April 19, 2001. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from American Eurocopter Corporation, 2701 Forum Drive, Grand Prairie, Texas 75053–4005, telephone (972) 641–3460, fax (972) 641–3527. Copies may be inspected at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on January 7, 2002.

Note 3: The subject of this AD is addressed in Direction Generale De L'Aviation Civile (France) AD 2000–285–005(A) R2, dated May 16, 2001.

Issued in Fort Worth, Texas, on November 20, 2001.

Eric Bries,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Agusta S.p.A. Model A109C, A109E, and A109K2 Helicopters

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment supersedes an existing airworthiness directive (AD) that applies to Agusta S.p.A. (Agusta) Model A109C, A109E, and A109K2 helicopters and currently requires inspecting the main rotor blade (blade) tip cap for bonding separation and a crack. This amendment contains the same requirements as the existing AD but also requires a tap inspection of the tip cap for bonding separation in the blade bond area and a dye penetrant inspection of the tip cap leading edge along the welded joint line of the upper and lower tip cap skin shells for a crack. This amendment is prompted by three occurrences in which the blade tip cap leading edge opened in flight due to cracks, resulting in excessive helicopter vibration. The actions specified by this AD are intended to prevent failure of a blade tip cap, excessive vibration, and subsequent loss of control of the helicopter.

DATES: Effective January 7, 2002.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 7, 2002.

ADDRESSES: The service information referenced in this AD may be obtained from Agusta, 21017 Cascina Costa di Samarate (VA) Italy, Via Giovanni Agusta 520, telephone 39 (0331) 229111, fax 39 (0331) 229605–222595. This information may be examined at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Richard Monschke, Aviation Safety Engineer, FAA, Rotorcraft Directorate, Rotorcraft Standards Staff, Fort Worth, Texas 76193–0110, telephone (817) 222–5116, fax (817) 222–5961.

SUPPLEMENTARY INFORMATION: A proposal to amend 14 CFR part 39 by superseding AD 98–19–04, Amendment 39–11039 (64 FR 7494, February 16, 1999), which applies to Agusta Model A109C, A109E, and A109K2 helicopters, was published in the **Federal Register** on August 23, 2001 (66 FR 44320). That action proposed to supersede AD 98–19–04, which requires inspecting between the metal shells and honeycomb core for bonding separation, visually inspecting the blade tip for swelling or deformation, and visually inspecting the welded bead along the leading edge of the blade tip cap for a crack. This AD retains the requirements of AD 98–19–04 and also requires tap inspection of the tip cap for bonding separation in the blade bond area and a dye penetrant inspection of the tip cap leading edge along the welded joint line of the upper and lower tip cap skin shells for a crack. Installing tip caps, P/N 709–0103–29–109, on all affected blades is terminating action for the requirements of this AD.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments were received on the proposal or the FAA's determination of the cost to the public. The FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for updating the language in Note 1 and adding "Agusta" before "Alert Bollettino Tecnico" in paragraph (a). These changes will neither increase the economic burden on any operator nor increase the scope of the AD.

The FAA estimates that 44 helicopters of U.S. registry will be affected by this AD and that it will take approximately 6 work hours per helicopter for the initial and repetitive inspections of the fleet. The average labor rate is $60 per work hour. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $15,840. This estimate is based on the assumption that no blade will need to be replaced as a result of these inspections.

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Amendment 39–11039 (64 FR 7494, February 16, 1999), and by adding a new airworthiness directive (AD), Amendment 39–12523, to read as follows:

2001–24–07 Agusta S.p.A.: Amendment 39–12523. Docket No. 2001–SW–15–AD. Supersedes AD 98–19–04, Amendment 39–11039, Docket No. 98–SW–40–AD.

Applicability: Model A109C, A109E, and A109K2 helicopters, with main rotor blade (blade), part number (P/N) 709–0130–01—all dash numbers, having a serial number (S/N) up to and including S/N 1428 with a prefix of either "EM–" or "A5–" installed, certificated in any category.

Note 1: This AD applies to each helicopter identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For helicopters that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (f) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required within 10 hours time-in-service (TIS), unless accomplished previously, and thereafter at intervals not to exceed 25 hours TIS.

To prevent failure of a blade tip cap, excessive vibration, and subsequent loss of control of the helicopter, accomplish the following:

(a) Tap inspect the upper and lower sides of each tip cap for bonding separation between the metal shells and the honeycomb core using a steel hammer, P/N 109–3101–58–1, or a coin (quarter) in the area indicated as honeycomb core on Figure 1 of Agusta Alert Bollettino Tecnico Nos. 109–106, 109K–22, or 109EP–1, all Revision B, and dated December 19, 2000 (ABT), as applicable. Also, tap inspect for bonding separation in the tip cap to blade bond area (no bonding voids are permitted in this area).

(b) Visually inspect the upper and lower sides of each blade tip cap for swelling or deformation.

(c) Dye-penetrant inspect the tip cap leading edge along the welded joint line of the upper and lower tip cap skin shells for a crack in accordance with the Compliance Instructions, paragraph 3, of the applicable ABT.

(d) If any swelling, deformation, crack, or bonding separation that exceeds the prescribed limits in the applicable maintenance manual is found, replace the blade with an airworthy blade.

(e) Replacement blades affected by this AD must comply with the repetitive inspection requirements of this AD. Replacing an affected blade with a blade having an airworthy blade tip cap, P/N 709–0103–29–109, is terminating action for the requirements of this AD for that blade.

(f) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Regulations Group, Rotorcraft Directorate, FAA. Operators shall submit their requests through an FAA Principal Maintenance Inspector, who may concur or comment and then send it to the Manager, Regulations Group.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Regulations Group.

(g) A special flight permit may be issued under 14 CFR 21.197 and 21.199 to operate the helicopter to a location where the requirements of this AD can be accomplished. No special flight permit will be issued for any flight with a known tip cap crack.

(h) The inspections shall be done in accordance with Figure 1 and paragraph 3 of Agusta Alert Bollettino Tecnico Nos. 109–106, 109K–22, or 109EP–1, all Revision B, and dated December 19, 2000. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Agusta, 21017 Cascina Costa di Samarate (VA) Italy, Via Giovanni Agusta 520, telephone 39 (0331) 229111, fax 39 (0331) 229605–222595. Copies may be inspected at the FAA, Office of the Regional Counsel, Southwest Region, 2601 Meacham Blvd., Room 663, Fort Worth, Texas; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(i) This amendment becomes effective on January 7, 2002.

Note 3: The subject of this AD is addressed in Ente Nazionale per l'Aviazionne Civile (Italy) AD's 2000–571, 2000–572, and 2000–573, all dated December 22, 2000.

Issued in Fort Worth, Texas, on November 21, 2001.

Eric Bries,

Acting Manager, Rotorcraft Directorate, Aircraft Certification Service.

RIN 2120–AA64

Airworthiness Directives; Short Brothers Model SD3 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain Short Brothers Model SD3 series airplanes, that requires repetitive tests (checks) of the engine power lever to ensure that the fuel control unit (FCU) lever is contacting the maximum stop, adjustment of the FCU rigging, if necessary, and an engine ground run for correct gas generator rotational speed. This AD also requires a static reduced power check on each engine to ensure correct operation of the reserve takeoff power (RTOP) system; and follow-on actions, if necessary. This action is necessary to prevent failure of the engines to reach adequate RTOP boost during takeoff, which could result in reduced controllability of the airplane. This action is intended to address the identified unsafe condition.

DATES: Effective January 7, 2002.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the Federal Register as of January 7, 2002.

ADDRESSES: The service information referenced in this AD may be obtained from Short Brothers, Airworthiness & Engineering Quality, P.O. Box 241, Airport Road, Belfast BT3 9DZ, Northern Ireland. This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Todd Thompson, Aerospace Engineer, International Branch, ANM–116, FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington 98055–4056; telephone (425) 227–1175; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain Short Brothers Model SD3 series airplanes was published in the **Federal Register** on August 28, 2001 (66 FR 45196). That action proposed to require repetitive tests (checks) of the power lever movement of the fuel control unit (FCU) lever to ensure the lever is contacting the maximum stop, adjustment of the FCU rigging, if necessary, and an engine ground run for correct gas generator rotational speed. That action also proposed to require a static reduced power check on each engine to ensure correct operation of the reserve takeoff power system; and follow-on actions, if necessary.

Comments

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the single comment received.

Remove Repetitive Tests/Checks

The commenter requests that the FAA revise the proposed AD to remove the requirement for repetitive tests (checks) every 90 days. The commenter suggests that, after the initial tests, the tests should only be repeated after the FCU is replaced or during a "Hot Section" inspection.

We do not concur with the commenter's request. The commenter provides no justification for its request and no data to support that its suggestion would provide an acceptable level of safety. No change to the final rule is necessary in this regard.

Explanation of New Relevant Service Information

Since the issuance of the proposed AD, the manufacturer has issued Shorts Service Bulletins SD3 SHERPA–71–2, SD360 SHERPA–71–2, SD360–71–19, and SD330–71–24; all Revision 1; all dated August 2, 2001. The proposed rule referenced the original issues of these service bulletins, all dated February 5, 2001, as the appropriate sources of service information for accomplishment of the proposed actions. The actions in Revision 1 are essentially similar to those in the original issue of the service bulletins. Revision 1 of all four service bulletins corrects minor errors and clarifies certain procedures for the static reduced power check on each engine. Accordingly, the FAA has revised paragraph (a) of this final rule to refer to Revision 1 of the service bulletins as the appropriate sources of service information for the actions required by that paragraph. Also, the FAA has added a new Note 2 to this final rule (and re-lettered subsequent notes accordingly) to give credit for tests, checks, and follow-on actions accomplished before the effective date of this AD per the original issue of the applicable service bulletin.

Explanation of Changes to Terminology

For clarification, the FAA has revised the "Summary" section and paragraph (a) of the proposed AD to clarify certain terminology concerning the test of the engine power lever to ensure that the lever is contacting the maximum stop.

Conclusion

After careful review of the available data, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes described previously. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

Cost Impact

The FAA estimates that 46 Model SD3 series airplanes of U.S. registry will be affected by this AD, that it will take approximately 3 work hours per airplane to accomplish the required tests (checks), and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of this AD on U.S. operators is estimated to be $8,280, or $180 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted. The cost impact figures discussed in AD rulemaking actions represent only the time necessary to perform the specific actions actually required by the AD. These figures typically do not include incidental costs, such as the time required to gain access and close up, planning time, or time necessitated by other administrative actions.

Regulatory Impact

The regulations adopted herein will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, it is determined that this final rule does not have federalism implications under Executive Order 13132.

For the reasons discussed above, I certify that this action (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

2001–24–09 Short Brothers PLC: Amendment 39–12525. Docket 2001–NM–113–AD.

Applicability: All Model SD3–SHERPA, SD3–60, and SD3–60 SHERPA series airplanes; and Model SD3–30 series airplanes having PT6A–45R series engines; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (b) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To prevent failure of the engines to reach adequate reserve takeoff power (RTOP) boost during takeoff, which could result in reduced controllability of the airplane, accomplish the following:

Repetitive Inspections/Corrective Action

(a) Within 100 flight cycles or 90 days after the effective date of this AD, whichever comes later: Do a test (check) of the engine power lever to ensure that the fuel control unit (FCU) lever is contacting the maximum stop; and adjust the FCU rigging if the lever is not contacting the stop; do an engine ground run for correct gas generator rotational speed; and do a static reduced power check on each engine to ensure correct operation of the RTOP system; per Shorts Service Bulletin SD3 SHERPA–71–2, SD360 SHERPA–71–2, SD360–71–19, or SD330–71–24; all Revision 1; all dated August 2, 2001; as applicable. Before further flight, do any follow-on actions necessary (includes a functional check of the RTOP solenoid, replacement of any defective RTOP solenoid with a new solenoid, adjustment of the RTOP system if system fails to provide adequate

boost, adjustment to the torque of the FCU Ng servo valve, test for leakage or restrictions of the FCU pnuematic system, or overhaul of the FCU), per the applicable service bulletin. Repeat the tests (checks) after that at intervals not to exceed 90 days.

Note 2: Tests, checks, and follow-on actions accomplished before the effective date of this AD per Shorts Service Bulletin SD3 SHERPA–71–2, SD360 SHERPA–71–2, SD360–71–19, or SD330–71–24; all dated February 5, 2001; as applicable; are acceptable for compliance with paragraph (a) of this AD.

Alternative Methods of Compliance

(b) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, International Branch, ANM–116.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the International Branch, ANM–116.

Special Flight Permits

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Incorporation by Reference

(d) The actions shall be done in accordance with Shorts Service Bulletin SD3 SHERPA–71–2, Revision 1, dated August 2, 2001; Shorts Service Bulletin SD360 SHERPA–71–2, Revision 1, dated August 2, 2001; Shorts Service Bulletin SD360–71–19, Revision 1, dated August 2, 2001; or Shorts Service Bulletin SD330–71–24, Revision 1, dated August 2, 2001; as applicable. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Short Brothers, Airworthiness & Engineering Quality, P.O. Box 241, Airport Road, Belfast BT3 9DZ, Northern Ireland. Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

Note 4: The subject of this AD is addressed in British airworthiness directives 002–02–2001, 003–02–2001, 004–02–2001, and 005–02–2001.

Effective Date

(e) This amendment becomes effective on January 7, 2002.

Issued in Renton, Washington, on November 21, 2001.

Kalene C. Yanamura,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 01–29590 Filed 11–30–01; 8:45 am]

BILLING CODE 4910–13–U

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 256

RIN 1010–AC68

Leasing of Sulphur or Oil and Gas in the Outer Continental Shelf—Revision of Requirements Governing Surety Bonds for Outer Continental Shelf Leases

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Final rule.

SUMMARY: This rule modifies requirements governing surety bonds for activities on the Outer Continental Shelf (OCS). These changes codify the terms and conditions under which a surety will be relieved of responsibility when MMS terminates the period of liability of a bond. Codifying these terms and conditions is necessary to clarify the responsibilities of the lessee and the surety after the lease expires.

DATES: This rule is effective January 2, 2002.

FOR FURTHER INFORMATION CONTACT: John Mirabella, Engineering and Operations Division, (703) 787–1600.

SUPPLEMENTARY INFORMATION: OCS lessees must comply with regulations governing operations, payments of rents and royalties, and end-of-lease obligations. To ensure that the lessee will be financially able to meet all requirements, including end-of-lease requirements, MMS requires the lessee to post a bond. This rule amends the provisions of 30 CFR 256.58 concerning the cancellation of a bond.

It sometimes happens that a problem arising during the period covered by a bond is only discovered after the coverage period ends. For example, an audit may reveal that the lessee owes us additional royalty. As a rare example, a plugged well may start to leak. In either case, the lessee is responsible for correcting the problem.

This rule addresses how long MMS will hold a bond to ensure that situations of this type are covered. The current regulation does not set a limit on the period that MMS may continue to hold the bond company responsible for a problem that occurs during the liability period.

On January 8, 2001, MMS published a proposed rule in the **Federal Register** (66 FR 1277). The rule provides for a period of 7 years (plus such additional time taken for appeals or litigation) during which MMS may hold the bond to cover any claims based upon obligations that accrued during the liability period. During this 7-year period, we will retain security or collateral pledged to us in lieu of a surety. We will cancel the bond after 7 years. We believe that the 7-year period provides adequate protection to the Government and will provide a measure of certainty to bond companies.

The 7-year provision applies to all base bonds, unless we find that less security needs to be retained. If you are a supplemental bond provider, this rule would release you from liability after completion of the bonded work, unless we find that potential liability is greater than the amount of the base bond. We will normally release the supplemental bond upon completion of the bonded work because, in most cases, we anticipate that the general bond will be sufficient to cover our estimate of potential residual liabilities.

The rule does not change the provision in 30 CFR 256.58(c) that allows MMS to reinstate your bond in extraordinary circumstances. That provision allows us to reinstate your bond as if no cancellation or release had occurred if: (1) You make a payment under the lease and the payment is rescinded or must be repaid by the recipient because you are insolvent, bankrupt, subject to reorganization, or placed in receivership; or (2) you represent to us that you have discharged your obligations under the lease and your representation was materially false.

The notice of proposed rulemaking requested comments during a 60-day public comment period. MMS received three comment letters during the comment period—one from an oil company, one from a trade association representing companies that write surety bonds, and one from an individual representing two companies that provide surety bonds for the OCS.

One comment requested clarification of how termination and cancellation of a bond will affect responsibilities of the surety and the lessee. Termination of the period of liability is important because it ends the surety's responsibility for further activities on a lease. The surety is responsible for all obligations that accrue during the period of liability. Accrued obligations include those associated with plugging of wells drilled and removal of

platforms installed during the period of liability. In addition, obligations accrue for all wells or platforms that were on the lease during any portion of the period of liability. Obligations can also accrue when the operator takes other actions, such as installing a piece of equipment, which must later be removed. When the period of liability is terminated, the surety continues to be liable for accrued obligations. When MMS cancels the bond, the cancellation ends all obligations for the surety, including previously accrued obligations.

A commenter recommended that the rules provide for cancellation of a bond when a new lessee has sufficient financial strength to provide for security without a supplemental bond. We agree with the commenter. The proposed rules already had specified conditions for cancellation of a bond when the lessee obtains a replacement bond. We agree that the proposal should be broadened. When a new lessee has sufficient financial strength on the basis of which MMS determines that a supplemental bond is unnecessary, we will cancel the supplemental bond because that financial strength provides a similar level of security as a bond.

A commenter recommended that a supplemental bond be cancelled when replaced by a new supplemental bond and that MMS not require the new bond issuer to accept all liabilities of the previous bond issuer. We revised the proposed rule so that accepting liabilities of the previous bond issuer applies only to base bonds and not to supplemental bonds, unless the Regional Director (1) determines that the base bond may not be adequate to cover liabilities accruing during the period of liability of the supplemental bond and which the replacement supplemental bond would not cover, and (2) notifies the provider of the bond that all or part of the supplemental bond will not be cancelled unless the issuer of the replacement bond accepts the liabilities of the previous supplemental bond issuer to the extent the Regional Director specifies.

One commenter recommended that the bond be cancelled 7 years after the termination of the lease rather than 7 years after meeting all lease obligations. Another commenter recommended that the bond be cancelled after 6 years instead of 7. The time difference between the termination of the lease and the meeting of all obligations is typically less than 1 year but can be longer. The lease covering offshore operations requires that the lessee remove all devices, works, and structures from the lease within 1 year of lease termination. The lease provides that MMS can allow the devices, works, and structures to remain longer for drilling or producing on other leases. When MMS grants a lessee additional time to meet these end-of-lease obligations, we require that the lessee maintain the bond until the obligations are met. In this situation, the period of liability does not end until the lessee has met the obligations, and we believe that the time period should not start until the lessee has met the obligations. However, when more than a year has elapsed between the end of the lease and the meeting of all lease obligations, we believe that an additional 6 years will be sufficient. Accordingly, we have modified the rule to provide for bond cancellation at the latest of 7 years after the termination of the lease, 6 years after completion of all bonded obligations, or the conclusion of any appeals or litigation related to your bonded obligations.

A commenter recommended that MMS make mandatory the provision that allows the Regional Director to reduce the amount of bond. MMS has maintained a policy of not requiring more bond than is necessary to ensure that obligations are met. The rule has been revised to address the commenter's concern. Under the final rule, the lessee may request a reduction in the level of the bond or the amount of security. The Regional Director will then reduce the bond or return a portion of the security if the Regional Director determines that the lessee needs less than the full amount of the base bond to meet any possible future obligation.

A commenter recommended that the bond form should reflect the 90-day termination provision in the rule. This notice addresses the rule and not the bond form. MMS will consider the comment during any revisions to the bond form. However, the provision for termination will be available and can be exercised by the surety whether or not the provision appears on the bond form.

Editorial Corrections: With this final rule, MMS is also making two minor editorial corrections to 30 CFR 256.52.

(1) Section 256.52(b) lists the three MMS OCS areas. We are correcting the first area listed to state that it is "The Gulf of Mexico and the area offshore the Atlantic Coast."

(2) In several paragraphs under § 256.52, the word "alternate" is used when referring to another form or type of security. This word is corrected to the more accurate term "alternative" in each place that it appears.

Procedural Matters

Regulatory Planning and Review (Executive Order 12866)

This document is not a significant rule and is not subject to review by the Office of Management and Budget (OMB) under Executive Order 12866.

(1) This rule will not have an effect of $100 million or more on the economy. It will not adversely affect in a material way the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. This rule, in many important ways, follows aspects of current policy. The rule will also extend that policy to other forms of security, such as escrow accounts, which are not currently used for base bonds. Since this rule normally will not apply to supplemental bonds without specific action by the Regional Supervisor, the impact of this change is minimal.

(2) This rule will not create a serious inconsistency or otherwise interfere with an action taken or planned by another agency. Other agencies are not affected by the bonds and other forms of surety that protect the Department of the Interior's interests.

(3) This rule does not alter the budgetary effects of entitlements, grants, user fees, or loan programs or the rights or obligations of their recipients. This rule will have no effect on the rights of the recipients of entitlements, grants, user fees, or loan programs.

(4) This rule does not raise novel legal or policy issues. The rule more clearly conforms MMS practice to that of the private sector and provides certainty with respect to the cancellation of surety bonds and other lease security.

Regulatory Flexibility (RF) Act

The Department certifies that this rule will not have a significant economic effect on a substantial number of small entities under the RF Act (5 U.S.C. 601 *et seq.*).

This rule will affect lessees and operators of leases on the OCS. This includes about 130 different companies. These companies are generally classified under the North American Industry Classification System (NAICS) code 211111, Crude Petroleum and Natural Gas Extraction, which includes companies that extract crude petroleum and natural gas. For this NAICS classification, a small company is one with fewer than 500 employees. Based on these criteria, we estimate that about 54 percent of the companies are considered small. This rule, therefore, affects a substantial number of small entities.

The companies that are considered small have an average of about 15 offshore facilities. We estimate that the small companies have annual sales between $1 million and $380 million.

As discussed above, we do not expect this rule to have a significant effect on any company, large or small. Under current regulations, when a lessee meets all of the lease requirements, the period of liability ends. If MMS later discovers a problem with the way the work was performed, we will hold the lessee responsible. If the lessee is not able to meet the obligation, we hold the bond company responsible. This regulation establishes a time period during which MMS will hold the bond before cancellation. The codification of a policy on bond cancellation is new. The other change from current practice is that MMS will retain pledged securities for the same length of time that we will wait before canceling surety bonds. While this new provision is needed to ensure consistency of agency practice, the provision will not have a significant effect since, in almost all cases, companies currently do not use instruments other than surety bonds to meet the basic bond requirement.

This rule will also affect companies that sell surety bonds or provide other types of security to OCS lessees. For those companies, this rule will provide certainty with regard to residual liabilities. Since the provisions in this rule are generally the same as current practice, any effects on bonding companies will be minor. Those minor effects will be reflected in costs charged to oil and gas lessees and will ultimately be borne by oil and gas lessees. These effects are included in the estimates addressing the oil and gas lessees.

Your comments are important. The Small Business and Agriculture Regulatory Enforcement Ombudsman and 10 Regional Fairness Boards were established to receive comments from small business about Federal agency enforcement actions. The Ombudsman will annually evaluate the enforcement activities and rate each agency's responsiveness to small business. If you wish to comment on the enforcement actions of MMS, call toll-free (888) 734–3247.

Small Business Regulatory Enforcement Fairness Act (SBREFA)

This rule is not a major rule under SBREFA (5 U.S.C. 804(2)). This rule:

(a) Does not have an annual effect on the economy of $100 million or more.

(b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions.

(c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises.

We do not expect this rule to have a significant effect because, as discussed earlier, this rule would, generally, codify policies already in use. The substantive change for securities other than surety bonds will not have a significant effect because the rule applies to the general bond requirement, and surety bonds are used by almost all MMS lessees to satisfy the base bond requirement.

Paperwork Reduction Act (PRA) of 1995

The PRA provides that an agency may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. Until OMB approves a collection of information and assigns a control number, you are not required to respond. OMB approved the information collection requirements in current 30 CFR part 256 regulations under OMB control number 1010–0006, with a current expiration date of March 31, 2004. The information collection aspects of this rule remain unchanged from current regulations, contain no additional paperwork requirements, and an OMB form 83–I submission to OMB under the PRA is not required.

Federalism (Executive Order 13132)

With respect to Executive Order 13132, the rule does not have Federalism implications. This rule does not substantially and directly affect the relationship between the Federal and State governments. The bonding requirements apply to leases between the Federal Government and its oil and gas lessees. The bond does not affect obligations between the lessee and any State or local government. This rule does not impose costs on States or localities. State or local governments do not provide bonds and do not need to comply with bonding requirements.

Takings (Executive Order 12630)

With respect to Executive Order 12630, this rule does not have significant Takings implications. A Takings Implication Assessment is not required. This rulemaking is not a governmental action capable of interfering with constitutionally protected property rights.

Energy Supply, Distribution, or Use (Executive Order 13211)

This rule is not a significant rule and is not subject to review by OMB under Executive Order 12866. The rule does not have a significant effect on energy supply, distribution, or use because the rule, in many important ways, follows aspects of current policy for bonds. The rule will also extend that policy to other forms of security such as escrow accounts. The new policy will apply only in the rare times when the other forms of security are used for a base bond. Thus, a Statement of Energy Effects is not required.

Civil Justice Reform (Executive Order 12988)

With respect to Executive Order 12988, the Office of the Solicitor has determined that this rule does not unduly burden the judicial system and meets the requirements of sections 3(a) and 3(b)(2) of the Executive Order.

National Environmental Policy Act of 1969

This rule does not constitute a major Federal action significantly affecting the quality of the human environment. A Categorical Exclusion Review determined that this action is considered a categorically excluded action, as it results only in administrative effects causing no significant impacts on the environment and does not require preparation of an environmental assessment. The rulemaking does not represent an exception to the established criteria for categorical exclusions.

Unfunded Mandate Reform Act (UMRA) of 1995

This rule does not impose an unfunded mandate on State, local, or tribal governments or the private sector of more than $100 million per year. This rule does not have a significant or unique effect on State, local, or tribal governments or the private sector. A statement containing the information required by the UMRA (2 U.S.C. 1531 *et seq.*) is not required.

List of Subjects in 30 CFR Part 256

Administrative practice and procedure, Continental shelf, Government contracts, Oil and gas exploration, Public lands—mineral resources, Reporting and recordkeeping requirements, Surety bonds.

Dated: November 7, 2001.

J. Steven Griles,

Acting Assistant Secretary, Land and Minerals Management.

For the reasons stated in the preamble, the Minerals Management Service (MMS) amends 30 CFR part 256 as follows:

PART 256—LEASING OF SULPHUR OR OIL AND GAS IN THE OUTER CONTINENTAL SHELF

1. The authority citation for part 256 continues to read as follows:

Authority: 43 U.S.C. 1331 *et seq.*, 42 U.S.C. 6213.

2. Section 256.52 is amended as follows:

A. Paragraph (b)(1) is revised to read as set forth below:

B. In paragraphs (d), (e), (g) introductory text, and (g)(1) and (2), remove the word "alternate" and add, in its place, the word "alternative".

§ 256.52 Bond requirements for an oil and gas or sulphur lease.

* * * * *

(b) * * *

(1) The Gulf of Mexico and the area offshore the Atlantic Coast.

* * * * *

3. Section 256.58 is revised to read as follows:

§ 256.58 Termination of the period of liability and cancellation of a bond.

This section defines the terms and conditions under which MMS will terminate the period of liability of a bond or cancel a bond. Terminating the period of liability of a bond ends the period during which obligations continue to accrue but does not relieve the surety of the responsibility for obligations that accrued during the period of liability. Canceling a bond relieves the surety of all liability. The liabilities that accrue during a period of liability include obligations that started to accrue prior to the beginning of the period of liability and had not been met and obligations that begin accruing during the period of liability.

(a) When the surety under your bond requests termination:

(1) The Regional Director will terminate the period of liability under your bond within 90 days after MMS receives the request; and

(2) If you intend to continue operations, or have not met all end of lease obligations, you must provide a replacement bond of an equivalent amount.

(b) If you provide a replacement bond, the Regional Director will cancel your previous bond and the surety that provided your previous bond will not retain any liability, provided that:

(1) The new bond is equal to or greater than the bond that was terminated, or you provide an alternative form of security, and the Regional Director determines that the alternative form of security provides a level of security equal to or greater than that provided for by the bond that was terminated;

(2) For a base bond submitted under § 256.52(a) or under § 256.53(a) or (b), the surety issuing the new bond agrees to assume all outstanding liabilities that accrued during the period of liability that was terminated; and

(3) For supplemental bonds submitted under § 256.53(d), the surety issuing the new supplemental bond agrees to assume that portion of the outstanding liabilities that accrued during the period of liability which was terminated and that the Regional Director determines may exceed the coverage of the base bond, and of which the Regional Director notifies the provider of the bond.

(c) This paragraph applies if the period of liability is terminated for a bond but the bond is not replaced by a bond of an equivalent amount. The surety that provided your terminated bond will continue to be responsible for accrued obligations:

(1) Until the obligations are satisfied; and

(2) For additional periods of time in accordance with paragraph (d) of this section.

(d) When your lease expires or is terminated, the surety that issued a bond will continue to be responsible, and the Regional Director will retain other forms of security as shown in the following table:

For the following type of bond	The period of liability will end	Your bond will be cancelled . . .
(1) Base bonds submitted under § 256.52(a), § 256.53(a), or (b).	When the Regional Director determines that you have met all of your obligations under the lease.	Seven years after the termination of the lease, 6 years after completion of all bonded obligations, or at the conclusion of any appeals or litigation related to your bonded obligation, whichever is the latest. The Regional Director will reduce the amount of your bond or return a portion of your security if the Regional Director determines that you need less than the full amount of the base bond to meet any possible future problems.
(2) Supplemental bonds submitted under § 256.53(d).	When the Regional Director determines that you have met all your obligations covered by the supplemental bond.	When you meet your bonded obligations, unless the Regional Director: (i) Determines that the future potential liability resulting from any undetected problems is greater than the amount of the base bond; and (ii) Notifies the provider of the bond that the Regional Director will wait 7 years before cancelling all or a part of the bond (or longer period as necessary to complete any appeals or judicial litigation related to your bonding obligation).

(e) For all bonds, the Regional Director may reinstate your bond as if no cancellation or release had occurred if:

(1) A person makes a payment under the lease and the payment is rescinded or must be repaid by the recipient because the person making the payment is insolvent, bankrupt, subject to reorganization, or placed in receivership; or

(2) The responsible party represents to MMS that it has discharged its obligations under the lease, and the representation was materially false when the bond was canceled or released.

[FR Doc. 01–29899 Filed 11–30–01; 8:45 am]

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 165

[COTP TAMPA–01–129]

RIN 2115–AA97

Security Zone; Port of Tampa, Tampa, FL

AGENCY: Coast Guard, DOT.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary fixed security zone in all waters in the vicinity of MacDill Air Force Base (AFB). This security zone is needed for national security reasons to protect MacDill AFB from potential subversive acts. Entry into this zone is prohibited, unless specifically authorized by the Captain of the Port, Tampa, Florida or his designated representative.

DATES: This regulation is effective at 7 a.m. (EDT) on October 24, 2001 and will remain in effect until 7 a.m. (EST) on January 31, 2002.

ADDRESSES: Comments and material received from the public, as well as documents indicated in this preamble as being available in the docket, are part of [COTP Tampa 01–129] and are available for inspection or copying at Marine Safety Office Tampa, 155 Columbia Drive, Tampa, Florida 33606–3598 between 7:30 a.m. and 3 p.m. Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: LCDR Michael Holland, Coast Guard Marine Safety Office Tampa, at (813) 228–2189 extension 130.

SUPPLEMENTARY INFORMATION:

Regulatory Information

We did not publish a notice of proposed rulemaking (NPRM) for this regulation. Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a NPRM. Publishing a NPRM and delaying its effective date would be contrary to the public interest since immediate action is needed to protect the public, ports and waterways of the United States. The Coast Guard will issue a broadcast notice to mariners and place Coast Guard or other law enforcement vessels in the vicinity of these zones to advise mariners of the restriction.

For the same reasons, under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**.

Background and Purpose

Based on the September 11, 2001, terrorist attacks on the World Trade Center buildings in New York and the Pentagon in Arlington, Virginia, there is an increased risk that subversive activity could be launched by vessels or persons in close proximity to MacDill Air Force Base. This security zone will encompass all waters in the vicinity of MacDill Air Force Base commencing from a point at 27° 50.20′ N/82° 32.14′ W extending 1,000 yards from shore to a point at 27° 49.60′ N/82° 32.14′ W then south-easterly 1,000 yards from shore to a point at 27° 48.90′ N/82° 28.20′ W then circling 1,000 yards from shore to a point at 27° 51.51′ N/82° 28.60′ W then westerly to end at a point at 27° 51.51′ N/82° 29.18′ W. The Coast Guard will issue a broadcast notice to mariners regarding this security zone and what law enforcement vessels will be on-scene enforcing the zone. Entry into this security zone is prohibited, unless specifically authorized by the Captain of the Port, Tampa, Florida or his designated representative.

Regulatory Evaluation

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that order. The Office of Management and Budget has not reviewed it under that order. It is not significant under the regulatory policies and procedures of the Department of Transportation (DOT) (44 FR 11040; February 26, 1979) because this temporary security zone covers a limited area and is only in effect for a limited period of time. Moreover, vessels may be allowed to enter the zone on a case-by-case basis with the permission of the Captain of the Port.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), the Coast Guard considered whether this rule would have a significant economic effect upon a substantial number of small entities. "Small entities" include small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities because small entities may be allowed to enter on a case by case basis with the authorization of the Captain of the Port.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Public Law 104–121), we offer to assist small entities in understanding the rule so that they can better evaluate its effects on them and participate in the rulemaking process. If the rule will affect your small business, organization, or government jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT** for assistance in understanding this rule.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247).

Collection of Information

This rule calls for no new collection of information requirements under the Paperwork Reduction Act (44 U.S.C. 3501–3520).

Federalism

A rule has implication for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive

Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Environmental

The Coast Guard considered the environmental impact of this rule and concluded under Figure 2–1, paragraph 34(g) of Commandant Instruction M16475.1D, this rule is categorically excluded from further environmental documentation.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationships between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or use. We have determined that it is not a "significant energy action" under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. It has not been designated by the Administrator of the Office of Information andRegulatory Affairs as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reports and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165, as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191, 33 CFR 1.05–1(g), 6.04–1, 6.04–6, 6.04–11, 160.5; 49 CFR 1.46.

2. A new temporary § 165.T07–129 is added to read as follows:

§ 165.T07–129 Security Zone; Port of Tampa, Tampa Florida.

(a) *Regulated area.* The Coast Guard is establishing a temporary fixed security zone in all waters in the vicinity of MacDill Air Force Base commencing from a point at 27° 50.20′ N/82° 32.14′ W extending 1,000 yards from shore to a point at 27° 49.60′ N/82° 32.14′ W then south-easterly 1,000 yards from shore to a point at 27° 48.90′ N/82° 28.20′ W then circling 1,000 yards from shore to a point at 27° 51.51′ N/82° 28.60′ W then westerly to end at a point at 27° 51.51′ N/82° 29.18′ W.

(b) *Regulations.* In accordance with the general regulations in § 165.33 of this part, entry into this zone is prohibited except as authorized by the Captain of the Port, or his designated representative. The Captain of the Port will notify the public via Marine Safety Radio Broadcast on VHF Marine Band Radio, Channel 13 and 16 (157.1 MHz).

(c) *Dates.* This section becomes effective at 7 a.m. (EDT) on October 24, 2001 and will remain in effect until 7 a.m. (EST) on January 31, 2002.

Dated: October 23, 2001.

A.L. Thompson, Jr.,

Captain, U. S. Coast Guard, Captain of the Port.

[FR Doc. 01–29885 Filed 11–30–01; 8:45 am]

BILLING CODE 4910–15–U

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 20

RIN 2900–AJ73

Board of Veterans' Appeals: Rules of Practice—Notice of Appeal in Simultaneously Contested Claim

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Board of Veterans' Appeals (Board) adjudicates appeals from denials of claims for veterans' benefits filed with the Department of Veterans Affairs (VA). This document amends a Board Rule of Practice, pertaining to a type of notice given in simultaneously contested claim appeals, to eliminate an inconsistency between that Rule of Practice and an Appeals Regulation and to update a presumption related to communication of the notice.

DATES: Effective Date: January 2, 2002.

FOR FURTHER INFORMATION CONTACT: Steven L. Keller, Senior Deputy Vice Chairman, Board of Veterans' Appeals, Department of Veterans Affairs, 810 Vermont Avenue, NW., Washington, DC 20420 (202–565–5978).

SUPPLEMENTARY INFORMATION: In a document published in the **Federal Register** on October 1, 1999 (64 FR 53302), we proposed to amend the Board's Rules of Practice to reconcile conflicting regulatory requirements in 38 CFR 19.102 and 38 CFR 20.502 concerning the information provided to other parties to a contested claim about the appeal of a contesting party. We also proposed to change a presumption concerning the date of furnishing this information .

The only comment that we received raised an objection concerning the presumption. As proposed, the rule would provide a presumption that information about the content of one contesting party's Substantive Appeal was furnished to other contesting parties on the date of the letter from VA that accompanies the information. The date the information is furnished is important because it begins a statutory 30-day time limit for filing a brief or argument in response to a Substantive Appeal.

A national veterans' service organization recommended that the time limit for filing the response begin to run on the date of mailing the information, stating that the "proposed rule does not take into consideration the time delay of placing mail within the internal mail system of the Department." In the alternative, the organization suggested that the rule require that the information and letter be placed "directly into the U.S. mail system."

The presumption in this rule has been based on the date of the letter for a number of years and the proposed rule would not change that. It merely would establish the presumption that the information was furnished on the date of the letter, as opposed to the previous presumption that the information was mailed on the date of the letter. The change was proposed specifically to remove the presumption's tie to mailing, inasmuch as the means of communication is not limited to mailing by regulation or statute. The applicable statute, 38 U.S.C. 7105A, merely requires that notice of the substance of the appeal be "communicated to the other party or parties in interest" by

"forward[ing] to the last known address of record." VA does not believe that it is prudent to unduly limit flexibility by foreclosing every means of communication other than mailing, as would result from adoption of the commenter's suggestion.

Presumptions are useful because they serve to establish critical facts when there is no contrary evidence. VA considers the proposed presumption "rebuttable." If the information is furnished by mail and the date of the letter and the date of mailing do not actually match in a particular case, a party may easily rebut the presumption by submitting a copy of the postmarked envelope. The presumption may be rebutted in other cases by other appropriate evidence, depending on the means by which the information was furnished.

For the reasons stated in this document and in the preamble to the proposed rule, VA is adopting the rule as proposed, except for a nonsubstantive grammatical change.

Regulatory Flexibility Act

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This rule may affect individual claimants for VA benefits and will not affect small businesses. Therefore, pursuant to 5 U.S.C. 605(b), this final rule is exempt from the initial and final regulatory flexibility analyses requirement of sections 603 and 604.

Paperwork Reduction Act

This document contains no provisions constituting a collection of information under the Paperwork Reduction Act (44 U.S.C. 3501–3520).

Unfunded Mandates

The Unfunded Mandates Reform Act requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before developing any rule that may result in an expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of $100 million or more in any given year. This rule would have no consequential effect on State, local, or tribal governments.

List of Subjects in 38 CFR Part 20

Administrative practice and procedure, Claims, Lawyers, Legal services, Veterans.

Approved: November 26, 2001.

Anthony J. Principi,

Secretary of Veterans Affairs.

For the reasons set out in the preamble, amend 38 CFR part 20 as follows:

PART 20—BOARD OF VETERANS' APPEALS: RULES OF PRACTICE

1. The authority citation for part 20 continues to read as follows:

Authority: 38 U.S.C. 501(a) and as noted in specific sections.

2. Revise § 20.502 to read as follows:

§ 20.502 Rule 502. Time limit for response to appeal by another contesting party in a simultaneously contested claim.

A party to a simultaneously contested claim may file a brief or argument in answer to a Substantive Appeal filed by another contesting party. Any such brief or argument must be filed with the agency of original jurisdiction within 30 days from the date the content of the Substantive Appeal is furnished as provided in § 19.102 of this chapter. Such content will be presumed to have been furnished on the date of the letter that accompanies the content.

(Authority: 38 U.S.C. 7105A(b))

Correction to the Hazardous Waste Identification Rule (HWIR): Revisions to the Mixture and Derived-from Rules: Delay of Effective Date; Reopening of Comment Period

ACTION: Delay of effective date and reopening of comment period.

SUMMARY: EPA issued a direct final rule in the **Federal Register** on October 3, 2001 at 66 FR 50332 entitled *Correction to the Hazardous Waste Identification Rule (HWIR): Revisions to the Mixture and Derived-from Rules; Direct Final Rule.* During and after the comment period for that direct final rule, U.S. mail delivery to EPA's dockets was delayed due to concerns about possible contamination. This document delays the effective date of that direct final rule and reopens the comment period for thirty days to assure that EPA receives any comments that were mailed during the comment period but were not received by EPA by the end of the comment period. EPA is requesting that anyone who submitted comments during the previous comment period resubmit those comments as described below.

DATES: This action is made on December 3, 2001. The effective date of the Correction to the Hazardous Waste Identification Rule, amending 40 CFR 261.3 published in the **Federal Register** on October 3, 2001 at 66 FR 50332, is delayed for 60 days, from December 3, 2001 to a new effective date of February 1, 2002. That direct final rule will be effective on February 1, 2002 unless EPA receives adverse comment by January 2, 2002.

ADDRESSES: Please send an original and two copies of your comments referencing Docket number F–2001–WH3P–FFFFF to (1) if using regular U.S. Postal Service mail: RCRA Docket Information Center, Office of Solid Waste (5305W), U.S. Environmental Protection Agency Headquarters (EPA, HQ), 1200 Pennsylvania Avenue, NW., Washington, DC 20460–0002, or (2) if delivering in person, or using special delivery, such as overnight express service: RCRA Docket Information Center (RIC), Crystal Gateway One, 1235 Jefferson Davis Highway, First Floor, Arlington, Virginia 22202. Because of possible mail delays in the Washington DC area, please send a separate copy of each public comment either (1) via Internet email to *rcra-docket@epamail.epa.gov*, or (2) to David M. Friedman, U.S. EPA Region 3, Mail Code 3WC11, 1650 Arch Street, Philadelphia, PA 19103–2029. If sending comments via email, please make sure this electronic copy is in an ASCII format that doesn't use special characters or encryption. Cite the docket Number F–2001–WH3P–FFFFF in your electronic file.

The RCRA Information Center is located at Crystal Gateway One, 1235 Jefferson Davis Highway, First Floor, Arlington Virginia. If you would like to look at and copy supporting information for RCRA rules, please make an appointment with the RCRA Information Center by calling (703) 603–9230. Docket hours are from 9:00 A.M. to 4:00 P.M. Monday through Friday, except for Federal holidays. You may copy up to 100 pages from any regulatory document at no cost. Additional copies cost $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Call Center at (800) 424–9346 or TDD (800) 553–7672 (hearing impaired). In the Washington, DC, metropolitan area,

call (703) 412–9810 or TDD (703) 412–3323.

For more detailed information on specific aspects of this rulemaking, contact Tracy Atagi, Office of Solid Waste 5304W, U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue, NW., Washington, DC 20460–0002, 703–308–8672, *atagi.tracy@epa.gov*.

SUPPLEMENTARY INFORMATION: On October 3, 2001, EPA published in the **Federal Register** at 66 FR 50332 a direct final rule taking final action on two clarifying revisions to the mixture rule. The first revision reinserts certain exemptions to the mixture rule which were inadvertently deleted. The second revision clarifies that mixtures consisting of certain excluded wastes (commonly referred to as Bevill wastes) and listed hazardous wastes that have been listed solely for the characteristic of ignitability, corrosivity, and/or reactivity, are exempt once the characteristic for which the hazardous waste was listed has been removed.

EPA also published a separate document at 66 FR50379 (October 3, 2001) to serve as the proposal to *Correction to the Hazardous Waste Identification Rule (HWIR): Revisions to the Mixture and Derived-from Rules* if adverse comments were filed. The rule was scheduled to become effective on December 3, 2001 unless EPA received adverse comment by November 2, 2001. However, during and after the comment period for that rule, U.S. mail delivery to all EPA Headquarters offices in Washington, DC and Northern Virginia, including EPA's dockets, was delayed due to concerns about possible contamination. Because of the unexpected and unprecedented nature of this U.S. mail delay and the resulting uncertainty about whether EPA may have received any comments that were sent by U.S. mail, EPA believes that it is in the public interest to temporarily delay the effective date of that direct final rule for sixty days. The purpose of delaying the effective date is to reopen the comment period for thirty days to assure that EPA receives any comments that were submitted by U.S. mail during the comment period but were delayed due to U.S. mail delays.

EPA expects that all delayed mail will be delivered by the end of this thirty-day period. However, to assure that EPA receives the comments, anyone who submitted comments during the comment period for *Correction to the Hazardous Waste Identification Rule (HWIR): Revisions to the Mixture and Derived-from Rules* should resubmit those comments in accordance with the directions in the **ADDRESSES** section of this notice. If EPA receives adverse comment on the direct final rule, EPA will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. EPA will address all public comments in a subsequent final rule based on the proposed rule.

To the extent that this action is subject to 5 U.S.C. 553, EPA's implementation of this action without opportunity for public comment, effective immediately upon publication today in the **Federal Register**, is based on the good cause exceptions in 5 U.S.C. 553(b)(B) and 553(d)(3). Seeking public comment is impracticable and unnecessary in light of the imminent effective date and the extraordinary nature of the delays which affected all U.S. mail directed to EPA Headquarters offices. A brief extension of the effective date is in the public interest because it will assure that all comments are received and that interested parties are not disadvantaged by these unique circumstances.

Under Executive Order 12866 (58 FR 51735, October 4, 1993), this action is not a "significant regulatory action" and is therefore not subject to review by the Office of Management and Budget and is not subject to Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 18355, May 22, 2001). In addition, this action does not impose any enforceable duty, contain any unfunded mandate, or impose any significant or unique impact on small governments as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4). This action also does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes, as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), nor will it have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132 (64 FR 43255, August 10, 1999), because it does not alter the relationship or the distribution of power and responsibilities established by applicable statute. Because this action is not subject to notice-and-comment requirements under the Administrative Procedure Act or any other statute, it is not subject to the regulatory flexibility provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). This action also is not subject to Executive Order 13045 (62 FR 19885, April 23, 1997) because EPA interprets Executive Order 13045 as applying only to those regulatory actions that are based on health or safety risks, such that the analysis required under section 5–501 of the Order has the potential to influence the regulation. This action is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks. Because this action does not involve technical standards, EPA did not consider the use of any voluntary consensus standards under the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note). This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

RIN 0938–AL29

Medicare and Medicaid Programs; Physicians' Referrals to Health Care Entities With Which They Have Financial Relationships: Partial Delay of Effective Date

AGENCY: Centers for Medicare & Medicaid Services (CMS), DHHS.

ACTION: Interim final rule with comment period; partial delay in effective date.

SUMMARY: This interim final rule with comment period delays for 1 year the effective date of the last sentence of 42 CFR 411.354(d)(1). Section 411.354(d)(1) was promulgated in the final rule entitled "Medicare and Medicaid Programs; Physicians' Referrals to Health Care Entities With Which They Have Financial Relationships," published in the **Federal Register** on January 4, 2001 (66

FR 856). A 1-year delay in the effective date of the last sentence in § 411.354(d)(1) will give Department officials the opportunity to reconsider the definition of compensation that is "set in advance" as it relates to percentage compensation methodologies in order to avoid unnecessarily disrupting existing contractual arrangements for physician services. Accordingly, the last sentence of § 411.354(d)(1), which would have become effective January 4, 2002, will not become effective until January 6, 2003.

DATES: *Effective date:* The effective date of the last sentence in § 411.354(d)(1) of the final rule published in the **Federal Register** on January 4, 2001 (66 FR 856), is delayed for 1 year, from January 4, 2002 until January 6, 2003.

Comment date: Comments on the length of the delay of the effective date of the last sentence in § 411.354(d)(1) of the January 4, 2001 final rule will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on February 1, 2002.

ADDRESSES: In commenting, please refer to file code CMS–1809–IFC. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

Mail written comments (one original and three copies) to the following address ONLY:

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1809–IFC, P.O. Box 8013, Baltimore, MD 21244–8013.

Please allow sufficient time for mailed comments to be timely received in the event of delivery delays.

If you prefer, you may deliver (by hand or courier) your written comments (one original and three copies) to one of the following addresses:

Room 443–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW., Washington, DC 20201, or

Room C5–14–03, 7500 Security Boulevard, Baltimore, MD 21244–1850.

(Because access to the interior of the HHH Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for commenters wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and could be considered late. For information on viewing public comments, see the beginning of the **SUPPLEMENTARY INFORMATION** section.

FOR FURTHER INFORMATION CONTACT: Joanne Sinsheimer, (410) 786–4620.

SUPPLEMENTARY INFORMATION:

Copies: This **Federal Register** document is available from the **Federal Register** online database through *GPO Access*, a service of the U.S. Government Printing Office. The Web site address is: *http://www.access.gpo.gov/nara/index.html.*

In addition, the information in this interim final rule with comment period will be available soon after publication in the **Federal Register** on our MEDLEARN Web site: *www.hcfa.gov/medlearn/refphys.htm.*

I. Background

The final rule, entitled "Medicare and Medicaid Programs; Physicians' Referrals to Health Care Entities With Which They Have Financial Relationships," published in the **Federal Register** on January 4, 2001 (66 FR 856), interpreted certain provisions of section 1877 of the Social Security Act (the Act). Under section 1877, if a physician or a member of a physician's immediate family has a financial relationship with a health care entity, the physician may not make referrals to that entity for the furnishing of designated health services (DHS) under the Medicare program, and the entity may not bill for the services, unless an exception applies. Many of the statutory and new regulatory exceptions that apply to compensation relationships require that the amount of compensation be "set in advance." Section 411.354(d)(1) of the final rule defines the term "set in advance."

The last sentence of § 411.354(d)(1) reads: "Percentage compensation arrangements do not constitute compensation that is 'set in advance' in which the percentage compensation is based on fluctuating or indeterminate measures or in which the arrangement results in the seller receiving different payment amounts for the same service from the same purchaser." Many of the comments we received regarding the January 4, 2001 physician self-referral final rule indicated that physicians are commonly paid for their professional services using a formula that takes into account a percentage of a fluctuating or indeterminate measure (for example, revenues billed or collected for physician services). According to the commenters, this compensation methodology is frequently used by hospitals, physician group practices, academic medical centers, and medical foundations. Several commenters pointed out that this aspect of the final rule, which is applicable to academic medical centers and medical foundations (among others), is inconsistent with the compensation methods permitted under the statute for many physician group practices and employed physicians (that is, neither section 1877(h)(4)(B)(i) of the Act nor section 1877(e)(2) of the Act contains the "set in advance" requirement). We understand that hospitals, academic medical centers, medical foundations and other health care entities would have to restructure or renegotiate thousands of physician contracts to comply with the language in § 411.354(d)(1) regarding percentage compensation arrangements.

II. Provisions of This Interim Final Rule With Comment Period

To avoid any unnecessary disruption to existing contractual arrangements while we consider modifying this provision, we are postponing for 1 year the effective date of the last sentence of § 411.354(d)(1). This delay should afford us enough time to reconsider the matter and to publish further guidance on the issue. In the meantime, compensation that is required to be "set in advance" for purposes of compliance with section 1877 of the Act may continue to be based on percentage compensation methodologies, including those in which the compensation is based on a percentage of a fluctuating or indeterminate measure. We note that the remaining provisions of § 411.354(d)(1) will still apply and that all other requirements of exceptions must be satisfied (including, for example, the fair market value and "volume and value" requirements).

III. Waiver of Proposed Rulemaking

We ordinarily publish a notice of proposed rulemaking and invite public comment on the proposed rule. This procedure can be waived, however, if an agency finds good cause that the notice and comment rulemaking procedure is impracticable, unnecessary, or contrary to the public interest and if the agency incorporates in the rule a statement of such a finding and the reasons supporting that finding.

Our implementation of this action without opportunity for public comment is based on the good cause exceptions in 5 U.S.C. 553(b)(B). We find that seeking public comment on this action is impracticable, unnecessary, and contrary to the public interest. We are implementing this delay

of effective date as a result of our review of the public comments that we received on the January 4, 2001 physician self-referral final rule. As discussed above, we understand from those comments that, unless we delay the effective date of the last sentence of § 411.354(d)(1), hospitals, academic medical centers, and other entities will have to renegotiate numerous contracts for physician services, potentially causing significant disruption within the health care industry. We are concerned that the disruption could unnecessarily inconvenience Medicare beneficiaries or interfere with their medical care and treatment. Accordingly, we do not believe that it is in the public interest to offer yet another opportunity for public comment on essentially the same issue in the limited context of whether to delay this sentence of the regulation. In addition, given the imminence of the January 4, 2002 effective date, we find that seeking public comment on this delay in effective date would be impracticable because it would generate uncertainty regarding an imminent effective date. This uncertainty could cause health care providers to renegotiate thousands of contracts with physicians in an effort to comply with the regulation by January 4, 2002 if the proposed delay is not finalized until after the opportunity for public comment. Thus, providing the opportunity for public comment could result in the very disruption that this delay of effective date is intended to avoid.

BILLING CODE 6712–01–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. NHTSA–98–4515; Notice 4]

RIN 2127–AI57

Federal Motor Vehicle Safety Standards

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Response to petitions for reconsideration; final rule.

SUMMARY: This document responds to petitions for reconsideration of the Federal motor vehicle safety standard that addresses occupant crash safety issues exclusive to electric vehicles: electrolyte spillage and electrical shock protection. We are making clarifying amendments regarding the application of the standard, and regarding the test conditions for battery state of charge and electrical isolation. We are denying a petition to specify an alternative performance requirement for electrical isolation.

DATES: The final rule is effective December 1, 2001.

FOR FURTHER INFORMATION CONTACT: For non-legal issues, contact Charles Hott, Office of Safety Performance Standards, NHTSA (202–366–0427). For legal issues, contact Taylor Vinson, Office of Chief Counsel, NHTSA (202–366–5263).

SUPPLEMENTARY INFORMATION: On September 27, 2000, the agency published a final rule establishing Federal Motor Vehicle Safety Standard No. 305 "Electric-powered vehicles: Electrolyte spillage and electrical shock protection" (65 FR 57980), effective October 1, 2001. On February 8, 2001, the effective date was delayed to December 1, 2001 (66 FR 9533).

Standard No. 305 applies to all electric vehicles (EVs) (except those covered by FMVSS No. 500 "Low-Speed Vehicles") that have a propulsion power source greater than 48 volts and a gross vehicle weight rating (GVWR) of 4536 kg (10,000 lbs) or less. The final rule was based on the Society of Automotive Engineers (SAE) J1766 "Recommended Practice for Electric and Hybrid Electric Vehicle Battery Systems Crash Integrity Testing." The final rule contains provisions similar to those in the SAE recommended practice, with only those changes that were necessary to accommodate the regulatory text.

Standard No. 305 establishes performance criteria that must be met when an EV is subjected to the frontal impact test procedures of Standard No. 208 (including the 30-degree oblique impact test), the side impact test procedures of Standard No. 214, and the rear impact test procedure of Standard No. 301. No spillage of electrolyte into the occupant compartment is permitted. Electrolyte spillage outside the passenger compartment is limited to 5 liters for the 30-minute period after vehicle motion ceases, and throughout the post-crash rollover test. Battery modules must stay restrained in the vehicle without any component intruding into the occupant compartment. Electrical isolation between the chassis and high voltage system must be at least 500 ohms per nominal volt as determined by the SAE test procedure.

Petitions for Reconsideration

We received two petitions for reconsideration of Standard No. 305, one from General Motors Corporation (GM) and another from DaimlerChrysler Corporation (DC).

1. Petition Pertaining to S3, Application

GM believes that a change in the regulatory text of S3 Application is

needed to clarify the application of the standard. GM argued that the discussion in the preamble of the September 27, 2000 final rule indicates that the reference to "48V" in S3 is intended to mean "48V nominal" voltage rating. It noted that the preamble repeatedly refers to "nominal voltage" in explaining the agency's selection of 48V as the application breakpoint. GM explained that the practical necessity of this change stems in part from the emergence of 42 volt nominal voltage as the likely industry standard for automotive battery systems. Just as today's automotive batteries have a nominal voltage rating of 12V and an operating voltage that can be close to 14V, the emerging 42V nominal systems may have peak operating voltages that slightly exceed the 48V breakpoint specified in Standard No. 305. GM argued that the standard should be amended to clarify that Standard No. 305 is not intended to apply to these 42V battery systems, including 42V battery systems used to supplement propulsion power.

GM is correct that the 48 volts referred to in S3 is intended to be nominal voltage. As we stated in the preamble to the final rule, this breakpoint voltage was determined from SAE J1673, "High Voltage Automotive Wiring Assembly Design;" SAE J1797, "Packaging of Electric Vehicle Battery Modules;" and SAE Information Report 52232, "Vehicle System Voltage—Initial Recommendations." All refer to nominal voltages. We agree with GM that the application section of Standard No. 305 should be modified to clearly state that the voltage specified is nominal voltage. Accordingly, we are granting GM's petition and amending S3 to add the word "nominal" after the words "48 volts."

2. Petition Pertaining to S7.1, Battery State of Charge

Paragraph S7.1 of Standard No. 305 specifies the state of charge of the batteries at the time of compliance testing. S7.1 specifies that the state-of-charge of the propulsion battery pack is at the maximum level recommended by the manufacturer, or at a level not less than 95 percent of the maximum capacity of the battery pack if the manufacturer does not provide a written recommendation. GM commented that, for certain vehicles, neither of these options is appropriate. GM asserted that hybrid EVs are being designed so that the propulsion battery pack is recharged exclusively by another onboard energy source, instead of by off-vehicle sources as surmised by the options in S7.1. Thus, there are no provisions to connect these hybrid EVs to an electrical charging port. GM stated that since vehicle owners will not have any means to charge directly the propulsion battery pack, there is no reason for the manufacturer to recommend a charging procedure or state-of-charge level in the operator's manual. GM further stated that the propulsion battery pack in these hybrid EVs is likely to be designed to operate within a state-of-charge range that is below 95 percent of the maximum capacity of the battery pack in order to maximize battery life.

We agree with GM's comment. Hybrid EVs already produced by Toyota and Honda do not contain any provision for charging the battery pack externally, and currently operate at a capacity of less than 95 percent. Accordingly, we are granting GM's petition, and amending S7.1 to specify that, in the case of a vehicle whose batteries are rechargeable only by an energy source on the vehicle, the battery state of charge for testing is "any state of charge within the normal operating voltage, as defined by the vehicle manufacturer."

3. Petition Pertaining to S7.6.1, Electrical Isolation Test Procedure

Paragraph S7.6.1 of Standard No. 305 specifies the procedures for the electrical isolation test. S7.6.1 specifies that, if a vehicle "utilizes an automatic disconnect between the propulsion battery system and the traction system, the electrical isolation measurement after the impact is made from the battery side of the automatic disconnect to the vehicle chassis." DC currently designs an automatic disconnect that is located entirely inside the battery container, and therefore, inaccessible to any measurement of electrical isolation without removal of the battery. DC stated that the intent of this design is to better confine the voltage to the inside of the battery compartment in an impact. DC argued that, in order to avoid being design restrictive, the measurement for electrical isolation should be made using a method that parallels SAE J1766.

GM provided supplemental information to support DC's petition, arguing that the present provision for measuring the voltage from the battery side of any contactors is overly design restrictive. GM reminded us that, in its response to the Notice of Proposed Rulemaking (NPRM) on Standard No. 305, it recommended that the agency clarify the measurement location in the regulatory text, and that Standard No. 305 contains the language GM suggested. GM now agrees with DC that Standard No. 305 should allow for the isolation measurement to be made from the traction side of the automatic disconnect in designs in which the disconnect is located inside the battery pack. GM stated that, like DC, it also has designs with an automatic disconnect that is located entirely inside the battery container, and that the intent of its design is also to better confine the voltage to the inside of the battery compartment after an impact.

GM related that it and other vehicle manufacturers have been marketing inherently safe battery-powered EVs since 1996. With respect to electrical safety, GM has designed its EV1 and S10 EVs in accordance with SAE J1766. The design strategy used has been to isolate the propulsion battery high voltage from the accessible areas of the vehicle if the system is compromised (e.g., loss of electric isolation, loss of interlock pilot line, loss of ground reference, etc.). According to GM, this approach of containing high voltage to the vehicle battery pack has been demonstrated in validation testing, and has been successful in the field.

GM argued that, by requiring the electrical isolation measurements to be made on the battery side of the contactors following the impact tests, it is probable that electrically-safe EVs would not comply with Standard No. 305 as presently written. In GM's view, it is possible that a side impact test could result in contact between the vehicle structure and one of the battery terminals. The automatic disconnect would immediately detect this condition and open the high voltage contactors (which are located inside the battery pack), removing all high voltage from the accessible areas of the vehicle. Although the high voltage is now referenced to the vehicle chassis ground, there is no accessibility to high voltage, and therefore no electric shock hazard.

Nevertheless, the present language of Standard No. 305 would prohibit this design. GM stated that its EVs' high voltage bus is designed to be electrically isolated from the vehicle chassis ground, primarily to add a level of fault tolerance to the electrical safety system (a "bus," in electrical terms, is a location in an electrical system used to distribute electrical voltage/power). By itself, a loss of electrical isolation between a point on the high voltage bus and vehicle chassis ground is not an electrical safety hazard. If the loss of electrical isolation occurs, the high-voltage bus is purposely referenced to vehicle chassis ground. GM further stated that, with a chassis-referenced high-voltage bus, it would take at least one failure (access to the other side of the high voltage) to become an electric

safety hazard. With an isolated high voltage bus, which is the EV original equipment manufacturers' design standard in the U.S., at least two failures (access to two separate areas of the high voltage bus) are needed to create a possible electric safety hazard.

GM further argued that, in the event that electrical isolation is lost during a vehicle crash, containing the high voltage to the inaccessible battery pack has been demonstrated to be an effective method for ensuring EV safety.

GM believes that to ensure that there is no loss of electrical isolation during a vehicle impact, sufficient crush space must be provided. In frontal collisions, with batteries that are located away from the accessible underhood area of the vehicle, there is typically sufficient crush space to reduce chassis structural impingement into the battery module area. However, in side or rear collisions, depending on the location of the battery modules, there may be less crush space available. GM argued that, in smaller, lower mass vehicles, the problem of maintaining adequate crush space for preventing loss of electrical isolation, while meeting the manufacturer's driving range goals, becomes increasingly difficult. In its opinion, the present language of Standard No. 305 would require a reduction in the amount of energy storage on the vehicle, thus reducing its available range. GM related that most of the automotive manufacturers are considering the smaller, "city cars" as part of their EV product portfolio. If the electrical isolation measurements are made on the battery side of the contactors, there would be a reduction in range performance to achieve compliance with Standard No. 305. This reduction in range would essentially render "city cars" not viable.

To address these concerns, GM recommended that S5.3 and S7.6.1 be revised to read as follows:

S5.3 Electrical Isolation. Electrical isolation between the battery system and the vehicle electricity-conducting structure after each test must be not less than 500 ohms/volt. Alternatively, if the vehicle utilizes an automatic disconnect between the propulsion battery system and the traction system that is physically contained within the battery pack system, the measured voltage after each test must be less than or equal to 30 volts.

and

S7.6.1 Prior to any barrier test, the propulsion battery system is connected to the vehicle's propulsion system, and the vehicle ignition is in the "on" (traction (propulsion) system energized) position. If the vehicle utilizes an automatic disconnect between the propulsion battery system and the traction system that is physically contained within the battery pack system, the electrical isolation measurement after the impact is made from the traction side of the automatic disconnect to the vehicle chassis. If the vehicle utilizes an automatic disconnect that is not physically contained within the battery pack system, the electrical isolation measurement after the impact is made from the battery side of the automatic disconnect to the vehicle chassis.

GM argued that the proposed modification of S7.6.1 to specify electrical isolation measurement from the traction side of the battery will meet the need of motor vehicle safety by safeguarding against electric shock hazards in EVs and would still be consistent with SAE J1766. In addition, it would be consistent with the test protocol that the agency validated in May 1998 in the 35 mph frontal crash test of an EV1.

DC's design with the automatic disconnect located inside the battery pack is similar to the design tested on GM's EV1. We agree with DC's and GM's assertions that this requirement, based on GM's comments to the NPRM, may now be overly design restrictive. In fact, NHTSA's own testing of EVs to date has measured electrical isolation from the traction side of the contactors. We believe that SAE J1766 is somewhat vague as to where the measurement should be taken. We agree with GM that a loss of electrical isolation between a point on the high voltage bus and the vehicle chassis ground is not an electrical safety hazard. Further, we do not believe that there would be any detriment to safety from taking the measurements on the traction side of the contactors, provided that the contactors are located inside the battery pack of the vehicle. We note that the same is not true if the contactors are located outside the battery pack. In that instance, there is an increased risk of someone coming in contact with high voltage caused by chaffed wires leading to the contactors if the isolation switch is located outside the battery pack. In that configuration, the measurement should be taken from the battery side of the contactors.

We are granting DC's and GM's petitions, and are amending S7.6.1 to add at the end of the existing text:

If the vehicle utilizes an automatic disconnect that is not physically contained within the battery pack system, the electrical isolation measurement after the impact is made from the battery side of the automatic disconnect to the vehicle chassis.

As noted earlier, GM also recommended changing S5.3, the electrical isolation requirement, to state that, for EVs which have an automatic disconnect located entirely in the battery pack, a voltage measurement of more than 30 volts would be required to perform the electrical isolation test. GM did not provide any rationale for why it sought this change. The GM recommendation would specify a minimum voltage above which the electrical isolation test procedure would be performed. We do not believe that specifying a minimum voltage to perform the electrical isolation test will add any safety benefit that is not already provided for in the standard. The standard now requires electrical isolation of 500 ohms/volt. This establishes an exposure of 0.002 ampere, which is at the threshold of sensation and well below a level of physiological concern. The GM recommendation would not change this exposure. In fact, if there is any voltage, the standard requires that the isolation test be performed. The GM recommendation would unnecessarily restrict the voltage over which the electrical isolation test could be conducted. Further, the GM recommendation would add requirements to the standard that need to be the subject of public notice and comment before they can be adopted. For the reasons discussed above, we see no justification at this time for requiring a change in S5.3 to specify a minimum voltage to perform the isolation test. Accordingly, we are denying this aspect of GM's petition for reconsideration of Standard No. 305.

Standard No. 305 is effective December 1, 2001. We have concluded that the minor amendments to Standard No. 305 effected by this notice should also be effective December 1, 2001, rather than 180 days after issuance of this notice. It is in the public interest to make the amendments effective on that date because they will facilitate compliance by manufacturers of EVs.

Rulemaking Analyses

Executive Order 12866 and DOT Regulatory Policies and Procedures

This document was not reviewed under Executive Order 12866. It has been determined that the rulemaking action is not significant under Department of Transportation regulatory policies and procedures. In promulgating the final rule in September 2000, we discussed at some length the impact of that final rule, and concluded that the impacts of that rule were so minimal as not to warrant preparation of a full regulatory evaluation. Today's final rule merely clarifies that earlier final rule.

Regulatory Flexibility Act

We have also considered the impacts of this rulemaking action in relation to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.* I certify that this rulemaking action does not have a significant economic impact upon a substantial number of small entities.

The following is our statement providing the factual basis for the certification (5 U.S.C. 605(b)). This final rule merely clarifies the original final rule. When we analyzed the original final rule for the purposes of the Regulatory Flexibility Act, we concluded that the overall economic impact was not considered to be significant, and, accordingly, no regulatory flexibility analysis was prepared.

Executive Order 13132 (Federalism)

Executive Order 13132 on "Federalism" requires us to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'" The E.O. defines this phrase to include regulations "that have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

This final rule, which regulates the manufacture of certain motor vehicles, will not have substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in E.O. 13132. As noted above, it merely clarifies an earlier final rule.

National Environmental Policy Act

We have analyzed this rulemaking action for purposes of the National Environmental Policy Act. The rulemaking action will not have a significant effect upon the environment as it does not affect the present method of manufacturing electric vehicles.

Civil Justice Reform

This rule will not have any retroactive effect. Under 49 U.S.C. 30103(b)(1), whenever a Federal motor vehicle safety standard is in effect, a state may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard. Section 30161 sets forth a procedure for judicial review of final rules establishing, amending, or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration or other administrative proceedings before parties may file suit in court.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) requires agencies to prepare a written assessment of the cost, benefits and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of more than $100 million annually. Because this rule will not have a $100 million effect, we have not prepared an Unfunded Mandates assessment.

National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act (the Act) requires agencies to evaluate and use existing voluntary consensus standards in its regulatory activities unless doing so would be inconsistent with applicable law (e.g., the statutory provisions regarding our vehicle safety authority) or otherwise impractical. In meeting that requirement, we are required to consult with voluntary, private sector, consensus standards bodies. Examples of organizations generally regarded as voluntary consensus standards bodies include the American Society for Testing and Materials (ASTM), the Society of Automotive Engineers (SAE), and the American National Standards Institute (ANSI). If we do not use available and potentially applicable voluntary consensus standards, we are required by the Act to provide Congress, through OMB, an explanation for not using such standards.

As we have explained in the preamble, this final rule is based upon SAE J1766 FEB96 "Recommended Practice for Electric and Hybrid Electric Vehicle Battery Systems Crash Integrity Testing," and is substantially similar to it in its specifications for prohibition of electrolyte spillage in front, side, and rear impacts, and battery retention during such impacts, and electrical isolation.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles, Reporting and recordkeeping requirements.

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

In consideration of the foregoing, 49 CFR part 571 is amended as follows:

1. The authority citation for part 571 continues to read as follows:

Authority: 49 U.S.C. 322, 30111, 30115, 30166; delegation of authority at 49 CFR 1.50.

2. In § 571.305, paragraphs S3, S7.1, and S7.6.1 are revised to read as follows:

§ 571.305 Standard No. 305; Electric-powered vehicles: electrolyte spillage and electrical shock protection.

* * * * *

S3 *Application.* This standard applies to passenger cars, and to multipurpose passenger vehicles, trucks and buses with a GVWR of 4536 kg or less, that use more than 48 nominal volts of electricity as propulsion power and whose speed attainable in 1.6 km on a paved level surface is more than 40 km/h.

* * * * *

S7.1 *Battery state of charge.* The battery system is at the level specified in the following paragraph (a), (b), or (c), as appropriate:

(a) At the maximum state of charge recommended by the manufacturer, as stated in the vehicle operator's manual or on a label that is permanently affixed to the vehicle;

(b) If the manufacturer has made no recommendation, at a state of charge of not less than 95 percent of the maximum capacity of the battery system; or

(c) If the batteries are rechargeable only by an energy source on the vehicle, at any state of charge within the normal operating voltage, as defined by the vehicle manufacturer.

* * * * *

S7.6.1 Prior to any barrier impact test, the propulsion battery system is connected to the vehicle's propulsion system, and the vehicle ignition is in the "on" (traction (propulsion) system energized) position. If the vehicle utilizes an automatic disconnect between the propulsion battery system and the traction system that is physically contained within the battery pack system, the electrical isolation measurement after the impact is made from the traction side of the automatic disconnect to the vehicle chassis. If the vehicle utilizes an automatic disconnect that is not physically contained within the battery pack system, the electrical isolation measurement after the impact is made from the battery side of the automatic disconnect to the vehicle chassis.

* * * * *

Issued on: November 27, 2001.

Jeffrey W. Runge,

Administrator.

[FR Doc. 01–29901 Filed 11–30–01; 8:45 am]

BILLING CODE 4910–60–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[I.D. 112701B]

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Reopening of the Commercial Red Snapper Component

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Announcement of a reopening of a fishery.

SUMMARY: NMFS announces that the closed commercial fishery for red snapper in the exclusive economic zone (EEZ) of the Gulf of Mexico will reopen. Reopening of the fishery is necessary because the 2001 annual quota for red snapper has not been reached.

DATES: The commercial fishery for red snapper will reopen at noon, local time, December 1, 2001, and will close at noon, local time, December 3, 2001. The fishery will remain closed until noon, local time, on February 1, 2002.

FOR FURTHER INFORMATION CONTACT: Phil Steele, telephone 727-570-5305, fax 727-570-5583, e-mail Phil.Steele@noaa.gov.

SUPPLEMENTARY INFORMATION: The reef fish fishery of the Gulf of Mexico is managed under the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP). The FMP was prepared by the Gulf of Mexico Fishery Management Council and is implemented under the authority of the Magnuson-Stevens Fishery Conservation and Management Act by regulations at 50 CFR part 622. Those regulations set the commercial quota for red snapper in the Gulf of Mexico at 4.65 million lb (2.11 million kg) for the current fishing year, January 1 through December 31, 2001. The red snapper commercial fishing season is split into two time periods, the first commencing at noon on February 1 with two-thirds of the annual quota (3.10 million lb (1.41 million kg)) available, and the second commencing at noon on October 1 with the remainder of the annual quota available. During the commercial season, the red snapper commercial fishery opens at noon on the first of each month and closes at noon on the 10th of each month, until the applicable commercial quotas are reached. The fall season was originally scheduled to be closed at noon, local time, on November 10, 2001, when NMFS projected the fall quota would be reached. However, inclement weather during the November 1-10 opening limited fishing activities for red snapper in some areas of the Gulf and, therefore, the fall quota was not reached.

Under 50 CFR 622.43(a), NMFS is required to close the commercial fishery for a species or species group when the quota for that species or species group is reached, or is projected to be reached, by filing a notification to that effect in the **Federal Register**. Based on current statistics, NMFS has determined that the available commercial quota of 4.65 million lb (2.11 million kg) for red snapper will be reached when the fishery closes at noon on December 3, 2001. Accordingly, the commercial fishery in the EEZ in the Gulf of Mexico for red snapper will remain closed until noon, local time, on February 1, 2002. The operator of a vessel with a valid reef fish permit having red snapper aboard must have landed and bartered, traded, or sold such red snapper prior to noon, local time, December 3, 2001.

During the closure, the bag and possession limits specified in 50 CFR 622.39(b) apply to all harvest or possession of red snapper in or from the EEZ in the Gulf of Mexico, and the sale or purchase of red snapper taken from the EEZ is prohibited. In addition, the bag and possession limits for red snapper apply on board a vessel for which a commercial permit for Gulf reef fish has been issued, without regard to where such red snapper were harvested. However, the bag and possession limits for red snapper apply only when the recreational quota for red snapper has not been reached and the bag and possession limit has not been reduced to zero. The prohibition on sale or purchase does not apply to sale or purchase of red snapper that were harvested, landed ashore, and sold prior to noon, local time, December 3, 2001, and were held in cold storage by a dealer or processor.

Classification

This action is taken under 50 CFR 622.43(a) and is exempt from review under Executive Order 12866.

Dated: November 28, 2001.

Jonathan M. Kurland,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–S

Proposed Rules

Federal Register
Vol. 66, No. 232
Monday, December 3, 2001

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 01–ASO–12]

Proposed Establishment of Class D Airspace; Titusville, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to establish Class D airspace at Titusville, FL. A federal contract tower with a weather reporting system is in operation at the National Aeronautics and Space Administration (NASA) Shuttle Landing Facility. Therefore, the airport meets the criteria for establishment of Class D airspace. Class D surface area airspace is required when the control tower is open to contain existing Standard Instrument Approach Procedures (SIAPs) and other Instrument Flight Rules (IFR) operations at the airport. This action would establish Class D airspace extending upward from the surface to and including 1,900 feet MSL within a 5.7-mile radius of the NASA Shuttle Landing Facility.

DATES: Comments must be received on or before January 2, 2002.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Docket No. 01–ASO–12, Manager, Airspace Branch, ASO–520, P.O. Box 20636, Atlanta, Georgia 30320. The official docket may be examined in the Office of the Regional Counsel for Southern Region, Room 550, 1701 Columbia Avenue, College Park, Georgia 30337, telephone (404) 305–5586.

FOR FURTHER INFORMATION CONTACT: Walter R. Cochran, Manager, Airspace Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–5586.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 01–ASO–12," The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. All comments submitted will be available for examination in the Office of the Regional Counsel for Southern Region, Room 550, 1701 Columbia Avenue, College Park, Georgia 30337, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace Branch, ASO–520, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A which describes the application procedure.

The Proposal

The FAA is considering an amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) to establish Class D airspace at Titusville, FL. Class D airspace designations for airspace areas extending upward from the surface of the earth are published in Paragraph 5000 of FAA Order 7400.9J, dated August 31, 2001, and effective September 16, 2001, which is incorporated by reference in 14 CFR 71.1. The Class D designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (Air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9J, Airspace Designations and Reporting Points, dated August 31, 2001, and effective

September 16, 2001, is amended as follows:

Paragraph 5000 Class D Airspace.

* * * * *

ASO FL D Titusville, FL [New]

NASA Shuttle Landing Facility, FL
(Lat. 28°36′54″ N, long. 80°41′40″ W)
Space Coast Regional Airport
(Lat. 28°30′50″ N, long. 80°47′58″ W)

That airspace extending upward from the surface to and including 1,900 feet MSL within a 5.7-mile radius of NASA Shuttle Landing Facility, excluding the portion east of a line connecting the 2 points of intersection with the 4-mile radius circle centered on Space Coast Regional Airport; excluding the portion west of a line connecting 2 points of intersection with Restricted Area R–2934; excluding the portion within Restricted Areas R–2932 and R–2934 when they are active. This Class D airspace area is effective during the specific days and times established in advance by a Notice to Airmen. The effective days and times will thereafter be continuously published in the Airport/Facility Directory.

40 CFR Part 80

[FRL–7108–9]

RIN 2060–AJ79

Regulation of Fuel and Fuel Additives: Reformulated Gasoline Terminal Receipt Date

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of proposed rulemaking.

SUMMARY: With today's action the Environmental Protection Agency (EPA) is proposing to establish April 15 as a new annual compliance date for reformulated gasoline (RFG) and reformulated blendstock for oxygenate blending (RBOB), on or after which no persons except retailers and wholesale purchaser consumers would be able to accept receipt of any RFG other than summer grade RFG. This action is intended to help ease the annual spring transition from winter grade RFG to summer grade RFG by increasing RFG inventories during the transition period. Requiring all terminals to receive summer grade RFG by a fixed date should help reduce the competitive pressure that keeps terminals from accepting summer grade RFG for as long as possible, and may provide for a smoother transition in certain geographic areas by lengthening the turnover time for terminal tanks. We are also proposing to simplify the existing blendstock accounting requirements. This action will allow refineries more flexibility to transfer gasoline blendstocks from one refinery to another. Finally, we are proposing to update certain ASTM designated analytical test methods for reformulated and conventional gasoline to their most recent ASTM version, and also update several sampling methods to their most recent ASTM version. These updates will allow improvements in the test method procedures and sampling procedures that would ensure better operation for the user of the test methods and sampling procedures.

DATES: Comments. All public comments must be received on or before January 2, 2002. To request a public hearing, contact Chris McKenna at (202) 564–9037 or *mckenna.chris@epa.gov*. If a hearing is requested within 20 days of the date of publication of this document in the **Federal Register**, a hearing will be held on December 24, 2001 at the location indicated in the **ADDRESSES** section below. Persons wishing to testify at a public hearing must contact Chris McKenna at (202) 564–9037, and submit copies of their testimony to the docket and to Chris McKenna at the addresses below, no later than 10 days prior to the hearing. After the hearing, the docket for this rulemaking will remain open for an additional 30 days to receive comments. If a hearing is held, EPA will publish a document in the **Federal Register** extending the comment period for 30 days after the hearing.

ADDRESSES: Any person wishing to submit comments should send them (in duplicate, if possible) to the docket address listed below and to Chris McKenna (6406J), Chemical Engineer, U.S. Environmental Protection Agency, Office of Transportation and Air Quality, Transportation and Regional Programs, 1200 Pennsylvania Ave., NW., Washington, DC 20460. Materials relevant to this have been placed in docket (A–2001–21) located at U.S. Environmental Protection Agency, Air Docket Section, Room M–1500, 401 M Street, SW., Washington, DC 20460. The docket is open for public inspection from 8:00 a.m. until 5:30 p.m., Monday through Friday, except on Federal holidays. A reasonable fee may be charged for photocopying services.

FOR FURTHER INFORMATION CONTACT: For further information about this proposed rule, contact Chris McKenna, Chemical Engineer, Office of Transportation and Air Quality, Transportation and Regional Programs Division, at (202) 564–9037 or mckenna.chris@epa.gov.

SUPPLEMENTARY INFORMATION:

Regulated Entities

Entities potentially affected by this action include those involved with the production, importation, distribution, sale and storage of gasoline motor fuel.

The table below gives some examples of entities that may have to comply with the regulations. However, since these are only examples, you should carefully examine these and other existing regulations in 40 CFR part 80. If you have any questions, please call the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

I. New Terminal Receipt Date for Summer Grade Reformulated Gasoline

A. Background

The purpose of the reformulated gasoline (RFG) program is to improve air quality in certain specified ozone nonattainment areas. Gasoline sold in RFG covered areas must achieve certain reductions in emissions of ozone forming volatile organic compounds (VOCs) and toxic air pollutants, pursuant to 211(k) of the Clean Air Act (CAA or the Act), as amended [1]. The Act requires RFG in the ten metropolitan areas with the worst summertime ozone problems, and certain other areas have opted into the program.

Phase I of the RFG program ran from 1995 through 1999, and more stringent Phase II RFG standards began in 2000. During the summer ozone season EPA's Phase II RFG regulations require a 29 percent reduction in VOC emissions from RFG in southern (class B) areas, and a 27.4 percent reduction in such emissions from RFG in northern (class C) areas (representing approximately an additional 10 percent reduction in VOC emissions beyond the Phase I requirements).

One significant way of reducing VOC emissions from RFG is to decrease the Reid Vapor Pressure (RVP) of the RFG during summer months. As a result, summer grade RFG has a significantly lower RVP than winter grade RFG. RVP is a measure of a gasoline's volatility, or the tendency for a gasoline to evaporate. As gasoline RVP increases, the tendency of the gasoline to emit volatile material also increases. Higher emissions of volatile material increase pollution. Therefore, gasoline RVP is permitted to be relatively high during colder months because colder temperatures reduce the tendency of gasoline to evaporate and reduce emissions of volatile material. During hotter months, refiners must reduce gasoline RVP by removing the most volatile portion of the gasoline in order to reduce evaporative emissions from the gasoline.

Each spring, refiners and importers must reduce the RVP of the gasoline that they produce or import in order to comply with federal summer emissions requirements, and refiners, gasoline terminal facilities and retail stations must replace high RVP winter grade RFG in storage tanks with lower RVP summer grade RFG. EPA regulations stipulate that gasoline retailers must be selling only summer grade RFG by June 1 of each year. In order to meet the June 1 compliance date, EPA regulations stipulate that by May 1 the RFG at terminals and all other facilities upstream of the retailer must meet the summertime RFG requirements. Refineries typically begin producing lower RVP RFG in March or April in order for terminals to meet the May 1 compliance date.

Storage terminals use different methods for meeting the applicable compliance dates. Some terminals completely convert their tanks from high to low RVP gasoline by starting to blend summer gasoline into the terminal tank prior to May 1, so that by May 1 the gasoline in the terminal tank meets summer specifications—the "blend down" method. Alternatively, some terminals draw down their inventory of winter gasoline by continuing to make deliveries of winter gasoline, but not replacing it. When the tank is sufficiently low, the terminal begins accepting summer gasoline in order to meet the May 1 compliance date. This method is called the "draw down" method.

Because low RVP summer grade RFG is more expensive than high RVP winter grade RFG, distributors have incentive to delay terminal receipt of more expensive summer grade fuel, and draw down tanks as much as possible before refilling. Then, with the tank about empty, the last minute addition of summer grade fuel allows terminal tanks to quickly come into compliance with summer grade RFG requirements. This practice minimizes the cost of converting the tank from winter grade RFG to summer grade RFG. This economic incentive increases the likelihood that terminals will use the draw down method for the transition to summer fuel. Terminals practicing the draw down method only wish to receive summer grade RFG just before May 1 when their tanks are low. This practice delays production and importation of summer RFG. This practice may also lead to low gasoline inventories and increased supply pressure, particularly if there are any disruptions to the production or distribution system during this period. Additionally, during the past two spring transition periods, refiners have also tried to keep RFG inventories low in the expectation that future crude oil prices would decrease and RFG inventories could be replenished by processing less expensive crude in the future. The effort to increase inventories by establishing a new terminal receipt date might be limited by the conditions in the broader crude oil and petroleum product market.

EPA has no regulations governing the methods by which terminal operators turn over their tanks from winter to summer grade RFG. Terminal operators choose whether to use the blend down method or the draw down method to turn over their tanks. Although EPA has heard anecdotal comments about difficulties with tank turnover, primarily in the Midwest, no refiner or terminal operator has contacted EPA with specific problems.

In response to concerns about tight RFG supplies in the Midwest during spring 2000 and spring 2001, EPA met with midwestern producers and distributors of RFG in March, 2001 and asked that anyone experiencing difficulty with tank turnover contact EPA for help in addressing their problem. No refiners, importers or terminal operators contacted EPA during the transition months regarding difficulties with tank turnover. Nonetheless, we believe that the practice of drawing down terminal tanks in connection with the transition from winter to summer grade RFG can have an adverse impact on spring RFG inventories and potentially on gasoline supply. Therefore, we believe it is appropriate for EPA to proceed with today's proposed rule, and for EPA to ask for comment on several potential actions, many of which have been suggested to EPA by fuel producers and distributors, that address this issue. EPA believes that today's proposed action would have a positive impact on distribution and supply, and would help to assure a smoother transition from summer to winter grade RFG.

B. What Is EPA Proposing?

We are proposing to establish a new April 15 date on or after which no persons except retailers and wholesale purchaser consumers would be able to accept receipt of any RFG or RBOB other than summer grade RFG or RBOB. While this restriction would apply to

[1] Section 211(k) also includes compositional specifications for reformulated gasoline including a 2.0 weight percent oxygen minimum, a 1.0 volume percent benzene maximum, and a prohibition on heavy metal content, as well as a requirement that emissions of oxides of nitrogen (NO_x) from RFG not increase compared to baseline emissions (baseline emissions are the emissions of 1990 model year vehicles operated on 1990 baseline gasoline).

both terminals and pipelines, barges or other companies transporting fuel to terminals, effectively the restriction applies most directly to terminals so for ease of discussion the April 15 date will be referred to as a terminal receipt date. Also for ease of discussion, since the April 15 date applies to both RFG and RBOB, all references to RFG in connection with the April 15 date will apply to both RFG and RBOB. Batch report information submitted to EPA for 2000 indicates that approximately 181 million gallons of winter grade RFG was produced by refiners or imported from April 15, 2000 through April 30, 2000, all of which was produced or imported in PADDs 1, 2, and 3. The average RVP of this volume was 8.04 psi. Thus, establishing an April 15 summer RFG receipt date would require the RVP of at least 181 million gallons of RFG to be reduced from an average of 8.04 psi to a nominal 6.8 psi to meet the summer RFG specifications.

One suggested alternative to establishing a new April 15 receipt date was to instead establish a new refinery production date for summer grade RFG. For example, a refinery production date of April 1 could be established in place of an April 15 receipt date. The receipt date option being proposed will give a refiner more flexibility in deciding when to begin production of summer grade RFG based on its particular situation. For example, an RFG batch produced at a Gulf Coast refinery would take 2–3 weeks to be transported to terminals in the Midwest or Northeast. However, a refinery located in the Midwest or Northeast may take only one or two days to transport its RFG to local terminals.

Establishing a receipt date for summer grade RFG means that refineries must begin producing summer grade RFG batches early enough that the RFG arrives at its destined terminal by April 15. A 1986 study commissioned by EPA estimated an average national transit time of approximately 7 days between refinery and terminal for gasoline produced in May [2]. Subtracting this transit time from April 15 means that, on average, RFG batches produced or imported from April 8 through April 30 would need to be produced or imported as summer grade RFG. Batch report information submitted to EPA for 2000 indicates that 315.6 million gallons of winter grade RFG was produced by refiners or imported from April 8, 2000 through April 30, 2000, all of which was produced or imported in PADDs 1, 2, and 3. The average RVP of this volume was 8.34 psi. Winter grade RFG volumes produced or imported in each PADD from April 8, 2000 through April 30, 2000 are summarized in Table 1, along with the corresponding average RVP.

[2] "Petroleum Storage and Transport Times" by Jack Faucett Associates under contract to EPA, September, 1986.

TABLE 1.—RFG BATCH INFORMATION FROM APRIL 8, 2000 THROUGH APRIL 30, 2000

PADD	Winter grade RFG produced from April 8, 2000 through April 30, 2000 million gallons	Average RVP of RFG produced from April 8, 2000 through April 30, 2000 psi
1	132.8	9.06
2	160.7	7.52
3	22.1	9.97
Total	315.6	8.34

C. How Will This Proposal Help the Transition Period?

This proposal should help to provide for a smoother transition from winter to summer RFG by requiring some terminals to begin turning over their tanks from winter grade RFG to summer grade RFG earlier than they currently do. Because some terminals draw down their gasoline storage tanks to very low levels in late April to drain as much winter grade RFG as possible from their tanks before refilling the tanks with summer grade RFG, in order to minimize cost, there is the potential for very low inventories of RFG during this transitional period which increases the likelihood of supply problems. Requiring all terminals to begin receiving summer grade RFG by a fixed date will remove much of the incentive for terminals to draw down their tanks to very low levels all at the same time. We expect instead that it will encourage a blend down of their tanks to meet summer RFG requirements and increase volumes of RFG at terminals during the transition, allowing terminals to more gradually turn over their tanks from winter to summer grade RFG, and help spread the transition period out over the last two weeks in April. This should help to avoid situations where many terminals draw down their inventories and turn over their tanks simultaneously at the end of April.

Establishing an April 15 terminal receipt date for summer grade RFG will not reduce the market pressure for refiners to delay production of summer gasoline until it is required. However, the April 15 date will reduce the market pressure that causes terminals to delay accepting summer grade RFG for as long as possible. Terminals would be required to begin receiving summer grade RFG on April 15 and would, at the latest, turn their tanks over between April 15 and May 1. Turnover times would vary with terminal storage capacity and throughput of RFG at the terminal. Terminals would not be economically encouraged to draw down the winter gasoline in their tanks prior to April 15. The April 15 date applies to gasoline supplies received on or after that date, but does not require that the gasoline in the tanks be in compliance with summer specifications on April 15. This should lead to greater use of the blend down method to meet the May 1 date by which all RFG in terminal storage tanks must meet the summertime RFG standards [3]. EPA requests comment on the premise that an April 15 terminal receipt date will encourage greater use of the blend down method.

D. What Is the Cost of Today's Proposal?

The total estimated cost of establishing an April 15 receipt date is estimated to be between $1.5 million per year and $2.3 million per year. Dividing these costs by the 315.6 million gallons per year of gasoline which would need to be produced as summer grade RFG instead of winter grade RFG produces an equivalent cost range of 0.49 cents per gallon RFG to 0.73 cents per gallon RFG. Both of these estimates include the operational cost of removing sufficient butane to reduce the RVP of 315.6 million gallons per year of winter grade RFG from an average RVP of 8.34 psi to a nominal summer grade RFG RVP of 6.8 psi. Assuming an RVP decrease of 1 psi for every 1.5 volume % decrease in butane, 7.3 million gallons per year of butane must be removed from 315.6 million gallons per year of RFG.

The lower cost estimate ($1.5 million per year or 0.49 cents per gallon RFG) includes the cost of new tankage to store all the butane until the butane can be used the following winter. The higher cost estimate ($2.3 million per year or 0.73 cents per gallon RFG) assumes that all the additional butane removed is directly sold to the spot butane market. Thus, the higher cost estimate includes the effect of directly selling 7.3 million gallons per year of product as relatively less valuable butane instead of more valuable RFG.

The cost, in cents per gallon affected RFG, of producing more summer grade

[3] Note that while we are not proposing eliminating this May 1 terminal compliance requirement, we are interested in the continuing need for a May 1 terminal compliance requirement to ensure adequate and timely supplies of summer RFG to meet the existing requirement of June 1 for retail station compliance.

RFG and less winter grade RFG from April 8 through April 30 is less than the cost differential between typical winter grade RFG and summer grade RFG. Based on data obtained from DOE, winter grade RFG prices were approximately 6 cents per gallon less than summer grade RFG during Phase I, and 9 cents per gallon less than summer grade RFG during Phase II[4]. These price differences are due to two factors, the additional cost to produce summer grade RFG, and demand. The cost difference is due to blending more butane, a relatively inexpensive gasoline blendstock, into winter grade RFG in place of more expensive blendstocks required for summer grade RFG, especially alkylate blendstock needed to produce very low RVP RBOB for ethanol blended RFG. DOE has estimated the cost differential between winter and summer RFG at approximately 3 cents per gallon, which does not include demand induced price effects[5].

Typical winter grade RFG may have an RVP as high as 15 psi, compared to an average RVP of 8.34 psi for all winter grade RFG produced between April 8, 2000 and April 30, 2000. EPA's cost estimate includes only the cost of reducing the RVP of winter grade RFG produced from April 8 through April 30 to summer grade RVP levels. However, we are aware there may be other costs associated with the production of more summer grade RFG and less winter grade RFG from April 8 through April 30, in addition to the cost of reducing RVP.

II. On What Issues Is EPA Requesting Comment?

A. Inventory Build Before April 15

While EPA believes that establishing an April 15 terminal receipt date for summer grade RFG should result in greater use of the blend down method to meet the May 1 date by which all RFG in terminal storage tanks must meet the summertime RFG standard, we are concerned about the possibility of strategic behavior that may undermine this result. Since winter grade gasoline is cheaper than summer grade, there is an incentive under today's proposal for distributors to stockpile as much winter grade gasoline as possible before the April 15 deadline and simply defer purchases of summer grade gasoline for as long as possible as supplies of winter gasoline are drawn down. Depending on tank and pipeline capacity, this could theoretically result in the same reliance on the "draw down" method for meeting the May 1 compliance date as exists today. EPA therefore requests comment on the effects of today's proposal on gasoline inventories during the winter to summer transition.

B. Eliminate or Delay May 1 Compliance Date

In connection with today's proposal to establish a new April 15 terminal receipt date, we request comment on the impact and feasibility of also eliminating the existing May 1 compliance date, or, in the alternative, moving the May 1 compliance date to May 15. Under any such approach, the existing June 1 compliance date for retail stations would remain in its current form. Under the proposed April 15 terminal receipt requirement, we anticipate that most, if not all, terminals will turn over their RFG to summer grade specifications by May 1 based on the normal throughput of fuel at the terminal. The May 1 compliance date currently provides retail stations with one month to turn over their tanks from winter grade to summer grade RFG after all upstream facilities have made the transition. Discussions to date with retailers, terminals and refiners have indicated that many retail stations may actually need less time to turn over their tanks. Eliminating or delaying the May 1 compliance date would further widen the window of time following the proposed April 15 receipt date that terminals would have to turn all their tanks over from winter to summer grade RFG. This improved flexibility could allow, for example, a specific tank to still be in the blend down process on May 1, selling fuel with an RVP approaching, but not yet meeting summer grade requirements, a fuel which would be anticipated to be purchased by consumers prior to June 1. This would reduce the need for terminals to draw their RFG inventories down to very low levels during the spring transition. Feedback received thus far has been that if the May 1 compliance date is maintained, some terminals may still need to draw down their inventories in at least some of their tanks to very low levels to achieve the seasonal transition.

While we in general believe supplies of compliant summer grade RFG will be sufficiently available to meet retail needs, it is possible that some markets, particularly with low demand such as premium fuel, might be slow to turn over at both the retail outlet and the terminal. In such a case, without the need for terminals to meet summer fuel requirements for all their fuel, it may be more difficult for retail outlets to find sufficient fuel to meet that niche need early enough in May to allow for orderly transition to summer requirements. Comments are specifically requested on this issue of assuming sufficient supply to slow turnover markets without a certain May 1 terminal compliance date.

C. Establish April 1 Terminal Receipt Date

We also request comment on establishing April 1 instead of April 15 as an annual starting date for receipt of summer grade RFG; an April 1 date would further assure the availability of summer grade RFG prior to the June 1 retail compliance requirement to further reduce the potential for sudden drawdowns in RFG stocks. However, to the extent April 1 requires earlier production of summer grade RFG batches, refinery processing costs will increase perhaps with little or no real benefit to the retail outlet or to the environment (the increased environmental benefit due to summer grade RFG would largely parallel the increase). Second, an April 1 receipt date will be more likely to impact vehicle driveability in the event of cold weather late in the early spring.

Establishing an April 1 receipt date and allowing an average transit time of 7 days for transport of RFG from refinery to terminal means that shipment of summer grade RFG batches from refineries would need to start March 24. Batch report information submitted to EPA for 2000 indicates that 738.6 million gallons of winter grade RFG was produced by refiners or imported from March 24, 2000 through April 30, 2000, all of which was produced or imported in PADDs 1, 2, and 3. The average RVP of this volume was 9.28 psi. Winter grade RFG volumes produced or imported in each PADD from March 24, 2000 through April 30, 2000 are summarized in Table 2, along with the corresponding average RVP.

TABLE 2.—RFG BATCH INFORMATION FROM MARCH 24, 2000 THROUGH APRIL 30, 2000

PADD	Winter grade RFG produced from March 24, 2000 through April 30, 2000 million gallons	Average RVP of RFG produced from March 24, 2000 through April 30, 2000 psi
1	376.8	9.65
2	283.0	8.52

[4] EIA Memo: Potential Gasoline Price Impacts Due to Winter-Summer Transition, November, 8, 2001.

[5] EIA Memo: Potential Gasoline Price Impacts Due to Winter-Summer Transition, November, 8, 2001.

TABLE 2.—RFG BATCH INFORMATION FROM MARCH 24, 2000 THROUGH APRIL 30, 2000—Continued

PADD	Winter grade RFG produced from March 24, 2000 through April 30, 2000 million gallons	Average RVP of RFG produced from March 24, 2000 through April 30, 2000 psi
3	77.1	10.27
Total	738.6	9.28

The total estimated cost of establishing an April 1 receipt date is estimated to be between $4.9 million per year and $7.6 million per year. Dividing these costs by the 738.6 million gallons per year of gasoline which must be produced as summer grade RFG instead of winter grade RFG produces an equivalent cost range of 0.65 cents per gallon RFG to 1.04 cents per gallon RFG. Both of these estimates include the operational cost of removing sufficient butane to reduce the RVP of 738.6 million gallons per year of winter grade RFG from an average RVP of 9.28 psi to a nominal summer grade RFG RVP of 6.8 psi. Assuming an RVP decrease of 1 psi for every 1.5 volume % decrease in butane, 27.5 million gallons per year of butane must be removed from 738.6 million gallons per year of RFG.

The lower cost estimate ($4.8 million per year or 0.65 cents per gallon RFG) includes the cost of new tankage to store all the butane until the butane can be used the following winter. The higher cost estimate ($7.6 million per year or 1.04 cents per gallon RFG) assumes that all the additional butane removed is directly sold to the spot butane market. Thus, the higher cost estimate includes the effect of directly selling 27.5 million gallons per year of product as relatively less valuable butane instead of more valuable RFG.

As discussed in Section I.D. our cost estimate includes only the cost of reducing the RVP of winter grade RFG produced from March 24 through April 30 to summer grade RVP levels. However, we are aware there may be other costs associated with the production of more summer grade RFG and less winter grade RFG from March 24 through April 30, in addition to the cost of reducing RVP. A full discussion of the cost estimate can be found in the Draft Technical Support Document for this proposed rule, which is available in the docket for this rulemaking (A–2001–21; Item II–B–1) and on the web at: www.epa.gov/otaq/rfg.

D. Two Step RVP Phase-In

We also request comment on a two step phase-in process, as an alternative to the proposed terminal receipt date, which gradually reduces RFG RVP by establishing an intermediate terminal compliance date and intermediate target RVP. We request comment on the following four sub-options for this two step phase-in option.

1. Terminals must have their RFG tanks completely turned over to an intermediate RVP of 8.0 psi by April 15 and completely turned over to summer grade RFG by May 1.

2. Terminals must have their RFG tanks completely turned over to an intermediate RVP of 9.0 psi by April 15 and completely turned over to summer grade RFG by May 1.

3. Terminals must have their RFG tanks completely turned over to an intermediate RVP of 8.0 psi by May 1 and completely turned over to summer grade RFG by May 15.

4. Terminals must have their RFG tanks completely turned over to an intermediate RVP of 9.0 psi by May 1 and completely turned over to summer grade RFG by May 15.

The two step phase-in is intended to reduce the degree to which terminals must draw down their tanks to meet the final terminal compliance date by turning tanks over in two smaller steps instead of one large step. Using sub-option 1 above as an example, in step 1 a tank containing 19,000 barrels of winter grade RFG with a 13.0 psi RVP could be blended with 81,000 barrels of summer grade RFG with a 6.8 psi RVP to produce 100,000 barrels of RFG with an 8.0 psi RVP, using linear blending. In step 2, the volume of RFG in the tank with an 8.0 psi RVP would only have to be reduced to 25,000 barrels. This residual volume of 25,000 barrels of RFG with an 8.0 psi RVP could then be blended with 75,000 barrels of summer grade RFG with a 6.4 psi RVP to produce 100,000 barrels of summer grade RFG with a 6.8 psi RVP, using linear blending.

In contrast, to accomplish the same turnover in one step would require the volume of 13.0 psi RVP winter grade RFG in the tank to be reduced to 6,000 barrels. Then 94,000 barrels of 6.4 psi RVP summer grade RFG would have to be blended with this 6,000 barrels of winter grade RFG to produce 100,000 barrels of summer grade RFG with a 6.8 psi RVP, using linear blending. The net effect of the two step phase-in is that RFG inventory does not have to be reduced as greatly in order to achieve the winter to summer RVP transition. A terminal using the two step phase-in from the example above would only have to reduce its tankage volume to a minimum of 19,000 barrels instead of 6,000 barrels in order to achieve its RVP transition.

Thus far, feedback on the idea of a two step phase-in option has been mixed. Some parties with whom EPA has spoken prefer a phase-in approach to a terminal receipt date. Others have expressed concern that the addition of a second transitional RVP compliance date would increase record keeping requirements and would not significantly reduce the current practice of drawing down tanks to very low levels. EPA requests comment on the two step phase-in approaches listed above, as well as any alternatives to help accomplish a smooth phase-in.

E. Limit Applicability of Terminal Receipt Date to Chicago/Milwaukee Areas

We also request comment on the option of limiting the applicability of the proposed terminal receipt date to the Chicago and Milwaukee metropolitan areas. These two areas have been most severely impacted by low gasoline inventories during the past two spring transitions from winter to summer grade gasoline.

F. Reduce Allowable Minimum RVP to 6.0 psi

We also request comment on the option of decreasing the allowable minimum RVP for RFG at the refinery gate to 6.0 psi from 6.4 psi, as an addition to the proposed terminal receipt date, to further help ease the winter to summer RVP transition. Under the emissions model used to measure RFG performance, the lowest allowable RVP for RFG is 6.4 psi. Reducing the RVP of gasoline at the refinery gate gives terminals the flexibility to maintain slightly higher inventories of winter grade RFG during the transition period by allowing sub-RVP RFG to be blended with winter grade RFG during the tank turnover process. For example, if a tank contained 6,000 barrels of winter grade RFG with a 13.0 psi RVP, this volume could be blended with 94,000 barrels of summer grade RFG with a 6.4 psi RVP to produce a 100,000 barrel mix with an RVP of 6.8 psi, using linear blending. However, if the minimum allowable RVP of summer grade RFG were decreased, a greater volume of winter grade RFG could be blended with the sub-RVP summer grade RFG to produce an acceptable blend of summer grade RFG. For example, the tank volume of winter grade RFG with a 13.0 psi RVP would only have to be reduced to 11,000 barrels during the RVP

transition. This 11,000 barrels could then be blended with 89,000 barrels of 6.0 psi RVP RFG to produce a 100,000 barrel mix with an RVP of 6.8 psi, using linear blending. The net effect of reducing the minimum allowable RVP is that RFG inventory does not have to be reduced as greatly in order to achieve the winter to summer RVP transition.

We have identified two potential concerns related to reducing the minimum allowable RVP for RFG at the refinery gate. First, reducing RVP also reduces the driveability index of RFG. In the event of late cold weather, vehicles could experience driveability problems if fueled with RFG with an RVP less than 6.4 psi. A potential solution would be to relax the minimum RVP only at the refinery gate, and not allow terminals to release RFG with an RVP lower than 6.4 psi. Second, refiners may be reluctant to use this option due to the additional processing costs associated with reducing RVP below 6.4 psi.

III. Eliminate Current Blendstock Accounting Regulation 40 CFR 80.102

Today's action proposes to replace the current blendstock accounting requirements at 40 CFR 80.102 with simpler, less restrictive requirements. These requirements are a part of the anti-dumping regulations for conventional gasoline (CG).

The Clean Air Act required EPA to establish the anti-dumping regulations as part of the RFG program to prevent increases in oxides of nitrogen (NO_X) and toxics air emissions from conventional gasoline as a result of RFG production. Thus, the anti-dumping regulations prevent a refinery from transferring, or "dumping," the relatively dirty components that it removes from its RFG (such as benzene) into its CG. Specifically, the anti-dumping regulations require that the CG produced or imported by each refinery and importer must be at least as clean with respect to NO_X and toxics emission performance, on an annual average basis, as the gasoline produced or imported by that refinery or importer in 1990. Under these regulations, refineries and importers are required to develop individual baselines for these emissions based on the quality of the gasoline they produced or imported in 1990. Refiners and importers who are not able to develop an individualized baseline are subject to a predetermined baseline that is representative of the average exhaust toxics and NO_X emission performance of 1990 gasoline, referred to as the anti-dumping statutory baseline. A refinery's or importer's individual 1990 baseline, or alternatively the statutory baseline, functions as the refinery's or importer's anti-dumping "standard."[6]

Requirements for blendstock accounting were included in the anti-dumping regulations out of a concern that refineries with 1990 baselines cleaner than the anti-dumping statutory baseline would transfer dirty blendstocks to refineries with dirtier baselines because such refineries would be better able to use the dirty blendstocks while still meeting their anti-dumping baseline. Under the blendstock accounting provisions, if a cleaner refinery transfers large quantities of dirty gasoline blendstocks to another refinery, the cleaner refinery must account for all of the blendstocks it produces and transfers in its anti-dumping compliance calculations in specified subsequent annual averaging periods. Thus, the cleaner refinery could not benefit from such a transfer. The regulations require significant additional reporting by a refinery with a baseline cleaner than the anti-dumping statutory baseline that transfers ten percent or more blendstocks than it transferred in 1990 relative to its total production.

EPA now believes that the current blendstock accounting requirements are unnecessary. When refineries produce more total gasoline than that produced in 1990, the additional gasoline over and above the 1990 baseline volume must meet the statutory baseline for all refineries regardless of the refinery's individual baseline. Since nearly all refineries currently produce significantly more gasoline than they produced in 1990, EPA believes that the blendstock transfers that are likely to occur today will be between donor and recipient refineries whose total production is well above 1990 baseline volume levels with or without a transfer. If transfers under these conditions occur between refiners producing only CG, there will be no net change in the quality of their combined CG pool because the donor refiner's gallons at the statutory baseline would be replaced by the recipient refiner's gallons at this same baseline. Thus, there would likely be no motivation or opportunity for "gaming the system" under these circumstances. Where either or both refiners make RFG and CG, there is some potential for meeting a slightly lower baseline by transferring blendstocks.[7] However, it is unlikely that there would ever be any impact more significant than a small decrease in the stringency of compliance requirements, meaning that the gaming possibilities of such a transfer are very small, and thus any such transfers would produce only very small economic benefits which may be more than offset by the transactional costs associated with the transfer. As a result, the shifting of blendstocks from one refinery to another where both refineries produce more gasoline than they did in 1990 has very little potential to cause any adverse environmental impact.

Additionally, EPA has carefully examined individual refinery situations and has concluded that for the very limited number of refineries producing volumes where a transfer could result in some increased emissions, there is little possibility for gaming since clean/dirty refinery baseline pairs within a specific emission category (NO_X or toxics) are very uncommon. (i.e, for NO_X and toxics, almost all members of this refinery subset are clean for one pollutant and dirty for the other leaving little chance of gaming for either.)[8]

Finally, the recently promulgated Mobile Source Air Toxics rule[9] requires each refinery to meet a performance standard for toxic air emissions for CG and RFG equivalent to the performance of that refinery's CG or RFG during the baseline years 1998, 1999, and 2000. Because this new baseline performance is better than 1990 baselines, refineries with dirty baselines would be even less likely to be able to accept dirty blendstocks since these blendstocks would potentially degrade performance relative to these years.

We believe the current blendstock accounting provisions create significant additional compliance and reporting requirements, and, in some cases, may have the effect of deterring refiners or importers from transferring gasoline blendstocks that they otherwise would transfer in the normal course of business in response to legitimate supply concerns and other refinery needs. Moreover, we believe that eliminating these requirements will help to improve the responsiveness of the gasoline supply system by increasing refiners' flexibility to transfer gasoline

[6] Refiners producing CG at several facilities have the option of meeting the antidumping standards on an aggregate basis with an aggregated baseline. 40 CFR 80.101(h).

[7] This is due to the concept of "equivalent CG volume" contained in the compliance baseline equation under the anti-dumping regulations in § 80.101(f). For a full discussion of this concept and the effects of RFG production on anti-dumping compliance, see "Technical Support Document for RFG Terminal Receipt Date Rule" in the docket for this rulemaking.

[8] Refinery-specific information is submitted to EPA as confidential business information under the RFG and anti-dumping reporting requirements and cannot be made public.

[9] 66 FR 17230 (March 29, 2001)

blendstocks.[10] Consequently, today's rule proposes to eliminate the current blendstock accounting requirements.

There remains some concern about the possibility that a refiner with a clean baseline could create an off-site terminal blending facility acting as a refinery for the sole purpose of certifying gasoline at the less stringent statutory baseline. To gain a significant compliance advantage the clean refiner would have to transfer a great deal of its gasoline production such that the original clean refinery would be making less gasoline than in 1990. Otherwise, the clean refinery would be producing incremental gasoline at approximately the statutory baseline and the transfer would not result in any significant compliance advantage. To address the limited situations in which blendstock transfers could possibly be undertaken for the purpose of evading a more stringent baseline, today's rule proposes provisions which would require a refinery with a baseline that is cleaner than the anti-dumping statutory baseline, and that produces less gasoline than its 1990 baseline volume during the annual averaging period, to petition EPA for approval to transfer specified "applicable" (i.e., "dirty") blendstocks in excess of 5% of the refinery's annual production. The refinery would be required to demonstrate that such blendstock transfers were for a legitimate operational purpose and not for the purpose of evading a more stringent baseline.

We believe that most blendstock transfers needed for operational purposes, for example during desulfurization unit turnarounds (which are projected to take approximately two weeks), are likely not to exceed 5% of the refinery's annual production. While we believe that 5% is the upper limit for necessary transfers of dirty blendstocks in most situations, the petition process would be available for unusual situations where desulfurization unit turnarounds or other such legitimate operational needs require blendstock transfers in excess of 5%. This petition processwould requires refineries to forecast total production for the entire year averaging period to be less than 1990 baseline volumes. The requirement to petition EPA for approval to transfer dirty blendstocks in excess of 5% of the refinery's annual production applies only to the highly unusual situation where a refinery possesses a baseline cleaner than the statutory baseline and produces less than its 1990 baseline volume during the annual averaging period. Other refineries would not be required to petition EPA for approval to transfer blendstocks even when in excess of 5% of their annual production. EPA requests comment on the practicality of this approach and on whether 5% is an appropriate trigger.[11]

IV. Updating ASTM Designated Analytical Test Methods for Reformulated and Conventional Gasoline to Their Most Recent ASTM Version

Refiners, importers and oxygenate blenders producing gasoline and diesel fuel are required to test RFG, CG and diesel fuel for RVP, aromatics, benzene, and various other parameters. During the federal RFG rulemaking, and in response to comments by the regulated industry, EPA designated analytical test methods that the Agency would use for enforcement and compliance purposes. See 40 CFR 80.46. On July 11, 1997, the Agency proposed to update the designated test methods that were ASTM standards in § 80.46 (a) through (g) to their most recent version, as well as replace the designated test methods for RVP and oxygenates with the ASTM version.[12] This proposal was never finalized by the Agency, and since the time of the proposal, these designated test methods have been updated by ASTM.

Since the July 11, 1997, proposal was published, newer versions of several designated test methods have been published by ASTM. We have reviewed these newer versions of the ASTM test methods. The Agency believes that the revisions in the newer versions of the ASTM designated test methods are not significant changes that would cause a user of an older version of the same method to incur significant costs. All of the revisions were deemed necessary by ASTM so that improvements in the test method's procedures would ensure better operation for the user of the test method. Therefore, today the Agency is proposing to update each designated test method for gasoline that is an ASTM standard, excluding the measurement of sulfur and aromatics in gasoline, at § 80.46 to its most recent ASTM version, as well as replace the designated test methods for RVP and oxygenates with the ASTM version. Table 3 lists the designated analytical test methods for each parameter measured under the RFG and CG fuels program under today's proposal.

TABLE 3.—DESIGNATED ANALYTICAL TEST METHOD UNDER THE RFG AND CG FUEL PROGRAMS

Fuel parameter	Designated analytical test method
Olefins	ASTM D–1319–98, entitled "Standard Test Method for Hydrocarbon Types in Liquid Petroleum Products by Fluorescent Indicator Absorption"
Reid Vapor Pressure	ASTM D 5191–99, entitled "Standard Test Method for Vapor Pressure of Petroleum Products (Mini Method), except that the following correlation equation be used with ASTM D 5191–99: RVP psi = (0.956*X) – 0.347 RVP kPa = (0.956*X) – 2.39

[10] EPA is aware that refiners have concerns regarding blendstock transfers under the newly promulgated gasoline sulfur reduction regulations. During maintenance periods for sulfur removal units or "turnarounds", refineries may have to transfer fairly large amounts of low-sulfur blendstocks into refineries during maintenance periods. Refiners have indicated that these transfers could trip the current complicated blendstock accounting requirements. We believe that today's proposal resolves this concern by removing the current blendstock accounting requirements. Discussions with refiners have also indicated that the 5% trigger for the petition process is sufficiently high so as to be unlikely to interfere with such transfers, especially considering that the 5% trigger is only applicable to refiners making less gasoline than produced in 1990.

[11] Two trigger mechanisms contained in today's action (the 5% trigger mechanism and annual gasoline production volumes less than 1990 volumes) would result in the petition process. These triggers essentially replace two criteria that, under the current regulations, would trigger blendstock accounting. These current criteria include a 3% transfer of blendstocks and a 10 percent increase in a multi-year ratio of blendstock transfers to total production for a facility relative to baseline years in the early 1990s. The 10% criteria required a fairly complex ongoing multi-year calculation of blendstock ratios which we believe is unnecessary. (These criteria are discussed more completely in "Technical Support Document for RFG Terminal Receipt Date Rule:" included in the docket for this rulemaking.) EPA believes that the 5% trigger mechanism is sufficient to allow free transfer of blendstocks, without a petition, for most or all refiners in most or all situations. Additionally, the petition process would not be tripped even if more than 5% of blendstocks, relative to total production, are transferred unless a refinery is making less total volume than in 1990. Thus, for the petition process, we are proposing to eliminate the two criteria in the current regulations for blendstock accounting and substituting the new 5% trigger for the petition process.

[12] 62 FR 37338, July 11, 1997.

TABLE 3.—DESIGNATED ANALYTICAL TEST METHOD UNDER THE RFG AND CG FUEL PROGRAMS—Continued

Fuel parameter	Designated analytical test method
	Where: X = total measured vapor pressure in psi or kPa
Distillation	ASTM D–86–00a, entitled "Standard Test Method for Distillation of Petroleum Products at Atmospheric Pressure"
Oxygen and Oxygenate content analysis	ASTM D 5599–00, entitled "Standard Test Method for Determination of Oxygenates in Gasoline by Gas Chromatography and Oxygen Selective Flame Ionization Detection[1]

[1] Prior to September 1, 2004, and when oxygenates present are limited to MTBE, ETBE, TAME, DIPE, tertiary-amyl alcohol, and C_1 and C_4 alcohols, any refiner, importer, or oxygenate blender may determine oxygen and oxygenated content using ASTM standard method D–4815–99, entitled "Standard Test Method for Determination of MTBE, ETBE, TAME, DIPE, tertiary-amyl Alcohol and C_1 and C_4 Alcohols in Gasoline by Gas Chromatography provided the result is correlated to ASTM D 5599–00.

V. Corrections to Gasoline and Diesel Sample Testing Methodology

40 CFR Part 80, Appendices D and G, specify sampling procedures for gasoline and diesel fuel for all motor vehicle fuel programs under 40 CFR Part 80, including the programs for unleaded gasoline, gasoline volatility, diesel sulfur, RFG, and anti-dumping. Today's proposal would replace the sampling procedures in Appendices D and G with the following ASTM standard practices:

- D 4057–95(2000), "Standard Practice for Manual Sampling of Petroleum and Petroleum Products;"
- D 4177–95(2000), "Standard Practice for Automatic Sampling of Petroleum and Petroleum Products;"
- D 5842–95(2000), "Standard Practice for Sampling and Handling of Fuels for Volatility Measurements;" and
- D 5854–96(2000), "Standard Practice for Mixing and Handling of Liquid Samples of Petroleum and Petroleum Products."

These changes were formerly proposed in "Regulation of Fuels and Fuel Additives: Modifications to Standards and Requirements for Reformulated and Conventional Gasoline—Proposed Rule," 62 FR 37338 (July 11, 1997), although these provisions were never finalized. Since we are proposing to update various other test methods via this notice, it is logical to consider sampling methodologies here as well.

Appendices D and G of 40 CFR Part 80 were adopted from the 1981 version of D 4057. Over time, however, ASTM has updated D 4057, and these changes are not reflected in Appendices D and G. For example, Appendix D addresses the collection of samples from a "tap" in the shell of a petroleum storage tank. The current requirement under Appendix D, reflective of D 4057–81, requires that taps extend at least three feet into the storage tank. See 11.3.1.1 of Appendix D. However, tap extensions are necessary only for heavy petroleum products (and not for gasoline and diesel fuel), and, furthermore, tap extensions are not possible with floating roof storage tanks that are commonly used today. As a result, EPA and regulated parties currently agree to waive the tap extension requirement on a case-by-case basis. Under D 4057–95(2000) sampling tap extensions are not required for light petroleum products such as gasoline and diesel fuel, so that if this ASTM procedure were adopted the tap extension issue would be resolved for all cases.

EPA is proposing to adopt three ASTM methods in addition to D 4057–95(2000) in order to include procedures that address a broad scope of sampling situations that are relevant to EPA's motor vehicle fuels programs. D 4177–95(2000) deals with automatic sampling of petroleum products, which is relevant under the anti-dumping regulations for refiners who produce conventional gasoline using an in-line blending operation where automatic sampling is necessary. Similarly, D 5842–95(2000) deals with sampling and sample handling for volatility measurement, which is relevant to determining compliance with the volatility standards in § 80.27 and the RFG standards in § 80.41. Last, D 5854–96(2000) deals with the creation of composite samples, which is relevant under the RFG and anti-dumping programs in certain situations involving imported gasoline where the gasoline from multiple ship compartments is treated as a single batch.

EPA believes it is appropriate to replace Appendices D and G with ASTM standard practices. The current ASTM practices reflect up to date procedures, which if followed would result in improved sample quality for regulatory purposes. In addition, the adoption of industry standard procedures would reduce regulatory burden because parties would be able to follow their customary practices when meeting regulatory requirements.

VI. Administrative Requirements

A. Executive Order 12866

Under Executive Order 12866, (58 FR 51735 (October 4, 1993)) the Agency must determine whether the regulatory action is "significant" and therefore subject to OMB review and the requirements of the Executive Order. The Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order."

EPA has determined that this regulation is a significant regulatory action under item (4) above. Pursuant to the terms of Executive Order 12866, OMB has notified EPA that it considers this a "significant regulatory action" within the meaning of the Executive Order. EPA has submitted this action to OMB for review. Changes made in response to OMB suggestions or recommendations will be documented in the public record.

B. Executive Order 13132 (Federalism)

Executive Order 13132, entitled "Federalism" (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure "meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications." "Policies that have federalism implications" is defined in

the Executive Order to include regulations that have "substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government."

This proposed rule does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132. The proposed rule would establish a new April 15 receipt date by which terminals must physically begin receiving summer grade RFG, and is intended to help stabilize the supply of RFG during the spring RVP transition. This proposed rule also simplifies the existing blendstock accounting requirements at 40 CFR 80.102 and updates ASTM test methods to their most recent version. Thus, Executive Order 13132 does not apply to this proposed rule.

In the spirit of Executive Order 13132, and consistent with EPA policy to promote communications between EPA and State and local governments, EPA specifically solicits comment on this proposed rule from State and local officials.

C. Executive Order 13175 (Consultation and Coordination With Indian Tribal Governments)

On January 1, 2001, Executive Order 13084 was superseded by Executive Order 13175. However, this proposed rule was developed during the period when Executive Order 13084 was still in force, and so tribal considerations were addressed under Executive Order 13084. Development of the final rule will address tribal considerations under Executive Order 13175. Executive Order 13175, entitled "Consultation and Coordination with Indian Tribal Governments" (65 FR 67249, November 6, 2000), requires EPA to develop an accountable process to ensure "meaningful and timely input by tribal officials in the development of regulatory policies that have tribal implications." "Policies that have tribal implications" is defined in the Executive Order to include regulations that have "substantial direct effects on one or more Indian tribes, on the relationship between the Federal government and the Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes."

This RFG terminal receipt date rule does not have tribal implications. It will not have substantial direct effects on tribal governments, on the relationship between the Federal government and Indian tribes, or on the distribution of power and responsibilities between the Federal government and Indian tribes, as specified in Executive Order 13175. This proposed rule applies to gasoline refiners, blenders and importers that supply gasoline to RFG areas. Today's action proposes some changes that would modify the Federal RFG requirements, and does not impose any enforceable duties on communities of Indian tribal governments. Thus, Executive Order 13175 does not apply to this rule.

D. Regulatory Flexibility Act (RFA), as Amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), 5 U.S.C. 601 et seq.

The RFA generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements under the Administrative Procedure Act or any other statute unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small organizations, and small governmental jurisdictions.

For purposes of assessing the impacts of today's rule on small entities, small entity is defined as: (1) A small business that has not more than 1,500 employees (13 CFR 121.201); (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of today's proposed rule on small entities, I certify that this action will not have a significant economic impact on a substantial number of small entities. We have determined that no small entities will experience an impact from this proposal. RFG batch results reported for 2000 indicate that no winter grade RFG produced or imported from April 8 through April 30 was supplied by small businesses.

Although this proposed rule will not have a significant impact on a substantial number of small entities, EPA has nonetheless tried to reduce the impact of this rule on small entities. We continue to be interested in the potential impacts of the proposed rule on small entities and welcome comments on issues related to such impacts.

E. Paperwork Reduction Act

The information collection requirements in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the *Paperwork Reduction Act*, 44 U.S.C. 3501 *et seq.* An Information Collection Request (ICR) document has been prepared by EPA (OMB # 2060–0277, EPA ICR No. 1591.14) and a copy may be obtained from Susan Auby by mail at Collection Strategies Division; U.S. Environmental Protection Agency (2822); 1200 Pennsylvania Ave., NW, Washington, DC 20460, by e-mail at *farmer.sandy@epamail.epa.gov*, or by calling (202) 260–2740. A copy may also be downloaded off the Internet at *http://www.epa.gov/icr*.

Under today's proposed rule, EPA is requiring refiners to keep certain records associated with the supply of RFG. However, EPA believes that this requirement will be met using documents created and kept for commercial business purposes; i.e., documents that show the movement of RFG to storage tanks and volume and parameter measurements. This requirement, therefore, is not expected to impose additional recordkeeping burdens on regulated parties.

Today's action also proposes to eliminate the current blendstock accounting provisions and instead requires only a small subset of refiners, and only under unusual situations, to submit a petition to EPA in order to transfer certain blendstocks. The information collection hour burden associated with the current blendstock accounting requirements is estimated to be 24 hours to track blendstock transfers and prepare each blendstock accounting report, and 80 hours to prepare a request for a waiver of the blendstock accounting requirements (under extreme or unusual circumstances). These burdens would be eliminated under this action. The petition requirement proposed under this action is estimated to be 3 hours to prepare each petition. The respondent cost associated with the current blendstock accounting requirement is estimated to be $60 per hour for blendstock tracking and preparation of each blendstock accounting report and blendstock accounting waiver request. The respondent cost per petition under this action is also estimated to be $60 per hour. The total information collection hour burden associated with the current blendstock provisions is estimated to be 4,680 hours per year. This is based on an estimate of 200 respondents at 24 hours for blendstock tracking and

preparation of blendstock accounting reports, and one respondent at 80 hours for preparation of blendstock accounting waiver requests. These burdens would be eliminated under this action. The information collection hour burden associated with the petition requirement potentially applicable to the small subset of refiners under this action is estimated to be a total of 15 hours, based on an estimated 5 respondents at 3 hours per petition. The total information collection hour burden, therefore, would be reduced by 4,865 hours (4,880 − 15). Based on previous experience with the RFG/anti-dumping program, EPA believes the estimates of the number of respondents both under the current rule and this action are likely to be the maximum number of respondents during an annual averaging period. The total cost burden associated with the current blendstock provisions is estimated to be $292,800 (4,880 hours × $60 per hour). This cost would be eliminated under this action. The total cost burden associated with the petition requirement applicable to the small subset of refiners included in today's rule is estimated to be $900 (15 hours × $60 per hour). As a result, today's rule would provide an overall reduction in cost burden of approximately $291,900 ($292,800 − $900). We request comment on this change in the information collection burden associated with anti-dumping compliance.

Regarding recordkeeping and reporting burdens, in a letter dated December 12, 2000, the National Petrochemical & Refiners Association (NPRA) commented on EPA's draft Information Collection Request for reformulated and conventional gasoline reporting. 65 FR 60939 (October 13, 2000). In the letter, NPRA made several requests relating to the RFG program's current information collection burden. Although today's proposed action does not address all of NPRA's requests, as discussed above, today's action would eliminate all of the current burden associated with the RFG program's anti-dumping blendstock accounting requirements. The current blendstock provisions impose substantial recordkeeping and reporting burdens on refiners who transfer blendstocks. These recordkeeping and reporting burdens may have had the effect of deterring refiners from transferring such blendstocks. Today's action would eliminate these burdens for all refiners. The information collection burden on the small subset of refiners who would be required to petition EPA under today's action would be minimal. We believe this reduction in information collection burden would result in a more free exchange of blendstocks.

OMB has approved the information collection requirements contained in the final RFG/anti-dumping rulemaking (See 59 FR 7716 (February 16, 1994) and has assigned OMB control number 2060–0277 (EPA ICR No. 1591.13). Upon promulgation of a final rule, ICR 1591.14 associated with this rule will be encompassed in the next renewal of ICR 1591.13.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. Comments are requested on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden, including through the use of automated collection techniques. Send comments on the ICR to the Director, Collection Strategies Division; U.S. Environmental Protection Agency (2822); 1200 Pennsylvania Ave., NW, Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th St., N.W., Washington, DC 20503, marked "Attention: Desk Officer for EPA." Include the ICR number in any correspondence. Since OMB is required to make a decision concerning the ICR between 30 and 60 days after December 3, 2001, a comment to OMB is best assured of having its full effect if OMB receives it by January 2, 2002. The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

F. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, for proposed and final rules with "Federal mandates" that may result in expenditures to State, local, and tribal governments, in the aggregate, or to the private sector, of $100 million or more in any one year. Before promulgating an EPA rule for which a written statement is needed, section 205 of the UMRA generally requires EPA to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule. The provisions of section 205 do not apply when they are inconsistent with applicable law. Moreover, section 205 allows EPA to adopt an alternative other than the least costly, most cost-effective or least burdensome alternative if the Administrator publishes with the final rule an explanation why that alternative was not adopted. Before EPA establishes any regulatory requirements that may significantly or uniquely affect small governments, including tribal governments, it must have developed under section 203 of the UMRA a small government agency plan. The plan must provide for notifying potentially affected small governments, enabling officials of affected small governments to have meaningful and timely input in the development of EPA regulatory proposals with significant Federal intergovernmental mandates, and informing, educating, and advising small governments on compliance with the regulatory requirements.

Today's proposed rule contains no Federal mandates (under the regulatory provisions of Title II of the UMRA) for State, local or tribal governments or the private sector. The proposed rule would impose no enforceable duty on any State, local or tribal governments or the private sector. This proposed rule applies to gasoline refiners, blenders and importers that supply gasoline to RFG areas.

G. Executive Order 13045: Children's Health Protection

Executive Order 13045: "Protection of Children from Environmental health Risks and Safety Risks" (62 FR 19885, April 23, 1997) applies to any rule that: (1) is determined to be "economically significant" as defined under Executive Order 12866, and (2) concerns an environmental health or safety risk that EPA has reason to believe may have a

disproportionate effect on children. If the regulatory action meets both criteria, the Agency must evaluate the environmental health or safety effects of the planned rule on children, and explain why the planned regulation is preferable to other potentially effective and reasonably feasible alternatives considered by the Agency.

EPA interprets Executive Order 13045 as applying only to those regulatory actions that are based on health or safety risks, such that the analysis required under section 5–501 of the Order has the potential to influence the regulation. This proposal is not subject to Executive Order 13045 because it does not establish an environmental standard intended to mitigate health or safety risks.

H. National Technology Transfer and Advancement Act of 1995 (NTTAA)

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 ("NTTAA"), Public Law No. 104–113, section 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. The NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

This proposed rulemaking involves environmental monitoring or measurement. Consistent with the Agency's Performance Based Measurement System ("PBMS"), EPA proposes not to require the use of specific, prescribed analytic methods. Rather, the Agency plans to allow the use of any method that meets the prescribed performance criteria. The PBMS approach is intended to be more flexible and cost-effective for the regulated community; it is also intended to encourage innovation in analytical technology and improved data quality. EPA is not precluding the use of any method. whether it constitutes a voluntary consensus standard or not, as long as it meets the performance criteria specified.

This proposed rule would update certain designated analytical test methods to their most recent ASTM version for the RFG program. Today's proposed action does not establish new technical standards or analytical test methods, although it does update certain ASTM test methods and sampling methods to their current versions. To the extent that this proposed action would allow the use of standards developed by voluntary consensus bodies (such as ASTM) this action would further the objectives of the NTTAA. The Agency plans to address the objectives of the NTTAA more broadly in an upcoming rulemaking to establish performance-based criteria for qualification of alternative analytical test methods.

I. Executive Order 13211 (Energy Effects)

This rule is not an economically "significant energy action" as defined in Executive Order 13211, "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (66 FR 28355 (May 22, 2001)) because it does not have a significant adverse effect on the supply, distribution, or use of energy. Although this rule will slightly decrease the volume of summer grade RFG produced from April 8 through April 30 by approximately 0.4 percent due to earlier production of summer grade RFG, the annual cost associated with this rule is less than $100 million. Also, this rule will provide for a smoother annual transition to summer RFG, which should help to alleviate seasonal pressures on gasoline supply. Moreover, EPA is allowing additional flexibility for refiners to transfer blendstocks, which should allow refiners to better respond to fluctuations in gasoline supply or demand.

VII. Statutory provisions and Legal Authority

Statutory authority for today's final rule comes from sections 211(c) and 211(k) of the CAA (42 U.S.C. 7545(c) and (k)). Section 211(c) allows EPA to regulate fuels that contribute to air pollution which endangers public health or welfare, or which impairs emission control equipment. Section 211(k) prescribes requirements for RFG and conventional gasoline and requires EPA to promulgate regulations establishing these requirements. Additional support for the procedural aspects of the fuels controls in today's rule comes from sections 114(a) and 301(a) of the CAA.

List of Subjects in 40 CFR Part 80

Environmental protection, Air pollution control, Fuel additives, Gasoline, Imports, Motor vehicle pollution, Reporting and recordkeeping requirements.

Dated: November 20, 2001.

Christine Todd Whitman,

Administrator.

For the reasons set forth in the preamble, part 80 of title 40 of the Code of Federal Regulations is proposed to be amended as follows:

PART 80—REGULATION OF FUELS AND FUEL ADDITIVES

1. The authority citation for part 80 continues to read as follows:

Authority: 42 U.S.C. 7414, 7545 and 7601(a).

2. Section 80.8 is added to subpart A to read as follows:

§ 80.8 Sampling methods for gasoline and diesel fuel.

The sampling methods specified in this section shall be used to collect samples of gasoline and diesel fuel for purposes of determining compliance with the requirements of this part.

(a) *Manual sampling.* Manual sampling of tanks and pipelines shall be performed according to the applicable procedures specified in American Society for Testing and Materials (ASTM) method D 4057–95(2000), entitled "Standard Practice for Manual Sampling of Petroleum and Petroleum Products."

(b) *Automatic sampling.* Automatic sampling of petroleum products in pipelines shall be performed according to the applicable procedures specified in ASTM method D 4177–95(2000), entitled "Standard Practice for Automatic Sampling of Petroleum and Petroleum Products."

(c) *Sampling and sample handling for volatility measurement.* Samples to be analyzed for Reid Vapor Pressure (RVP) shall be collected and handled according to the applicable procedures in ASTM method D 5842–95(2000), entitled "Standard Practice for Sampling and Handling of Fuels for Volatility Measurement."

(d) *Sample compositing.* Composite samples shall be prepared using the applicable procedures in ASTM method D 5854–96(2000), entitled "Standard Practice for Mixing and Handling of Liquid Samples of Petroleum and Petroleum Products."

(e) *Incorporations by reference.* ASTM standard practices D 4057–95(2000), D 4177–95(2000), D 5842–95(2000), and D 5854–96(2000), are incorporated by reference. These incorporations by reference were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the American Society for Testing and Materials, 100 Barr Harbor Dr., West

Conshohocken, PA 19428. Copies may be inspected at the Air Docket Section (LE–131), room M–1500, U.S. Environmental Protection Agency, Docket No. A–97–03, 401 M Street, SW, Washington, DC 20460, or at the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, (202) 523–4534.

3. Section 80.27 is amended by revising paragraphs (b) and (d)(2) to read as follows:

§ 80.27 Controls and prohibitions on gasoline volatility.

* * * * *

(b) *Determination of compliance.* Compliance with the standards listed in paragraph (a) of this section shall be determined by the use of the sampling methodologies specified in § 80.8 and the testing methodology specified in § 80.46(c).

* * * * *

(d) * * *

(2) In order to quality for the special regulatory treatment specified in paragraph (d)(1) of this section, gasoline must contain denatured, anhydrous ethanol. The concentration of the ethanol, excluding the required denaturing agent, must be at least 9% and no more than 10% (by volume) of the gasoline. The ethanol content of the gasoline shall be determined by the use of one of the testing methodologies specified in § 80.46(g). The maximum ethanol content shall not exceed any applicable waiver conditions under section 211(f) of the Clean Air Act.

* * * * *

4. Section 80.28 is amended by revising paragraphs (g)(2)(ii) and (g)(4)(i) to read as follows:

§ 80.28 Liability for violations of gasoline volatility controls and prohibitions.

* * * * *

(g) * * *

(2) * * *

(ii) Test results using the sampling methodology set forth in § 80.8 and the testing methodology set forth in § 80.46(c), or any other test method where adequate correlation to § 80.46(c) of this part is demonstrated, which show evidence that the gasoline determined to be in violation was in compliance with the applicable standard when it was delivered to the next party in the distribution system.

* * * * *

(4) * * *

(i) Test results using the sampling methodology set forth in § 80.8 and the testing methodology set forth in § 80.46(c), or any other test method where adequate correlation to § 80.46(c) is demonstrated, which show evidence that the gasoline determined to be in violation was in compliance with the applicable standard when transported from the refinery.

* * * * *

5. Section 80.40 is amended by revising paragraph (c)(1) to read as follows:

§ 80.40 Fuel certification procedures.

* * * * *

(c)(1) "Adjusted VOC gasoline" for purposes of the general requirements in § 80.65(d)(2)(ii), and the certification procedures in this section is gasoline that contains 10 volume percent ethanol, or RBOB intended for blending with 10 volume percent ethanol, that is intended for use in the areas described at § 80.70(f) and (i), and is designated by the refiner as adjusted VOC gasoline subject to less stringent VOC standards in § 80.41(e) and (f). In order to for "adjusted VOC gasoline" to qualify for the regulatory treatment specified in § 80.41(e) and (f), reformulated gasoline must contain denatured, anhydrous ethanol. The concentration of the ethanol, excluding the required denaturing agent, must be at least 9% and no more than 10% (by volume) of the gasoline. The ethanol content of the gasoline shall be determined by use of one of the testing methodologies specified in § 80.46(g).

* * * * *

6. Section 80.46 is amended by revising paragraphs (b), (c), (d), (e)(1), (f)(2), (g) and (h) to read as follows:

§ 80.46 Measurement of reformulated gasoline fuel parameters.

* * * * *

(b) *Olefins.* Olefin content shall be determined using ASTM standard method D 1319–98, entitled "Standard Test Method for Hydrocarbon Types in Liquid Petroleum Products by Fluorescent Indicator Adsorption."

(c) *Reid vapor pressure (RVP).* Reid vapor pressure (RVP) shall be determined using ASTM standard method D 5191–99, entitled "Standard Test Method for Vapor Pressure of Petroleum Products (Mini Method)," except that the following correlation equation must be used:

$$RVP\ psi = (0.956 * X) - 0.347$$

$$RVP\ kPa = (0.956 * X) - 2.39$$

Where

X = total measured vapor pressure in psi or kPa

(d) *Distillation.* Distillation parameters shall be determined using ASTM standard method D 86–00a, entitled" Standard Test Method for Distillation of Petroleum Products at Atmospheric Pressure."

* * * * *

(f) * * *

(2)(i) Prior to September 1, 2004, any refiner or importer may determine aromatics content using ASTM standard method D 1319–99, entitled "Standard Test Method for Hydrocarbon Types in Liquid Petroleum Products by Flourescent Indicator Adsorption," for purposes of meeting any testing requirement involving aromatics content; provided that

(ii) The refiner or importer test result is correlated with the method specified in paragraph (f)(1) of this section.

* * * * *

(g) *Oxygen and oxygenate content analysis.* (1) Oxygen and oxygenate content shall be determined using ASTM standard method D 5599–00, entitled "Standard Test Method for Determination of Oxygenates in Gasoline by Gas Chromatography and Oxygen Selective Flame Ionization Detection."

(2)(i) Prior to September 1, 2004, and when the oxygenates present are limited to MTBE, ETBE, TAME, DIPE, tertiary-amyl alcohol, and C1 to C4 alcohols, any refiner, importer, or oxygenate blender may determine oxygen and oxygenate content using ASTM standard method D 4815–99 entitled "Standard Test Method for Determination of MTBE, ETBE, TAME, DIPE, tertiary-Amyl Alcohol, and C1 to C4 Alcohols in Gasoline by Gas Chromatography," for purposes of meeting any testing requirement; provided that

(ii) The refiner or importer test result is correlated with the method specified in paragraph (g)(1) of this section.

(h) *Incorporations by reference.* ASTM standard methods D 3606–99, entitled "Standard Test Method for Determination of Benzene and Toluene in Finished Motor and Aviation Gasoline by Gas Chromatography;" D 1319–98, entitled "Standard Test Method for Hydrocarbon Types in Liquid Petroleum Products by Fluorescent Indicator Adsorption;" D 1319–99, entitled "Standard Test Method for Hydrocarbon Types in Liquid Petroleum Products by Fluorescent Indicator Adsorption;" D 4815–99, entitled "Standard Test Method for Determination of MTBE, ETBE, TAME, DIPE, tertiary-Amyl Alcohol and C_1 to C_4 Alcohols in Gasoline by Gas Chromatography;" D 2622–98, entitled "Standard Test Method for Sulfur in Petroleum Products by Wavelength Dispersive X-Ray Fluorescence Spectrometry;" D 5453–00, entitled "Standard Test

Method for Determination of Total Sulfur in Light Hydrocarbons, Motor Fuels, and Oils by Ultraviolet Fluorescence;" D 4045–99, entitled "Standard Test Method for Sulfur in Petroleum Products by Hydrogenolysis and Rateometric Colorimetry;" D 6428–98, entitled "Test Method for Total Sulfur in Liquid Aromatic Hydrocarbons and Their Derivatives by Oxidative Combustion and Electrochemical Detection;" D 3120–96 entitled "Standard Test Method for Trace Quantities of Sulfur in Light Petroleum Hydrocarbons by Oxidative Microcoulometry;" D 3246–96, entitled "Standard Test Method for Sulfur in Petroleum Gas by Oxidative Microcoulometry;" D 4468–85 (Re-approved 1995), entitled "Standard Test Method for Total Sulfur in Gaseous Fuels by Hydrogenolysis and Rateometric Colorimetry;" D 1266–98, entitled "Standard Test Method for Sulfur in Petroleum Products (Lamp Method)," D 6334–98, entitled "Standard Test Method for Sulfur in Gasoline by Wavelength Dispersive X-Ray Fluorescence;" D 5191–99, entitled, "Standard Test Method for Vapor Pressure of Petroleum Products (Mini Method);" D 5599–00, entitled, "Standard Test Method for Determination of Oxygenates in Gasoline by Gas Chromatography and Oxygen Selective Flame Ionization Detection;" and D 86–00a, entitled, "Standard Test Method for Distillation of Petroleum Products at Atmospheric Pressure;" are incorporated by reference in this section. These incorporations by reference were approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from the American Society of Testing and Materials, 1916 Race Street, Philadelphia. PA 19103. Copies may be inspected at the Air Docket Section (LE–131), room M–1500, U.S. Environmental Protection Agency, Docket Nos. A–97–03, A–99–06, and A–2001–21, 401 M Street, SW, Washington DC 20460 or at the Office of the Federal Register, 800 North Capitol Street, NW, Suite 700, Washington, DC.

7. Section 80.65 is amended by revising paragraph (d)(3) to read as follows:

§ 80.65 General requirements for refiners, importers, and oxygenate blenders.

* * * * *

(d) * * *

(3) Every batch of reformulated or conventional gasoline or RBOB produced or imported at each refinery or import facility shall be assigned a number (the "batch number"), consisting of the EPA-assigned refiner, importer or oxygenate blender registration number, the EPA facility registration number, the last two digits of the year in which the batch was produced, and a unique number for the batch, beginning with the number one for the first batch produced or imported each calendar year and each subsequent batch during the calendar year being assigned the next sequential number (e.g., 4321–54321–95–000001, 4321–54321–95–000002, etc.).

* * * * *

8. Section 80.78 is amended by adding paragraph (a)(11) to read as follows:

§ 80.78 Controls and prohibitions on reformulated gasoline.

* * * * *

(a) * * *

(11) No persons except retailers and wholesale purchaser-consumers may take physical custody of reformulated gasoline or reformulated blendstock for oxygenate blending (RBOB) that is not VOC-controlled during the period April 15 through September 15 of each year.

* * * * *

9. Section 80.91 is amended by removing paragraph (a)(1)(iii) and removing the "; and" at the end of paragraph (a)(1)(ii) and replacing it with a period.

10. Section 80.92 is amended by revising the first sentence of paragraph (a)(1) to read as follows:

§ 80.92 Baseline auditor requirements.

(a) * * *

(1) Each refiner or importer is required to have its individual baseline determination methodology, resulting baseline fuel parameter, volume and emissions values verified by an auditor which meets the requirements described in this section. * * *

* * * * *

11. Section 80.101 is amended by removing and reserving paragraphs (d)(2) and (e)(2), and removing paragraph (h)(2)(iii), and revising paragraphs (h)(2)(i) and (ii) to read as follows:

§ 80.101 Standards applicable to refiners and importers.

* * * * *

(h) * * *

(2) * * *

(i) Be made as part of the report for the 1995 averaging period required by § 80.105; and

(ii) Apply for the 1995 averaging period and for each subsequent averaging period, and may not thereafter be changed.

* * * * *

12. Section 80.102 is revised to read as follows:

§ 80.102 Restrictions on transferring applicable blendstocks

(a) The following petroleum products are considered "applicable blendstocks" for purposes of this subpart E:

(1) Reformate;
(2) Light coker naphtha;
(3) FCC naphtha;
(4) Benzene/toluene/xylene;
(5) Pyrolysis gas;
(6) Aromatics;
(7) Polygasoline; and
(8) Dimate.

(b)(1) No refinery or importer whose 1990 baseline value for any emission performance, as determined in accordance with §§ 80.91 and 80.92, is more stringent than the anti-dumping statutory baseline value for that emission performance may transfer applicable blendstock(s) under paragraph (a) of this section to others in excess of five per cent of the refinery's or importer's total gasoline production (including conventional gasoline, reformulated gasoline and RBOB) during an annual averaging period, unless the refiner for the refinery or the importer petitions for and obtains approval from EPA to transfer such blendstock(s).

(2) A petition under paragraph (b)(1) of this section must include a demonstration that the transfer of blendstock(s) is for a legitimate operational purpose and not for the purpose of evading a more stringent baseline.

(3) The provisions of paragraph (b)(1) of this section do not apply in the case of a refinery or importer whose total gasoline production (including conventional gasoline, reformulated gasoline and RBOB) during the entire annual averaging period in which the blendstock transfers are made is equal to or greater than the refinery's or importer's 1990 baseline volume.

(c) Applicable blendstocks under paragraph (a) of this section may be excluded from the requirements of this section where the refiner or importer has sufficient evidence in the form of documentation that the blendstocks are:

(1) Exported;
(2) Used for other than gasoline blending purposes;
(3) Transferred to a refiner that used the blendstock as a "feedstock" in a refining process during which the blendstock underwent a substantial chemical or physical transformation; or
(4) Transferred between refineries that have been grouped pursuant to § 80.101(h) by a refiner for the purpose of determining compliance under this subpart;

(5) Used to produce California gasoline as defined in § 80.81(a)(2).

13. Section 80.104 is amended by revising paragraph (a)(1)(i) and removing and reserving paragraph (a)(2)(ix) to read as follows:

§ 80.104 Recordkeeping requirements.

* * * * *

(a) * * *

(1) * * *

(i) Each batch of conventional gasoline; and

* * * * *

14. Section 80.105 is amended by removing and reserving paragraphs (a)(2) and (a)(3).

15. Section 80.106 is amended by removing and reserving paragraph (b).

16. Section 80.128 is amended by removing paragraphs (h) and (i).

Appendix D—[Reserved.]

17. Appendix D is removed and reserved.

Appendix E to Part 80—[Reserved.]

18. Appendix E is removed and reserved.

Appendix F to Part 80—[Reserved.]

19. Appendix F is removed and reserved.

Appendix G to Part 80—[Reserved.]

20. Appendix G is removed and reserved.

BILLING CODE 6560–50–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 61

RIN 3067–AD27

National Flood Insurance Program (NFIP); Increased Rates for Flood Coverage

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Proposed rule.

SUMMARY: We (the Federal Insurance and Mitigation Administration of FEMA) propose to increase the amount of premium policyholders pay for flood insurance coverage under the NFIP for "pre-FIRM" buildings in coastal areas subject to high velocity waters, such as storm surges, and wind-driven waves ("V" zones). (The term "pre-FIRM buildings" means buildings whose construction began on or before December 31, 1974, or the effective date of the community's Flood Insurance Rate Map (FIRM), whichever date is later. Most pre-FIRM buildings and their contents are eligible for subsidized rates under the NFIP.) We propose this rate increase to bring the premiums we currently charge for pre-FIRM, V-zone properties more in line with their actual risk.

DATES: We invite comments on this proposed rule, which we should receive on or before January 2, 2002.

ADDRESSES: Please submit any written comments to the Rules Docket Clerk, Office of the General Counsel, Federal Emergency Management Agency, 500 C Street, SW., room 840, Washington, DC 20472, (facsimile) 202–646–4536, or (e-mail) *rules@fema.gov*.

FOR FURTHER INFORMATION CONTACT: Thomas Hayes, Federal Emergency Management Agency, Federal Insurance and Mitigation Administration, 500 C Street SW., Washington, DC 20472, 202–646–3419, (facsimile) 202–646–7970, or (e-mail) *Thomas.Hayes@fema.gov*.

SUPPLEMENTARY INFORMATION:

Background

On March 17, 1999, we published at 64 FR 13115 a final rule that increased the subsidized premiums rates for "pre-FIRM" buildings in V-zones—areas subject to high velocity waters, such as storm surges and wind-driven waves. (We use the term "pre-FIRM" to describe construction that was started on or before December 31, 1974, or the effective date of the Flood Insurance Rate Map (FIRM) for a community, whichever date is later. The premium rates we charge for flood insurance coverage on pre-FIRM buildings are less than full-risk premiums.) This is how we summarized our reasons for the increase in 1999 at 64 FR 13116:

"In summary, we believe that targeting a particularly risky class of properties with higher premium rates supports FEMA's overall program of loss reduction. It more accurately reflects the loss exposure of pre-FIRM, V-zone properties, which are at a greater exposure to flood loss than pre-FIRM, A-zone properties. Also, it helps make policyholders aware of the danger of their V-zone properties."

Currently, the rates for pre-FIRM, V-zone properties that apply to the first-layer limits of flood insurance coverage established by 42 U.S.C. 4013 are roughly twenty percent higher than the equivalent rates for pre-FIRM, A-zone properties. (For example, first layer coverage for single-family dwellings amounts to $35,000 out of $250,000—the maximum amount available for such structures under the National Flood Insurance Program.) We believe that the difference in loss exposure between these two groups of risks is much greater than that. Therefore, we are proposing a further increase in the pre-FIRM, V-zone rates.

Section 572 of the National Flood Insurance Reform Act of 1994, Pub. L. 103–325, 42 U.S.C. 4015, however, imposes the following annual limitation on rate increases under the NFIP:

"Notwithstanding any other provision of this title, the chargeable risk premium rates for flood insurance under this title for any properties within any single risk classification may not be increased by an amount that would result in the average of such rate increases for properties within the risk classification during any 12-month period exceeding 10 percent of the average of the risk premium rates for properties within the risk classification upon commencement of such 12-month period." (42 U.S.C. 4015)

Our proposed rate increase for such properties would comply with this statutory limitation on annual rate increase under the NFIP.

Statutory Mandates for Setting Flood Insurance Premiums

The Flood Disaster Protection Act of 1973 requires us to charge full-risk premiums for flood insurance coverage on buildings when their construction began after December 31, 1974, or on or after the effective date of the Flood Insurance Rate Map, if the second date is later. (We call such construction "post-FIRM" construction.)

The Flood Disaster Protection Act of 1973 also authorizes us to apply chargeable premiums to pre-FIRM property and gives FEMA flexibility to set the flood insurance rates for such property. The legislation calls for us to balance the need to offer reasonable rates that encourage people to buy flood insurance with the statutory goal to distribute burdens fairly between all who will be protected by flood insurance and the general public.

Proposed Changes and Their Purposes

We are proposing to increase the current subsidized rates we charge for the initial limits of coverage under the NFIP for pre-FIRM properties in "V" zones on FEMA's FIRMs. ("V" zones represent coastal areas subject to high velocity water such as wind-driven waves from storms or tidal surges that are extremely hazardous to people and property.) Currently, these premium rates are about twenty percent higher than the equivalent rates we charge for pre-FIRM, A-zone zone properties. We are proposing to further increase the rates we charge for V-zone, pre-FIRM properties to bring them more in line with their greater exposure to flood losses.

Currently, the sum of the premium and other administrative fees one pays for flood insurance on subsidized pre-FIRM properties is less than our expected expenses and loss payments. This applies especially to pre-FIRM, V-zone properties.

Subsidized Rate Increases in the Past

We have increased the chargeable or subsidized premium rates four times during the program's history for the same reason that we are proposing this rule: to distribute burdens fairly among all who will be protected by flood insurance and to reduce the burden on the general public. The changes proposed in this rule for pre-FIRM, V-zone properties would move us closer toward that goal by bringing subsidized premiums charged for buildings in extremely hazardous areas more in line with the actual risk.

Comparison of Proposed Rate Increases With Current Rates

The following chart compares the current rates we charge for pre-FIRM, V-zone properties with the proposed rate increases for pre-FIRM, V-zone properties. The rates for pre-FIRM, A-zone properties would be unaffected by this proposal. Also these proposed increases apply only to the rates charged for the "first layer" of flood insurance coverage set by Congress in Section 1306 of the National Flood Insurance Act of 1968, as amended (Pub. L. 90–448):

Type of structure	Current V Zone [1] rates per year per $100 coverage on:		Proposed V Zone rates per year per $100 coverage on:	
	Structure	Contents	Structure	Contents
1. Residential:				
No Basement or Enclosure	.82	.95	.91	1.06
With Basement or Enclosure	.88	.95	.98	1.06
2. All other including hotels and motels with normal occupancy of less than 6 months duration:				
No basement or Enclosure	.95	1.90	1.06	2.10
With basement or Enclosure	1.01	1.90	1.12	2.10

[1] V Zones are Zones V1–V30, VE, and unnumbered V Zones.

National Environmental Policy Act (NEPA)

Pursuant to section 102(2) (C) of the National Environmental Policy Act (NEPA) of 1969, 42 U.S.C. 4317 *et seq.*, we are conducting an environmental assessment of this proposed rule. The assessment will be available for inspection through the Rules Docket Clerk, Federal Emergency Management Agency, room 840, 500 C St. SW., Washington, DC 20472.

Executive Order 12866, Regulatory Planning and Review

We have prepared and reviewed this proposed rule under the provisions of E.O. 12866, Regulatory Planning and Review. Under Executive Order 12866, 58 FR 51735, October 4, 1993, a significant regulatory action is subject to OMB review and the requirements of the Executive Order. The Executive Order defines "significant regulatory action" as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

For the reasons that follow we have concluded that the proposed rule is neither an economically significant nor a significant regulatory action under the Executive Order. The rule would result in a modest increase in premiums for V-zone, pre-FIRM buildings and their contents. The adjustment in premiums rates would increase by slightly less than $3 million the amount of premium collected and deposited in the National Flood Insurance Fund each year. It would not have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, the insurance sector, competition, or other sectors of the economy. It would create no serious inconsistency or otherwise interfere with an action taken or planned by another agency. It would not materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof. Nor does it raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

The Office of Management and Budget has not reviewed this proposed rule under the provisions of Executive Order 12866.

Paperwork Reduction Act

This rule does not contain a collection of information and is therefore not subject to the provisions of the Paperwork Reduction Act.

Executive Order 13132, Federalism

Executive Order 13132 sets forth principles and criteria that agencies must adhere to in formulating and implementing policies that have federalism implications, that is, regulations that have substantial direct effects on the States, or on the distribution of power and responsibilities among the various levels of government. Federal agencies must closely examine the statutory authority supporting any action that would limit the policymaking discretion of the States, and to the extent practicable, must consult with State and local officials before implementing any such action.

We have reviewed this proposed rule under E.O. 13132 and have determined that the rule does not have federalism implications as defined by the Executive Order. The rule would adjust the premiums for pre-FIRM buildings in V-zone areas. The rule in no way that we foresee affects the distribution of power and responsibilities among the various levels of government or limits the policymaking discretion of the States.

List of Subjects in 44 CFR Part 61

Flood insurance.

Accordingly, we propose to amend 44 CFR part 61 as follows:

PART 61—INSURANCE COVERAGE AND RATES

1. The authority citation for part 62 continues to read as follows:

Authority: 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 43 FR 41943, 3 CFR, 1978 Comp., p. 329; E.O. 12127 of Mar. 31, 1979, 44 FR 19367, 3 CFR, 1979 Comp., p. 376.

2. Revise § 61.9 to read as follows:

§ 61.9 Establishment of chargeable rates.

Under section 1308 of the Act, we are establishing annual chargeable rates for each $100 of flood insurance coverage as follows for pre-FIRM, A zone properties, pre-FIRM, V-zone properties, and emergency program properties.

Type of structure	A Zone rates [1] per year per $100 coverage on:		V Zone rates [2] per year per $100 coverage on:	
	Structure	Contents	Structure	Contents
1. 1. Residential:				
No Basement or Enclosure	.68	.79	.91	1.06
With Basement or Enclosure	.73	.79	.98	1.06
2. All other including hotels and motels with normal occupancy of less than 6 months duration:				
No basement or Enclosure	.79	1.58	1.06	2.10
With basement or Enclosure	.84	1.58	1.12	2.10

[1] A Zones are zones A1–A30, AE, AO, AH, and unnumbered A Zones
[2] V Zones are zones V1–V30, VE, and unnumbered V Zones

Dated: November 26, 2001.

Robert F. Shea,

Acting Administrator, Federal Insurance and Mitigation Administration.

Notices

Federal Register
Vol. 66, No. 232
Monday, December 3, 2001

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Center for Nutrition Policy and Promotion; Agency Information Collection Activities; Proposed Collection; Comment Request—Consumer Food Guide Pyramid Study

AGENCY: Center for Nutrition Policy and Promotion, USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on a proposed information collection. This notice announces the Center for Nutrition Policy and Promotion's intention to request the Office of Management and Budget approval of the information collection instruments to be used during consumer research with focus groups of consumers to identify key issues of concern related to understanding and use of the Food Guide Pyramid. The information collected will be used in the reassessment and potential revision of the Food Guide Pyramid.

DATES: Written comments on this notice must be submitted on or before February 1, 2002.

ADDRESSES: Comments are invited on (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the propose collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. Comments may be sent to Carole Davis, Nutrition Promotion Staff Director, Center for Nutrition Policy and Promotion, U.S. Department of Agriculture, 3101 Park Center Drive, Room 1034, Alexandria Virginia, 22302.

All responses to this notice will be summarized and included in the request for Office of Management and Budget (OMB) approval, All comments will also become a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Patricia Britten, (703) 305–2477.

SUPPLEMENTARY INFORMATION:

Title: Consumer Food Guide Pyramid Study.

OMB Number: Not assigned yet.

Expiration Date: Not applicable.

Type of Request: New collection of information.

Abstract: The U.S. Department of Agriculture's Food Guide Pyramid is designed to help all healthy Americans two years of age and over implement the Dietary Guidelines for Americans. The proposed qualitative consumer research will describe consumers' understanding and use of the Food Guide Pyramid along with possible barriers to following the Pyramid's guidance. This study involves eighteen focus group sessions, 6 with general consumers and 4 each with the elderly, overweight, and food stamp recipients, to explore how consumers understand the concepts and messages of the consumer brochure and graphic illustration of the Food Guide Pyramid. The study will also obtain feedback on how and to what extent consumers use the Pyramid to make food choices, and will help to identify any barriers they face in applying Pyramid recommendations to their food choices. The information gathered along with additional information will be used by USDA in the reassessment and potential revision of the Food Guide Pyramid, and in message development and other communications efforts used to promote the Pyramid.

Affected Public: Adult Consumers.

Estimated Number of Respondents: 180.

Estimated Time Per Response: 2 hours.

Estimated Total Annual Burden on Respondents: 360 hours.

Dated: November 28, 2001.

Steven N. Christensen,

Acting Deputy Director, Center for Nutrition Policy and Promotion.

[FR Doc. 01–29852 Filed 11–30–01; 8:45 am]
BILLING CODE 3410–30–U

DEPARTMENT OF AGRICULTURE

Foreign Agricultural Service

AGENCY: Foreign Agricultural Service, USDA.

ACTION: Advisory Committee on Emerging Markets: Nominations.

SUMMARY: Notice is hereby given that nominations are being sought for qualified persons to serve on the Advisory Committee on Emerging Markets. The role of the committee is to provide information and advice, based upon knowledge and expertise of the members, useful to the U.S. Department of Agriculture (USDA) in implementing the Emerging Markets Program. The committee also advises USDA on ways to increase the involvement of the U.S. private sector in cooperative work with emerging markets in food and rural business systems and reviews proposals submitted to the Program for funding technical assistance activities.

DATES: Written nominations must be received by the Foreign Agricultural Service (FAS) before or at the close of business January 2, 2002.

ADDRESSES: All nominating materials should be sent to Mr. Douglas Freeman, Foreign Agricultural Service, Room 4932–Stop 1042, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Washington, DC 20250–1042. Forms may also be submitted by fax to (202) 720–9361.

FOR FURTHER INFORMATION CONTACT: Persons interested in serving on the Advisory Committee on Emerging Markets or in nominating individuals to serve, should contact FAS by telephone (202) 720–4327, by fax (202) 720–9361, by mail (Mr. Douglas Freeman, Foreign Agricultural Service, Room 4932—Stop 1042, U.S. Department of Agriculture, 1400 Independence Avenue, S.W., Washington, D.C. 20250–1042), or by electronic mail to *emo@fas.usda.gov* and request Form AD–755 and Form SF–181. Form AD–755 is required and is available at the FAS home page: *http://www.fas.usda.gov/admin/*

ad755.pdf. Form SF–181 is requested but optional, and is available at *http://www.fas.usda/admin/sf181.pdf*.

SUPPLEMENTARY INFORMATION: The Advisory Committee on Emerging Markets is authorized by section 1542 of the Food, Agriculture, Conservation, and Trade Act of 1990 (Public Law 101–624), as amended. The overall purpose of the Committee is "to provide the Secretary with information that may be useful * * * in carrying out the provisions of [the Emerging Markets Program]." The Committee is to be composed of representatives of the various sectors of the food and rural business systems of the United States. More information about the purpose and function of the Advisory Committee may be found at the FAS/Emerging Markets Program Web site: *http://www.fas.usda.gov/mos/em-markets/acem.html*. The members of the Advisory Committee are appointed by the Secretary of Agriculture and serve at the discretion of the Secretary. Committee members serve without compensation, but can receive reimbursement for travel expenses to attend Committee meetings if requested, in accordance with USDA travel regulations.

The Committee has a balanced membership of up to 20 members, representing a broad cross-section of the U.S. agricultural and agribusiness industry. All appointments will expire two years from the date of appointment. The Secretary may renew an appointment for one or more additional terms.

Most meetings will be held in Washington, DC, though other locations may be selected on an occasional basis. Committee meetings will be open to the public, unless the Secretary of Agriculture determines that the Committee will be discussing issues the disclosure of which justify closing all or a portion of a meeting, in accordance with 5 U.S.C. 552(c).

Nominations are open to all individuals without regard to race, color, religion, sex, national origin, age, physical handicap, marital status, or sexual orientation. To ensure that the work of the Committee takes into account the needs of the diverse groups served by the Department of Agriculture, membership shall include, to the extent practicable, individuals with demonstrated ability to represent the interest of minorities, women, and persons with disabilities.

Members are selected primarily for their experience, expertise and knowledge of international agriculture and of trade and development issues as they affect emerging markets. No person, company, producer, farm organization, trade association, or other entity has a right to representation on the Committee. In making selections, every effort will be made to maintain balanced representation of the various broad industries within the United States, and of a geographic diversity as well.

Signed at Washington, DC, November 26, 2001.

Mary T. Chambliss,

Acting Administrator, Foreign Agricultural Service.

[FR Doc. 01–29876 Filed 11–30–01; 8:45 am]

BILLING CODE 3410–10–P

DEPARTMENT OF AGRICULTURE

Forest Service

North End Sheep Allotment Range Analysis, Caribou-Targhee National Forest, Caribou and Bonneville Counties, ID

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an Environmental Impact Statement.

SUMMARY: The Soda Springs Ranger District, Caribou-Targhee National Forest, will be preparing an Environmental Impact Statement (EIS) to analyze the effects to grazing on several sheep allotments. Allotment Management Plans for the following sheep allotments; Bald Mountain, Barnes Creek, Black Canyon, Bridge Creek, Comb Creek, Deep Creek, Eagle Creek-Morgan Meadow, Hell Creek, Keenan City, Little Elk Mountain, Miners Delight, Pole Creek, Spring Creek, Squaw Creek, Taylor Creek, West Jensen and Wolverine-Kirk will be updated based on the analysis. All of these allotments are located on the North end of the Caribou Range in Townships 2–5 South, Ranges 43–46 East, Boise Meridian, within Caribou and Bonneville Counties. An EIS will be prepared to display the effects of sheep grazing on these allotments. Public comments will be used to develop issues and alternative management systems. The purpose for this project is to assess current conditions on the allotments and ensure that riparian and upland vegetation are meeting Forest Plan objectives and other applicable laws and regulations. The EIS will outline standards and guidelines for livestock management, which will be used to revise Allotment Management Plans for each allotment. The EIS and subsequent revision of the Allotment Management Plans will bring these allotments into compliance with Public Law 104, the Caribou National Forest Land and Resource Management Plan, and other applicable laws and regulations. The decision to be made by the District Ranger is what changes need to be made for future livestock management within the boundaries of these allotments.

DATES: Written comments concerning the analysis should be received within 30 days of the date of publication of this notice in the **Federal Register**.

ADDRESSES: Send written comments to Soda Springs Ranger District, Attn: David Whittekiend, 421 West 2nd South, Soda Springs, Idaho 83276. The responsible official for this decision is David Whittekiend, District Ranger.

FOR FURTHER INFORMATION CONTACT: Questions concerning the proposed action and EIS should be directed to Derek Hinckley, Range Management Specialist, at (208) 547–4356.

SUPPLEMENTARY INFORMATION: The EIS and subsequent revision of the Allotment Management Plans will bring these allotments into compliance with Public Law 104, the Caribou National Forest Land and Resource Management Plan, and other applicable laws and regulations.

Initial scoping and issue development identified the following tentative issues: riparian/fisheries, wildlife, vegetation and watershed/soils.

The Forest Service has previously scoped this project in February of 2001. If you have already commented, your comments are part of the record and will be considered in determining issues, and alternatives. The Forest Service invites written comments and suggestions on the issues related to the proposal and the area being analyzed. Information received will be used in preparation of the Draft EIS and Final EIS. For most effective use, comments should be submitted to the Forest Service within 30 days from the date of publication of this Notice in the **Federal Register**.

Agency representatives and other interested people are invited to visit with Forest Service officials at any time during the EIS process. Two specific time periods are identified for the receipt of formal comments on the analysis. The two comment periods are, (1) during the scoping process, the next 30 days following publication of this Notice in the **Federal Register**, and (2) during the formal review period of the Draft EIS.

The Draft EIS is estimated to be filed with the Environmental Protection Agency (EPA) and available for public review in August of 2002. At that time,

the EPA will publish an availability notice of the Draft EIS in the **Federal Register**.

The Forest Service estimates the Draft EIS will be filed within 10 months of this Notice of Intent, approximately August of 2002. The Final EIS will be filed within 6 months of that date, approximately December of 2002.

The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency publishes the notice of availability in the **Federal Register**.

The Forest Service believes, at this early stage, it is important to give reviewers notice of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and intentions.

Vermont Yankee Nuclear Power Corp. v. *NRDC*, 435 U.S. 519, 553 (1978). Also, environmental objections that could be raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *Court of Angoon* v. *Hodel*, 803 F.2d 1016, 1022 (9th Cir. 1986) and *Wisconsin Heritages, Inc.* v. *Harris*, 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft environmental impact statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. (Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.)

Comments received in response to this solicitation, including names and addresses of those who comment, will be considered part of the public record on this proposed action and will be available for public inspection. Comments submitted anonymously will be accepted and considered: however, those who submit anonymous comments will not have standing to appeal the subsequent decision under 36 CFR parts 215 or 217. Additionally, pursuant to 7 CFR 1.27(d), any person may request the agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Persons requesting such confidentiality should be aware that under the FOIA, confidentiality may be granted in only very limited circumstances such as to protect trade secrets. The Forest Service will inform the requester of the agency's decision regarding the request for confidentiality, and where the request is denied, the agency will return the submission and notify the requester that the comments may be resubmitted with or without name and address within 10 days.

Dated: November 26, 2001.

David C. Whittekiend,

Soda Springs Ranger District.

[FR Doc. 01–29836 Filed 11–30–01; 8:45 am]

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Forest Service

Squirrel Meadows-Grand Targhee Land Exchange; Caribou-Targhee National Forest, Teton County, WY

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare a Supplemental Environmental Impact Statement.

SUMMARY: The U.S. Department of Agriculture, Forest Service will prepare a Supplemental Environmental Impact Statement (SEIS) to comply with Idaho District Court Judge Winmill's Judgment and Memorandum Decision dated August 8, 2001 in Civil Case Number 01–0176–E–BLW. These documents are available at the District Court of Idaho's Remote Access to Court Electronic Records (RACER) Web page *http://www.id.uscourts.gov/* or upon request from the Forest Service.

The Forest Service proposes to acquire 400 acres of private land at Squirrel Meadows that is considered to be important habitat for the threatened grizzly bear and other wildlife for 120 acres of National Forest System lands at the base of the Grand Targhee Ski and Summer Resort. The proposed action remains essentially the same as in the Final Environmental Impact Statement for the Squirrel Meadows-Grand Targhee Land Exchange, dated December of 2000. In the FEIS the proposal was to exchange up to 158 acres of NFS lands at Grand Targhee; however, in the Record of Decision, the acreage was reduced to 120 acres to balance the appraised values.

DATES: Written comments concerning the analysis required by the Judgment and Memorandum Decision should be received within 15 days of the date of publication of this notice in the **Federal Register**. The Forest Service estimates the Draft SEIS will be filed in February of 2002. The Final SEIS will be filed within 3 months of that date, approximately May of 2002.

ADDRESSES: Send written comments to Caribou-Targhee National Forest Headquarters, Attn: Lisa Klinger, 1405 Hollipark Drive, Idaho Falls, Idaho 83401. The responsible official for this decision is Jerry Reese, Caribou-Targhee National Forest Supervisor.

FOR FURTHER INFORMATION CONTACT: Copies of the December 2000 Final EIS and Record of Decision (ROD) for the Squirrel Meadows-Grand Targhee land Exchange can be obtained by contacting the Caribou-Targhee National Forest Headquarters Office at (208) 557–5760 or the Teton Basin Ranger District at (208) 354–2312. Questions concerning the proposed action and SEIS should be directed to Lisa Klinger, Recreation Specialist, at (208) 557–5760 or Cheryl Probert, Forest Planner, at (209) 557–5821.

SUPPLEMENTARY INFORMATION: Comments received in response to this solicitation, including names and addresses of those who comment, will be considered part of the public record on this proposed action and will be available for public inspection. Comments submitted anonymously will be accepted and considered: however, those who submit anonymous comments will not have standing to appeal the subsequent decision under 36 CFR parts 215 or 217. Additionally, pursuant to 7 CFR 1.27 (d), any person may request the agency to withhold a submission from the public record by showing how the Freedom of Information Act (FOIA) permits such confidentiality. Persons requesting such confidentiality should be aware that under the FOIA, confidentiality may be granted in only very limited circumstances such as to protect trade secrets. The Forest Service will inform the requester of the agency's decision regarding the request for confidentiality, and where the request is denied, the agency will return the

submission and notify the requester that the comments may be resubmitted with or without name and address within 10 days.

The comment period on the draft environmental impact statement will be 45 days from the date the Environmental Protection Agency's notice of availability appears in the **Federal Register**. It is very important that those interested in this proposed action participate at this time. To be most helpful, comments on the draft environmental impact statement should be a specific as possible and may address the adequacy of the statement or the merits of the alternatives discussed. (see the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3).

In addition, Federal court decisions have established that reviews of draft environmental impact statements must structure their participation in the environmental review of the proposal so that it is meaning and alerts an agency to the reviewers' position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978). Environmental objections that could have been raised at the draft stage may be waived if not raised until after completing of the final environmental impact statement. *City of Angoon* v. *Hodel,* (9th Circuit, 1986) and *Wisconsin Heritages, Inc.* v. *Harris,* 490 F. Supp. 1334, 1338 (E.D. Wis. 1980). The reason for this is to ensure that substantive comments and objections area made available to the Forest Service at time when it can meaningfully consider them and respond to them in the final.

Dated: November 26, 2001.

Jerry B. Reese,

Caribou-Targhee Forest Supervisor.

[FR Doc. 01–29837 Filed 11–30–01; 8:45 am]

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Forest Service

Black Ant Fire Salvage EIS—Lewis and Clark National Forest

AGENCY: Forest Service, USDA.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an environmental impact statement on a proposal to salvage fire killed trees on approximately 1,000 acres on the Lewis and Clark National Forest, in Meagher County, Montana. The Lost Fork Fire burned an estimated 2,300 acres in September of 2001. A preliminary assessment indicated about ⅓ of the burned area contains trees of commercial value. In order to further the purposes of the National Environmental Policy Act and to provide full disclosure of effects, the analysis will be documented in an Environmental Impact Statement (EIS).

DATES: Comments concerning the scope of the analysis, issues, the alternatives, and evaluation of alternatives are requested. A draft document will be provided upon request.

ADDRESSES: Send written comments to Rick Prausa, Forest Supervisor, Lewis and Clark National Forest, 1101 15th Street North, Box 869, Great Falls, MT 59403. Electronic mail may be sent to *rl lewisclark comments@fs.fed.us* (**Note:** there are spaces before and after lewisclark.)

FOR FURTHER INFORMATION CONTACT: Scott Hill, EIS Team Leader, Judith Ranger District, POB 484, Stanford MT, 59479. Phone: (406) 566–2292, Electronic Mail: *shill02@fs.fed.us.*

SUPPLEMENTARY INFORMATION: The Forest Service proposes to salvage fire-killed trees of commercial value on approximately 1,000 acres in the North Fork of the Musselshell and the North Fork of the Smith River drainages on the Lewis and Clark National Forest. The entire project area covers about 2,300 acres in the central portion of the Little Belt Mountains. The purposes of the proposed action is to make use of trees of commercial value while the opportunity exists. No salvage or road construction within identified roadless areas is proposed.

Decisions To Be Made: The Forest Supervisor will decide whether and where salvage activities would take place in the project area. He will decide the number of acres, if any, on which salvage would take place and the treatment methods to be used. He will decide when any management activities would take place, what mitigation measures would be implemented to address concerns, and whether the action requires amendment(s) to the Lewis and Clark Forest Plan

Responsible Official: Rick Prausa, Forest Supervisor, is the Responsible Official for making the decision to implement any of the alternatives evaluated. He will document his decision and rationale in a Record of Decision.

Preliminary Issues: Issues associated with salvage harvest that have been identified during scoping and development of proposed action include impacts of proposed activities on wildlife and fish species and their habitat and soil resources.

Public Involvement, Rationale, and Public Meetings: Scoping for this project will begin in October 2001. A letter will be sent to individuals requesting their comment on the proposed action. A 45-day review period for comments on the Draft EIS will be provided. Comments received will be considered and included in documentation of the Final EIS. The public is encouraged to take part in the process and to visit with Forest Service officials at any time during the analysis and prior to the decision. The Forest Service has sought and will continue to seek information, comments and assistance from Federal, State and local agencies and other individuals or organizations who may be interested in, or affected by, the proposed action.

Electronic Access and Filing Addresses: Comments may be sent by electronic mail (e-mail) to *rl lewisclark comments@fs.fed.us.* Please reference the Black Ant Salvage EIS on the subject line. Also, include your name and mailing address with your comments so documents pertaining to this project may be mailed to you.

Estimated Dates for Filing: The Draft EIS is expected to be filed with the Environmental Protection Agency (EPA) and to be available for public review by February, 2002. At that time EPA will publish a Notice of Availability of the draft EIS in the **Federal Register.** The comment period on the draft EIS will be 45 days from the date the EPA publishes the Notice of Availability in the **Federal Register**. It is very important that those interested in the management of this area participate at that time.

The final EIS is scheduled to be completed by May, 2002. In the final EIS, the Forest Service will respond to comments received during the comment period that pertain to the environmental consequences of the action, as well as those pertaining to applicable laws, regulations, and policies. These will be considered in making a decision regarding the proposal.

The Reviewers Obligation To Comment: The Forest Service believes it is important to give reviewers notice at this early stage of several court rulings related to public participation in the environmental review process. First, reviewers of draft environmental impact statement must structure their participation in the environmental review of the proposal so that it is meaningful and alerts an agency to the reviewer's position and contentions. *Vermont Yankee Nuclear Power Corp.* v. *NRDC,* 435 U.S. 519, 553 (1978). Also, environmetnal objections that could be

raised at the draft environmental impact statement stage but that are not raised until after completion of the final environmental impact statement may be waived or dismissed by the courts. *Wisconsin Heritages, Inc.* v. *Harris*, 490 F.Supp. 1334, 1338 (E.D. Wis. 1980). As shown by these court rulings, it is very important that those interested in this proposed action participate by the close of the 45-day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider them and respond to them in the final environmental impact statement.

To assist the Forest Service in identifying and considering issues and concerns on the proposed action, comments on the draft environmental impact statement should be as specific as possible. It is also helpful if comments refer to specific pages or chapters of the draft statement. Comments may also address the adequacy of the draft environmental impact statement or the merits of the alternatives formulated and discussed in the statement. Reviewers may wish to refer to the Council on Environmental Quality Regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Dated: November 27, 2001.

Rick Prausa,

Lewis and Clark Forest Supervisor.

BILLING CODE 3410–11–M

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

South Texas Electric Cooperative, Inc.; Notice of Finding of No Significant Impact

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of finding of no significant impact.

SUMMARY: Notice is hereby given that the Rural Utilities Service (RUS) has made a finding of no significant impact (FONSI) with respect to a request from South Texas Electric Cooperative (STEC) for assistance from RUS to finance the construction and operation of a 177 MW combined-cycle combustion turbine generation facility in Victoria County, Texas.

FOR FURTHER INFORMATION CONTACT: Dennis E. Rankin, Environmental Protection Specialist, RUS, Engineering and Environmental Staff, Stop 1571, 1400 Independence Avenue, SW., Washington, DC 20250–1571, telephone: (202) 720–1953 or e-mail: *drankin@rus.usda.gov*.

SUPPLEMENTARY INFORMATION: STEC is proposing to construct a combined-cycle combustion turbine generation plant at the existing Sam Rayburn Plant which is located in Nursery, Texas. The 177 MW capacity project would consist of three combustion turbine units connected to a single combined-cycle unit. Approximately 5.5 acres of the existing site will be needed for the proposed project. The existing plant infrastructure will be utilized for this new generation addition including existing gas lines, cooling water ponds and switchyard.

Copies of the Environmental Assessment and FONSI are available for review at, or can be obtained from, RUS at the address provided herein, or from Mr. John Packard, STEC, FM 447, Nursery, Texas 77976, telephone: (361) 575–6491.

Dated: November 26, 2001.

Blaine D. Stockton,

Assistant Administrator, Electric Program, Rural Utilities Service.

BILLING CODE 3410–15–P

DEPARTMENT OF COMMERCE

International Trade Administration

Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation; Opportunity To Request Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of opportunity to request administrative review of antidumping or countervailing duty order, finding, or suspended investigation.

Background

Each year during the anniversary month of the publication of an antidumping or countervailing duty order, finding, or suspension of investigation, an interested party, as defined in section 771(9) of the Tariff Act of 1930, as amended, may request, in accordance with section 351.213 (2001) of the Department of Commerce (the Department) Regulations, that the Department conduct an administrative review of that antidumping or countervailing duty order, finding, or suspended investigation.

Opportunity To Request a Review

Not later than the last day of December 2001, interested parties may request administrative review of the following orders, findings, or suspended investigations, with anniversary dates in December for the following periods:

	Period
Antidumping Duty Proceedings	
Brazil:	
Certain Carbon Steel Butt-Weld Pipe Fittings, A–351–602	12/1/00–11/30/01
Silicomanganese, A–351–824	12/1/00–11/30/01
Chile: Certain Preserved Mushrooms,A–337–804	12/1/00–11/30/01
India: Stainless Steel Wire Rod, A–533–808	12/1/00–11/30/01
Japan:	
Drafting Machines and Parts Thereof, A–588–811	12/1/00–11/30/01
Polychloroprene Rubber, A–588–046	12/1/00–11/30/01
P.C. Steel Wire Strand, A–588–068	12/1/00–11/30/01
Vector Supercomputers, A–588–841[1]	10/1/00–9/30/01
Mexico: Porcelain-on-Steel Cooking Ware, A–201–504	12/1/00–11/30/01
Republic of Korea: Welded ASTM A–312 Stainless Steel Pipe, A–580–810	12/1/00–11/30/01
Taiwan:	
Carbon Steel Butt-Weld Pipe Fittings, A–583–605	12/1/00–11/30/01
Porcelain-On-Steel Cooking Ware, A–583–508	12/1/00–11/30/01
Welded ASTM A–312 Stainless Steel Pipe, A–583–815	12/1/00–11/30/01

	Period
The People's Republic of China:	
Cased Pencils, A–570–827	12/1/00–11/30/01
Porcelain-on-Steel Cooking Ware, A–570–506	12/1/00–11/30/01
Silicomanganese, A–570–828	12/1/00–11/30/01
Countervailing Duty Proceedings	
None	
Suspension Agreements	
None	

[1] On October 1, 2001 (66 FR 49923) this order was inadvertently listed in the opportunity notice for October cases. This case has been revoked and the effective date of the revocation is 1/1/2000.

In accordance with section 351.213(b) of the regulations, an interested party as defined by section 771(9) of the Act may request in writing that the Secretary conduct an administrative review. For both antidumping and countervailing duty reviews, the interested party must specify the individual producers or exporters covered by an antidumping finding or an antidumping or countervailing duty order or suspension agreement for which it is requesting a review, and the requesting party must state why it desires the Secretary to review those particular producers or exporters. If the interested party intends for the Secretary to review sales of merchandise by an exporter (or a producer if that producer also exports merchandise from other suppliers) which were produced in more than one country of origin and each country of origin is subject to a separate order, then the interested party must state specifically, on an order-by-order basis, which exporter(s) the request is intended to cover.

Six copies of the request should be submitted to the Assistant Secretary for Import Administration, International Trade Administration, Room 1870, U.S. Department of Commerce, 14th Street & Constitution Avenue, NW., Washington, DC 20230. The Department also asks parties to serve a copy of their requests to the Office of Antidumping/Countervailing Duty Enforcement, Attention: Sheila Forbes, in room 3065 of the main Commerce Building. Further, in accordance with section 351.303(f)(l)(i) of the regulations, a copy of each request must be served on every party on the Department's service list.

The Department will publish in the **Federal Register** a notice of "Initiation of Administrative Review of Antidumping or Countervailing Duty Order, Finding, or Suspended Investigation" for requests received by the last day of December 2001. If the Department does not receive, by the last day of December 2001, a request for review of entries covered by an order, finding, or suspended investigation listed in this notice and for the period identified above, the Department will instruct the Customs Service to assess antidumping or countervailing duties on those entries at a rate equal to the cash deposit of (or bond for) estimated antidumping or countervailing duties required on those entries at the time of entry, or withdrawal from warehouse, for consumption and to continue to collect the cash deposit previously ordered.

This notice is not required by statute but is published as a service to the international trading community.

Dated: November 27, 2001.

Holly A. Kuga,

Senior Office Director, Group II, Office 4, Import Administration.

[FR Doc. 01–29895 Filed 11–30–01; 8:45 am]

BILLING CODE 3510–DS–F

DEPARTMENT OF COMMERCE

International Trade Administration

Notice of Initiation of Five-Year ("Sunset") Reviews

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of initiation of five-year ("sunset") reviews.

SUMMARY: In accordance with section 751(c) of the Tariff Act of 1930, as amended ("the Act"), the Department of Commerce ("the Department") is automatically initiating a five-year ("sunset") review of the suspended antidumping investigation listed below. The International Trade Commission ("the Commission") is publishing concurrently with this notice its notice of *Institution of Five-Year Review* covering this same suspended investigation.

FOR FURTHER INFORMATION CONTACT: Martha V. Douthit, Office of Policy, Import Administration, International Trade Administration, U.S. Department of Commerce, at (202) 482–5050, or Vera Libeau, Office of Investigations, U.S. International Trade Commission, at (202) 205–3176.

SUPPLEMENTARY INFORMATION:

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the "Act"), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department of Commerce's ("Department") regulations are to 19 CFR part 351 (2001). Pursuant to sections 751(c) and 752 of the Act, an antidumping ("AD") or countervailing duty ("CVD") order will be revoked, or the suspended investigation will be terminated, unless revocation or termination would be likely to lead to continuation or recurrence of (1) dumping or a countervailable subsidy, and (2) material injury to the domestic industry.

The Department's procedures for the conduct of sunset reviews are set forth in 19 CFR 351.218. Guidance on methodological or analytical issues relevant to the Department's conduct of sunset reviews is set forth in the Department's Policy Bulletin 98:3—*Policies Regarding the Conduct of Five-year ("Sunset") Reviews of Antidumping and Countervailing Duty Orders; Policy Bulletin*, 63 FR 18871 (April 16, 1998) ("*Sunset Policy Bulletin*").

Background

Initiation of Review

In accordance with 19 CFR 351.218 we are initiating a sunset review of the following suspended investigation:

DOC case No.	ITC case No.	Country	Product
A–588–839	731–TA–740	Japan	Sodium Azide

Filing Information

As a courtesy, we are making information related to sunset proceedings, including copies of the *Sunset Regulations* (19 CFR 351.218) and *Sunset Policy Bulletin*, the Department's schedule of sunset reviews, case history information (*i.e.*, previous margins, duty absorption determinations, scope language, import volumes), and service lists, available to the public on the Department's sunset Internet website at the following address: *"http://ia.ita.doc.gov/sunset/"*.

All submissions in this sunset review must be filed in accordance with the Department's regulations regarding format, translation, service, and certification of documents. These rules can be found at 19 CFR 351.303. Also, we suggest that parties check the Department's sunset website for any updates to the service list before filing any submissions. The Department will make additions to and/or deletions from the service list provided on the sunset website based on notifications from parties and participation in this review. Specifically, the Department will delete from the service list all parties that do not submit a substantive response to the notice of initiation.

Because deadlines in a sunset review are, in many instances, very short, we urge interested parties to apply for access to proprietary information under administrative protective order ("APO") immediately following publication in the **Federal Register** of the notice of initiation of the sunset review. The Department's regulations on submission of proprietary information and eligibility to receive access to business proprietary information under APO can be found at 19 CFR 351.304–306.

Information Required From Interested Parties

Domestic interested parties (defined in 19 CFR 351.102) wishing to participate in this sunset review must respond not later than 15 days after the date of publication in the **Federal Register** of the notice of initiation by filing a notice of intent to participate. The required contents of the notice of intent to participate are set forth at 19 CFR 351.218(d)(1)(ii). In accordance with the Department's regulations, if we do not receive a notice of intent to participate from at least one domestic interested party by the 15-day deadline, the Department will automatically revoke the order without further review.

If we receive an order-specific notice of intent to participate from a domestic interested party, the Department's regulations provide that *all parties* wishing to participate in the sunset review must file substantive responses not later than 30 days after the date of publication in the **Federal Register** of the notice of initiation. The required contents of a substantive response, on an order-specific basis, are set forth at 19 CFR 351.218(d)(3). Note that certain information requirements differ for foreign and domestic parties. Also, note that the Department's information requirements are distinct from the International Trade Commission's information requirements. Please consult the Department's regulations for information regarding the Department's conduct of sunset reviews.[1] Please consult the Department's regulations at 19 CFR part 351 for definitions of terms and for other general information concerning antidumping and countervailing duty proceedings at the Department.

This notice of initiation is being published in accordance with section 751(c) of the Act and 19 CFR 351.218(c).

Dated: November 27, 2001.

Richard W. Moreland,

Acting Assistant Secretary, for Import Administration.

[FR Doc. 01–29893 Filed 11–30–01; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–570–868]

Notice of Preliminary Determination of Sales at Less Than Fair Value: Folding Metal Tables and Chairs From the People's Republic of China

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Helen Kramer or John Drury, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–0405, and (202) 482–0195, respectively.

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended ("the Act"), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act ("URAA"). In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR part 351 (2000).

Preliminary Determination

We preliminarily determine that folding metal tables and chairs ("FMTC") from the People's Republic of China ("PRC") are being, or are likely to be, sold in the United States at less than fair value ("LTFV"), as provided in section 733 of the Act. The estimated margins of sales at LTFV are shown in the "Suspension of Liquidation" section of this notice.

Case History

This investigation was initiated on May 17, 2001. See Initiation of Antidumping Duty Investigation: Folding Metal Tables and Chairs from the People's Republic of China, 66 FR 28728, May 24, 2001 ("Notice of Initiation"). The Department set aside a period for all interested parties to raise issues regarding product coverage. See Notice of Initiation at 28730. We received comments regarding product coverage as follows:

(1) Cosco, Inc. (an importer of the merchandise under investigation) suggested on June 6, 2001, that folding tables and folding chairs should be considered as primarily of metal only if at least two structural components consist entirely of metal;

(2) Meco Corporation (the petitioner) responded on June 18, 2001, that Cosco's suggested clarification was an impermissible attempt to change the intended scope of the investigation to exempt merchandise that the petition expressly covers, and to permit future

[1] A number of parties commented that these interim-final regulations provided insufficient time for rebuttals to substantive responses to a notice of initiation, 19 CFR 351.218(d)(4)). As provided in 19 CFR 351.302(b), the Department will consider individual requests for extension of that five-day deadline based upon a showing of good cause.

circumvention of antidumping duty order through minor alterations; and

(3) On October 5, 2001, National Public Seating Corp. ("NPSC"), an importer, asked that certain double-hinged chairs be excluded from the scope. On October 26, 2001, Meco responded that the petition expressly covers the type of chair NPSC sought to exclude.

On June 11, 2001, the United States International Trade Commission ("ITC") issued its affirmative preliminary determination that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of the subject merchandise from the PRC, which was published in the **Federal Register** on June 15, 2001. See Certain Folding Metal Tables and Chairs From China, 66 FR 32644.

On June 21, 2001, the Department issued a questionnaire requesting volume and value of U.S. sales information to the Embassy of the PRC and to the Ministry of Foreign Trade and Economic Development, and sent courtesy copies to the following known producers/exporters of subject merchandise identified in the petition: Dongguan Shichang Metals Factory Co., Ltd., Xiamen New-Tec Jcc Co., Ltd., Samwise Hardware Products Factory, Office Max, Inc., Fujian Anxi Yinfa Handicrafts Co., Ltd., Shin Crest (Div. Taiwan Shin Yeh Enterprise Co.), Shian International Co., Tian Jian Industries (Group) Co. Ltd., China National Aero-Technology Import & Export Corp., Numark Industries Co., Ltd., Sun Son Trading Co. (Agent of Supper Chair Enterprise Co., Ltd.), Fujian Province Materials General Co., Xiaguang Industry Co., Ltd., China North Industries Guangzhou, Ningbo United Group Co., Ltd., China Precision Machinery, Xiamen Xiangjiang Imp. and Exp. Corp., Wuxi East Grace Garments Imp. Exp. Corp., Mitex International (H K) Ltd., and Nanhai Hongda Metal Products Co., Ltd. Additionally, we notified the PRC Government that it was responsible for ensuring that volume and value information for those companies and for all other companies not identified in our list be provided to the Department.

A timely response to the Department's questionnaire seeking volume and value of U.S. sales information was received on July 9, 2001, from Dongguan Shichang Metals Factory Co. Ltd. ("Dongguan"). Because Feili Furniture Development Co., Ltd. and Feili (Fujian) Co., Ltd. ("Feili Group"), New-Tec Integration Co., Ltd. ("New-Tec") and Shin Crest Pte. Ltd. ("Shin Crest") did not file public versions of their original submissions in proper form on July 6 and 9, 2001, respectively, we rejected these submissions, but indicated they would be accepted if refiled in proper form. They were refiled in proper form on July 13, 2001, by Shin Crest and on July 16, 2001, by Feili Group and New-Tec. On August 3, 2001, the Department issued the respondent selection memorandum, selecting Feili Group and Shin Crest to be investigated (see Selection of Respondents section below). Additional responses were received on August 9, 2001, from Himark Industry Corp. Ltd. and on September 13, 2001, from Supper Chair Enterprise Co., Ltd., which were rejected by the Department as untimely.

On July 12, 2001, Meco proposed product characteristics. On August 6, 2001, the Department issued its antidumping questionnaire to Feili Group and Shin Crest and a letter to interested parties providing an opportunity to comment on the Department's proposed product characteristics. Comments were submitted on August 13, 2001 by Cosco proposing additional characteristics, which were not accepted by the Department.

On August 7, 2001, the Department received requests from Dongguan and New-Tec to be treated as voluntary respondents in this investigation. Dongguan also requested that if it were not selected as a voluntary respondent that it be allowed to answer section A of the questionnaire and be granted a rate equal to the average of the mandatory respondents' rates.

The Department received section A responses from Feili Group and New-Tec on August 27, 2001, and from Dongguan and Shin Crest on September 4, 2001. On September 7, 2001, petitioners submitted comments regarding respondents' section A responses. On September 12, 2001, the Department received a section C and D questionnaire response from Dongguan. On September 13, 2001, the Department issued section A supplemental questionnaires to Feili Group and Shin Crest and received sections C and D questionnaire responses from Feili Group, New-Tec and Shin Crest. The Department received responses from Feili Group and Shin Crest to its section A supplementals on September 27, 2001. On September 24, 2001, petitioners submitted comments on respondents' section C and D responses. On September 25 and 27, 2001, the Department issued sections C and D supplemental questionnaires to Shin Crest and Feili Group, respectively, and received responses on October 10 and 12, 2001.

On August 29, 2001, the Department issued a request for parties to submit comments on surrogate market-economy country selection, and publicly available information for valuing the factors of production. The petitioner and Feili Group submitted comments in response to these requests on September 28, 2001. On October 1, 2001, Shin Crest submitted surrogate value data to the Department. On October 9, 2001, and subsequent dates petitioner, Feili Group and Shin Crest provided additional information and comments on surrogate country selection and surrogate value data. The petitioner proposed to use Indonesia as the surrogate country, although Indian data were used in the petition. The respondents proposed to use India. See Surrogate Country section below.

On October 4, 2001, petitioner alleged that Feili Group and Shin Crest purchased cold-rolled steel inputs from market-economy suppliers at prices that were below the producers' cost of production, or subsidized, or both. On October 15, 2001, Shin Crest commented that the Department's regulations and practice require the use of actual prices paid to market-economy suppliers in NME investigations. Feili Group commented on the same date that petitioner's argument regarding subsidized Korean steel prices is based on a case that was terminated by the ITC. On November 6, 2001, petitioner responded that the Department has the authority to disregard the price that an NME producer pays for an input purchased from a market-economy supplier if it has reason to believe or suspect that the input has been dumped or subsidized.

In response to a request by petitioners for a thirty-day postponement of the preliminary determination, the Department postponed the deadline for the preliminary determination to November 5, 2001, pursuant to section 733(c)(1)(A) of the Act. See Notice of Postponement of Preliminary Antidumping Duty Determination: Folding Metal Tables and Chairs from the People's Republic of China, 66 FR 50608 (October 4, 2001). On October 23, 2001, petitioners requested an additional postponement. On November 9, 2001, the Department published a notice extending the deadline to November 23, 2001 (66 FR 56635).

Period of Investigation

The period of investigation (POI) is October 1, 2000 through March 31, 2001. This period corresponds to the two most recent fiscal quarters prior to the month of the filing of the petition

(April 27, 2001). See 19 CFR 351.204(b)(1).

Scope of Investigation

The merchandise subject to this investigation consists of assembled and unassembled folding tables and folding chairs made primarily or exclusively from steel or other metal, as described below:

(1) Assembled and unassembled folding tables made primarily or exclusively from steel or other metal ("folding metal tables"). Folding metal tables include square, round, rectangular, and any other shapes with legs affixed with rivets, welds, or any other type of fastener, and which are made most commonly, but not exclusively, with a hardboard top covered with vinyl or fabric. Folding metal tables have legs that mechanically fold independently of one another, and not as a set. The subject merchandise is commonly, but not exclusively, packed singly, in multiple packs of the same item, or in five piece sets consisting of four chairs and one table. Specifically excluded from the scope of folding metal tables are the following:

- Lawn furniture;
- Trays commonly referred to as "TV trays";
- Side tables;
- Child-sized tables;
- Portable counter sets consisting of rectangular tables 36″ high and matching stools; and
- Banquet tables. A banquet table is a rectangular table with a plastic or laminated wood table top approximately 28″ to 36″ wide by 48″ to 96″ long and with a set of folding legs at each end of the table. One set of legs is composed of two individual legs that are affixed together by one or more cross-braces using welds or fastening hardware. In contrast, folding metal tables have legs that mechanically fold independently of one another, and not as a set.

(2) Assembled and unassembled folding chairs made primarily or exclusively from steel or other metal ("folding metal chairs"). Folding metal chairs include chairs with one or more cross-braces, regardless of shape or size, affixed to the front and/or rear legs with rivets, welds or any other type of fastener. Folding metal chairs include: Those that are made solely of steel or other metal; those that have a back pad, a seat pad, or both a back pad and a seat pad; and those that have seats or backs made of plastic or other materials. The subject merchandise is commonly, but not exclusively, packed singly, in multiple packs of the same item, or in five piece sets consisting of four chairs and one table. Specifically excluded from the scope of folding metal chairs are the following:

- Folding metal chairs with a wooden back or seat, or both;
- Lawn furniture;
- Stools;
- Chairs with arms; and
- Child-sized chairs.

The subject merchandise is currently classifiable under subheadings 9401710010, 9401710030, 9401790045, 9401790050, 9403200010 and 9403200030 of the HTSUS. Although the HTSUS subheadings are provided for convenience and U.S. Customs Service purposes, the Department's written description of the merchandise is dispositive.

Selection of Respondents

Section 777A(c)(1) of the Act directs the Department to calculate individual dumping margins for each known exporter and producer of the subject merchandise. However, section 777A(c)(2) of the Act gives the Department discretion, when faced with a large number of exporters/producers, to limit its examination to a reasonable number of such companies if it is not practicable to examine all companies. Where it is not practicable to examine all known producers/exporters of subject merchandise, this provision permits the Department to investigate either: (A) A sample of exporters, producers, or types of products that is statistically valid based on the information available to the Department at the time of selection; or (B) exporters and producers accounting for the largest volume of the subject merchandise that can reasonably be examined. After consideration of the complexities expected to arise in this proceeding and the resources available to the Department, we determined that it was not practicable in this investigation to examine all known producers/exporters of subject merchandise. Instead, we limited our examination to two producers, based on the relative volumes of their reported U.S. sales during the POI.

The subject merchandise is classified under broad HTSUS headings and cannot be distinguished from non-subject merchandise in official import statistics. Consequently, the Department could not use this information to determine the volume of imports of the subject merchandise. Therefore, to determine the two largest producers/exporters of subject merchandise for the PRC, we relied on the data submitted by the producers/exporters in response to the Department's June 21, 2001, request for information, which was sent to all companies identified in the petition, as well as to the PRC Government and Embassy in Washington. The data submitted by the four producers/exporters that submitted timely responses to the quantity and value questionnaire show that, of these producers/exporters, Feili Group and Shin Crest were the two largest producers/exporters of subject merchandise to the United States during the POI. Feili Group was not identified in the petition, but responded to the Department's request for information. While information submitted by petitioners indicates that these producers/exporters may not constitute the universe of possible producers/exporters of subject merchandise during the POI, because we did not receive any response from the PRC indicating what constitutes the complete universe, we must rely on data submitted by the four producers/exporters for purposes of respondent selection. See Memorandum from Richard O. Weible to Joseph A. Spetrini on Respondent Selection (August 3, 2001).

Non-Market Economy Country Status

The Department has treated the PRC as a non-market economy ("NME") country in all past antidumping investigations (see, e.g., Notice of Final Determination of Sales at Less Than Fair Value: Bulk Aspirin From the People's Republic of China, 65 FR 33805 (May 25, 2000); Notice of Final Determination of Sales at Less Than Fair Value: Certain Non-Frozen Apple Juice Concentrate from the People's Republic of China, 65 FR 19873 (April 13, 2000) (Apple Juice)). A designation as an NME remains in effect until it is revoked by the Department (see section 771(18)(C) of the Act). No party to this investigation has requested a revocation of the PRC's NME status. We have, therefore, preliminarily determined to continue to treat the PRC as an NME country. When the Department is investigating imports from an NME, section 773(c)(1) of the Act directs us to base the normal value ("NV") on the NME producer's factors of production, valued in a comparable market economy that is a significant producer of comparable merchandise. The sources of individual factor prices are discussed under the "Normal Value" section, below.

Furthermore, no interested party has requested that the folding metal tables and chairs industry in the PRC be treated as a market-oriented industry and no information has been provided that would lead to such a determination. Therefore, we have not treated the folding metal tables and chairs industry

in the PRC as a market-oriented industry in this investigation.

Separate Rates

In proceedings involving NME countries, the Department begins with a rebuttable presumption that all companies within the country are subject to government control and thus should be assessed a single antidumping duty deposit rate. It is the Department's policy to assign all exporters of merchandise subject to investigation in an NME country this single rate, unless an exporter can demonstrate that it is sufficiently independent so as to be entitled to a separate rate. The two companies that the Department selected to investigate (i.e., Feili Group and Shin Crest) and the PRC companies that were not selected as mandatory respondents by the Department for this investigation, but which have submitted separate rates responses (i.e., New-Tec and Dongguan) have provided the requested separate rates information and have stated that, for each company, there is no element of government ownership or control.

We considered whether each PRC company is eligible for a separate rate. The Department's separate rate test to determine whether the exporters are independent from government control does not consider, in general, macroeconomic/border-type controls, e.g., export licenses, quotas, and minimum export prices, particularly if these controls are imposed to prevent dumping. The test focuses, rather, on controls over the investment, pricing, and output decision-making process at the individual firm level. See, e.g., Certain Cut-to-Length Carbon Steel Plate from Ukraine: Final Determination of Sales at Less than Fair Value, 62 FR 61754, 61757 (November 19, 1997); Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, from the People's Republic of China: Final Results of Antidumping Duty Administrative Review, 62 FR 61276, 61279 (November 17, 1997).

To establish whether a firm is sufficiently independent from government control of its export activities to be entitled to a separate rate, the Department analyzes each entity exporting the subject merchandise under a test arising out of the Final Determination of Sales at Less Than Fair Value: Sparklers from the People's Republic of China, 56 FR 20588 (May 6, 1991) ("Sparklers"), as amplified by Final Determination of Sales at Less Than Fair Value: Silicon Carbide from the People's Republic of China, 59 FR 22585 (May 2, 1994) ("Silicon Carbide"). In accordance with the separate rates criteria, the Department assigns separate rates in NME cases only if respondents can demonstrate the absence of both *de jure* and *de facto* governmental control over export activities.

1. Absence of De Jure Control

The Department considers the following *de jure* criteria in determining whether an individual company may be granted a separate rate: (1) An absence of restrictive stipulations associated with an individual exporter's business and export licenses; (2) any legislative enactments decentralizing control of companies; and (3) any other formal measures by the government decentralizing control of companies. See Sparklers, 56 FR at 20508.

All four PRC companies seeking separate rates reported that the subject merchandise was not subject to any government list regarding export provisions or export licensing, and was not subject to export quotas during the POI. Each company also submitted copies of its respective business license. We found no inconsistencies with the exporters' claims of the absence of restrictive stipulations associated with an individual exporter's business license. Our examination of the record indicates that each exporter submitted copies of the legislation of the PRC or documentation demonstrating the statutory authority for establishing the de jure absence of government control over the companies. Thus, we believe that the evidence on the record supports a preliminary finding of *de jure* absence of governmental control based on: (1) an absence of restrictive stipulations associated with the individual exporter's business license; and (2) the applicable legislative enactments decentralizing control of the companies.

2. Absence of De Facto Control

The Department typically considers four factors in evaluating whether each respondent is subject to *de facto* governmental control of its export functions: (1) Whether the export prices are set by or are subject to the approval of a governmental agency; (2) whether the respondent has authority to negotiate and sign contracts and other agreements; (3) whether the respondent has autonomy from the government in making decisions regarding the selection of management; and (4) whether the respondent retains the proceeds of its export sales and makes independent decisions regarding disposition of profits or financing of losses. See Silicon Carbide, 59 FR at 22586–87; see also Notice of Final Determination of Sales at Less Than Fair Value: Furfuryl Alcohol From the People's Republic of China, 60 FR 22544, 22545 (May 8, 1995). As stated in previous cases, there is some evidence that certain enactments of the PRC central government have not been implemented uniformly among different sectors and/or jurisdictions in the PRC. See Silicon Carbide, 56 FR at 22587. Therefore, the Department has determined that an analysis of de facto control is critical in determining whether respondents are, in fact, subject to a degree of governmental control which would preclude the Department from assigning separate rates.

Regarding whether each exporter sets its own export prices independently of the government and without the approval of a government authority, each exporter reported that it determines its prices for sales of the subject merchandise based on the cost of the merchandise, movement expenses, overhead, profit, and the market situation in the United States. Each exporter stated that it negotiates prices directly with its customers. Also, each exporter claimed that its prices are not subject to review or guidance from any governmental organization. Regarding whether each exporter has authority to negotiate and sign contracts and other agreements, our examination of the record indicates that each exporter reported that it has authority to negotiate and sign contracts and other agreements. Also, each exporter claimed that its negotiations are not subject to review or guidance from any governmental organization. There is no evidence on the record to suggest that there is any governmental involvement in the negotiation of contracts.

Regarding whether each exporter has autonomy in making decisions regarding the selection of management our examination of the record indicates that each exporter reported that it has autonomy in making decisions regarding the selection of management. Also, each exporter claimed that its selection of management is not subject to review or guidance from any governmental organization. There is no evidence on the record to suggest that there is any governmental involvement in the selection of management by the exporters.

Regarding whether each exporter retains the proceeds from its sales and makes independent decisions regarding disposition of profits or financing of losses, our examination of the record indicates that each exporter reported that it retains the proceeds of its export sales, using profits according to its business needs. Also, each exporter reported that the allocation of profits is determined by its top management.

There is no evidence on the record to suggest that there is any governmental involvement in the decisions regarding disposition of profits or financing of losses.

Therefore, we determine that the evidence on the record supports a preliminary finding of *de facto* absence of governmental control based on record statements and supporting documentation showing that: (1) Each exporter sets its own export prices independent of the government and without the approval of a government authority; (2) each exporter retains the proceeds from its sales and makes independent decisions regarding disposition of profits or financing of losses; (3) each exporter has the authority to negotiate and sign contracts and other agreements; and (4) each exporter has autonomy from the government regarding the selection of management.

The evidence placed on the record of this investigation by Dongguan, Feili Group, New-Tec and Shin Crest demonstrates an absence of government control, both in law and in fact, with respect to each of the exporter's exports of the merchandise under investigation, in accordance with the criteria identified in Sparklers and Silicon Carbide. Therefore, for the purposes of this preliminary determination, we are granting separate rates to the two mandatory respondents, Feili Group and Shin Crest, and a rate equal to the weighted average of the mandatory respondents' rates (excluding zero or *de minimis* rates and rates based entirely on adverse facts available) to Dongguan and New-Tec, which provided complete questionnaire responses, including supplemental responses. For a full discussion of this issue, see the memorandum from Helen Kramer to Richard Weible, Folding Metal Tables and Chairs from the People's Republic of China: Separate Rates Analysis for the Preliminary Determination, dated November 23, 2001 ("Separate Rates Memorandum").

Facts Available

Section 776(a) of the Act provides that, if an interested party withholds information that has been requested by the Department, fails to provide such information in a timely manner or in the form or manner requested, significantly impedes a proceeding under the antidumping statute, or provides information which cannot be verified, the Department shall use, subject to section 782(d) of the Act, facts otherwise available in reaching the applicable determination. Pursuant to section 782(e) of the Act, the Department shall not decline to consider submitted information if that information is necessary to the determination but does not meet all of the requirements established by the Department provided that all of the following requirements are met: (1) The information is submitted by the established deadline; (2) the information can be verified; (3) the information is not so incomplete that it cannot serve as a reliable basis for reaching the applicable determination; (4) the interested party has demonstrated that it acted to the best of its ability in providing the information and meeting Department requirements; and (5) the information can be used without undue difficulties.

Section 776(a)(2)(B) of the Act requires the Department to use facts available when a party does not provide the Department with information by the established deadline or in the form and manner requested by the Department. In addition, section 776(b) of the Act provides that, if the Department finds that an interested party "has failed to cooperate by not acting to the best of its ability to comply with a request for information," the Department may use information that is adverse to the interests of that party as facts otherwise available.

PRC-Wide Rate

As discussed above (see "Separate Rates"), all PRC producers/exporters that do not qualify for a separate rate are treated as a single enterprise. As noted above in "Case History," all producers/exporters were given the opportunity to respond to the Department's questionnaire regarding volume and value of U.S. sales. As explained above, we received timely responses from Dongguan, Feili Group, New-Tec, and Shin Crest. Late responses were submitted by Himark Industry Corp. Ltd. and Supper Chair Enterprise Co., Ltd. The Department did not receive responses from the following companies identified in the petition as exporters of the subject merchandise to the United States during the POI: Samwise Hardware Products Factory, Office Max, Inc., Fujian Anxi Yinfa Handicrafts Co., Ltd., Shian International Co., Tian Jian Industries (Group) Co. Ltd., China National Aero-Technology Import & Export Corp., Numark Industries Co., Ltd., Sun Son Trading Co. (Agent of Supper Chair Enterprise Co., Ltd.), Fujian Province Materials General Co., Xiaguang Industry Co., Ltd., China North Industries Guangzhou, Ningbo United Group Co., Ltd., China Precision Machinery, Xiamen Xiangjiang Imp. and Exp. Corp., Wuxi East Grace Garments Imp. Exp. Corp., Mitex International (H K) Ltd., and Nanhai Hongda Metal Products Co., Ltd.

Because these companies did not respond to our June 21, 2001, request for information, we assume that these companies also exported the subject merchandise to the United States during the POI. Consequently, we are applying a single antidumping rate—the PRC-wide rate—to all other exporters in the PRC based on our presumption that those respondents who failed to demonstrate entitlement to a separate rate constitute a single enterprise under common control by the Chinese government. See, e.g., Final Determination of Sales at Less Than Fair Value: Synthetic Indigo from the People's Republic of China, 65 FR 25706, 25707 (May 3, 2000). The PRC-wide rate applies to all entries of subject merchandise except for entries from Dongguan, Feili Group, New-Tec, and Shin Crest.

As set forth above, section 776(b) of the Act provides that, in selecting from among the facts available, the Department may employ adverse inferences against an interested party if that party failed to cooperate by not acting to the best of its ability to comply with requests for information. See also "Statement of Administrative Action" accompanying the URAA, H.R. Rep. No. 103–316, 870 (1994) ("SAA"). The Department finds that exporters (i.e., the single PRC entity) who did not respond to our request for information have failed to cooperate to the best of their ability. Therefore, the Department preliminarily finds that, in selecting from among the facts available, an adverse inference is appropriate. See, e.g., Notice of Preliminary Determination of Sales at Less Than Fair Value: Stainless Steel Wire Rod From Germany, 63 FR 10847 (March 5, 1998).

Section 776(b) provides that an adverse inference may include reliance on information derived from (1) the petition, (2) the final determination in the investigation segment of the proceeding, (3) a previous review under section 751 of the Act or a determination under section 753 of the Act, or (4) any other information placed on the record. The Department's practice when selecting an adverse rate from among the possible sources of information is to ensure that the margin is sufficiently adverse "as to effectuate the purpose of the facts available role to induce respondents to provide the Department with complete and accurate information in a timely manner." See Static Random Access Memory Semiconductors from Taiwan: Final Determination of Sales at Less than Fair

Value, 63 FR 8909, 8932 (February 23, 1998). The Department also considers the extent to which a party may benefit from its own lack of cooperation in selecting a rate. See Roller Chain, Other than Bicycle, from Japan; Notice of Final Results and Partial Recission of Antidumping Duty Administrative Review, 62 FR 60472, 60477 (November 10, 1997). Accordingly, in order to ensure that the rate is sufficiently adverse so as to induce cooperation by the PRC entity, we have preliminarily assigned the highest dumping margin calculated in this segment of the proceeding, which is 134.77 percent, to the PRC entity, based on our presumption that those respondents who failed to demonstrate entitlement to a separate rate constitute a single enterprise under common control by the Chinese government. See, e.g., Final Determination of Sales at Less Than Fair Value: Synthetic Indigo from the People's Republic of China, 65 FR 25706, 25707 (May 3, 2000) ("Synthetic Indigo").

Because this is a preliminary margin, the Department will consider all margins on the record at the time of the final determination for the purpose of determining the most appropriate final PRC-wide margin. See Notice of Preliminary Determination of Sales at Less Than Fair Value: Solid Fertilizer Grade Ammonium Nitrate From the Russian Federation, 65 FR 1139 (January 7, 2000).

Surrogate Country

When the Department is investigating imports from an NME country, section 773(c)(1) of the Act directs it to base NV, in most circumstances, on the NME producer's factors of production, valued in a surrogate market-economy country or countries considered to be appropriate by the Department. In accordance with section 773(c)(4) of the Act, the Department, in valuing the factors of production, shall utilize, to the extent possible, the prices or costs of factors of production in one or more market-economy countries that: (A) are at a level of economic development comparable to that of the NME country; and (B) are significant producers of comparable merchandise. The sources of the surrogate factor values are discussed under the NV section below.

The Department has determined that India, Pakistan, Indonesia, Sri Lanka and the Philippines are countries comparable to the PRC in terms of economic development. See Memorandum from Jeffrey May to Richard Weible, "Antidumping Duty Investigation of Folding Metal Tables and Chairs from the People's Republic of China," dated July 31, 2001. Customarily, we select an appropriate surrogate country based on the availability and reliability of data from the countries. For PRC cases, the primary surrogate country has most often been India, if it is a significant producer of comparable merchandise. In this case, we have found that India is a significant producer of comparable merchandise. See Surrogate Country Selection Memorandum to The File from John Drury and Helen M. Kramer, dated November 23, 2001, ("Surrogate Country Memorandum").

We used India as the primary surrogate country and, accordingly, we have calculated NV using Indian prices to value the PRC producers' factors of production, when available and appropriate. See Surrogate Country Memorandum. We have obtained and relied upon publicly available information wherever possible. See Factor Valuation Memorandum to The File from Case Analysts, dated November 23, 2001 ("Factor Valuation Memorandum").

In accordance with section 351.301(c)(3)(i) of the Department's regulations, for the final determination in an antidumping investigation, interested parties may submit publicly available information to value factors of production within 40 days after the date of publication of this preliminary determination.

Fair Value Comparisons

To determine whether sales of folding metal tables and chairs to the United States by Feili Group and Shin Crest were made at less than fair value, we compared export price ("EP") to normal value ("NV"), as described in the "Export Price" and "Normal Value" sections of this notice. In accordance with section 777A(d)(1)(A)(i) of the Act, we calculated weighted-average EPs.

Export Price

In accordance with section 772(a) of the Act, export price is the price at which the subject merchandise is first sold (or agreed to be sold) before the date of importation by the producer or exporter of the subject merchandise outside of the United States to an unaffiliated purchaser in the United States or to an unaffiliated purchaser for exportation to the United States, as adjusted under subsection (c).

In accordance with section 772(a) of the Act, we used EP for Feili Group and Shin Crest because the subject merchandise was sold directly to unaffiliated customers in the United States prior to importation and because CEP was not otherwise indicated. In accordance with section 777A(d)(1)(A)(i) of the Act, we compared POI-wide weighted-average EPs to the NVs.

Feili Group

We calculated weighted-average EP for Feili Group's U.S. sales, based on packed prices, F.O.B. port of export, to unaffiliated purchasers in the United States. We made deductions for movement expenses in accordance with section 772(c)(2)(A) of the Act. Feili Group reported that it paid a fee to an unaffiliated trucking company in the PRC which included all movement expenses. Therefore, Feili Group reported all movement expenses paid in a single field. The charges in this single field include brokerage and handling, and foreign inland freight. Because transportation for all sales was provided by a NME company, we based movement expenses associated with these sales on surrogate values.

Shin Crest

We calculated EP for Shin Crest based on packed F.O.B. prices to unaffiliated purchasers in the United States. We made deductions for movement expenses in accordance with section 772(c)(2)(A) of the Act. These included domestic inland freight and brokerage and handling charges. Shin Crest reported that it used NME carriers for foreign inland freight to certain ports. We based these expenses for these sales on Indian surrogate freight rates and the distances to the respective ports. For other sales we used Shin Crest's reported foreign inland freight expenses paid to market-economy carriers. For all sales we used the reported brokerage and handling charges, which were paid to a market-economy company. See Factor Valuation Memorandum.

Normal Value

Section 773(c)(1) of the Act provides that the Department shall determine the normal value ("NV") using a factors-of-production methodology if: (1) The merchandise is exported from an NME country; and (2) the information does not permit the calculation of NV using home-market prices, third-country prices, or constructed value under section 773(a) of the Act.

Factors of production include: (1) Hours of labor required; (2) quantities of raw materials employed; (3) amounts of energy and other utilities consumed; and (4) representative capital costs. We used factors of production, reported by respondents, for materials, energy, labor, by-products, and packing.

In accordance with 19 CFR 351.408(c)(1), the Department will

normally use publicly available information to value factors of production. However, the Department's regulations also provide that where a producer sources an input from a market economy and pays for it in market-economy currency, the Department employs the actual price paid for the input to calculate the factors-based NV. Id.; see also *Lasko Metal Products* v. *United States*, 43 F. 3d 1442, 1445–1446 (Fed. Cir. 1994) ("Lasko"). Respondents Feili Group and Shin Crest reported that some of their inputs were sourced from market economies and paid for in a market-economy currency. See Factor Valuation Memorandum, dated November 23, 2001 for a listing of these inputs.

In accordance with section 773(c) of the Act, we calculated NV based on factors of production reported by respondents for the POI. To calculate NV, the reported per-unit factor quantities were multiplied by publicly available Indian surrogate values (except as noted below). In selecting the surrogate values, we considered the quality, specificity, and contemporaneity of the data. As appropriate, we adjusted input prices by including freight costs to make them delivered prices. Specifically, we added to Indian import surrogate values a surrogate freight cost using the shorter of the reported distance from the domestic supplier to the factory or the distance from the nearest seaport to the factory. This adjustment is in accordance with the Court of Appeals for the Federal Circuit's decision in *Sigma Corp.* v. *United States*, 117 F. 3d 1401 (Fed. Cir. 1997). For a detailed description of all surrogate values used for respondents, see Factor Valuation Memorandum.

Except as noted below, we valued raw material inputs using the weighted-average unit import values for the period April 2000—February 2001 derived from the Monthly Trade Statistics of Foreign Trade of India—Volume II—Imports (February 2001) ("Indian Import Statistics"). We valued electricity using the cost in India per kwh in 1997 reported in U.S. dollars, adjusted for inflation using wholesale price indices published in the International Monetary Fund's International Financial Statistics. We valued water as reported for India in 1997 by the Asian Development Bank, adjusted for inflation. See Factor Valuation Memorandum.

As noted above, respondents Shin Crest and Feili Group sourced certain raw material inputs from market-economy suppliers and paid for them in market-economy currencies. Specifically, Feili Group sourced cold-rolled steel, plastic pellets and polyester fabric from market-economy suppliers. Shin Crest reported that it sourced cold-rolled steel coils, PVC sheets, polyester fabric, polyurethane foam, rivets, screws, polyethylene panels, plywood, plastic caps, plastic bags, cartons and powder paint from market-economy suppliers. For this preliminary determination, the Department has used the market-economy prices for the inputs listed above, in accordance with 19 CFR 351.408(c)(1). We added to the weighted-average price for each input the Indian surrogate value for transporting the input to the factory, where appropriate (i.e., where the sales terms for the market-economy inputs were not delivered to the factory).

For all instances in which respondents reported delivery by truck to calculate domestic inland freight, we used an average of multiple price quotes in September 2000 and April 2001 for transporting materials by truck between Mumbai (Bombay) and various Indian cities, which were reported by The Financial Express of India on its website. We converted the Indian rupee value to U.S. dollars.

As noted above under Case History, the petitioner has urged the Department to reject the prices paid for cold-rolled steel. Section 773(c)(1) of the Act requires the Department to use "best available information" to value a NME producer's factors of production. Section 351.408(c)(1) of the Department's regulations describes our method for valuing factors of production, including our preference for using the price paid by a NME producer that imports the input, when the input is purchased from a market-economy supplier and paid for in a market-economy currency. It is not the Department's practice to reject actual prices paid in market-economy currencies to market-economy suppliers, unless they are not at arm's length or if the amount purchased was insignificant. See Helical Spring Lock Washers from the People's Republic of China; Final Results of Antidumping Administrative Review, 65 FR 31143 (May 16, 2000), Issues and Decision Memorandum at Comment 1, where the Department stated:

> We do not believe that substituting a surrogate value for the price a NME producer actually paid to a market economy supplier for an input actually used to produce the merchandise being sold to the United States could meet the best available information standard imposed by the statute.

See also Shakeproof Assembly Components Division of Illinois Tool Works, Inc. v. United States, 2001 U.S. App. LEXIS 22491, Fed. Cir. Slip Op. 00–1521 (October 12, 2001). The Department intends to verify on-site the respondents' reported factor prices.

Respondents identified steel scrap as a by-product which they claimed was sold. The Department has offset the respondents' cost of production by the amount of reported scrap. See Factor Valuation Memorandum for a discussion of the surrogate value used.

For energy, to value electricity, we used 1997 data reported as the average Indian domestic prices within the category "Electricity for Industry," published in the International Energy Agency's publication, Energy Prices and Taxes—Quarterly Statistics (Third Quarter 2000), as adjusted for inflation. We valued water using the Asian Development Bank's Second Water Utilities Data Book: Asian and Pacific Region (1997), adjusted for inflation. We valued LPG and diesel oil using prices as of June 2001 from India Infoline.

For direct, indirect, and packing labor, consistent with section 351.408(c)(3) of the Department's regulations, we used the PRC regression-based wage rate at Import Administration's home page, Import Library, Expected Wages of Selected NME Countries, revised in May 2000 (see *http://ia.ita.doc.gov/wages*). The source of the wage rate data on the Import Administration's Web site is the 1999 Year Book of Labour Statistics, International Labor Office (Geneva: 1999), Chapter 5B: Wages in Manufacturing.

To value factory overhead, selling, general and administrative expenses ("SG&A") and profit, we used the audited financial statements for the year ended March 31, 2001, from an Indian producer of steel furniture, including the subject merchandise, Godrej & Boyce Manufacturing Company Ltd. ("Godrej"). See Factor Valuation Memorandum for the calculation of these ratios from Godrej's financial statements. The petitioner argued that the Department should use the financial statement of an Indonesian producer of steel furniture (but not the subject merchandise) to calculate the overhead, selling, general and administrative expenses ("SG&A") and profit ratios. As discussed in the Surrogate Country Memorandum, India is the preferred surrogate country, and Godrej is a producer of comparable merchandise; therefore we used Godrej's financial statements rather than those of an Indonesian surrogate.

Finally, to value material inputs for packing, we used the reported values for purchases from market-economy suppliers. For packing materials

purchased from NME sources, we used Indian Import Statistics data for the period April 1, 2000 through February 2001. See Factor Valuation Memorandum.

Verification

As provided in section 782(i)(1) of the Act, we intend to verify company information relied upon in making our final determination.

Rate for Producers/Exporters That Responded to the Questionnaires

For Dongguan and New-Tec, which were not selected as respondents, but provided separate rates information in section A and also responded to the sections C and D questionnaires, we have calculated a weighted-average margin based on the rates calculated for those producers/exporters that were selected to respond. The rate for these companies is analogous to the Department's calculation of the All Others rate (see section 735(c)5 of the Act). It is equal to an average of all calculated margins other than any zero or de minimis margins, or any margins determined entirely under section 776 of the Act. As Shin Crest's preliminary margin is zero, the rate for Dongguan and New-Tec is equal to Feili's margin.

Suspension of Liquidation

In accordance with section 733(d) of the Act, we are directing the U.S. Customs Service to suspend liquidation of all imports of subject merchandise, except for merchandise produced and exported by Shin Crest, entered or withdrawn from warehouse for consumption on or after the date of publication of this notice in the **Federal Register**. We will instruct the U.S. Customs Service to require a cash deposit or the posting of a bond equal to the weighted-average amount by which the NV exceeds the EP, as indicated below. These suspension-of-liquidation instructions will remain in effect until further notice. The weighted-average dumping margins are as follows:

Exporter/manufacturer	Weighted-average percent margin
Shin Crest Pte. Ltd.	0.00
Feili Furniture Development Co., Ltd. and Feili (Fujian) Co., Ltd.	134.77
Dongguan Shichang Metals Factory Co. Ltd.	134.77
New-Tec Integration Co., Ltd.	134.77
China-Wide	134.77

International Trade Commission Notification

In accordance with section 733(f) of the Act, we have notified the ITC of our determination of sales at LTFV. If our final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after our final determination whether the domestic industry in the United States is materially injured, or threatened with material injury, by reason of imports, or sales (or the likelihood of sales) for importation, of the subject merchandise.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Import Administration no later than fifty days after the date of publication of this notice, and rebuttal briefs, limited to issues raised in case briefs, no later than fifty-five days after the date of publication of this preliminary determination. See 19 CFR 351.309(c)(1)(i); 19 CFR 351.309(d)(1). A list of authorities used and an executive summary of issues should accompany any briefs submitted to the Department. This summary should be limited to five pages total, including footnotes. In accordance with section 774 of the Act, we will hold a public hearing, if requested, to afford interested parties an opportunity to comment on arguments raised in case or rebuttal briefs. Tentatively, any hearing will be held fifty-seven days after publication of this notice at the U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230, at a time and location to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date. Interested parties who wish to request a hearing, or to participate if one is requested, must submit a written request to the Assistant Secretary for Import Administration, U.S. Department of Commerce, Room 1870, within 30 days of the date of publication of this notice. See 19 CFR 351.310(c). Requests should contain: (1) The party's name, address, and telephone number; (2) the number of participants; and (3) a list of the issues to be discussed. At the hearing, each party may make an affirmative presentation only on issues raised in that party's case brief, and may make rebuttal presentations only on arguments included in that party's rebuttal brief. See 19 CFR 351.310(c).

If this investigation proceeds normally, we will make our final determination no later than 75 days after the date of the preliminary determination.

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act.

Dated: November 23, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

[FR Doc. 01–29814 Filed 11–30–01; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–560–812]

Antidumping Duty Order: Certain Hot-Rolled Carbon Steel Flat Products From Indonesia

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Mark Manning or Ronald Trentham at (202) 482–3936 and (202) 482–6320, respectively, AD/CVD Enforcement, Group II, Office 4, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended, (the Act) are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce's (the Department's) regulations are to 19 CFR part 351 (2000).

Background

On September 28, 2001, in accordance with sections 735(d) and 777(i)(1) of the Act, the Department published its affirmative final determination in this proceeding. *See Notice of Final Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products From Indonesia*, 66 FR 49628.

Scope of Order

For purposes of this order, the products covered are certain hot-rolled carbon steel flat products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with

plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers), regardless of thickness, and in straight lengths of a thickness of less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm, and of a thickness of not less than 4.0 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this order.

Specifically included within the scope of this order are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium or niobium (also commonly referred to as columbium), or both, added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products to be included in the scope of this order, regardless of definitions in the Harmonized Tariff Schedule of the United States (HTSUS), are products in which: (i) Iron predominates, by weight, over each of the other contained elements; (ii) the carbon content is 2 percent or less, by weight; and (iii) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

1.80 percent of manganese, or
2.25 percent of silicon, or
1.00 percent of copper, or
0.50 percent of aluminum, or
1.25 percent of chromium, or
0.30 percent of cobalt, or
0.40 percent of lead, or
1.25 percent of nickel, or
0.30 percent of tungsten, or
0.10 percent of molybdenum, or
0.10 percent of niobium, or
0.15 percent of vanadium, or
0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of this order unless otherwise excluded. The following products, by way of example, are outside or specifically excluded from the scope of this order:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including, *e.g.*, American Society for Testing and Materials (ASTM) specifications A543, A387, A514, A517, A506).
- Society of Automotive Engineers (SAE)/American Iron & Steel Institute (AISI) grades of series 2300 and higher.
- Ball bearing steels, as defined in the HTSUS.
- Tool steels, as defined in the HTSUS.
- Silico-manganese (as defined in the HTSUS) or silicon electrical steel with a silicon level exceeding 2.25 percent.
- ASTM specifications A710 and A736.
- USS abrasion-resistant steels (USS AR 400, USS AR 500).
- All products (proprietary or otherwise) based on an alloy ASTM specification (sample specifications: ASTM A506, A507).
- Non-rectangular shapes, not in coils, which are the result of having been processed by cutting or stamping and which have assumed the character of articles or products classified outside chapter 72 of the HTSUS.

The merchandise subject to this order is classified in the HTSUS at subheadings: 7208.10.15.00, 7208.10.30.00, 7208.10.60.00, 7208.25.30.00, 7208.25.60.00, 7208.26.00.30, 7208.26.00.60, 7208.27.00.30, 7208.27.00.60, 7208.36.00.30, 7208.36.00.60, 7208.37.00.30, 7208.37.00.60, 7208.38.00.15, 7208.38.00.30, 7208.38.00.90, 7208.39.00.15, 7208.39.00.30, 7208.39.00.90, 7208.40.60.30, 7208.40.60.60, 7208.53.00.00, 7208.54.00.00, 7208.90.00.00, 7211.14.00.90, 7211.19.15.00, 7211.19.20.00, 7211.19.30.00, 7211.19.45.00, 7211.19.60.00, 7211.19.75.30, 7211.19.75.60, and 7211.19.75.90. Certain hot-rolled carbon steel flat products covered by this order, including: Vacuum degassed fully stabilized; high strength low alloy; and the substrate for motor lamination steel may also enter under the following tariff numbers: 7225.11.00.00, 7225.19.00.00, 7225.30.30.50, 7225.30.70.00, 7225.40.70.00, 7225.99.00.90, 7226.11.10.00, 7226.11.90.30, 7226.11.90.60, 7226.19.10.00, 7226.19.90.00, 7226.91.50.00, 7226.91.70.00, 7226.91.80.00, and 7226.99.00.00. Subject merchandise may also enter under 7210.70.30.00, 7210.90.90.00, 7211.14.00.30, 7212.40.10.00, 7212.40.50.00, and 7212.50.00.00. Although the HTSUS subheadings are provided for convenience and U.S. Customs purposes, the written description of the merchandise subject to this proceeding is dispositive.

Antidumping Duty Order

On November 13, 2001, in accordance with section 735(d) of the Act, the International Trade Commission (the Commission) notified the Department of its final determination that an industry in the United States is materially injured by reason of less-than-fair-value imports of subject merchandise from Indonesia, pursuant to section 735(b)(1)(A) of the Act. Therefore, in accordance with section 736(a)(1) of the Act, the Department will direct U.S. Customs to assess, upon further advice by the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price of the merchandise for all relevant entries of certain hot-rolled carbon steel flat products from Indonesia. These antidumping duties will be assessed on all unliquidated entries of hot-rolled steel products from Indonesia entered, or withdrawn from the warehouse, for consumption on or after May 3, 2001, the date on which the Department published its *Notice of Preliminary Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products From Indonesia*, (66 FR 22163).

On or after the date of publication of this notice in the **Federal Register**, U.S. Customs must require, at the same time as importers would normally deposit estimated duties, cash deposits for the subject merchandise equal to the estimated weighted-average dumping margins noted below. The "All Others" rate applies to all exporters of subject merchandise not specifically listed below.

Manufacturer/exporter	Margin (percent)
PT Krakatau Steel Corporation	47.86
All Others	47.86

This notice constitutes the antidumping duty order with respect to certain hot-rolled carbon steel flat products from Indonesia. Interested parties may contact the Department's Central Records Unit, Room B–099 of the main Commerce building, for copies of an updated list of antidumping duty orders currently in effect.

This order is issued and published published in accordance with section 736(a) of the Act and 19 CFR 351.211.

Dated: November 20, 2001.

Faryar Shirzad,

Assistant Secretary for Import Administration.

International Trade Administration

[A–533–820]

Notice of Amended Final Antidumping Duty Determination of Sales at Less Than Fair Value and Antidumping Duty Order: Certain Hot-Rolled Carbon Steel Flat Products From India

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

SUMMARY: We are amending our *Notice of Final Determination of Sales at Less Than Fair Value: Certain Hot-Rolled Carbon Steel Flat Products From India*, October 3, 2001 (66 FR 50406) (*Final Determination*), to reflect the correction of ministerial errors made in the final determination. This correction is in accordance with section 735(e) of the Tariff Act of 1930, as amended (the Act) and 19 CFR 351.224 of the Department of Commerce's (the Department's) regulations. The period of investigation (POI) covered by this amended final determination is October 1, 1999, through September 30, 2000. This notice also constitutes the antidumping duty order with respect to certain hot-rolled carbon steel flat products from India.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Timothy Finn, John Conniff, or Howard Smith at (202) 482–0065, (202) 482–1009, or (202) 482–5193, respectively, AD/CVD Enforcement, Office 4, Group II, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

Applicable Statute and Regulations

Unless otherwise indicated, all citations to the Act are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to 19 CFR part 351 (2000).

Scope of Order

For purposes of this order, the products covered are certain hot-rolled carbon steel flat products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers), regardless of thickness, and in straight lengths of a thickness of less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm, and of a thickness of not less than 4.0 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this order.

Specifically included within the scope of this order are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium or niobium (also commonly referred to as columbium), or both, added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products to be included in the scope of this order, regardless of definitions in the Harmonized Tariff Schedule of the United States (HTSUS), are products in which: (i) Iron predominates, by weight, over each of the other contained elements; (ii) the carbon content is 2 percent or less, by weight; and (iii) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

1.80 percent of manganese, or
2.25 percent of silicon, or
1.00 percent of copper, or
0.50 percent of aluminum, or
1.25 percent of chromium, or
0.30 percent of cobalt, or
0.40 percent of lead, or
1.25 percent of nickel, or
0.30 percent of tungsten, or
0.10 percent of molybdenum, or
0.10 percent of niobium, or
0.15 percent of vanadium, or
0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of this order unless otherwise excluded. The following products, by way of example, are outside or specifically excluded from the scope of this order:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including, *e.g.*, American Society for Testing and Materials (ASTM) specifications A543, A387, A514, A517, A506).
- Society of Automotive Engineers (SAE)/American Iron & Steel Institute (AISI) grades of series 2300 and higher.
- Ball bearing steels, as defined in the HTSUS.
- Tool steels, as defined in the HTSUS.
- Silico-manganese (as defined in the HTSUS) or silicon electrical steel with a silicon level exceeding 2.25 percent.
- ASTM specifications A710 and A736.
- USS abrasion-resistant steels (USS AR 400, USS AR 500).
- All products (proprietary or otherwise) based on an alloy ASTM specification (sample specifications: ASTM A506, A507).
- Non-rectangular shapes, not in coils, which are the result of having been processed by cutting or stamping and which have assumed the character of articles or products classified outside chapter 72 of the HTSUS.

The merchandise subject to this order is classified in the HTSUS at subheadings: 7208.10.15.00, 7208.10.30.00, 7208.10.60.00, 7208.25.30.00, 7208.25.60.00, 7208.26.00.30, 7208.26.00.60, 7208.27.00.30, 7208.27.00.60, 7208.36.00.30, 7208.36.00.60, 7208.37.00.30, 7208.37.00.60, 7208.38.00.15, 7208.38.00.30, 7208.38.00.90, 7208.39.00.15, 7208.39.00.30, 7208.39.00.90, 7208.40.60.30, 7208.40.60.60, 7208.53.00.00, 7208.54.00.00, 7208.90.00.00, 7211.14.00.90, 7211.19.15.00, 7211.19.20.00, 7211.19.30.00, 7211.19.45.00, 7211.19.60.00, 7211.19.75.30, 7211.19.75.60, and 7211.19.75.90. Certain hot-rolled carbon steel flat products covered by this order, including: Vacuum degassed fully stabilized; high strength low alloy; and the substrate for motor lamination steel may also enter under the following tariff numbers: 7225.11.00.00, 7225.19.00.00, 7225.30.30.50, 7225.30.70.00, 7225.40.70.00, 7225.99.00.90, 7226.11.10.00, 7226.11.90.30, 7226.11.90.60, 7226.19.10.00, 7226.19.90.00, 7226.91.50.00, 7226.91.70.00, 7226.91.80.00, and 7226.99.00.00. Subject merchandise may also enter under 7210.70.30.00, 7210.90.90.00, 7211.14.00.30, 7212.40.10.00, 7212.40.50.00, and 7212.50.00.00. Although the HTSUS subheadings are provided for

convenience and U.S. Customs purposes, the written description of the merchandise subject to this proceeding is dispositive.

Amended Final Determination

On October 3, 2001, in accordance with sections 735(d) and 777(i)(1) of the Act, the Department published its affirmative final determination in this proceeding. See *Final Determination*, 66 FR 50406. Pursuant to 19 CFR 351.224(c), on October 2, October 3, and October 4, 2001, we received timely filed submissions from respondents, Essar Steel Ltd. (Essar) and Ispat Industries Ltd. (Ispat), and certain petitioners [1] alleging that the Department made ministerial errors in its final determination. On October 9, 2001, we received rebuttal comments from Ispat and petitioners regarding the allegations of ministerial errors in the calculation of Ispat's margin.

Petitioners allege that in calculating Ispat's weighted-average margin, the Department (1) failed to include bad debt expenses in the reported home market indirect selling expenses, and (2) failed to include a significant portion of interest expenses in the interest expense ratio. Although Ispat agrees with petitioners' contention that bad debt expense should be included in indirect selling expenses, it disagrees with the methodology used by petitioners to recalculate the indirect selling expense ratio. In addition, Ispat claims that there is no ministerial error with respect to the interest expense calculation.

Moreover, both parties allege that the Department failed to use costs that properly reflect the "Customs Duty Adjustment."

With respect to Essar, petitioners allege that the Department's margin calculations (1) Fail to account for interest expenses and interest income associated with home market and U.S. sales, (2) fail to account for direct labor expense, (3) fail to base general, administrative and interest expenses on adjusted total manufacturing costs, and (4) fail to include the proper facts available rate for unreported U.S. sales.

Essar alleges that the Department failed to take into account home market freight revenue in calculating home market credit expense.

In accordance with section 735(e) of the Act, we have determined that, with the exception of the allegation regarding the interest expense ratio, ministerial errors were made in our final margin calculations. Thus, we are amending our final determination in order to revise the antidumping duty rate for Essar and Ispat. The revised weighted-average dumping margins are listed in the "Antidumping Duty Order" section below. For a detailed analysis of the ministerial errors that we addressed, and the Department's position on each, *see* the Memorandum to Bernard T. Carreau from Holly A. Kuga, dated November 19, 2001, regarding *Ministerial Error Allegations* on file in room B–099 of the Main Commerce building.

Antidumping Duty Order

On November 13, 2001, in accordance with section 735(d) of the Act, the International Trade Commission (the Commission) notified the Department of its final determination that an industry in the United States is materially injured by reason of less-than-fair-value imports of subject merchandise from India, pursuant to section 735(b)(1)(A) of the Act. Therefore, in accordance with section 736(a)(1) of the Act, the Department will direct U.S. Customs to assess, upon further advice by the Department, antidumping duties equal to the amount by which the normal value of the merchandise exceeds the export price of the merchandise for all relevant entries of certain hot-rolled carbon steel flat products from India. These antidumping duties will be assessed on all unliquidated entries of subject merchandise from India entered, or withdrawn from warehouse, for consumption on or after May 3, 2001, the date on which the Department published its *Notice of Preliminary Determination of Sales at Less Than Fair Value and Postponement of Final Determination: Certain Hot-Rolled Carbon Steel Flat Products From India*, (66 FR 22157).

On or after the date of publication of this notice in the **Federal Register**, U.S. Customs must require, at the same time as importers would normally deposit estimated duties, cash deposits for the subject merchandise equal to the estimated weighted-average dumping margins listed below. The "All Others" rate applies to all exporters of subject merchandise not specifically listed below.

Manufacturer/exporter	Revised margin (percent)
Ispat Industries Ltd	44.40
Essar Steel Ltd.	36.53
All Others	38.72

This notice constitutes the antidumping duty order with respect to certain hot-rolled carbon steel flat products from India. Interested parties may contact the Department's Central Records Unit, Room B–099 of the main Commerce building, for copies of an updated list of antidumping duty orders currently in effect.

This order is issued and published in accordance with section 736(a) of the Act and 19 CFR 351.211.

November 20, 2001.

Faryar Shirzad,

Assistant Secretary for Import Administration.

Administrative Review of the Suspension Agreement on Certain Hot-Rolled Flat-Rolled Carbon-Quality Steel Products From Brazil: Extension of Time Limit for Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Michael Ferrier at (202) 482–1394, Phyllis Hall at (202) 482–1398, or Dena Aliadinov at (202) 482–3362, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Ave, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Statutory Time Limits

Section 751(a)(3)(A) of the Tariff Act of 1930, as amended (the Act), requires the Department of Commerce ("the Department") to make a preliminary determination within 245 days after the last day of the anniversary month of an order for which a review is requested, and a final determination within 120 days after the date on which the preliminary determination is published. However, if it is not practicable to complete the review within these time periods, section 751(a)(3)(A) of the Act allows the Department to extend the time limit for the preliminary determination to a maximum of 365 days and for the final determination to 180 days (or 300 days if the Department does not extend the time limit for the preliminary determination) from the date of publication of the preliminary determination.

Background

On July 6, 1999, the Department entered into Antidumping Duty Suspension Agreement regarding certain hot-rolled flat-rolled carbon-quality steel products ("hot-rolled steel") from Brazil produced by Companhia Siderurgica Nacional ("CSN"), Usinas Siderurgicas de Minas Gerais ("USIMINAS"), and Companhia Siderurgica Paulista ("COSIPA"). This agreement was entered into under section 734(c) of the Tariff Act of 1930, as amended, requiring, among other things, that the estimated margin of each entry under the suspension agreement does not exceed 15 percent of the margin found in the investigation. In addition, the Agreement requires that sales of subject merchandise are not made below the reference price (calculated quarterly, to prevent price suppression or undercutting). On July 28, 2000, petitioners requested that the Department conduct an administrative review of the agreement. The Department initiated this review on September 6, 2000. *See* 65 FR 53980 (September 6, 2000). On March 8, 2001 the Department extended the time limit for completion of the preliminary results by 120 days. *See* 66 FR 13891 (March 8, 2001). The preliminary results were published on August 8, 2001. *See* 66 FR 41500 (August 8, 2001). The final results are due on December 6, 2001, which is 120 days after the date of publication for the preliminary results.

Extension of Time Limit for Final Results of Review

This is the first administrative review of this suspension agreement. There are several novel and complex issues relating to compliance with the suspension agreement, including those involving: The precise nature of the relationships between the Brazilian mills and other parties involved in the U.S. sales process; the appropriate methods of margin calculations with respect to the requirements of the suspension agreement; and the treatment of certain Brazilian domestic taxes. Because of these issues, we find it is not practicable to complete this review within the initial time limits mandated by section 751(a)(3)(A) of the Act. Therefore, we are fully extending the due date for the final results to 180 days after the publication date of the preliminary results, until February 4, 2002.

This extension of the time limit is in accordance with section 751(a)(3)(A) of the Act and 19 CFR 351.213(h)(2).

Dated: November 23, 2001.

Joseph A. Spetrini,

Deputy Assistant Secretary for Import Administration, Group III.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[A–475–822]

Notice of Extension of the Time Limit for Preliminary Results of Antidumping Duty Administrative Review: Stainless Steel Plate in Coils From Italy

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Carrie Blozy or Stephen Shin, AD/CVD Enforcement Group III, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–0165 or (202) 482–0413.

SUPPLEMENTARY INFORMATION:

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act) are to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act. In addition, unless otherwise indicated, all citations to the Department of Commerce's ("the Department") regulations are to the current regulations as codified at 19 CFR part 351 (2001).

Background

On May 31, 2001, Accai Speciali Terni S.p.A. and its affiliated company, requested that the Department conduct an administrative review. On June 19, 2001, the Department published a notice of initiation of the administrative review of the antidumping duty order on Stainless Steel Plate in Coils from Italy, covering the period May 1, 2000 through April 30, 2001. *See Initiation of Antidumping and Countervailing Duty Administrative Review and Requests for Revocation in Part*, 66 FR 32934 (June 19, 2001). The preliminary results of this review are currently due no later than January 31, 2002.

Extension of Time Limit for Preliminary Results

Pursuant to section 751(a)(3)(A) of the Act, the Department may extend the deadline for completion of the preliminary results of a review if it determines that it is not practicable to complete the preliminary results within the statutory time limit of 245 days from the date on which the review was initiated. On October 22, 2001, the Department initiated a sales-below-the-cost-of-production investigation with respect to home market sales made by AST. On November 23, 2001, AST submitted the company-specific cost data. In order to properly analyze and consider the cost data in the Department's preliminary results, the Department has determined that it is not practicable to complete the preliminary results of this review for Accai Speciali Terni S.p.A. and its affiliates within the initial time limits provided in section 751(a)(3)(A) of the Act and section 351.213(h) of the Department's regulations.

Therefore, we are extending the due date for the preliminary results by 60 days, until no later than April 2, 2002. The final results continue to be due 120 days after the publication of the preliminary results.

Dated: November 26, 2001.

Barbara E. Tillman,

Acting Deputy Assistant Secretary, for Import Administration, Group III.

Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From the People's Republic of China; Amended Final Results of Antidumping Administrative Review

AGENCY: Import Administration, International Trade Administration, United States Department of Commerce.

ACTION: Notice of amended final results of administrative review.

SUMMARY: The United States Court of International Trade has affirmed the Department of Commerce's final remand results affecting the final weighted-average margins for the 1994/1995 administrative review of the antidumping duty order on tapered roller bearings and parts thereof, finished and unfinished, from the People's Republic of China. There was no appeal to the United States Court of Appeals for the Federal Circuit. As there is now a final and conclusive court decision in this case, we are amending the final results of review and we will instruct the Customs Service to

197-001 D-01 Signature .3

liquidate entries subject to this review. The period of review is June 1, 1994, through May 31, 1995.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: George Callen or Richard Rimlinger, AD/CVD Enforcement 3, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482–0180 or (202) 482–4477, respectively.

SUPPLEMENTARY INFORMATION:

Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions in effect as of December 31, 1994.

Background

On February 11, 1997, the Department published the final results of administrative review of the antidumping duty order on tapered roller bearings and parts thereof, finished and unfinished (TRBs), from the People's Republic of China covering the period June 1, 1994, through May 31, 1995. See *Tapered Roller Bearings and Parts Thereof, Finished and Unfinished, From the People's Republic of China, Final Results of Antidumping Duty Administrative Review*, 62 FR 6173 (February 11, 1997) (*Final Results*).

The Timken Company contested the Department's decision in the *Final Results*. In issuing its decision in this case, the United States Court of International Trade (CIT) instructed the Department to make the following changes to its margin calculations for the *Final Results*: (1) Eliminate from the cost-of-manufacture calculation the category "purchases of traded goods" and (2) recalculate marine insurance expense on a value rather than weight basis. See *Timken Company* v. *United States*, Court No. 97–01–00394, Slip Op. 99–73 (CIT July 30, 1999). The Department issued final results of redetermination on remand on December 13, 1999. The CIT affirmed the Department's final remand results and dismissed the case. See *Timken Company* v. *United States*, Slip Op. 200–13 (CIT February 8, 2000).

There was no appeal to the United States Court of Appeals for the Federal Circuit. As there is now a final and conclusive court decision in this action, we are amending our final results of review and we will instruct the Customs Service to liquidate entries subject to this review.

Amendment to Final Results

Pursuant to section 516A(e) of the Act, we are now amending the final results of administrative review of the antidumping duty order on TRBs from the People's Republic of China for the period of review June 1, 1994, through May 31, 1995. The revised weighted-average margins are as follows:

Company	Margin
Premier Bearing and Equipment, Ltd.	2.89
Tianshui Hailin Import and Export Corporation	25.63
Zhejiang Machinery Import and Export Corporation	3.04
East Sea Bearing Company, Ltd.	3.60

Accordingly, the Department will determine and the Customs Service will assess appropriate antidumping duties on entries of the subject merchandise exported by firms covered by this review. Weighted-average margins for other respondent companies and the PRC-wide rate for others remain as published in the *Final Results*.

We are issuing and publishing this determination in accordance with section 751(a) of the Act.

Dated: November 21, 2001.

Faryar Shirzad,

Assistant Secretary for Import Administration.

[C–549–818]

Notice of Countervailing Duty Order: Certain Hot-Rolled Carbon Steel Flat Products From Thailand

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Dana Mermelstein at (202) 482–1391, Sean Carey at (202) 482–3964, or Scott Lindsay at (202) 482–3782, Office of AD/CVD Enforcement VII, Group III, Import Administration, U.S. Department of Commerce, Room 4012, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the Tariff Act of 1930, as amended. In addition, unless otherwise indicated, all citations to the Department of Commerce (the Department) regulations refer to the regulations codified at 19 CFR part 351 (2000).

Scope of Order

The merchandise subject to this investigation is certain hot-rolled flat-rolled carbon-quality steel products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers), regardless of thickness, and in straight lengths, of a thickness of less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm, and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this investigation.

Specifically included within the scope of this investigation are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium or niobium (also commonly referred to as columbium), or both, added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products included in the scope of this investigation, regardless of definitions in the Harmonized Tariff Schedule of the United States (HTS), are products in which: (i) Iron predominates, by weight, over each of the other contained elements; (ii) the carbon content is 2 percent or less, by weight; and (iii) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

1.80 percent of manganese, or
2.25 percent of silicon, or
1.00 percent of copper, or
0.50 percent of aluminum, or
1.25 percent of chromium, or
0.30 percent of cobalt, or
0.40 percent of lead, or
1.25 percent of nickel, or
0.30 percent of tungsten, or
0.10 percent of molybdenum, or
0.10 percent of niobium, or

0.15 percent of vanadium, or 0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of this investigation unless otherwise excluded. The following products, by way of example, are outside or specifically excluded from the scope of this investigation:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including, *e.g.*, ASTM specifications A543, A387, A514, A517, A506).
- SAE/AISI grades of series 2300 and higher.
- Ball bearings steels, as defined in the HTS.
- Tool steels, as defined in the HTS.
- Silico-manganese (as defined in the HTS) or silicon electrical steel with a silicon level exceeding 2.25 percent.
- ASTM specifications A710 and A736.
- USS Abrasion-resistant steels (USS AR 400, USS AR 500).
- All products (proprietary or otherwise) based on an alloy ASTM specification (sample specifications: ASTM A506, A507).
- Non-rectangular shapes, not in coils, which are the result of having been processed by cutting or stamping and which have assumed the character of articles or products classified outside chapter 72 of the HTS.

The merchandise subject to this investigation is classified in the HTS at subheadings: 7208.10.15.00, 7208.10.30.00, 7208.10.60.00, 7208.25.30.00, 7208.25.60.00, 7208.26.00.30, 7208.26.00.60, 7208.27.00.30, 7208.27.00.60, 7208.36.00.30, 7208.36.00.60, 7208.37.00.30, 7208.37.00.60, 7208.38.00.15, 7208.38.00.30, 7208.38.00.90, 7208.39.00.15, 7208.39.00.30, 7208.39.00.90, 7208.40.60.30, 7208.36.60.60, 7208.53.00.00, 7208.54.00.00, 7208.90.00.00, 7211,14.00.90, 7211.19.15.00, 7211.19.20.00, 7211.19.30.00, 7211.19.45.00, 7211.19.60.00, 7211.19.75.30, 7211.19.75.60, and 7211.19.75.90. Certain hot-rolled flat-rolled carbon-quality steel covered by this investigation, including: Vacuum degassed fully stabilized; high strength low alloy; and the substrate for motor lamination steel may also enter under the following tariff numbers: 7225.11.00.00, 7225.19.00.00, 7225.30.30.50, 7225.30.70.00, 7225.40.70.00, 7225.99.00.90, 7226.11.10.00, 7226.11.90.30, 7226.11.90.60, 7226.19.10.00, 7226.19.90.00, 7226.91.50.00, 7226.91.70.00, 7226.91.80.00, and 7226.99.00.00. Subject merchandise may also enter under 7210.70.30.00, 7210.90.90.00, 7211.14.00.30, 7212.40.10.00, 7212.40.50.00. and 7212.50.00.00. Although the HTS subheadings are provided for convenience and U.S. Customs purposes, the Department's written description of the merchandise subject to this proceeding is dispositive.

Countervailing Duty Order

In accordance with section 705(d) of the Act, on October 3, 2001, the Department published in the **Federal Register** its final affirmative determination in the countervailing duty investigation of certain hot-rolled carbon steel flat products from Thailand (66 FR 50410). On November 13, 2001, the International Trade Commission (ITC) notified the Department of its final determination, pursuant to section 705(b)(1)(A)(i) of the Act, that an industry in the United States is materially injured by reason of imports of hot-rolled carbon steel flat products from Thailand.

Therefore, countervailing duties will be assessed on all unliquidated entries of certain hot-rolled carbon steel flat products from Thailand entered, or withdrawn from warehouse, for consumption on or after April 20, 2001, the date on which the Department published its preliminary countervailing duty determination in the **Federal Register**, and before August 18, 2001, the date that the Department instructed the U.S. Customs Service to terminate the suspension of liquidation in accordance with section 703(d) of the Act, and on all entries and withdrawals on or after the date of publication of this countervailing duty order in the **Federal Register**. Section 703(d) of the Act states that the suspension of liquidation pursuant to a preliminary determination may not remain in effect for longer than four months. Entries of certain hot-rolled carbon steel flat products made on or after August 18, 2001, and prior to the date of publication of this order in the **Federal Register** are not liable for the assessment of countervailing duties due to the Department's termination, effective August 17, 2001, of suspension of liquidation.

In accordance with section 706 of the Act, the Department will direct U.S. Customs officers to reinstate the suspension of liquidation effective the date of publication of this notice in the **Federal Register** and to assess, upon further advice by the Department pursuant to section 706(a)(1) of the Act, countervailing duties for each entry of the subject merchandise in an amount based on the counteravailable subsidy rate for the subject merchandise.

On or after the date of publication of this notice in the **Federal Register**, U.S. Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the counteravailable subsidy rates noted below. The All Others rate applies to all producers and exporters of certain hot-rolled carbon steel flat products from Thailand not specifically listed below. The cash deposit rates are as follows:

Producer/exporter	Net subsidy rate
Sahaviriya Steel Industries Public Company Ltd.	2.38% *Ad Valorem*.
All Others	2.38% *Ad Valorem*.

This notice constitutes the countervailing duty order with respect to certain hot-rolled carbon steel flat products from Thailand, pursuant to section 706(a) of the Act. Interested parties may contact the Central Records Unit, for copies of an updated list of countervailing duty orders currently in effect.

This countervailing duty order is published in accordance with section 706(a) of the Act and 19 CFR 351.211.

Dated: November 26, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

[FR Doc. 01–29811 Filed 11–30–01; 8:45 am]

Notice of Amended Final Determination and Notice of Countervailing Duty Orders: Certain Hot-Rolled Carbon Steel Flat Products From India and Indonesia

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Eric B. Greynolds (202) 482–6071 (India), and Stephanie Moore (202) 482–3692 (Indonesia), Office of AD/CVD Enforcement VI, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the provisions of the Tariff Act of 1930, as amended by the Uruguay Round Agreements Act effective January 1, 1995 (the Act). In addition, unless otherwise indicated, all citations to the Department's regulations are to the current regulations codified at 19 CFR part 351 (2001).

Scope of Orders

For purposes of these orders, the products covered are certain hot-rolled flat-rolled carbon steel flat products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers), regardless of thickness, and in straight lengths, of a thickness of less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm, and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of these orders.

Specifically included within the scope of these orders are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium or niobium (also commonly referred to as columbium), or both, added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products to be included in the scope of these orders, regardless of definitions in the Harmonized Tariff Schedule of the United States (HTS), are products in which: (i) Iron predominates, by weight, over each of the other contained elements; (ii) the carbon content is 2 percent or less, by weight; and (iii) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

1.80 percent of manganese, or
2.25 percent of silicon, or
1.00 percent of copper, or
0.50 percent of aluminum, or
1.25 percent of chromium, or
0.30 percent of cobalt, or
0.40 percent of lead, or
1.25 percent of nickel, or
0.30 percent of tungsten, or
0.10 percent of molybdenum, or
0.10 percent of niobium, or
0.15 percent of vanadium, or
0.15 percent of zirconium.

All products that meet the physical and chemical description provided above are within the scope of these orders unless otherwise excluded. The following products, by way of example, are outside or specifically excluded from the scope of these orders:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including, *e.g.*, ASTM specifications A543, A387, A514, A517, A506).
- SAE/AISI grades of series 2300 and higher.
- Ball bearings steels, as defined in the HTS.
- Tool steels, as defined in the HTS.
- Silico-manganese (as defined in the HTS) or silicon electrical steel with a silicon level exceeding 2.25 percent.
- ASTM specifications A710 and A736.
- USS Abrasion-resistant steels (USS AR 400, USS AR 500).
- All products (proprietary or otherwise) based on an alloy ASTM specification (sample specifications: ASTM A506, A507).
- Non-rectangular shapes, not in coils, which are the result of having been processed by cutting or stamping and which have assumed the character of articles or products classified outside chapter 72 of the HTS.

The merchandise subject to these orders are classified in the HTS at subheadings: 7208.10.15.00, 7208.10.30.00, 7208.10.60.00, 7208.25.30.00, 7208.25.60.00, 7208.26.00.30, 7208.26.00.60, 7208.27.00.30, 7208.27.00.60, 7208.36.00.30, 7208.36.00.60, 7208.37.00.30, 7208.37.00.60, 7208.38.00.15, 7208.38.00.30, 7208.38.00.90, 7208.39.00.15, 7208.39.00.30, 7208.39.00.90, 7208.40.60.30, 7208.40.60.60, 7208.53.00.00, 7208.54.00.00, 7208.90.00.00, 7211.14.00.90, 7211.19.15.00, 7211.19.20.00, 7211.19.30.00, 7211.19.45.00, 7211.19.60.00, 7211.19.75.30, 7211.19.75.60, and 7211.19.75.90. Certain hot-rolled flat-rolled carbon-quality steel covered by these orders, including: Vacuum degassed fully stabilized; high strength low alloy; and the substrate for motor lamination steel may also enter under the following tariff numbers: 7225.11.00.00, 7225.19.00.00, 7225.30.30.50, 7225.30.70.00, 7225.40.70.00, 7225.99.00.90, 7226.11.10.00, 7226.11.90.30, 7226.11.90.60, 7226.19.10.00, 7226.19.90.00, 7226.91.50.00, 7226.91.70.00, 7226.91.80.00, and 7226.99.00.00. Subject merchandise may also enter under 7210.70.30.00, 7210.90.90.00, 7211.14.00.30, 7212.40.10.00, 7212.40.50.00, and 7212.50.00.00. Although the HTS subheadings are provided for convenience and U.S. Customs purposes, the Department's written description of the merchandise subject to these proceedings is dispositive.

Amended Final Determination for India

On October 3, 2001, petitioners[1] alleged ministerial errors in the calculations of the *Final Affirmative Countervailing Duty Determination: Certain Hot-Rolled Carbon Steel Flat Products from India*, 66 FR 49635 (September 28, 2001) (*Final Determination*), with respect to Essar Steel Limited (Essar) and the Steel Authority of India Limited (SAIL). On October 9, 2001, we received comments from SAIL regarding petitioners' ministerial error allegations.

Regarding Essar, petitioners alleged that the Department incorrectly calculated the number of days outstanding for one of Essar's Pre-Shipment loans. We agree with petitioners and have recalculated the benefit under the program using the correct number of days outstanding.

Regarding SAIL, petitioners alleged that the Department incorrectly calculated the *ad valorem* subsidy rate for SAIL's Steel Development Fund (SDF) loan that was outstanding during the period of investigation (POI). They argued that in calculating the benefit under the program, the Department properly calculated the benefit from the interest deferral granted to the company in each month but inadvertently failed to take into account the additional benefit received by SAIL from each month's interest deferral over the entire POI. In other words, they contended that the Department should calculate the benefit from the January interest payment deferral over a 12-month period, the benefit from the February interest payment deferral over an 11-

[1] The petitioners in these proceedings are Bethlehem Steel Corporation, Gallatin Steel Company, IPSCO Steel Inc., LTV Steel Company, Inc., National Steel Corporation, Nucor Corporation, Steel Dynamics, Inc., U.S. Steel Group, a unit of USX Corporation, Weirton Steel Corporation, Independent Steelworkers Union, and the Independent Steelworkers of America.

month period, etc. SAIL argued that if the Department agrees with petitioners, it should revise the approach advocated by petitioners so that the duration of each interest payment deferral period is calculated on the last day of each month, which was the day the interest payment was due. We agree with petitioners that we should take into account the benefit received by SAIL from each month's interest waiver over the entire POI. The Department's Countervailing Duty (CVD) Regulations state that interest-free loans and deferred interest payments should be treated as government-provided loans in the amount of the interest deferred. *See* Preamble to CVD Regulations at 63 FR 65369 and 19 CFR 351.509(a)(2). Accordingly, we have revised our calculation under this program such that the benefit corresponds to the duration of each interest payment deferral period during the POI. In addition, in accordance with SAIL's comments, we have calculated the duration of each interest payment deferral period beginning on the last day of each month.

Regarding SAIL, petitioners further alleged that with respect to the company's use of the Exemption of Pre-Shipment Export Credit from Interest Tax program, the Department inadvertently divided the benefit by SAIL's total export sales rather than dividing the benefit by SAIL's total sales of subject merchandise to the United States. We agree with petitioners. Information on the record of this investigation indicates that SAIL's use of this program is tied to individual shipments. Accordingly, we have divided SAIL's benefit under this program by its total sales of subject merchandise to the United States.

The corrections for Essar and SAIL are discussed in further detail in the October 16, 2001 memorandum to Bernard Carreau, Deputy Assistant Secretary, AD/CVD Enforcement II, Import Administration, from Melissa G. Skinner, Director, Office of AD/CVD Enforcement VI. The public version of this memorandum is on file in Room B–099 in the Central Records Unit (CRU) of the Main Commerce Building.

As a result of our corrections, the estimated net countervailable subsidy rate attributable to Essar increased from 8.32 percent *ad valorem* to 8.35 percent *ad valorem*. The cash deposit rate attributable to Essar increased from 8.25 percent *ad valorem* to 8.28 percent *ad valorem*. The estimated net countervailable subsidy rate attributable to SAIL increased from 18.38 percent *ad valorem* to 18.45 percent *ad valorem*. The cash deposit rate attributable to SAIL increased from 18.22 percent *ad valorem* to 18.27 percent *ad valorem*.

Due to the revisions of Essar's and SAIL's net subsidy and cash deposit rates, the all others rate has also changed. The all others net countervailable subsidy rate increased from 16.17 percent *ad valorem* to 16.20 percent *ad valorem*. The all others cash deposit rate increased from 16.08 percent *ad valorem* to 16.10 percent *ad valorem*.

Countervailing Duty Orders

In accordance with section 705(d) of the Act, on September 28, 2001, the Department published its final determinations in the countervailing duty investigations of certain hot-rolled carbon steel flat products from India (66 FR 49635) and Indonesia (66 FR 49637). On November 13, 2001, the International Trade Commission (ITC) notified the Department of its final determination, pursuant to section 705(b)(1)(A)(i) of the Act, that an industry in the United States suffered material injury as a result of subsidized imports of certain hot-rolled carbon steel flat products from India and Indonesia.

Therefore, countervailing duties will be assessed on all unliquidated entries of certain hot-rolled carbon steel flat products from India and Indonesia entered, or withdrawn from warehouse, for consumption on or after April 20, 2001, the date on which the Department published its preliminary affirmative countervailing duty determinations in the **Federal Register**, and before August 18, 2001, the date the Department instructed the U.S. Customs Service to discontinue the suspensions of liquidation in accordance with section 703(d) of the Act, and on all entries and withdrawals of subject merchandise made on or after the date of publication of these countervailing duty orders in the **Federal Register**. Section 703(d) states that the suspension of liquidation pursuant to a preliminary determination may not remain in effect for more than four months. Entries of certain hot-rolled carbon steel flat products made on or after August 18, 2001, and prior to the date of publication of these orders in the **Federal Register** are not liable for the assessment of countervailing duties due to the Department's discontinuation, effective August 18, 2001, of the suspensions of liquidation.

In accordance with section 706 of the Act, the Department will direct U.S. Customs officers to reinstitute the suspension of liquidation for certain hot-rolled carbon steel flat products from India and Indonesia effective the date of publication of this notice in the **Federal Register** and to assess, upon further advice by the Department pursuant to section 706(a)(1) of the Act, countervailing duties for each entry of the subject merchandise in an amount based on the net countervailable subsidy rates for the subject merchandise.

On or after the date of publication of this notice in the **Federal Register**, U.S. Customs officers must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the rates noted below. The All Others rates apply to all producers and exporters of certain hot-rolled carbon steel flat products from India and Indonesia not specifically listed below. The cash deposit rates are as follows:

Producer/exporter: India	Cash deposit rate
Essar Steel Limited (Essar).	8.28 percent *ad valorem*.
Ispat Industries Limited (Ispat).	31.89 percent *ad valorem*.
Steel Authority of India Limited (SAIL).	18.27 percent *ad valorem*.
Tata Iron and Steel Company Limited (TISCO).	9.17 percent *ad valorem*.
All Others Rate	16.10 percent *ad valorem*.

Producer/exporter: Indonesia	Cash deposit rate
P.T. Krakatau Steel ...	10.21 percent *ad valorem*.
All Others Rate	10.21 percent *ad valorem*

This notice constitutes the countervailing duty orders with respect to certain hot-rolled carbon steel flat products from India and Indonesia, pursuant to section 706(a) of the Act. Interested parties may contact the CRU, for copies of an updated list of countervailing duty orders currently in effect.

These countervailing duty orders and amended final determination are issued and published in accordance with sections 706(a) and 705 of the Act and 19 CFR 351.211 and 351.224.

Dated: November 21, 2001.

Faryar Shirzad,

Assistant Secretary for Import Administration.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[C–791–810]

Notice of Countervailing Duty Order: Certain Hot-Rolled Carbon Steel Flat Products From South Africa

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Sally C. Gannon at (202) 482–0162, Mark Hoadley at (202) 482–0666, or Julio Fernandez at (202) 482–0190, Office of AD/CVD Enforcement VII, Group III, Import Administration, International Trade Administration, U.S. Department of Commerce, Room 7866, 14th Street and Constitution Avenue, NW., Washington, DC 20230.

The Applicable Statute and Regulations

Unless otherwise indicated, all citations to the statute are references to the Tariff Act of 1930 (the Act), as amended. In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR part 351 (2000).

Scope of Order

The merchandise subject to this investigation is certain hot-rolled carbon steel flat products of a rectangular shape, of a width of 0.5 inch or greater, neither clad, plated, nor coated with metal and whether or not painted, varnished, or coated with plastics or other non-metallic substances, in coils (whether or not in successively superimposed layers), regardless of thickness, and in straight lengths, of a thickness of less than 4.75 mm and of a width measuring at least 10 times the thickness. Universal mill plate (*i.e.*, flat-rolled products rolled on four faces or in a closed box pass, of a width exceeding 150 mm, but not exceeding 1250 mm, and of a thickness of not less than 4 mm, not in coils and without patterns in relief) of a thickness not less than 4.0 mm is not included within the scope of this investigation.

Specifically included within the scope of this investigation are vacuum degassed, fully stabilized (commonly referred to as interstitial-free (IF)) steels, high strength low alloy (HSLA) steels, and the substrate for motor lamination steels. IF steels are recognized as low carbon steels with micro-alloying levels of elements such as titanium or niobium (also commonly referred to as columbium), or both, added to stabilize carbon and nitrogen elements. HSLA steels are recognized as steels with micro-alloying levels of elements such as chromium, copper, niobium, vanadium, and molybdenum. The substrate for motor lamination steels contains micro-alloying levels of elements such as silicon and aluminum.

Steel products included in the scope of this investigation, regardless of definitions in the *Harmonized Tariff Schedule of the United States* (HTSUS), are products in which: (i) Iron predominates, by weight, over each of the other contained elements; (ii) the carbon content is 2 percent or less, by weight; and (iii) none of the elements listed below exceeds the quantity, by weight, respectively indicated:

1.80 percent of manganese, or
2.25 percent of silicon, or
1.00 percent of copper, or
0.50 percent of aluminum, or
1.25 percent of chromium, or
0.30 percent of cobalt, or
0.40 percent of lead, or
1.25 percent of nickel, or
0.30 percent of tungsten, or
0.10 percent of molybdenum, or
0.10 percent of niobium, or
0.15 percent of vanadium, or
0.15 percent of zirconium.

All products that meet the physical and chemical descriptions provided above are within the scope of this investigation unless otherwise excluded. The following products, by way of example, are outside or specifically excluded from the scope of this investigation:

- Alloy hot-rolled steel products in which at least one of the chemical elements exceeds those listed above (including, *e.g.*, American Society for Testing and Materials (ASTM) specifications A543, A387, A514, A517, A506).
- Society of Automotive Engineers (SAE)/American Iron & Steel Institute (AISI) grades of series 2300 and higher.
- Ball bearings steels, as defined in the HTSUS.
- Tool steels, as defined in the HTSUS.
- Silico-manganese (as defined in the HTSUS) or silicon electrical steel with a silicon level exceeding 2.25 percent.
- ASTM specifications A710 and A736.
- USS Abrasion-resistant steels (USS AR 400, USS AR 500).
- All products (proprietary or otherwise) based on an alloy ASTM specification (sample specifications: ASTM A506, A507).
- Non-rectangular shapes, not in coils, which are the result of having been processed by cutting or stamping and which have assumed the character of articles or products classified outside chapter 72 of the HTSUS.

The merchandise subject to this investigation is classified in the HTSUS at subheadings: 7208.10.15.00, 7208.10.30.00, 7208.10.60.00, 7208.25.30.00, 7208.25.60.00, 7208.26.00.30, 7208.26.00.60, 7208.27.00.30, 7208.27.00.60, 7208.36.00.30, 7208.36.00.60, 7208.37.00.30, 7208.37.00.60, 7208.38.00.15, 7208.38.00.30, 7208.38.00.90, 7208.39.00.15, 7208.39.00.30, 7208.39.00.90, 7208.40.60.30, 7208.40.60.60, 7208.53.00.00, 7208.54.00.00, 7208.90.00.00, 7211.14.00.90, 7211.19.15.00, 7211.19.20.00, 7211.19.30.00, 7211.19.45.00, 7211.19.60.00, 7211.19.75.30, 7211.19.75.60, and 7211.19.75.90. Certain hot-rolled carbon steel flat products covered by this investigation, including vacuum degassed fully stabilized, high strength low alloy, and the substrate for motor lamination steel, may also enter under the following tariff numbers: 7225.11.00.00, 7225.19.00.00, 7225.30.30.50, 7225.30.70.00, 7225.40.70.00, 7225.99.00.90, 7226.11.10.00, 7226.11.90.30, 7226.11.90.60, 7226.19.10.00, 7226.19.90.00, 7226.91.50.00, 7226.91.70.00, 7226.91.80.00, and 7226.99.00.00. Subject merchandise may also enter under 7210.70.30.00, 7210.90.90.00, 7211.14.00.30, 7212.40.10.00, 7212.40.50.00, and 7212.50.00.00. Although the HTSUS subheadings are provided for convenience and U.S. Customs purposes, the Department's written description of the merchandise under investigation is dispositive.

Countervailing Duty Order

In accordance with section 705(d) of the Act, on October 3, 2001, the Department published in the **Federal Register** its final affirmative determination in the countervailing duty investigation of certain hot-rolled carbon steel flat products from South Africa (66 FR 50412). On November 13, 2001, the International Trade Commission (ITC) notified the Department of its final determination, pursuant to section 705(b)(1)(A)(i) of the Act, that an industry in the United States is materially injured by reason of imports of certain hot-rolled carbon steel flat products from South Africa.

Therefore, countervailing duties will be assessed on all unliquidated entries of certain hot-rolled carbon steel flat products from South Africa entered, or withdrawn from warehouse, for consumption on or after April 20, 2001, the date on which the Department

published its preliminary countervailing duty determination in the **Federal Register**, and before August 18, 2001, the date on which the Department instructed the U.S. Customs Service to terminate the suspension of liquidation in accordance with section 703(d) of the Act, and on all entries and withdrawals on or after the date of publication of this countervailing duty order in the **Federal Register**. Section 703(d) of the Act states that the suspension of liquidation pursuant to a preliminary determination may not remain in effect for longer than four months. Entries of certain hot-rolled carbon steel flat products made on or after August 18, 2001, and prior to the date of publication of this order in the **Federal Register** are not liable for the assessment of countervailing duties as a result of the Department's termination, effective August 18, 2001, of the suspension of liquidation.

In accordance with section 706 of the Act, the Department will direct U.S. Customs (Customs) to reinstate the suspension of liquidation effective on the date of publication of this notice in the **Federal Register** and to assess, upon further advice by the Department pursuant to section 706(a)(1) of the Act, countervailing duties for each entry of the subject merchandise in an amount based on the countervailable subsidy rate for the subject merchandise. In its instructions, the Department will direct Customs to exclude Highveld Steel and Vanadium Corporation Limited (Highveld), which received a *de minimis* subsidy rate in the Department's final determination, from this reinstatement of the suspension of liquidation and any subsequent assessment of countervailing duties.

On or after the date of publication of this notice in the **Federal Register**, Customs must require, at the same time as importers would normally deposit estimated duties on this merchandise, a cash deposit equal to the countervailable subsidy rates noted below. The "All Others" rate applies to all producers and exporters, except for Highveld, of certain hot-rolled carbon steel flat products from South Africa not specifically listed below. The cash deposit rates are as follows:

Producer/exporter	Net subsidy rate
Saldanha Steel/Iscor	5.76% *Ad Valorem*.
All Others	5.76% *Ad Valorem*.

This notice constitutes the countervailing duty order with respect to certain hot-rolled carbon steel flat products from South Africa, pursuant to section 706(a) of the Act. Interested parties may contact the Central Records Unit, for copies of an updated list of countervailing duty orders currently in effect.

This countervailing duty order is published in accordance with section 706(a) of the Act and 19 CFR 351.211.

Dated: November 26, 2001.

Richard W. Moreland,

Acting Assistant Secretary for Import Administration.

CORPORATION FOR NATIONAL AND COMMUNITY SERVICE

Proposed Information Collection: Comment Request

AGENCY: Corporation for National and Community Service.

ACTION: Notice.

SUMMARY: The Corporation for National and Community Service (hereinafter the "Corporation"), as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork

Reduction Act of 1995 (PRA95) (44 U.S.C. 3506(c)(2)(A)). This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirement on respondents can be properly assessed.

Currently, the Corporation is soliciting comments concerning its AmeriCorps Volunteer Generation Survey. Copies of the information collection requests can be obtained by contacting the office listed below in the address section of this notice.

The Corporation is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Corporation, including whether the information will have practical utility;
- Evaluate the accuracy of the Corporation's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section by February 1, 2002.

ADDRESSES: Send comments to the Corporation for National and Community Service, Office of Evaluation, Attn: Chuck Helfer, 1201 New York Avenue, NW., Washington, DC 20525.

FOR FURTHER INFORMATION CONTACT: Chuck Helfer, (202) 606–5000, ext. 248.

SUPPLEMENTARY INFORMATION:

AmeriCorps Volunteer Generation Study

I. Background

The three AmeriCorps programs of the Corporation (AmeriCorps*State/National, National Civilian Community Corps (NCCC) and Volunteers In Service To America (VISTA)) depend on volunteers to help link program activities to individuals and institutions in the communities served by AmeriCorps. Each program plans and implements its own volunteer mobilization and deployment strategies. Volunteer mobilization includes volunteer position development, recruitment, screening, and training. Deployment includes management (i.e. placement, scheduling, coordination, record keeping, volunteer/paid staff relations), recognition and development of appropriate volunteer policies and procedures.

II. Current Action

The Corporation seeks to evaluate the volunteer mobilization and deployment practices and outcomes of AmeriCorps programs. The evaluation will determine the extent to which the mobilization and deployment of local volunteers is meeting AmeriCorps goals for community strengthening and getting things done and AmeriCorps programs are engaging in effective volunteer mobilization and deployment practices. The evaluation will entail mail survey of approximately 1500 surveys to program/project directors and/or site staff. The Corporation will use the data collected through these activities to help programs and projects improve their volunteer-related practices.

Type of Review: New collection.

Agency: Corporation for National and Community Service.

Title: AmeriCorps Volunteer Generation Study.

OMB Number: None.

Agency Number: None.

Affected Public: AmeriCorps program staff, members, volunteers, and other stakeholders.

Total Respondents: 1500 survey respondents.

Frequency: One time.

Average Time Per Response: 45 minutes.

Estimated Total Burden Hours: 1125 hours (survey).

Total Burden Cost (capital/startup): 0.

Total Burden Cost (operating/maintenance): 0.

Comments submitted in response to this notice will be summarized and/or included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: November 27, 2001.

David B. Rymph,

Acting Director, Department of Evaluation and Effective Practices.

[FR Doc. 01–29842 Filed 11–30–01; 8:45 am]

BILLING CODE 6050–65–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Proposed Collection; Comment Request

AGENCY: Office of the Under Secretary of Defense (Acquisition, Technology & Logistics), DoD.

ACTION: Notice.

SUMMARY: In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of the Under Secretary of Defense (Acquisition, Technology & Logistics) announces a proposed public information colleciton and seeks public comment on the provisions thereof. Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the information collected on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by February 1, 2002.

ADDRESSES: Written comments and recommendations on the proposed information collection should be sent to the Office of the Director, Acquisition Initiatives, ATTN: Dr. Jay Mandelbaum, 3620 Defense Pentagon, Washington, DC 20301–3620.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to the above address, or call Office of the Director, Acquisition Initiatives, at 703–614–3882.

Title: Defense Suppliers Customer Satisfaction Diagnostic Survey.

Needs and Uses: The information collection is necessary to determine the reasons for supplier satisfaction/dissatisfaction with Defense acquisition processes. The information will be used to improve Defense acquisition processes to assure supplier satisfaction.

Affected Public: Business or other for profit.

Annual Burden Hours: 95.

Number of Respondents: 380.

Responses per Respondent: 1.

Average Burden per Response: 15 minutes.

Frequency: Annually.

SUPPLEMENTARY INFORMATION:

Summary of the Information Collection

DoD has identified three activities that interface with its suppliers and are relevant for acquisition improvement. These are providing information that contractors need to do business with DoD, establishing a business relationship with each contractor, and then maintaining that business relationship on a long-term basis. The best leverage for improving the overall satisfaction of suppliers is in improving the relationships DoD maintains with them. The proposed collection has been designed to diagnose problems with supplier customer satisfaction. This feedback will be used to formulate policies, programs and practices for improving the level of supplier customer satisfaction. A web-based survey is planned for the supplier diagnostic survey. The survey instrument will be posted on the web, and suppliers will be sent invitations via e-mail to access the web site and complete the survey instrument. The basis for this method is that the cost and time for the survey could be reduced, minimizing the burden on the supplier base.

Dated: November 27, 2001.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 01–29843 Filed 11–30–01; 8:45 am]

BILLING CODE 5001–08–M

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Notice of proposed information collection requests.

SUMMARY: The Leader, Regulatory Information Management, Office of the Chief Information Officer, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: An emergency review has been requested in accordance with the Act (44 U.S.C. Chapter 3507(j)), since public harm is reasonably likely to result if normal clearance procedures are followed. Approval by the Office of Management and Budget (OMB) has been requested by December 21, 2001. A regular clearance process is also beginning. Interested persons are invited to submit comments on or before February 1, 2002.

ADDRESSES: Written comments regarding the emergency review should be addressed to the Office of Information and Regulatory Affairs, Attention: Lauren Wittenberg, Desk Officer: Department of Education, Office of Management and Budget; 725 17th Street, NW., Room 10235, New Executive Office Building, Washington, DC 20503 or should be electronically mailed to the internet address *Lauren_Wittenberg@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Director of OMB provide interested Federal agencies and the public an early opportunity to comment on information collection requests. The Office of Management and Budget (OMB) may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Leader, Information Management Group, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. ED invites public comment. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on respondents, including through the use of information technology.

Dated: November 27, 2001.

John Tressler,

Leader, Regulatory Information Management, Office of the Chief Information Officer.

Office of Special Education and Rehabilitative Services

Type of Review: Revision.

Title: Part B of the Individual with Disabilities Education Act Biennial Performance Report for School Years 1999–2000 through 2000–2001.

Abstract: State educational agencies are required to establish goals for the performance of children with disabilities in that State that promote the purposes of Part B of the Individuals with Disabilities Education Act (Part B). States must also establish performance indicators that the State will use to assess its progress in achieving these goals. Section 612(a)(16) of Part B requires States to report to the Secretary biennially on the progress that the State has made toward meeting its goals.

Additional Information: Information required provides States an opportunity to analyze and explain data that are reported in the Annual Report of Children Served, i.e., number of children served, suspension and expulsion, graduation, and dropout data.

Frequency: Biennially.

Affected Public: State, Local, or Tribal Gov't, SEAs or LEAs; Federal Government.

Reporting and Recordkeeping Hour Burden:

Responses: 57.

Burden Hours: 4,560.

Requests for copies of the proposed information collection request should be addressed to Vivian Reese, Department of Education, 400 Maryland Avenue, SW., Room 4050, Regional Office Building 3, Washington, DC 20202–4651, or should be electronically mailed to the internet address *OCIO.RIMG@ed.gov*, or should be faxed to 202–708–9346.

Comments regarding burden and/or the collection activity requirements, contact Sheila Carey at (202) 708–6287 or via her internet address *Sheila.Carey@ed.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP02–51–000]

Colorado Interstate Gas Company; Notice of Proposed Changes in FERC Gas Tariff

November 27, 2001.

Take notice that on November 16, 2001, Colorado Interstate Gas Company (CIG) tendered for filing as part of its

FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets, with an effective date of January 1, 2002:

Twentieth Revised Sheet No. 10
Thirty-Fourth Revised Sheet No. 11

CIG states that the tariff sheets are being filed to revise the Gas Research Institute surcharges.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

[Docket No. RP02–54–000]

Eastern Shore Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

November 27, 2001.

Take notice that on November 20, 2001 Eastern Shore Natural Gas Company (ESNG) tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, certain revised tariff sheets in the above captioned docket, bear a proposed effective date of November 1, 2001.

ESNG states that the purpose of this instant filing is to track rate changes attributable to storage services purchased from Transcontinental Gas Pipe Line Corporation (Transco) under its Rate Schedules GSS and LSS. The costs of the above referenced storage services comprise the rates and charges payable under ESNG's respective Rate Schedules GSS and LSS. This tracking filing is being made pursuant to Section 3 of ESNG's Rate Schedules GSS and LSS.

ESNG states that copies of the filing have been served upon its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's rules and regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. Egan Hub Partners, L.P.; Notice of Compliance Filing

November 27, 2001.

Take notice that on November 20, 2001, Egan Hub Partners, L.P. (Egan Hub) tendered for filing pro forma tariff sheets in compliance with Order Nos. 637, *et seq.*

Egan Hub states that the purpose of this filing is to comply with the requirement of Order Nos. 637, *et seq.* either to file pro forma tariff sheets that implement certain tariff changes relating to scheduling procedures, capacity segmentation, imbalance management, and penalties, or to explain why the Order No. 637 requirements do not apply to the pipeline's tariff and operating practices.

Egan Hub states that copies of its filing have been mailed to all affected customers and interested state commissions.

Egan Hub proposes that the Commission grant interested parties thirty days from the date of the filing within which to submit initial comments regarding the filing, and a further twenty day period within which Egan Hub may submit reply comments.

Any person desiring to file initial comments in said filing should file the comments with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. All initial comments must be filed on or before December 20, 2001. Egan must file reply comments to the initial comments on or before January 9, 2002. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. Kinder Morgan Interstate Gas Transmission LLC; Notice of Compliance Filing

November 27, 2001.

Take notice that on November 19, 2001, Kinder Morgan Interstate Gas Transmission LLC (KMIGT) tendered for filing as part of its FERC Gas Tariff, the tariff sheets listed on Appendix A and Appendix B–1 to the filing.

KMIGT is filing the above-referenced tariff sheets in compliance with the Commission's Order No. 637 and with the Commission's Letter Order dated October 19, 2001 in Docket No. RP00–343.

KMIGT states that a copy of this filing has been served upon all parties on the official service list for this proceeding.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with section 385.211 of the Commission's rules and regulations. All such protests must be filed in accordance with section 154.210 of the Commission's regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

[Docket No. RP01–382–007]

Northern Natural Gas Company; Notice of Compliance Filing

November 27, 2001.

Take notice that on November 19, 2001, Northern Natural Gas Company (Northern), tendered for filing changes in its FERC Gas Tariff, Fifth Revised Volume No. 1, the following tariff sheet proposed to be effective November 1, 2001.

Substitute Eighth Revised Sheet No. 263

Northern states that the reason for this filing is to comply with the Commission's Order dated November 15, 2001 in Docket RP01–382–006. Pursuant to the Order, Northern has removed the reference to the customer buyout surcharge that pertains to future winter heating seasons from the above noted tariff sheet.

Northern further states that copies of the filing have been mailed to each of its customers and interested State Commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with section 385.211 of the Commission's rules and regulations. All such protests must be filed in accordance with section 154.210 of the Commission's regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

[Docket No. RP02–53–000]

Overthrust Pipeline Company; Notice of Tariff Filing

November 27, 2001.

Take notice that on November 19, 2001, Overthrust Pipeline Company (Overthrust) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1 the following tariff sheets to be effective December 19, 2001:

Sixth Revised Sheet No. 3
Fifth Revised Sheet No. 5

Overthrust is proposing to modify its tariff for two separate cleanup purposes as described below:

1. Overthrust states that on March 24, 2000, Questar Pipeline Company bought Enron Overthrust Pipeline Company's (Enron) interest in the Overthrust partnership resulting in Enron's removal from the general partnership, effective January 1, 2000.

2. Natural Gas Pipeline Company of America permanently released capacity to Duke Energy Trading & Marketing, LLC, effective November 1, 1998.

Overthrust states that this filing reflects these changes. Overthrust states that a copy of this filing has been served upon its customers, the Public Service Commission of Utah and the Public Service Commission of Wyoming.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's rules and regulations. All such motions or protests must be filed in accordance with section 154.210 of the Commission's regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the Web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Federal Energy Regulatory Commission

[Docket Nos. RP02–17–001 and CP00–65–006]

Tennessee Gas Pipeline Company; Notice of Compliance Filing and Associated Tariff Filing

November 27, 2001.

Take notice that on November 16, 2001, Tennessee Gas Pipeline Company (Tennessee) tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, Substitute First Revised Sheet No. 23F, with an effective date of December 1, 2001, and withdraws its Sixth Revised Sheet No. 159 which the Commission accepted in its November 2, 2001 letter order.

Tennessee states that the filing is being made in compliance with the Commission's November 2, 2001, Letter Order in Docket Nos. RP02–17–000 and CP00–65–005 and to propose Extended Receipt Service (ERS) and Extended Delivery Service (EDS) on Incremental Laterals such as the Stagecoach Lateral

for shippers receiving firm transportation service under Rate Schedule FT–A.

Tennessee states that for an additional incremental charge, FT–A shippers will be able to access such Incremental Laterals, without executing a separate contract under Rate Schedule FT–IL. Tennessee requests that any waivers be granted and this filing be accepted and the tariff sheet be made effective on December 1, 2001, so that Tennessee can implement the proposed ERS and EDS on the same date that all other services relating to the Stagecoach Lateral will be effective.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with section 385.211 of the Commission's Rules and Regulations. All such protests must be filed in accordance with section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection. Trunkline Gas Company and CMS Trunkline Gas Company, LLC; Notice of Proposed Changes in FERC Gas Tariff

November 27, 2001.

Take notice that on November 19, 2001, Trunkline Gas Company (Trunkline) and CMS Trunkline Gas Company, LLC tendered for filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the tariff sheets listed on Appendix A to the filing, to reflect a corporate name change to become effective December 1, 2001.

Trunkline states that the revised tariff sheets reflect a corporate name change that will occur on December 1, 2001. On that date, Trunkline will convert from a Corporation to a limited liability company and will change its corporate name to CMS Trunkline Gas Company, LLC.

Trunkline states that copies of its transmittal letter and appendices have been mailed to all affected customers and interested state commissions. Trunkline states that copies of the tariff sheets will be provided, via overnight mail, upon request.

Any person desiring to be heard or to protest said filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with sections 385.214 or 385.211 of the Commission's rules and regulations. BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER02–360–000, et al.]

UAE Lowell Power LLC, et al.; Electric Rate and Corporate Regulation Filings

November 23, 2001.

Take notice that the following filings have been made with the Commission:

1. UAE Lowell Power LLC

[Docket No. ER02–360–000]

Take notice that on November 16, 2001, UAE Lowell Power LLC (ULP), tendered for filing with the Federal

Energy Regulatory Commission (Commission) a Notification of Change in Status. ULP seeks to notify the Commission that it is no longer affiliated with Duke Energy Corporation (Duke). Due to this change in affiliation with Duke, ULP is amending its Rate Schedule No. 1 to remove the Code of Conduct (Supplement No. 1 to Rate Schedule No. 1) between ULP and Duke. ULP requests an effective date of December 16, 2001 for the amendment.

Comment date: December 7, 2001, in accordance with Standard Paragraph E at the end of this notice.

2. Lowell Cogeneration Company Limited Partnership

[Docket No. ER02–361–000]

Take notice that on November 16, 2001, Lowell Cogeneration Company LP. (LCCLP) tendered for filing with the Federal Energy Regulatory Commission (Commission) a Notification of Change in Status. LCCLP seeks to notify the Commission that it is no longer affiliated with Duke Energy Corporation (Duke). Due to this change in affiliation with Duke, LCCLP is amending its Rate Schedule No. 1 to remove its Code of Conduct (Supplement No. 1 to Rate Schedule No. 1) between LLCLP and Duke. LCCLP requests an effective date of December 16, 2001 for the amendment.

Comment date: December 7, 2001, in accordance with Standard Paragraph E at the end of this notice.

3. United American Energy Corp.

[Docket No. ER02–362–000]

Take notice that on November 16, 2001, United American Energy Corp. (UAE), tendered for filing with the Federal Energy Regulatory Commission (Commission) a Notification of Change in Status. UAE seeks to notify the Commission that it is no longer affiliated with Duke Energy Corporation (Duke). Due to this change in affiliation with Duke, UAE is amending its Rate Schedule No. 1 to remove the Code of Conduct (Supplement No. 1 to Rate Schedule No. 1) between UAE and Duke. UAE requests an effective date of December 16, 2001 for the amendment.

Comment date: December 7, 2001, in accordance with Standard Paragraph E at the end of this notice.

4. Calpine Construction Finance Company, L.P.

[Docket No. ER02–363–000]

Take notice that on November 16, 2001, Calpine Construction Finance Company, L.P. (CCFC) filed a revised executed long-term power marketing agreement under which CCFC will make wholesale sales of electric energy to Calpine Energy Services, L.P. at market-based rates. CCFC requests confidential treatment of this agreement.

Comment date: December 7, 2001, in accordance with Standard Paragraph E at the end of this notice.

5. American Transmission Company LLC

[Docket No. ER02–364–000]

Take notice that on November 16, 2001, American Transmission Company LLC (ATCLLC) tendered for filing an executed Distribution-Transmission Interconnection Agreement between ATCLLC and City of Algoma.

ATCLLC requests an effective date of June 25, 2001.

Comment date: December 7, 2001, in accordance with Standard Paragraph E at the end of this notice.

6. American Transmission Company LLC

[Docket No. ER02–365–000]

Take notice that on November 16, 2001, American Transmission Company LLC (ATCLLC) tendered for filing an executed Distribution-Transmission Interconnection Agreement between ATCLLC and Rock County Electric Cooperative Association. ATCLLC requests an effective date of June 29, 2001.

Comment date: December 7, 2001, in accordance with Standard Paragraph E at the end of this notice.

7. Exelon Generation Company, LLC

[Docket No. ER02–366–000]

Take notice that on November 16, 2001, Exelon Generation Company, LLC (Exelon Generation), submitted for filing a power sales service agreement between Exelon Generation and Florida Power Corporation under Exelon Generation's wholesale power sales tariff, FERC Electric Tariff Original Volume No. 2

Comment date: December 7, 2001, in accordance with Standard Paragraph E at the end of this notice.

8. Exelon Generation Company, LLC

[Docket No. ER02–367–000]

Take notice that on November 16, 2001, Exelon Generation Company, LLC (Exelon Generation), submitted for filing a power sales service agreement between Exelon Generation and Carolina Power & Light Company under Exelon Generation's wholesale power sales tariff, FERC Electric Tariff Original Volume No. 2

Comment date: December 7, 2001, in accordance with Standard Paragraph E at the end of this notice.

9. Xcel Energy Operating Companies, Northern States Power Company, Northern States Power Company (Wisconsin)

[Docket No. ER02–368–000]

Take notice that on November 19, 2001, Northern States Power Company and Northern States Power Company (Wisconsin) (jointly NSP), wholly-owned utility operating company subsidiaries of Xcel Energy Inc., tendered for filing with the Federal Energy Regulatory Commission (FERC or Commission) a Firm Point-to-Point Transmission Service Agreement between NSP and Alliant Energy Corporate Services Inc. NSP proposes the Agreement be included in the Xcel Energy Operating Companies FERC Joint Open Access Transmission Tariff, First Revised Volume No. 1, as Service Agreement 193–NSP, pursuant to Order No. 614.

NSP requests that the Commission accept the agreement effective November 1, 2001, and requests waiver of the Commission's notice requirements in order for the agreements to be accepted for filing on the date requested.

Comment date: December 10, 2001, in accordance with Standard Paragraph E at the end of this notice.

10. California Independent System Operator Corporation

[Docket No. ER02–369–000]

Take notice that the California Independent System Operator Corporation (ISO), on November 19, 2001, tendered for filing with the Federal Energy Regulatory Commission (Commission) a Meter Service Agreement for Scheduling Coordinators between the ISO and Quiet, LLC for acceptance by the Commission. The ISO states that this filing has been served on Quiet, LLC and the California Public Utilities Commission.

The ISO is requesting waiver of the 60-day notice requirement to allow the Meter Service Agreement to be made effective as of November 6, 2001.

Comment date: December 10, 2001, in accordance with Standard Paragraph E at the end of this notice.

11. California Independent System Operator Corporation

[Docket No. ER02–370–000]

Take notice that the California Independent System Operator Corporation (ISO), on November 19, 2001, tendered for filing with the Federal Energy Regulatory Commission (Commission) a Scheduling Coordinator Agreement between the ISO and Quiet, LLC for acceptance by the

Commission.The ISO states that this filing has been served on Quiet, LLC and the California Public Utilities Commission.

The ISO is requesting waiver of the 60-day notice requirement to allow the Scheduling Coordinator Agreement to be made effective as of November 6, 2001.

Comment date: December 10, 2001, in accordance with Standard Paragraph E at the end of this notice.

12. American Electric Power Service Corporations

[Docket No. ER02–371–000]

Take notice that on November 19, 2001, American Electric Power Service Corporation tendered for filing on behalf of the operating companies of the American Electric Power System (collectively, AEP), proposed amendments to the AEP Open Access transmission Tariff (OATT) and to the Transmission Coordination Agreement (TCA).

AEP requests that the amendments to the OATT be made effective in two stages. AEP requests that the stage one amendments become effective as of January 1, 2002 and that the stage two amendments to the OATT become effective as of the date AEP implements corporate separation of its facilities in the Electric Reliability Council of Texas (ERCOT). AEP requests that the amended TCA become effective as of the date AEP implements corporate separation of its facilities in the ERCOT.

Copies of the transmittal letter and the prefiled testimony have been served upon AEP's transmission customers and copies of the complete filing have been served on the public service commissions of Arkansas, Indiana, Kentucky, Louisiana, Michigan, Ohio, Tennessee, Texas, Virginia, West Virginia, and the Oklahoma Corporation Commission.

Comment date: December 10, 2001, in accordance with Standard Paragraph E at the end of this notice.

13. Entergy Services, Inc.

[Docket No. ER02–372–000]

Take notice that on November 19, 2001, Entergy Services, Inc., on behalf of Entergy Arkansas, Inc., Entergy Gulf States, Inc., Entergy Louisiana, Inc., Entergy Mississippi, Inc., and Entergy New Orleans, Inc., (collectively, the Entergy Operating Companies) tendered for filing a Non-Firm Point-To-Point Transmission Service Agreement and a Short-Term Firm Point-To-Point Transmission Service Agreement both between Entergy Services, Inc., as agent for the Entergy Operating Companies, and Morgan Stanley Capital Group Inc.

Comment date: December 10, 2001, in accordance with Standard Paragraph E at the end of this notice.

14. American Transmission Company LLC

[Docket No. ER02–373–000]

Take notice that on November 19, 2001, American Transmission Company LLC (ATCLLC) tendered for filing an executed Distribution-Transmission Interconnection Agreement between ATCLLC and the City of Reedsburg.

ATCLLC requests an effective date of June 19, 2001.

Comment date: December 10, 2001, in accordance with Standard Paragraph E at the end of this notice.

15. American Transmission Company LLC

[Docket No. ER02–374–000]

Take notice that on November 19, 2001, American Transmission Company LLC (ATCLLC) tendered for filing an executed Distribution-Transmission Interconnection Agreement between ATCLLC and the City of Sun Prairie.

ATCLLC requests an effective date of June 26, 2001.

Comment date: December 10, 2001, in accordance with Standard Paragraph E at the end of this notice.

16. Phelps Dodge Energy Services, LLC

[Docket No. ER02–375–000]

Take notice that on November 19, 2001, Phelps Dodge Energy Services, LLC, (PDES) filed with the Federal Energy Regulatory Commission (Commission) a letter informing the Commission of a change in the amount of capacity available to PDES that may be relevant to PDES'' market-based rate authority granted by letter order on July 1, 1999. See Green Power Partners I LLC, 88 FERC ¶ 61,005 (1999).

Comment date: December 10, 2001, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest such filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at http://www.ferc.gov using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance). Comments, protests and interventions may be filed electronically via the Internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Application for Amendment of License and Soliciting Comments, Motions To Intervene, and Protests

November 27, 2001.

Take notice that the following application has been filed with the Commission and is available for public inspection:

a. *Application type:* Amendment of License.

b. *Project no.:* 10455–021.

c. *Date filed:* November 8, 2001.

d. *Licensee:* JDJ Energy Company.

e. *Name of project:* River Mountain Pumped Storage Hydroelectric Project.

f. *Location:* The project is located on Lake Dardanelle on the Arkansas River in Logan County; Arkansas. The project does not occupy any federal lands.

g. *Filed pursuant to:* Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. *Licensee contact:* Mr. Donald H. Clarke, Counsel, Law Offices of GKRSE, 1500 K Street NW., Suite 330, Washington, DC 20005; (202) 408–5400.

i. *FERC Contact:* Any questions on this notice should be addressed to Steve Naugle, *steven.naugle@ferc.fed.us*, or (202) 219–2805.

j. *Deadline for filing comments and or motions:* December 13, 2001.

All documents (original and eight copies) should be filed with Mr. David P. Boergers, Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. Comments, protests and interventions may be filed electronically via the internet in lieu of paper. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site under the "e-Filing" link. Please reference the

following number, P–10455–021, on any comments or motions filed.

k. *Description of proposal:* The licensee requests that article 412 of the project license be deleted from the license. License article 412 requires the licensee to file with the Commission, for approval, the proposed terms and conditions of an agreement between the licensee and the Pine Bluff Sand & Gravel Company for lost mineral resources as a result of the project. The licensee asserts that this article imposes additional and unnecessary procedures with respect to the licensee's acquisition of project property.

l. *Locations of the application:* Copies of this filing are on file with the Commission and are available for public inspection. This filing may also be viewed on the web at *http://www.ferc.gov* using the "RIMS" link, select "Docket#" and follow the instructions (call 202–208–2222 for assistance).

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

p. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

David P. Boergers,

Secretary.

BILLING CODE 6717–01–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7111–3]

Underground Injection Control Program Hazardous Waste Injection; Restrictions; Petition for Exemption—Class I Hazardous Waste Injection; E. I. du Pont de Nemours & Company, Inc.

AGENCY: Environmental Protection Agency.

ACTION: Notice of final decision on a no migration petition reissuance.

SUMMARY: Notice is hereby given that a reissuance of an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to E. I. du Pont de Nemours & Company, Inc. (DuPont) for three Class I injection wells located at Beaumont, Texas. As required by 40 CFR part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by the petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the continued underground injection by DuPont, of the specific restricted hazardous wastes identified in the exemption, into Class I hazardous waste injection wells No. WDW–100, WDW–101, and WDW–188 at the Beaumont, Texas facility, until December 31, 2020, for the Frio Sand and until December 31, 2010, for the Oakville Sand, unless EPA moves to terminate the exemption under provisions of 40 CFR 148.24. As required by 40 CFR 148.22(b) and 124.10, a public notice was issued November 27, 2000, and a comment period extension notice was issued December 28, 2000, notifying the public of the opportunity to comment on this action. The initial public comment period opened on November 27, 2000, and closed on January 31, 2001. There was a public hearing held January 4, 2001. The second comment period opened on July 19, 2001, and closed on September 4, 2001. A responsiveness summary was prepared to address all of the extensive comments received. This decision constitutes final Agency action.

DATES: This action is effective as of November 21, 2001.

ADDRESSES: Copies of the petition and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Quality Protection Division, Source Water Protection Branch (6WQ–S), 1445 Ross Avenue, Dallas, Texas 75202–2733.

FOR FURTHER INFORMATION CONTACT: Philip Dellinger, Chief Ground Water/UIC Section, EPA—Region 6, telephone (214) 665–7165.

Sam Becker,

Acting Division Director, Water Quality Protection Division (6WQ).

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–7111–2]

Notice of Proposed Prospective Purchaser Agreement Pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as Amended by the Superfund Amendments and Reauthorization Act, the Resource Conservation Recovery Act, and the Missouri Hazardous Waste Law, Sentinel Wood Treating Site, Ava Douglas County, MO

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposal of prospective purchaser agreement for the Sentinel Wood Treating Site.

SUMMARY: Notice is hereby given that a proposed prospective purchaser agreement associated with the Sentinel Wood Treating Site, located in Ava, Douglas County, Missouri, was executed by the Agency on October 25, 2001, the Missouri Department of Natural Resources on November 7, 2001, the Missouri Attorney General's Office on October 22, 2001, the City of Ava on October 19, 2001, and concurred upon by the United States Department of Justice on October 22, 2001. The Site is an inactive woodtreating facility. The agreement, between the City of Ava, Missouri ("the purchaser"), the United States Environmental Protection Agency ("EPA"), and the Missouri Department of Natural Resources ("MDNR") is subject to final approval after the comment period. The Prospective Purchaser Agreement would resolve

certain potential EPA claims under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended by the Superfund Amendments and Reauthorization Act of 1986 ("CERCLA"), and potential MDNR claims under the Missouri Hazardous Waste Law.

Under this proposed agreement, the purchaser would be required to sample, if necessary, and dispose of contaminated materials that are excavated during road construction and related construction activities, restrict access to two ponds located north of the Site, and refrain from any activity which disturbs the former lagoon area of the Site and the ground water drainage diversion system at the Site. The purchaser must also provide to EPA copies of all construction plans at least thirty (30) days in advance of construction activities. Further, the settlement also requires the purchaser to restrict the use of ground water and ensure non-interference with the performance, operation, and maintenance of any selected response action.

The purchaser is required to grant access to the property to EPA, its authorized officers, employees, representatives, and all other persons performing response actions under EPA oversight. If the purchaser fails to comply with the terms of the Agreement and Covenant Not to Sue, the purchaser would be liable for all litigation and other enforcement costs incurred by the United States to enforce this Agreement.

This notice is also hereby given in accordance with section 7003(d) of the Resource Conservation and Recovery Act ("RCRA"), 42 U.S.C. 6973(d). The proposed settlement includes an EPA covenant not to sue the purchaser pursuant to section 7003 of RCRA, 42 U.S.C. 6973. Commenters may request an opportunity for a public meeting in the affected area in accordance with section 7003(d) of RCRA, 42 U.S.C. 6973(d).

For thirty (30) days following the date of publication of this notice, the Agency will receive written comments relating to the proposed settlement. The Agency's response to any comments received will be available for public inspection at the U.S. Environmental Protection Agency, Region VII, 901 North 5th Street, Kansas City, Kansas 66101, and the information repository for the Sentinel Wood Treating site located at the Douglas County Public Library, Ava, Missouri.

DATES: Comments must be submitted on or before January 2, 2002.

Availability. The proposed settlement is available for public inspection at the U.S. Environmental Protection Agency, Region VII, 901 North 5th Street, Kansas City, Kansas 66101, and the information repository for the Sentinel Wood Treating Site located at the Douglas County Public Library, Ava, Missouri. A copy of the proposed agreement may be obtained from Alyse Stoy, Assistant Regional Counsel, U.S. Environmental Protection Agency, Region VII, 901 North 5th Street, Kansas City, Kansas 66101. Comments should reference "The Sentinel Wood Treating Site Prospective Purchaser Agreement" and should be forwarded to Alyse Stoy, at the above address.

FOR FURTHER INFORMATION CONTACT: Alyse Stoy, Assistant Regional Counsel, Office of Regional Counsel, United States Environmental Protection Agency, Region VII, 901 North 5th Street, Kansas City, Kansas 66101, (913) 551–7826.

Dated: November 16, 2001.

James B. Gulliford,

Regional Administrator, Region VII.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–OW–7111–4]

Notice of Extension of Comment Period on Draft Aquatic Life Criteria Document for Atrazine

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of extension of comment period on draft aquatic life criteria document for atrazine.

SUMMARY: Section 304(a)(1) of the Clean Water Act (CWA) requires the Environmental Protection Agency (EPA) to develop and publish, and from time to time revise, criteria for water accurately reflecting the latest scientific knowledge. These criteria provide EPA's recommendations to states and authorized tribes as guidance in establishing their water quality standards as state or tribal law or regulation. On September 26, 2001, at 66 FR 49186, EPA published a notice of availability for a draft aquatic life criteria document for atrazine. Today, in response to an official request, EPA is notifying the public that the comment period on this draft aquatic life criteria document has been extended for an additional sixty days, until January 25, 2002.

As discussed in the original **Federal Register** notice, EPA's Office of Pesticide Programs (OPP) released its preliminary ecological fate and effects risk assessment of atrazine for a sixty day comment period (66 FR 49180) concurrent with the EPA's Office of Water (OW) draft aquatic life criteria document. However, the 60-day time extension announced today is only for comments on OW's draft aquatic life criteria document. OPP's ecological fate and effects risk assessment will be revised after public comments have been considered and incorporated, and OPP will be soliciting public comment on risk mitigation ideas for 60 days. Both offices continue to ask that comments be submitted to both the OW (W–01–10) and OPP (OPP–34237A) dockets, as discussed in the original **Federal Register** notices.

EPA is notifying the public about the availability of this draft document in accordance with the Agency's process for developing or revising criteria (63 FR 68354, December 10, 1998). As indicated in the December 10, 1998 FR notice, the Agency believes it is important to provide the public with an opportunity to submit scientific information on draft criteria.

DATES: All significant scientific information must be submitted to the Agency under docket number W–01–10. All significant scientific information submissions are requested to be submitted by January 25, 2002. The Administrative Record supporting this draft guidance document is available at the Water Docket, Room EB 57, Environmental Protection Agency, 401 M Street SW., Washington, DC 20460 on Monday through Friday, excluding Federal holidays, between 9 a.m. and 4 p.m. For access to docket materials call (202) 260–3027 for an appointment. A reasonable fee will be charged for photocopies.

ADDRESSES: Send an original and three copies of any written significant scientific information to W–01–10 Comment Clerk, Water Docket (MC4101), USEPA, 1200 Pennsylvania Ave., NW., Washington, DC 20460. Information may be hand-delivered to the Water Docket, USEPA, Room EB 57, 401 M Street, SW., Washington, DC 20460. Information may also be submitted electronically to *OW-Docket@epa.gov*. Information should be submitted as a WP5.1, 6.1 and/or 8.0 or an ASCII file with no form of encryption.

Copies of the criteria document entitled, *Ambient Aquatic Life Water Quality Criteria for Atrazine* may be obtained from EPA's Water Resource

Center by phone at (202) 260–7786, or by e-mail to *center.water-resource@epa.gov* or by conventional mail to EPA Water Resource Center, RC–4100, 1200 Pennsylvania Ave., Washington, DC 20460. Alternatively, consult *www.epa.gov/OST* for download availability.

FOR FURTHER INFORMATION CONTACT: Frank Gostomski, Health and Ecological Criteria Division (4304), US EPA, 1200 Pennsylvania Avenue NW., Washington, DC 20460; (202) 260–1321; *gostomski.frank@epa.gov*

SUPPLEMENTARY INFORMATION:

What Are Recommended Water Quality Criteria?

Recommended water quality criteria are the concentrations of a chemical in water at or below which aquatic life are protected from acute and chronic adverse effects of the chemical. Section 304(a)(1) of the Clean Water Act requires EPA to develop and publish, and from time to time revise, criteria for water accurately reflecting the latest scientific knowledge. Water quality criteria developed under section 304(a) are based solely on data and scientific judgments. They do not consider economic impacts or the technological feasibility of meeting the criteria in ambient water. Section 304(a) criteria provide guidance to States and Tribes in adopting water quality standards and provide a scientific basis for them to develop controls of discharges or releases of pollutants. The criteria also provide a scientific basis for EPA to develop Federally promulgated water quality standards under section 303(c).

What Is Atrazine and Why Are We Concerned About It?

Atrazine is an organic chemical used as an herbicide throughout the U.S. for control of weeds in agricultural crops. Environmental exposure occurs mainly from its application as an herbicide but may also occur from industrial manufacture, distribution releases, precipitation, field runoff, and drift. Atrazine is moderately volatile and soluble in water, and resistant to natural degradation in water. Because of atrazine's chemical properties and widespread use as an herbicide, concerns have been raised over the potential risks posed by exposure of aquatic organisms to it. For these reasons, EPA has developed the following water quality criteria:

Freshwater

Aquatic life should not be affected unacceptably if the: One-hour average concentration of atrazine does not exceed 350 ug/l more than once every three years on the average (Acute Criterion); and Four-day average concentration of atrazine does not exceed 12 ug/l more than once every three years on the average (Chronic Criterion).

Saltwater

Aquatic life should not be affected unacceptably if the: One hour average concentration of atrazine does not exceed 760 ug/l more than once every three years on the average (Acute Criterion); and Four-day average concentration of atrazine does not exceed 26 ug/l more than once every three years on the average (Chronic Criterion).

Definitions of Criteria Terminology

One hour average: The average of all samples taken during a one hour period by either continuous sampling or periodic grab samples.

Four day average: The average of all samples taken during four consecutive days by either continuous sampling or periodic grab samples. Also known as a 96-hour average.

Acute Criterion: A chemical concentration protective of aquatic organisms from short term exposure to fast acting chemicals or spikes in concentrations. For example exposure of a fish moving through an area for foraging but not residing in the area.

Chronic Criterion: A chemical concentration protective of aquatic organisms from longer term exposure to slower acting chemicals or relatively steady concentrations. For example, exposure of a fish that resides in an area.

Why Is EPA Notifying the Public About the Extension of the Comment Period on the Draft Atrazine Criteria Document?

Today, EPA is notifying the public about the extension of the comment period on the draft aquatic life criteria document for atrazine to expand the public's involvement in the criteria development process. EPA notified the public of its intent to develop aquatic life criteria for atrazine in the **Federal Register** on October 29, 1999 (64 FR 58409). At that time EPA made available to the public all references identified by a recent literature review and solicited any additional pertinent data or scientific views that would be useful in developing the aquatic life criteria for atrazine. On September 26, 2001, EPA notified the public of the availability of a draft aquatic life criteria document for atrazine (66 FR 49186). EPA is now making the draft aquatic life criteria document for atrazine available for public review for an additional sixty days. As indicated in the December 10, 1998 FR notice, the Agency believes it is important to provide the public with an opportunity to submit scientific information on draft criteria. EPA is soliciting views from the public on issues of science pertaining to the information used to derive the draft criteria. EPA will review and consider significant scientific information submitted by the public that might not have otherwise been identified during development of these criteria.

Where Can I Find More Information on EPA's Revised Process for Developing New or Revised Criteria?

The Agency published detailed information about its revised process for developing and revising criteria in the **Federal Register** on December 10, 1998 (63 FR 68354) and in the EPA document entitled, *National Recommended Water Quality—Correction* (EPA 822–Z–99–001, April 1999). The purpose of the revised process is to provide expanded opportunities for public input, and to make the criteria development process more efficient.

Dated: November 7, 2001.

Geoffrey H. Grubbs,

Director, Office of Science and Technology.

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Activities: Submission for OMB Review; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency has submitted the following proposed information collection to the Office of Management and Budget for review and clearance in accordance with the requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3507).

Title: Review of Local Mitigation Planning Initiatives and practices.

Type of Information Collection: New.

Abstract: The data collected from the survey will support the Federal Insurance and Mitigation Administration and the Office of the Inspector General in conducting a national review of local mitigation planning. The goal of the survey is to determine the extent to which communities are formulating, adopting and adhering to local mitigation plans, and to review the overall quality of

these plans. Additional goals are to document the "best practices" and identify characteristics of successful planning programs at the local level.

Affected Public: State, local or tribal governments.

Estimated Annual Burden Hours: 188.

Frequency of Responses: Annually.

Estimated Annual Costs to Respondents: $30.00 per respondent.

Comments: Interested persons are invited to submit written comments on the proposed information collection to the Desk Officer for the Federal Emergency Management Agency, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 within 30 days from the date of this notice.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection should be made to Muriel B. Anderson, Chief, Records Management Section, Program Services and Systems Branch, Facilities Management and Services Division, Administration and Resource Planning Directorate, Federal Emergency Management Agency, 500 C Street, SW, Room 316, Washington, DC 20472. Telephone number (202) 646–2625, Fax number (202) 646–3347, or e-mail address: *muriel.anderson@fema.gov.*

Dated: September 28, 2001.

Reginald Trujillo,

Branch Chief, Program Services and Systems Branch, Facilities Management and Services Division, Administration and Resource Planning Directorate.

BILLING CODE 6718–01–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

[FEMA–1395–DR]

Oklahoma; Amendment No. 2 to Notice of a Major Disaster Declaration

AGENCY: Federal Emergency Management Agency (FEMA).

ACTION: Notice.

SUMMARY: This notice amends the notice of a major disaster declaration for the State of Oklahoma, (FEMA–1395–DR), dated October 25, 2001, and related determinations.

EFFECTIVE DATE: November 16, 2001.

FOR FURTHER INFORMATION CONTACT: Madge Dale, Readiness, Response and Recovery and Directorate, Federal Emergency Management Agency, Washington, DC 20472, (202) 646–2705 or *madge.dale@fema.gov.*

SUPPLEMENTARY INFORMATION: The notice of a major disaster declaration for the State of Oklahoma is hereby amended to include the following areas among those areas determined to have been adversely affected by the catastrophe declared a major disaster by the President in his declaration of October 25, 2001: Caddo and Kiowa Counties for Individual Assistance and Public Assistance.

(The following Catalog of Federal Domestic Assistance Numbers (CFDA) are to be used for reporting and drawing funds: 83.537, Community Disaster Loans; 83.538, Cora Brown Fund Program; 83.539, Crisis Counseling; 83.540, Disaster Legal Services Program; 83.541, Disaster Unemployment Assistance (DUA); 83.542, Fire Suppression Assistance; 83.543, Individual and Family Grant (IFG) Program; 83.544, Public Assistance Grants; 83.545, Disaster Housing Program; 83.548, Hazard Mitigation Grant Program.)

Joe M. Allbaugh,

Director.

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 27, 2001.

A. Federal Reserve Bank of Boston (Richard Walker, Community Affairs Officer) 600 Atlantic Avenue, Boston, Massachusetts 02106-2204:

1. Chittenden Corporation, Burlington, Vermont; to acquire 100 percent of the voting shares of, and thereby merge with Ocean National Corporation, Kennebunk, Maine, and thereby indirectly acquire Ocean National Bank, Kennebunk, Maine.

B. Federal Reserve Bank of Atlanta (Cynthia C. Goodwin, Vice President) 1000 Peachtree Street, N.E., Atlanta, Georgia 30309–4470:

1. F.N.B. Corporation, Naples, Florida; to acquire up to 20 percent of the voting shares of Sun Bancorp, Inc., Selinsgrove, Pennsylvania, and thereby indirectly acquire voting shares of Sun Bank, Selinsgrove, Pennsylvania.

C. Federal Reserve Bank of Dallas (W. Arthur Tribble, Vice President) 2200 North Pearl Street, Dallas, Texas 75201–2272:

1. Jane Austin Chapman Limited Partnership, L.P., Jacksonville, Texas; to become a bank holding company by directly acquiring 14.8 percent of the voting shares of Austin Bancorp, Inc., Jacksonville, Texas; and thereby indirectly acquire voting shares of TEB, Inc., Shreveport, Louisiana; and Austin Bank, Texas National Association, Jacksonville, Texas; and directly acquire 8.1 percent of the voting shares of Capital Bancorp, Inc., Jacinto City, Texas, and thereby indirectly acquire voting shares of JACI, Inc., Wilmington, Delaware, and Capital Bank, Jacinto City, Texas; and directly acquire 9.9 percent of the voting shares of Frankston Bancorp, Inc., Frankston, Texas, and thereby indirectly acquire voting shares of FDB, Inc., Dover, Delaware, and First State Bank, Frankston, Texas; and directly acquire 5.9 percent of the voting shares of First State Bank, Athens, Texas.

Board of Governors of the Federal Reserve System, November 27, 2001.

Margaret McCloskey Shanks,

Assistant Secretary of the Board.

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y (12 CFR Part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company, including the companies listed below, that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.28 of Regulation Y (12 CFR 225.28) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. The notice also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act. Additional information on all bank holding companies may be obtained from the National Information Center website at www.ffiec.gov/nic/.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 17, 2001.

A. Federal Reserve Bank of Kansas City (Susan Zubradt, Assistant Vice President) 925 Grand Avenue, Kansas City, Missouri 64198–0001:

1. Meader Insurance Agency, Inc., Waverly, Kansas; to retain Waverly Insurance Agency, Inc., Waverly, Kansas, and thereby engage in insurance activities in a place of less than 5,000 persons, pursuant to § 225.28(b)(11)(iii) of Regulation Y.

Board of Governors of the Federal Reserve System, November 27, 2001.

BILLING CODE 6210-01-S

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration on Aging

Agency Information Collection Activities: Proposed Submission to the Office of Management and Budget (OMB) for Clearance; Comment Request; New Information Collection

AGENCY: Administration on Aging, HHS.

The Administration on Aging (AoA), Department of Health and Human Services, provides an opportunity for comment on the following proposal for the collection of information in compliance with the Paperwork Reduction Act (PRA; Pub. L. 96–511): National Outcome Measures Surveys of Older Americans Act (OAA) Clients.

Type of Request: New information collection.

Use: Consumer assessment data will be collected in this initial set of surveys to initiate national program outcome assessment consistent with the requirements of the Government Performance and Results Act and the Older Americans Act.

Frequency: One-time.

Respondents: Elderly individuals who have received selected services under Title 3 of the Older Americans Act.

Estimated Number of Responses: 3,500.

Total Estimated Burden Hours: 2,000.

Additional Information or Comments:

The Administration on Aging plans to submit to the Office of Management and Budget for approval the National Outcome Measures Surveys of Older Americans Act (OAA) Clients, pursuant to requirements set forth by congressional statute. Through a contract with WESTAT, Inc., AoA will draw samples of individuals served through Area Agencies on Aging across the country for the purpose of obtaining OAA program service assessments from these individuals. The surveys will utilize information collection instruments and methods developed and tested by experts in the field of gerontology and by State and local entities that administer OAA programs. The surveys will include assessments from among the following service categories: nutrition, transportation, caregiver support, home-care, and information and assistance.

Written comments and recommendations for the proposed information collection should be sent within 60 days of the publication of this notice directly to the following address: Office of Planning and Evaluation, Administration on Aging, Attention: David Bunoski, 330 Independence Avenue, SW., Rm. 4755, Washington, DC 20201.

Dated: November 27, 2001.

Josefina G. Carbonell,

Assistant Secretary for Aging.

BILLING CODE 4154-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Program Announcement 02020]

Cooperative Agreement for Research and Human Resource Development in Human Infectious Diseases in Guatemala; Notice of Availability of Funds

A. Purpose

The Centers for Disease Control and Prevention (CDC) announces the availability of fiscal year (FY) 2002 funds for a cooperative agreement program for Research and Human Resource Development in Human Infectious Diseases in Guatemala. This program addresses the "Healthy People 2010" focus area of Immunization and Infectious Diseases.

The purpose of this program is to conduct multi-disciplinary laboratory and field research studies and related activities to control and prevent human infectious diseases of public health importance in Guatemala and to achieve the health promotion and diseases prevention objectives of a national activity to reduce morbidity and mortality and improve the quality of health.

B. Eligible Applicants

Assistance will be provided only to the Universidad del Valle. No other applications are solicited.

The Universidad del Valle is the only non-government organization (NGO) in Guatemala with an established collaboration with the Guatemala Ministry of Health and Social Assistance (MOH).

The Universidad del Valle is the only research organization in Guatemala that possesses the requisite scientific and technical expertise, the infrastructure capacity, and which had conducted research in the areas of parasitic diseases and other human infectious diseases through collaboration with CDC for the past twenty three years.

Note: Title 2 of the United States Code, section 1611 states that an organization described in section 501(c)(4) of the Internal Revenue Code that engages in lobbying activities is not eligible to receive Federal funds constituting an award, grant, or loan.

C. Availability of Funds

Approximately $500,000 is available in FY 2002 to fund one award. It is expected that the awards will begin on or about April 1, 2002, and will be made for a 12-month budget period within a project period of up to five years. The funding estimate may change.

Continuation awards within an approved project period will be made on the basis of satisfactory progress as evidenced by required reports and the availability of funds.

D. Where To Obtain Additional Information

Business management technical assistance, contact: Cynthia Collins, Grants Management Specialist, Grants Management Branch, Procurement and Grants Office, Centers for Disease Control and Prevention, 2920 Brandywine Road, Room 3000, Atlanta, GA 30341–4146, Telephone number: (770) 488–2757, E-mail address: *coc9cdc.gov*.

Program technical assistance may be obtained from: Diana Curtis, Division of Parasitic Diseases, National Center for Infectious Diseases, Centers for Disease Control and Prevention, 1600 Clifton Road, NE., Atlanta, GA 30333, Telephone: (770) 488–7744, E-mail address: *dcy1@cdc.gov*.

Dated: November 26, 2001.

Rebecca B. O'Kelley,

Chief, International Grants and Contracts Branch, Procurement and Grants Office, Centers for Disease Control and Prevention (CDC).

[FR Doc. 01–29838 Filed 11–30–01; 8:45 am]

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

[Docket No. 98N–0917]

RIN 0910–AA52

Opioid Drugs in Maintenance and Detoxification Treatment of Opiate Addiction; Notice of Approval of Accreditation Organizations for Opioid Treatment Programs Under 42 CFR Part 8

AGENCY: Substance Abuse and Mental Health Services Administration, DHHS.

ACTION: Notice.

SUMMARY: The Substance Abuse and Mental Health Services Administration (SAMHSA) is announcing the approval of four accreditation organizations under new opioid treatment program regulations. Under the provisions of the new regulations which went into effect on May 18, 2001, opioid treatment programs must apply to one of these approved accreditation organization as a condition of SAMHSA certification.

FOR FURTHER INFORMATION CONTACT: Nicholas Reuter, Center for Substance Abuse Treatment (CSAT), SAMHSA, Rockwall II, 5600 Fishers Lane, Rockville, MD, 20857, 301–443–0457, e-mail: *nreuter@samhsa.gov*. For further information on accreditation issues contact Raymond Hylton, Center for Substance Abuse Treatment (CSAT), SAMHSA, Rockwall II, 5600 Fishers Lane, Rockville, MD 20857, 301–443–6502, e-mail: *rhylton@samhsa.gov*.

SUPPLEMENTARY INFORMATION: New regulations effective May 18, 2001 (66 FR 15347, March 19, 2001, see also 66 FR 4092, January 17, 2001) establish an accreditation based regulatory system for opioid treatment programs (OTPs) that use methadone or ORLAAM for the maintenance or detoxification treatment of opiate addiction. Under 42 CFR 8.3, interested private nonprofit organizations or State governmental entities can submit applications to become accreditation bodies under the new rules. Four entities submitted applications and have been determined by SAMHSA under 42 CFR 8.3(d) to substantially meet the conditions for approval.

1. CARF * * * The Rehabilitation Accreditation Commission, 4891 East Grant, Tucson, Arizona 60181, telephone: 520–325–1044, fax: 520–318–1129, Web site: *http://www.carf.org/CARF*.

2. Council on Accreditation for Children and Family Services, 120 Wall Street, 11th Floor, New York, New York 10005, telephone: 212–797–3000, fax: 212–797–1428, Web site: *http://www.coanet.org*.

3. Joint Commission on Accreditation of Healthcare Organizations, One Renaissance Boulevard, Oakbrook Terrace, Illinois 60181, telephone: 630–792–5800, fax: 630–792–5005, Web site: *http://www.jcaho.org*.

4. Division of Alcohol and Substance Abuse, Washington Department of Social and Health Services, Division of Alcohol and Substance Abuse, P.O. Box 45330 (Mail Stop 45330), Olympia, Washington 98504–5330, telephone: 360–438–8056, fax: 360–407–5318, Web site: *http://www-app2.wa.gov/dshs/dasa*.

SAMHSA is providing this notice to OTPs and others to facilitate accreditation applications as necessary for certification under the provisional and transitional certification provisions of Subpart B of the new regulation (see 42 CFR 8.11(a), (d), and (e)). OTPs with transitional certification must apply to an approved accreditation body no later than March 4, 2002. SAMHSA is also notifying OTPs directly about the approval of these four accreditation organizations and will notify OTPs of future approvals in a similar manner.

Additional information on accreditation and related issues can be obtained from the SAMHSA/CSAT Web page at *www.opat.samhsa.gov* or by writing to the Substance Abuse and Mental Health Services Administration, CSAT Office of Pharmacologic and Alternative Therapies, Attention: OTP Accreditation Program, 5600 Fishers Lane, Room 12–105, Rockville, MD 20857.

Dated: November 27, 2001.

Richard Kopanda,

Executive Officer, SAMHSA.

BILLING CODE 4162–20–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered Species Permit Applications

AGENCY: Fish and Wildlife Service.

ACTION: Notice of receipt of permit applications.

SUMMARY: The following applicants have applied for a scientific research permit to conduct certain activities with endangered species pursuant to section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Permit No. TE–048470

Applicant: Sonoma County Permit and Resource Management Department, Santa Rosa, California.

The applicant requests a permit to take (capture) the California freshwater shrimp (*Syncaris pacifica*) in conjunction with surveys throughout the species range in California for the purpose of enhancing its survival.

Permit No. TE–048739

Applicant: Daniel Cordova, Santa Maria, California.

The applicant requests a permit to take (locate and monitor nests) the California least tern (*Sterna antillarum browni*) in conjunction with population monitoring in San Luis Obispo and Santa Barbara Counties, California, for the purpose of enhancing its survival.

Permit No. TE–049072

Applicant: Wayne D. Spencer, San Diego, California.

The applicant requests a permit to take (capture, handle, mark, and release) the Pacific pocket mouse (*Perognathus longimembris pacificus*), San Bernardino kangaroo rat (*Dipodomys merriami parvus*), and Stephens' kangaroo rat (*Dipodomys stephensi*) in conjunction with demographic and ecological research throughout the species' range for the purpose of enhancing their survival.

Permit No. TE–702631

Applicant: Assistant Regional Director-Ecological Services, Region 1, U.S. Fish and Wildlife Service, Portland, Oregon.

The applicant requests a permit amendment to remove/reduce to possession specimens of the following plant species: *Silene spaldingii* (Spalding's catchfly). Authorization is also requested to take the following species: Ohlone tiger beetle (*Cicindela ohlone*). Collection and take activities will be conducted throughout the species' range in conjunction with recovery efforts for the purpose of enhancing their propagation and survival.

Permit No. TE–049461

Applicant: Jaymee Marty, Galt, California.

The applicant requests a permit to take the vernal pool tadpole shrimp (*Lepidurus packardi*) in Sacramento County, California, in conjunction with population monitoring for the purpose of enhancing its survival.

Permit No. TE–026932

Applicant: Darlene Woodbury, Santa Maria, California.

The permittee requests a permit amendment to take (capture and band) the California least tern (*Sterna antillarum browni*) in conjunction with population monitoring in San Luis Obispo and Santa Barbara Counties, California, for the purpose of enhancing its survival.

Permit No. TE–802107

Applicant: Patricia Baird, Long Beach, California.

The permittee requests a permit amendment to take (collect blood) the least tern (*Sterna antillarum*) throughout the its range in conjunction with genetic research for the purpose of enhancing its survival.

Permit No. TE–049175

Applicant: Melanie R. Huffman, Pheonix, Arizona.

The applicant requests a permit to take (survey) the Delhi Sands flower-loving fly (*Rhaphiomidas terminatus abdominalis*), and take (pursue) the Quino Checkerspot Butterfly (*Euphydryas editha quino*) in conjunction with surveys throughout the range of each species for the purpose of enhancing their survival.

Permit No. TE–049470

Applicant: Chris A. Niemela, La Mirada, California,

The applicant requests a permit to take (pursue) the Quino Checkerspot Butterfly (*Euphydryas editha quino*) in conjunction with surveys throughout the range of the species for the purpose of enhancing its survival.

Permit No. TE–049540

Applicant: Riverside-Corona Resource Conservation District, Riverside, California.

The applicant requests a permit to take (capture and remove from the wild) the Santa Ana sucker (*Catostomus santaanae*) in conjunction with relocation and captive propagation in a controlled stream site, and release to the wild for the purpose of enhancing its survival.

Permit No. TE–048660

Applicant: Dharm S. Pellegrini, Los Angeles, California.

The applicant requests a permit to take (survey, locate and monitor nests) the southwestern willow flycatcher (*Empidonax trailii extimus*) and take (locate and monitor nests) the least Bell's vireo (*Vireo bellii pusillus*) in conjunction with population monitoring in San Bernadino, Riverside, Orange, San Diego, Kern, Los Angeles, and Ventura Counties, California for the purpose of enhancing their survival.

DATES: Written comments on these permit applications must be received within 30 days of the date of publication of this notice.

ADDRESSES: Written data or comments should be submitted to the Chief, Endangered Species, Ecological Services, Fish and Wildlife Service, 911 NE. 11th Avenue, Portland, Oregon 97232–4181; Fax: (503) 231–6243. Please refer to the respective permit number for each application when submitting comments. All comments received, including names and addresses, will become part of the official administrative record and may be made available to the public.

FOR FURTHER INFORMATION CONTACT: Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 20 days of the date of publication of this notice to the address above; telephone: (503) 231–2063. Please refer to the respective permit number for each application when requesting copies of documents.

Dated: November 15, 2001.

Rowan W. Gould,

Acting Regional Director, Region 1, Portland, Oregon.

Notice of Receipt of Applications for Permit

Endangered Species

The public is invited to comment on the following application(s) for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, *as amended* (16 U.S.C. 1531, *et seq.*). Written data, comments, or requests for copies of these complete applications should be submitted to the Director (address below) and must be received within 30 days of the date of this notice.

Applicant: Mark Groger, Cumming, GA, PRT–050072

The applicant request(s) a permit to import the sport-hunted trophy of one male bontebok (*Damaliscus pygargus*

dorcas) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

Applicant: Blair Allen Murphy, Gaylord, MI, PRT–050074

The applicant requests a permit to import the sport-hunted trophy of one male bontebok (*Damaliscus pygargus dorcas*) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

The U.S. Fish and Wildlife Service has information collection approval from OMB through March 31, 2004, OMB Control Number 1018–0093. Federal Agencies may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a current valid OMB control number.

Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents within 30 days of the date of publication of this notice to: U.S. Fish and Wildlife Service, Division of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203, telephone 703/358–2104 or fax 703/358–2281.

Dated: November 19, 2001.

Monica Farris,

Senior Permit Biologist, Branch of Permits, Office of Management Authority.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of Draft Recovery Plan for Coastal Plants of the Northern San Francisco Peninsula for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of the Draft Recovery Plan for Coastal Plants of the Northern San Francisco Peninsula. This recovery plan includes the endangered San Francisco lessingia (*Lessingia germanorum*) and Raven's manzanita (*Arctostaphylos hookeri* ssp. *ravenii*). The portion of the plan dealing with Raven's manzanita is a revision of the 1984 Raven's Manzanita Recovery Plan. Additional species of concern that will benefit from recovery actions taken for these plants are also discussed in the draft recovery plan. The draft plan includes recovery criteria and measures for San Francisco lessingia and Raven's manzanita.

DATES: Comments on the draft recovery plan must be received on or before March 4, 2002.

ADDRESSES: Copies of the draft recovery plan are available for inspection, by appointment, during normal business hours at the following location: U.S. Fish and Wildlife Service, Sacramento Fish and Wildlife Office, 2800 Cottage Way, W–2605, Sacramento, California (telephone (916) 414–6600). Requests for copies of the draft recovery plan and written comments and materials regarding this plan should be addressed to Wayne S. White, Field Supervisor, Ecological Services, at the above Sacramento address. The draft recovery plan is also available on the World Wide Web at *http://www.r1.fws.gov/es/endsp.htm.*

FOR FURTHER INFORMATION CONTACT: Carmen Thomas, Fish and Wildlife Biologist, at the above Sacramento address.

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals and plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for the conservation of the species, establish criteria for downlisting or delisting listed species, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act as amended in 1988 requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during the public comment period prior to approval of each new or revised recovery plan. Substantive technical comments will result in changes to the plan. Substantive comments regarding recovery plan implementation may not necessarily result in changes to the recovery plan, but will be forwarded to appropriate Federal or other entities so that they can take these comments into account during the course of

implementing recovery actions. Individual responses to comments will not be provided.

San Francisco lessingia and Raven's manzanita are restricted to the San Francisco peninsula in San Francisco County, California. San Francisco lessingia, an annual herb in the aster family, is restricted to coastal sand deposits. Raven's manzanita is a rare evergreen creeping shrub in the heath family which was historically restricted to few scattered serpentine outcrops. Habitat loss, adverse alteration of ecological processes, and invasion of non-native plant species threaten San Francisco lessingia. Raven's manzanita has also been threatened by habitat loss; at present it is threatened primarily by invasion of non-native vegetation and secondarily by disease organisms and poor reproductive success. The draft plan also makes reference to several other federally listed species which are ecologically associated with San Francisco lessingia and Raven's manzanita, but which are treated comprehensively in other recovery plans. These species are beach layia (*Layia carnosa*), Presidio clarkia (*Clarkia franciscana*), Marin dwarf-flax (*Hesperolinon congestum*), Myrtle's silverspot butterfly (*Speyere zerene myrtleae*), and bay checkerspot butterfly (*Euphydryas editha bayensis*). In addition, 16 plant species of concern and 17 plant species of local or regional conservation significance are considered in this recovery plan.

The draft recovery plan stresses re-establishing dynamic, persistent populations of San Francisco lessingia and Raven's manzanita within plant communities which have been restored to be as "self-sustaining" as possible within urban wildland reserves. Specific recovery actions for San Francisco lessingia focus on the restoration and management of large, dynamic mosaics of coastal dune areas supporting shifting populations within the species' narrow historic range. Recovery of Raven's manzanita will include, but will not be limited to, the strategy of the 1984 Raven's Manzanita Recovery Plan, which emphasized the stabilization of the single remaining genetic individual. The draft plan also seeks to re-establish multiple sexually reproducing populations of Raven's manzanita in association with its historically associated species of local serpentine outcrops. The objectives of this recovery plan are to delist San Francisco lessingia and to downlist Raven's manzanita through implementation of a variety of recovery measures including: (1) Protection and restoration of a series of ecological reserves (often with mixed recreational and conservation park land uses); (2) promotion of population increases of San Francisco lessingia and Raven's manzanita within these sites, or reintroduction of them to restored sites; (3) management of protected sites, especially the extensive eradication or suppression of invasive dominant non-native vegetation; (4) research; and (5) public participation, outreach, and education.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of this plan.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: November 20, 2001.

Steve Thompson,

Acting California/Nevada Operations Manager, U.S. Fish and Wildlife Service, Sacramento, California.

[FR Doc. 01–29824 Filed 11–30–01; 8:45 am]

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Availability; Draft Environmental Impact Statement on Double-Crested Cormorant Management

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability for public comment.

SUMMARY: The U.S. Fish and Wildlife Service has prepared a Draft Environmental Impact Statement, which is available for public review. The DEIS analyzes the potential environmental impacts of several management alternatives for addressing problems associated with increasing double-crested cormorant populations. The analysis provided in the DEIS is intended to accomplish the following: inform the public of the proposed action and alternatives; address public comment received during the scoping period; and disclose the direct, indirect, and cumulative environmental effects of the proposed action and each of the alternatives. The Service invites the public to comment on the DEIS.

DATES: Written comments on the DEIS must be received by January 15, 2002.

ADDRESSES: Requests for copies of the DEIS should be mailed to Chief, Division of Migratory Bird Management, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, Room 634, Arlington, Virginia 22203. Copies of the DEIS can also be downloaded from the Division of Migratory Bird Management Web site at: *http://migratorybirds.fws.gov/issues/cormorant/cormorant.html.*

FOR FURTHER INFORMATION CONTACT: Jon Andrew, Chief, Division of Migratory Bird Management, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, MS634, Arlington, VA 22203; phone: 703/358–1714; fax: 703/358–2272.

SUPPLEMENTARY INFORMATION: On November 8, 1999, a notice was published in the **Federal Register** (64 FR 60826) announcing that the Service intended to prepare an Environmental Impact Statement " to [address] impacts caused by population and range expansion of the double-crested cormorant in the contiguous United States." This announcement commenced a public scoping period that ended on June 20, 2000. Over 1,400 public comments were received and were considered in the development of the DEIS, which is now being made available for public review. This notice is provided pursuant to Fish and Wildlife Service regulations for implementing the National Environmental Policy Act of 1969 (40 CFR 1506.6).

The DEIS evaluates six management alternatives to address biological and socioeconomic resource conflicts associated with cormorants: (1) No Action or a continuation of current cormorant management practices (Alternative A); (2) implement only non-lethal management techniques (Alternative B); (3) expand current cormorant damage management policies (Alternative C); (4) establish a new Depredation Order to address public resource conflicts (Alternative D) (PROPOSED ACTION); (5) reduce regional cormorant populations (Alternative E); and (6) establish frameworks for a cormorant hunting season (Alternative F). Our proposed action (Alternative D) modifies the existing Aquaculture Depredation Order and establishes a new Public Resource Depredation Order to allow public resource managers greater flexibility in dealing with cormorant conflicts while ensuring Federal oversight via reporting and monitoring requirements.

You may mail or deliver comments to the Division of Migratory Bird Management, U.S. Fish and Wildlife Service, 4401 N. Fairfax Drive, Room 634, Arlington, Virginia 22203.

Additionally, you may submit comments on the DEIS via the internet to: *cormorant_eis@fws.gov*. Please include your name and return address in your e-mail message, and submit your comments as an ASCII file. Do not use special characters or encryption. If you do not receive a confirmation from the system that we received your e-mail message, you can contact us directly at 703/358–1714.

In order to be considered, submission of comments (written or electronic) must include your name and postal mailing address; we will not consider anonymous comments. All comments received, including names and addresses, will become part of the public record. The public may inspect comments during normal business hours in Room 634 " Arlington Square Building, 4401 N. Fairfax Drive, Arlington, Virginia. Requests for such comments will be handled in accordance with the Freedom of Information Act and the Council on Environmental Quality's National Environmental Policy Act regulations [40 CFR 1506.6(f)]. Our practice is to make comments available for public review during regular business hours. Individual respondents may request that we withhold their home address from the record, which we will honor to the extent allowable by law. If a respondent wishes us to withhold his/her name and/or address, this must be stated prominently at the beginning of the comment.

Several public hearings will be held throughout the country during the comment period to solicit further comments from the public. The dates and locations of these hearings are yet to be determined. A notice of public meetings with the locations, dates, and times will be published in the **Federal Register**.

Kevin R. Adams,

Acting Deputy Director.

BILLING CODE 4310–55–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Availability of an Environmental Assessment and an Application for an Incidental Take Permit for the Temecula Ridge Apartments and Temecula Village Development Projects in Riverside County, CA

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and receipt of application.

SUMMARY: AGK Group, LLC and Temecula Village Development, L.P. (the Applicants) have applied to the Fish and Wildlife Service (Service) for incidental take permits pursuant to section 10(a)(1)(B) of the Endangered Species Act of 1973, as amended. The Service is considering issuance of a 7-year permit to each Applicant that would authorize take of the threatened coastal California gnatcatcher (Polioptila californica californica) incidental to otherwise lawful activities. Such take would occur during the construction of multi-family residential structures and associated commercial/retail space on a 44-acre infill site adjacent to Rancho California Road in the City of Temecula in southwestern Riverside County, California. We request comments from the public on the permit application, and an Environmental Assessment, both of which are available for review. The permit application includes the proposed Habitat Conservation Plan (HCP) and an accompanying Implementing Agreement (legal contract). The HCP describes the proposed action and the measures that the Applicants would undertake to minimize and mitigate take of the coastal California gnatcatcher.

DATES: We must receive your written comments on or before February 1, 2002.

ADDRESSES: Please address written comments to Mr. Jim Bartel, Field Supervisor, U.S. Fish and Wildlife Service, 2730 Loker Avenue West, Carlsbad, California 92008. You also may send comments by facsimile to (760) 431–5902.

FOR FURTHER INFORMATION CONTACT: Ms. Karen Evans, Assistant Field Supervisor, at the above address or call (760) 431–9440.

SUPPLEMENTARY INFORMATION:

Availability of Documents

You may obtain copies of these documents for review by contacting the above office. Documents also will be available for public inspection, by appointment, during normal business hours at the above address and at the Temecula Library located at 41000 County Center Drive, Temecula, California.

Background

Section 9 of the Endangered Species Act (Act) and federal regulations prohibit the "take" of fish or wildlife species listed as endangered or threatened. Take of listed fish or wildlife is defined under the Act to include "harass, harm, pursue, hunt, shot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct." The Service may, under limited circumstances, issue permits to authorize incidental take (i.e., take that is incidental to, and not the purpose of, the carrying out of an otherwise lawful activity). Regulations governing incidental take permits for threatened and endangered species are found in 50 CFR 17.32 and 17.22.

The Applicants are proposing development of multi-family residential structures (containing a total of 406 residential units) and associated commercial and retail space on 44 acres. The development site is an infill area within the City surrounded by a combination of multi-family and single family residential complexes.

Biologists surveyed the combined project site for biological resources in 1999 and 2000. Two years of protocol surveys for Quino checkerspot butterfly (*Euphydryas editha quino*) were conducted, but no sign of the species was detected. Two pairs of coastal California gnatcatchers were found in 2000. Given the limited amount of sage scrub habitat available for these two pairs on this infill site (14 acres), it is presumed that the two pairs are also utilizing, to some degree, portions of the remaining 30 acres, which consist of non-native grassland, ruderal vegetation, and barren areas.

Based on the survey results, the Service concluded that implementation of the two proposed projects would result in take of the two pairs of gnatcatchers found on this infill site, through the permanent removal of the vegetation on the 44 acres of this combined site: 14 acres of riversidean sage scrub, and 30 acres of non-native grassland and ruderal vegetation. Environmental effects addressed in the HCP and Environmental Assessment include the loss of both pairs of gnatcatchers given the removal of the vegetation from the site.

The Applicants propose to implement the following measures to mitigate and minimize take of coastal California gnatcatchers: (1) Avoid ground disturbing activities during the California gnatcatcher breeding season; (2) stake the construction boundaries of the project; (3) random inspections of the project site by a biological monitor; (4) purchase conservation credits for 45 acres of riversidean sage scrub occupied by two pairs of gnatcatchers from an off-site mitigation bank in the Riverside County area; and (5) purchase an additional 25 acres of riversidean sage scrub conservation credits from another

off-site mitigation bank in the Riverside County area. Both conservation banks possess a management endowment to ensure their permanent management for sensitive species and habitats, including the California gnatcatcher.

The Environmental Assessment considers the environmental consequences of four alternatives, including the Proposed Action. The Proposed Action consists of the issuance of two incidental take permits and implementation of the HCP and its Implementing Agreement, which includes measures to minimize and mitigate impacts of the two projects on the coastal California gnatcatcher. Under the "No Action" alternative, the Service would not issue a permit to either Applicant. Under this alternative, the proposed residential developments would not be constructed at this time. Both pairs of gnatcatchers may still be lost over time because the small isolated project site is not well-suited to the long term preservation of gnatcatcher pairs. Contributions to more permanent gnatcatcher preservation efforts in the region (through participation in regional conservation mitigation banks) would not occur.

Under the "Reduced Project" alternative, one of the two multi-family residential projects would not receive an incidental take permit. One of the applicants would not develop their property at this time. The other project would receive a permit. It is likely that both gnatcatcher pairs would ultimately be lost from the 44 acre combined site since development of either project alone would likely eliminate so much habitat as to render the remaining isolated habitat incapable of supporting any gnatcatcher pairs in the long term. This alternative would provide only half of the conservation benefits of the Proposed Action while ultimately resulting in the same level of incidental take as the Proposed Action.

Under the "Different Location" alternative, the two adjoining projects would be relocated to another area in the City of Temecula. The opportunities for needed multi-family housing in the City of Temecula are severely limited, and the identification and acquisition of an alternative site in the City cannot be assured. Under this alternative, both pairs of gnatcatchers may still be lost because the small isolated project site is not well-suited to the long term preservation of gnatcatcher pairs. No conservation contributions to regional gnatcatcher preservation would be made.

The alternatives to the Proposed Action would result in less habitat conservation value for the coastal California gnatcatcher in the Riverside County region and contribute less to its long-term survival in the wild than the off-site conservation bank habitat preservation/management mitigation measures under the Proposed Action.

This notice is provided pursuant to section 10(a) of the Endangered Species Act and the regulations of the National Environmental Policy Act of 1969 (40 CFR 1506.6). All comments that we receive, including names and addresses, will become part of the official administrative record and may be made available to the public. We will evaluate the application, associated documents, and comments submitted thereon to determine whether the application meets the requirements of the National Environmental Policy Act regulations and section 10(a) of the Endangered Species Act. If we determine that those requirements are met, we will issue a permit to each Applicant for the incidental take of the coastal California gnatcatcher. We will make our final permit decision no sooner than 60 days from the date of this notice.

Dated: November 26, 2001.

John Engbring,

Acting Deputy Manager, California/Nevada Operations Office, Sacramento, California.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Issuance of Permit for Marine Mammals

On August 29, 2001, a notice was published in the **Federal Register** (66 FR 45689), that an application had been filed with the Fish and Wildlife Service by Andy Krook for a permit (PRT–046899) to import one polar bear (*Ursus maritimus*) taken from the Southern Beaufort Sea population, Canada, for personal use.

Notice is hereby given that on October 29, 2001, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On September 6, 2001, a notice was published in the **Federal Register** (66 FR 46650), that an application had been filed with the Fish and Wildlife Service by Gerald Moschgat for a permit (PRT–047378) to import one polar bear (*Ursus maritimus*) taken from the Northern Beaufort Sea population, Canada, for personal use.

Notice is hereby given that on October 29, 2001, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

On September 25, 2001, a notice was published in the **Federal Register** (66 FR 49035), that an application had been filed with the Fish and Wildlife Service by Douglas E. Snell for a permit (PRT–047054) to import one polar bear (*Ursus maritimus*) taken from the Northern Beaufort Sea population, Canada, for personal use.

Notice is hereby given that on November 9, 2001, as authorized by the provisions of the Marine Mammal Protection Act of 1972, *as amended* (16 U.S.C. 1361 *et seq.*) the Fish and Wildlife Service authorized the requested permit subject to certain conditions set forth therein.

Documents and other information submitted for these applications are available for review by any party who submits a written request to the U.S. Fish and Wildlife Service, Division of Management Authority, 4401 North Fairfax Drive, Room 700, Arlington, Virginia 22203, telephone (703) 358–2104 or fax (703) 358–2281.

Dated: November 19, 2001.

Monica Farris,

Senior Permit Biologist, Branch of Permits, Division of Management Authority.

BILLING CODE 4310–55–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 731–TA–740 (Review)]

Sodium Azide From Japan

AGENCY: United States International Trade Commission.

ACTION: Institution of a five-year review concerning the suspended investigation on sodium azide from Japan.

SUMMARY: The Commission hereby gives notice that it has instituted a review pursuant to section 751(c) of the Tariff Act of 1930 (19 U.S.C. 1675(c)) (the Act) to determine whether termination of the suspended investigation on sodium azide from Japan would be likely to lead to continuation or recurrence of material injury. Pursuant to section 751(c)(2) of the Act, interested parties are requested to respond to this notice by submitting the information specified below to the

Commission;[1] to be assured of consideration, the deadline for responses is January 22, 2002. Comments on the adequacy of responses may be filed with the Commission by February 19, 2002. For further information concerning the conduct of this review and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A through E (19 CFR part 201), and part 207, subparts A, D, E, and F (19 CFR part 207).

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Mary Messer (202–205–3193), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS–ON–LINE) at *http://dockets.usitc.gov/eol/public*.

SUPPLEMENTARY INFORMATION:

Background

On January 7, 1997, the Department of Commerce suspended an antidumping duty investigation on imports of sodium azide from Japan (62 FR 973). The Commission is conducting a review to determine whether termination of the suspended investigation would be likely to lead to continuation or recurrence of material injury to the domestic industry within a reasonably foreseeable time. It will assess the adequacy of interested party responses to this notice of institution to determine whether to conduct a full review or an expedited review. The Commission's determination in any expedited review will be based on the facts available, which may include information provided in response to this notice.

[1] No response to this request for information is required if a currently valid Office of Management and Budget (OMB) number is not displayed; the OMB number is 3117–0016/USITC No. 01–5–066, expiration date July 31, 2002. Public reporting burden for the request is estimated to average 7 hours per response. Please send comments regarding the accuracy of this burden estimate to the Office of Investigations, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436.

Definitions

The following definitions apply to this review:

(1) *Subject Merchandise* is the class or kind of merchandise that is within the scope of the five-year review, as defined by the Department of Commerce.

(2) The *Subject Country* in this review is Japan.

(3) The *Domestic Like Product* is the domestically produced product or products which are like, or in the absence of like, most similar in characteristics and uses with, the Subject Merchandise. For the purpose of the preliminary investigation, the Commission defined the Domestic Like Product as all sodium azide.

(4) The *Domestic Industry* is the U.S. producers as a whole of the Domestic Like Product, or those producers whose collective output of the Domestic Like Product constitutes a major proportion of the total domestic production of the product. For the purpose of the preliminary investigation, the Commission defined the Domestic Industry as producers of sodium azide.

(5) The *Order Date* is the date that the investigation was suspended. In this review, the Order Date is January 7, 1997.

(6) An *Importer* is any person or firm engaged, either directly or through a parent company or subsidiary, in importing the Subject Merchandise into the United States from a foreign manufacturer or through its selling agent.

Participation in the Review and Public Service List

Persons, including industrial users of the Subject Merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the review as parties must file an entry of appearance with the Secretary to the Commission, as provided in section 201.11(b)(4) of the Commission's rules, no later than 21 days after publication of this notice in the **Federal Register**. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the review.

Former Commission employees who are seeking to appear in Commission five-year reviews are reminded that they are required, pursuant to 19 CFR 201.15, to seek Commission approval if the matter in which they are seeking to appear was pending in any manner or form during their Commission employment. The Commission's designated agency ethics official has advised that a five-year review is the "same particular matter" as the underlying original investigation for purposes of 19 CFR 201.15 and 18 U.S.C. 207, the post employment statute for Federal employees. Former employees may seek informal advice from Commission ethics officials with respect to this and the related issue of whether the employee's participation was "personal and substantial." However, any informal consultation will not relieve former employees of the obligation to seek approval to appear from the Commission under its rule 201.15. For ethics advice, contact Carol McCue Verratti, Deputy Agency Ethics Official, at 202–205–3088.

Limited Disclosure of Business Proprietary Information (BPI) Under an Administrative Protective Order (APO) and APO Service List

Pursuant to section 207.7(a) of the Commission's rules, the Secretary will make BPI submitted in this review available to authorized applicants under the APO issued in the review, provided that the application is made no later than 21 days after publication of this notice in the **Federal Register**. Authorized applicants must represent interested parties, as defined in 19 U.S.C. § 1677(9), who are parties to the review. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

Certification

Pursuant to section 207.3 of the Commission's rules, any person submitting information to the Commission in connection with this review must certify that the information is accurate and complete to the best of the submitter's knowledge. In making the certification, the submitter will be deemed to consent, unless otherwise specified, for the Commission, its employees, and contract personnel to use the information provided in any other reviews or investigations of the same or comparable products which the Commission conducts under Title VII of the Act, or in internal audits and investigations relating to the programs and operations of the Commission pursuant to 5 U.S.C. Appendix 3.

Written Submissions

Pursuant to section 207.61 of the Commission's rules, each interested party response to this notice must provide the information specified below. The deadline for filing such responses is January 22, 2002. Pursuant to section 207.62(b) of the Commission's rules, eligible parties (as specified in Commission rule 207.62(b)(1)) may also

file comments concerning the adequacy of responses to the notice of institution and whether the Commission should conduct an expedited or full review. The deadline for filing such comments is February 19, 2002. All written submissions must conform with the provisions of sections 201.8 and 207.3 of the Commission's rules and any submissions that contain BPI must also conform with the requirements of sections 201.6 and 207.7 of the Commission's rules. The Commission's rules do not authorize filing of submissions with the Secretary by facsimile or electronic means. Also, in accordance with sections 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the review must be served on all other parties to the review (as identified by either the public or APO service list as appropriate), and a certificate of service must accompany the document (if you are not a party to the review you do not need to serve your response).

Inability To Provide Requested Information

Pursuant to section 207.61(c) of the Commission's rules, any interested party that cannot furnish the information requested by this notice in the requested form and manner shall notify the Commission at the earliest possible time, provide a full explanation of why it cannot provide the requested information, and indicate alternative forms in which it can provide equivalent information. If an interested party does not provide this notification (or the Commission finds the explanation provided in the notification inadequate) and fails to provide a complete response to this notice, the Commission may take an adverse inference against the party pursuant to section 776(b) of the Act in making its determination in the review.

Information To Be Provided in Response to This Notice of Institution

As used below, the term "firm" includes any related firms.

(1) The name and address of your firm or entity (including World Wide Web address if available) and name, telephone number, fax number, and e-mail address of the certifying official.

(2) A statement indicating whether your firm/entity is a U.S. producer of the Domestic Like Product, a U.S. union or worker group, a U.S. importer of the Subject Merchandise, a foreign producer or exporter of the Subject Merchandise, a U.S. or foreign trade or business association, or another interested party (including an explanation). If you are a union/worker group or trade/business association, identify the firms in which your workers are employed or which are members of your association.

(3) A statement indicating whether your firm/entity is willing to participate in this review by providing information requested by the Commission.

(4) A statement of the likely effects of the termination of the suspended investigation on the Domestic Industry in general and/or your firm/entity specifically. In your response, please discuss the various factors specified in section 752(a) of the Act (19 U.S.C. 1675a(a)) including the likely volume of subject imports, likely price effects of subject imports, and likely impact of imports of Subject Merchandise on the Domestic Industry.

(5) A list of all known and currently operating U.S. producers of the Domestic Like Product. Identify any known related parties and the nature of the relationship as defined in section 771(4)(B) of the Act (19 U.S.C. 1677(4)(B)).

(6) A list of all known and currently operating U.S. importers of the Subject Merchandise and producers of the Subject Merchandise in the Subject Country that currently export or have exported Subject Merchandise to the United States or other countries since 1996.

(7) If you are a U.S. producer of the Domestic Like Product, provide the following information on your firm's operations on that product during calendar year 2000 (report quantity data in thousands of pounds and value data in thousands of U.S. dollars, f.o.b. plant). If you are a union/worker group or trade/business association, provide the information, on an aggregate basis, for the firms in which your workers are employed/which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total U.S. production of the Domestic Like Product accounted for by your firm's(s') production;

(b) the quantity and value of U.S. commercial shipments of the Domestic Like Product produced in your U.S. plant(s); and

(c) the quantity and value of U.S. internal consumption/company transfers of the Domestic Like Product produced in your U.S. plant(s).

(8) If you are a U.S. importer or a trade/business association of U.S. importers of the Subject Merchandise from the Subject Country, provide the following information on your firm's(s') operations on that product during calendar year 2000 (report quantity data in thousands of pounds and value data in thousands of U.S. dollars). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) The quantity and value (landed, duty-paid but not including antidumping or countervailing duties) of U.S. imports and, if known, an estimate of the percentage of total U.S. imports of Subject Merchandise from the Subject Country accounted for by your firm's(s') imports;

(b) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. commercial shipments of Subject Merchandise imported from the Subject Country; and

(c) the quantity and value (f.o.b. U.S. port, including antidumping and/or countervailing duties) of U.S. internal consumption/company transfers of Subject Merchandise imported from the Subject Country.

(9) If you are a producer, an exporter, or a trade/business association of producers or exporters of the Subject Merchandise in the Subject Country, provide the following information on your firm's(s') operations on that product during calendar year 2000 (report quantity data in thousands of pounds and value data in thousands of U.S. dollars, landed and duty-paid at the U.S. port but not including antidumping or countervailing duties). If you are a trade/business association, provide the information, on an aggregate basis, for the firms which are members of your association.

(a) Production (quantity) and, if known, an estimate of the percentage of total production of Subject Merchandise in the Subject Country accounted for by your firm's(s') production; and

(b) the quantity and value of your firm's(s') exports to the United States of Subject Merchandise and, if known, an estimate of the percentage of total exports to the United States of Subject Merchandise from the Subject Country accounted for by your firm's(s') exports.

(10) Identify significant changes, if any, in the supply and demand conditions or business cycle for the Domestic Like Product that have occurred in the United States or in the market for the Subject Merchandise in the Subject Country since the Order Date, and significant changes, if any, that are likely to occur within a reasonably foreseeable time. Supply conditions to consider include technology; production methods; development efforts; ability to increase production (including the shift of production facilities used for other products and the use, cost, or availability of major inputs into

production); and factors related to the ability to shift supply among different national markets (including barriers to importation in foreign markets or changes in market demand abroad). Demand conditions to consider include end uses and applications; the existence and availability of substitute products; and the level of competition among the Domestic Like Product produced in the United States, Subject Merchandise produced in the Subject Country, and such merchandise from other countries.

(11) (Optional) A statement of whether you agree with the above definitions of the Domestic Like Product and Domestic Industry; if you disagree with either or both of these definitions, please explain why and provide alternative definitions.

Authority: This review is being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.61 of the Commission's rules.

Issued: November 27, 2001.

By order of the Commission.

Donna R. Koehnke,

Secretary.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Immigration and Naturalization Service

[INS No. 2169C–01]

Notice of Corrected Address for Aliens Seeking Relief Pursuant to the Settlement Agreement in *Walters* v. *Reno*

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Notice of change of address.

SUMMARY: On September 20, 2001, the Immigration and Naturalization Service (Service) published a notice in the **Federal Register** at 66 FR 48480–82, regarding the class action settlement agreement in the case of *Walters et al.* v. *Reno et al.*, Civ. No. 94–1204C. In the notice the Service incorrectly listed the address for class members to mail their requests for a refund for a previously paid civil money penalty for a section 274c violation. The correct mailing address for such requests is: INS Debt Management Center, 188 Harvest Lane, Williston, VT 05495–7554.

This change is necessary to ensure that class members have the proper mailing address for requesting refunds from the Service.

DATES: This notice is effective December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Warren McBroom, Immigration and Naturalization Service, 425 I Street, NW, Suite 6100, Washington, DC 20536, telephone (202) 514–2895.

Dated: November 19, 2001.

James W. Ziglar,

Commissioner, Immigration and Naturalization Service.

[FR Doc. 01–29884 Filed 11–30–01; 8:45 am]

BILLING CODE 4410–10–M

LIBRARY OF CONGRESS

Copyright Office

[Docket No. RM 97–5C]

Copyright Restoration of Works in Accordance With the Uruguay Round Agreements Act; Notification Pertaining to Notices of Intent To Enforce Restored Copyrights

AGENCY: Copyright Office, Library of Congress.

ACTION: Notification of request to retract prior filings of notices of intent to enforce restored copyrights.

SUMMARY: This notice gives public notice that the Copyright Office has received a notification of a request to retract the filing of certain notices of intent to enforce restored copyrights under the Uruguay Round Agreements Act.

EFFECTIVE DATE: December 3, 2001.

FOR FURTHER INFORMATION CONTACT: Charlotte Douglass, Principal Legal Advisor to the General Counsel, or Marilyn Kretsinger, Copyright GC/I&R, PO Box 70400, Southwest Station, Washington, DC 20024. Telephone: (202) 707–8380. Telefax: (202) 707–8366.

SUPPLEMENTARY INFORMATION: Under the Uruguay Round Agreements Act, the Copyright Office is charged with publishing in the **Federal Register** any notices of intent to enforce restored copyrights timely filed with the Office. Notices filed with the Office must be filed within 24 months after a work initially becomes eligible. See 17 U.S.C. 104A(d)(2)(A). At this time, only works the source country of which is a foreign member of the World Trade Organization or the Berne Convention are eligible for restoration. 17 U.S.C. 104A(h)(3). On or shortly after January 1, 1996, the effective date of the Uruguay Round Agreements Act, the great majority of these countries fulfilled the conditions for eligibility. For those reasons, the time for filing notices of intent from the overwhelming majority of countries has now expired. Thus, typically, the Office does not receive new NIEs that are timely.

The URAA also prescribes conditions under which NIEs may be corrected. In 1997, the Copyright Office adopted an interim regulation under which corrections of errors in Notices of Intent to Enforce restored copyright may be filed. 62 FR 55736 (1997). In accordance with that regulation, the Office has published in the **Federal Register** lists of certain Correction Notices which reflect information erroneously listed on or omitted from original NIEs. 37 CFR 201.34. Any timely filed original or correction NIEs are published within four months after receipt on the next scheduled publication date. 17 U.S.C. 104A(e)(1)(B).

The Office now publishes a list of NIEs that is neither of original nor Correction NIEs but a judicially required statement which is the result of an action related to ownership of certain restored copyrights. The Office publishes this notice consistent with the intent of the URAA that makes the Copyright Office responsible for providing public notice of significant facts regarding, inter alia, the ownership of restored copyrights.

In a letter dated August 30, 2001, responding to an Amended Final Judgment in *Alameda Films, S.A.* v. *H. Jackson Shirley III*, No. H–99–0734, slip op. at 4 (S.D. Tex. Aug. 1, 2001), Mr. Shirley notified the U.S. Copyright Office that the Authors Rights Restoration Corporation retracts all filings in the U.S. Copyright Office in any way related to the eighty-one films listed in Exhibit "A" of the district court's order. This case has been appealed to the fifth circuit, No. 01–20869, docketed August 24, 2001.

The titles from Exhibit A are as follows:

U.S. copyright owner	Film title	Translated title
Alameda Films, S.A	El Baron del Terror	The Baron of Terror.
Alameda Films, S.A	El Grito de la Muerte	Cry of Death.
Alameda Films, S.A	El Hombre y El Monstruo	The Man and the Monster.

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice.

SUMMARY: NARA is giving public notice that the agency proposes to request use of NA Form 14116, Customer Request for Information and Order, a web-based form to be completed by members of the public who wish to either request printed order forms for copies of genealogical records or to obtain information about NARA's archival holdings or services. The public is invited to comment on the proposed information collection pursuant to the Paperwork Reduction Act of 1995.

DATES: Written comments must be received on or before February 1, 2002 to be assured of consideration.

ADDRESSES: Comments should be sent to: Paperwork Reduction Act Comments (NHP), Room 4400, National Archives and Records Administration, 8601 Adelphi Rd, College Park, MD 20740–6001; or faxed to 301–713–6913; or electronically mailed to *tamee.fechhelm@nara.gov*.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the proposed information collection and supporting statement should be directed to Tamee Fechhelm at telephone number 301–713–6730, or fax number 301–713–6913.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13), NARA invites the general public and other Federal agencies to comment on proposed information collections. The comments and suggestions should address one or more of the following points: (a) Whether the proposed information collection is necessary for the proper performance of the functions of NARA; (b) the accuracy of NARA's estimate of the burden of the proposed information collection; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways, including the use of information technology, to minimize the burden of the collection of information on respondents. The comments that are submitted will be summarized and included in the NARA request for Office of Management and Budget (OMB) approval. All comments will become a matter of public record. In this notice, NARA is soliciting comments concerning the following information collection:

Title: Customer Request for Information and Order Forms.

OMB number: 3095—New.

Agency form number: NA Form 14116.

Type of review: Regular.

Affected public: Individuals and households.

Estimated number of respondents: 130,000.

Estimated time per response: 5 minutes.

Frequency of response: On occasion.

Estimated total annual burden hours: 10,833 hours.

Abstract: The form is a web-based form to be completed by members of the public who wish to either request printed order forms for copies of genealogical records or to obtain information about NARA's archival holdings or services. Customers who request printed forms indicate the type and quantity of form wanted. Those who need information about NARA's archival holdings choose a subject heading to help describe their request. The form entails no burden other than that necessary to identify the customer, the date, the customer's address, and the nature of the request. This information is used only to facilitate answering the request and is not retained after the request is completed. The information is not used for any subsequent purpose.

Dated: November 27, 2001.

L. Reynolds Cahoon,

Assistant Archivist for Human Resources and Information Services.

NATIONAL SCIENCE FOUNDATION

Proposal Review; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation (NSF) announces its intent to hold proposal review meetings throughout the year. The purpose of these meetings is to provide advice and recommendations concerning proposals submitted to the NSF for financial support. The agenda for each of these meetings is to review and evaluate proposals as part of the selection process for awards. The majority of these meetings will take place at NSF, 4201 Wilson Blvd., Arlington, Virginia 22230.

All of these meetings will be closed to the public. The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act. NSF will continue to review the agenda and merits of each meeting for overall compliance of the Federal Advisory Committee Act.

These closed proposal review meetings will no longer be announced

Other

on an individual basis in the **Federal Register**. NSF intends to publish a notice similar to this on a quarterly basis. For an advance listing of the closed proposal review meetings that include the names of the proposal review panel and the time, date, place, and any information on changes, corrections, or cancellations, please visit the NSF Web-site: *www.nsf.gov/home/pubinfo/advisory.htm*. This information may also be requested by telephoning 703/292–8182.

Dated: November 27, 2001.

Susanne Bolton,

Committee Management Officer.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

Deployment of the NRC's Redesigned Public Web Site

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of availability.

SUMMARY: The Nuclear Regulatory Commission (NRC) plans to deploy its newly redesigned public Web site in a phased approach between now and the end of the year. The redesign gives the Web site a new and consistent look and feel. It is organized by content and topic rather than by NRC organizational structure, uses top-down logic going from the general to specific topics, makes navigation easy, gives greater visibility to frequently accessed information, uses plain language where possible, and complies with Section 508 of the Rehabilitation Act. As a result of the events of September 11, 2001, the NRC shut down its public Web site on October 11 and is conducting a thorough review of the original scope of the redesigned site. This review includes all of the content available at the NRC public Web site prior to October 11. As reviews are completed, NRC will restore content incrementally in the redesigned format.

ADDRESSES: NRC's newly redesigned Web site will be made available at *www.nrc.gov*. For updates on the planned deployment, see the redesign notice at *www.nrc.gov*.

FOR FURTHER INFORMATION CONTACT: Walter Oliu, Office of the Chief Information Officer, Mail Stop T–6 E7, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Telephone (301) 415–7823, or e-mail *nrcweb@nrc.gov*.

SUPPLEMENTARY INFORMATION: As a result of a public meeting to discuss NRC interactions with stakeholders on nuclear material and waste activities, the Commission directed the NRC staff to improve NRC's Web site by (1) reviewing other major Web sites as models for possible improvements to the NRC site; (2) soliciting the views of stakeholders, including members of the general public, researchers, and representatives of the library community; (3) implementing goals for the public site to support NRC's Strategic Plan; and (4) ensuring that the public site is compliant with the Americans With Disabilities Act.

The NRC staff established the following objectives for the external Web site to support the goals of NRC's Strategic Plan: (1) Increase public confidence in the NRC by providing information that enhances the ability of stakeholders to participate effectively in the regulatory process; provide information that enhances the public's understanding of NRC's mission, goals, and performance; make it easy to find desired information; ensure the timeliness and accuracy of information at the site; and (2) make doing business with the NRC more efficient and effective by providing easy access to necessary information and tools for conducting business electronically via the Web.

The NRC formed two groups to provide agencywide input to the redesign effort: a Web Redesign Working Group, composed of staff who currently maintain the NRC's content at our public Web site, and a Web Redesign Steering Committee, composed of senior managers and chaired first by a representative from the Office of Nuclear Reactor Regulation and later by a representative from the Office of Public Affairs.

The NRC staff contracted for a usability analysis of the existing Web site. Stakeholders, including representatives of public interest groups, librarians, licensees, State officials, members of the international nuclear regulatory community, and NRC staff who frequently interact with the public were involved in this process through several focus groups, a usability test at NRC's Regulatory Information Conference, and a Web survey. An expert evaluation of how well NRC's current Web site follows best practices and considers human factors, and how accessible it is to individuals with disabilities (in compliance with Section 508 of the Rehabilitation Act) was also done. In addition, the staff compared NRC's Web site with other highly rated government sites and confirmed that there were significant opportunities to improve the current site's structure and organization, navigability, style, understandability, and accessibility. The recommendations included:

- Create a "common look and feel" for the entire NRC Web site (enforce standards);
- Organize by content and topic rather than by NRC organizational structure;
- Use top-down logic going from the general to the specific;
- Make navigation consistent (links to top-level pages, within-page navigational devices, and links to external non-NRC sites); and
- Comply with Section 508 of the Rehabilitation Act (test pages on multiple platforms and with browsers favored by people with disabilities).

The results of these assessments formed the basis for developing a prototype for the redesigned Web site. The prototype contained improvements adopted from all the recommendations listed above and was reviewed by the NRC Web staff, the Web Redesign Working Group, and the Web Redesign Steering Committee. In addition, NRC collected and evaluated comments on the prototype from stakeholders who were involved in the initial usability study, as well as others. The agency obtained OMB clearance to collect comments from stakeholders. The NRC staff as a whole was also provided an opportunity to comment.

An analysis of the feedback on the prototype indicated that users were more satisfied with the prototype than with NRC's existing public Web site. Many suggestions for further improvements were adopted and implemented for the redesigned site.

As a result of the events of September 11, 2001, the NRC shut down its public Web site on October 11 and is conducting a thorough review of the original scope of the redesigned site. This review includes all document collections available at the NRC public Web site prior to October 11 (over 50,000 pages and nearly all of the other content, over 1,000 pages). As reviews are completed, NRC will restore content incrementally in the redesigned format. Updates on the redesign will be posted at the Web site (*www.nrc.gov*) as the deployment proceeds.

Dated at Rockville, Maryland this 27th day of November 2001.

For the Nuclear Regulatory Commission.

Stuart Reiter,

Chief Information Officer.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC–25299/File No. 812–12572]

Mutual of America Life Insurance Company, et al.

November 26, 2001.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of an application for an order pursuant to section 11(a) of the Investment Company Act of 1940 (the "Act").

APPLICANTS: Mutual of America Life Insurance Company ("Mutual of America"), Mutual of America Separate Account No. 2 (the "Annuity Account") and Mutual of America Separate Account No. 3 (the "VUL Account," and together with the Annuity Account, "Mutual Accounts").

SUMMARY OF APPLICATION: Applicants seek an order approving the terms of a proposed offer of exchange of interests in the Mutual Accounts for interests issued by The American Life Insurance Company of New York ("American Life").

FILING DATE: The application was filed on July 13, 2001.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the Commission and serving Applicants with a copy of the request, personally or by mail. Hearing requests must be received by the Commission by 5:30 p.m. on December 21, 2001, and be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the requester's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549–0609. Applicants, Deborah S. Becker, Esq., Senior Vice President and Associate General Counsel, Mutual of America, 320 Park Avenue, New York, New York 10022.

FOR FURTHER INFORMATION CONTACT: Kenneth C. Fang, Attorney, or Keith E. Carpenter, Branch Chief, at (202) 942–0670, Office of Insurance Products, Division of Investment Management.

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application is available for a fee from the Public Reference Branch of the Commission, 450 Fifth Street, NW., Washington DC 20549–0102 (tel. (202) 942–8090).

Applicants' Representations

1. Mutual of America is a mutual life insurance company organized under the laws of the State of New York in 1945, having its home office at 320 Park Avenue, New York, New York 10022. Mutual of America is authorized to sell individual and group life insurance policies, variable annuity contracts and variable universal life policies in 50 states and the District of Columbia.

2. The Annuity Account is a separate account of Mutual of America established for the purpose of providing an investment medium for variable contracts, including individual annuities. It is registered under the Act as a unit investment trust (File No 811–4679), and three registration statements on Form N–4 filed pursuant to the Securities Act of 1933 ("1933 Act") are in effect for sales of interests under group and individual variable accumulation annuity contracts (File Nos. 2–90201, 33–5609 and 33–11023). One registration statement (File No. 2–90201) covers several forms of contract, including Individual Retirement Annuity ("IRA") Contracts and Flexible Premium Deferred Annuity ("FPA") Contracts. The IRA and FPA Contracts issued by Mutual of America are herein referred to as the "Contracts."

3. The VUL Account is a separate account of Mutual of America established for the purpose of providing an investment medium for variable contracts, including individual life policies. It is registered under the Act as a unit investment trust (File No. 811–9487), and a registration statement on Form S–6 filed pursuant to the 1933 Act is in effect for sales of interests under individual variable universal life insurance policies (the "Policies") (File No. 333–83413).

4. The Mutual Accounts currently hold assets in their respective seventeen subaccounts ("investment funds"), each of which invests in shares of a corresponding mutual fund portfolio (collectively, the "Underlying Funds"). Each of the Underlying Funds is a series of a management investment company registered under the Act and its shares are registered for sale under the 1933 Act.

5. Mutual of America serves as the principal underwriter of the Contracts and the Policies, and also is the principal underwriter for the Mutual of America Investment Corporation. It is a broker-dealer registered under the Securities and Exchange Act of 1934 and is a member of the National Association of Securities Dealers, Inc.

6. Mutual of America intends to make offers of exchange to the holders ("Owners") of variable annuity and life insurance products that were issued by American Life at a time when American Life was an indirectly wholly-owned subsidiary of Mutual of America. American Life is a stock life insurance company organized under the laws of the State of New York in 1955, with headquarters at 435 Hudson Street, New York, New York 10014, and substantial operations at 300 Distillery Commons, Louisville, Kentucky 40206.

7. The American Separate Account No. 2 (the "American Annuity Account") is a separate account of American Life established for the purpose of providing an investment medium for variable contracts, including individual annuities. The American Annuity Account is registered under the Act as a unit investment trust (File No. 811–7904), and a registration statement on Form N–4 filed pursuant to the 1933 Act is in effect for sales of interests under IRA Contracts and FPA Contracts, which are variable individual accumulation annuity contracts (File No. 33–66406). The American IRA and American FPA Contracts issued by American Life are herein referred to as the "American Contracts."

8. The American Separate Account No. 3 (the "American VUL Account") is a separate account of American Life established for the purpose of providing an investment medium for variable contracts, including individual life policies. The American VUL Account is registered under the Act as a unit investment trust (File No. 811–8368), and a registration statement on Form S–6 filed pursuant to the 1933 Act is in effect for sales of interests under individual variable universal life insurance policies (the "American Policies") (File No. 33–75280).

9. The American Annuity Account and American VUL Account are herein called the "American Accounts." The American Accounts each have seventeen investment funds that invest in shares of corresponding Underlying Funds.

10. American Life ceased selling the American Contracts and Policies as of April 1, 2000. In reliance on the Commission's no-action position in *Great-West Life & Annuity Insurance Co.* (publicly available October 23, 1990), American Life in 2001 did not file updating amendments to the registration statements covering the American Contracts and the American Policies.

11. On March 16, 2001, Mutual of America sold to a third party all of the

outstanding common stock of a holding company, which owned all of the outstanding common stock of American Life. For accounting purposes, the sale was effective as of February 28, 2001. Under an Indemnity Reinsurance Agreement, dated as of February 28, 2001, between Mutual of America and American Life (the "Indemnity Agreement"), Mutual of America has indemnity reinsured American Life's general account liabilities under the American Contracts and Policies. Under an Administrative Services Agreement, dated as of February 28, 2001, between Mutual of America and American Life (the "Servicing Agreement"), Mutual of America provides all administrative services for the American Contracts and America Policies, including administrative services with respect to the American Accounts. Under an Amendment, dated as of February 28, 2001, to the Distribution and Administration Agreement between Mutual of America and American Life, Mutual of America is the principal underwriter of the American Contracts and Policies for new contributions and premiums paid by existing Owners (the "Distribution Agreement"). Mutual of America entered into the Servicing Agreement, the Indemnity Agreement and the Distribution Agreement to facilitate the sale of American Life to a third party.

12. American Life and Mutual of America entered into a reinsurance and assumption agreement, which was effective April 1, 2000 (the "assumption agreement"), relating to various individual annuity contracts and individual life policies, including the then outstanding American Contracts and Policies. In the assumption agreement, American Life ceded all of its obligations, rights and liabilities under the American Contracts and Policies to Mutual of America on an assumption reinsurance basis, and Mutual of America agreed to assume all such obligations, rights and liabilities transferred to it, subject to compliance with applicable state insurance laws and regulations.

13. Under the insurance laws and regulations of some states, Owners had the right to opt out of the proposed assumption reinsurance of their contracts by Mutual of America, and in some states Owners were required to affirmatively consent to the assumption reinsurance. In addition, the New York State Insurance Department has administratively prohibited the assumption reinsurance of variable annuity contracts and variable life insurance policies issued in New York when contractholders are no longer New York residents. Upon effectiveness of the assumption agreement, a substantial portion of the American Contracts and Policies were transferred to Mutual of America, which replaced American Life as the issuer of such Contracts and Policies. Mutual of America, however, was not able to assumption reinsure American Contracts and Policies when an Owner: (a) Was required under applicable state insurance law to give affirmative consent to Mutual of America's assumption reinsurance and did not provide such consent; (b) had the right under applicable state insurance law to opt out of Mutual of America's assumption reinsurance and timely exercised such right; or (c) was a resident of the State of New York when the American Contract or Policy was issued and subsequently moved to another state.

14. On November 4, 1999, Mutual of America, the Mutual Accounts, American Life and the American Accounts (the "Initial Applicants") filed with the Commission an application for an order pursuant to Section 17(b), Section 17(d) and Rule 17d–1 thereunder, and Section 11(a) of the Act, in connection with the assumption agreement and the reinsurance transactions contemplated thereunder. Among other things, the application requested an order to permit the offers of exchange when Owners had opt out rights or the consent of Owners was required in connection with the assumption reinsurance of American Contracts and Policies by Mutual of America. The Initial Applicants filed an amended and restated application on February 16, 2000 (the "Initial Application"), and the Commission issued an Order granting the requested exemptions to the Initial Applicants on March 13, 2000, Inv. Co. Act Rel. No. 24336, File No. 812–11840 (the "Initial Order").

15. At the time of the Initial Application, Mutual of America and American Life contemplated that they would make additional offers of exchange only through requests for consent to assumption by Owners whose American Contracts and Policies were not assumption reinsured effective April 1, 2000. Accordingly, the exemptive relief that was requested in the Initial Application and granted in the Initial Order with respect to offers of exchange contemplated that such offers would be made in connection with assumption reinsurance transactions, either before or after the sale of American Life by Mutual of America.

16. Mutual of America intends to make offers of exchange to Owners, pursuant to which Owners would exchange their American Contracts and Policies for Contracts and Policies, respectively. A reduction in the number of Owners, or their elimination, would reduce or eliminate, respectively, the cost to Mutual of America of providing administrative services for the American Contracts and Policies and the American Accounts, as required under the Servicing Agreement, and for reinsuring American Life's general account liabilities, pursuant to the Indemnity Agreement. It would be less expensive for Mutual of America to provide administrative services only to owners of its Contracts and Policies rather than to provide such services for both Contracts and Policies and American Contracts and Policies. The exchanges also would benefit Owners, because owners of Contracts and Policies may utilize Mutual of America's regional service offices and may use Mutual of America's toll-free telephone number and Internet web site for transactions as well as to obtain contract information, while Owners must send transaction requests in writing to the New York administrative office that is servicing the American Contracts and Policies and may use a toll free number only to obtain information. American Life will not issue additional contracts or policies through the American Accounts, and therefore the Accounts are expected to decline in asset size and number of Owners over a period of time.

17. The terms of the Contracts and Policies are identical to the American Contracts and Policies except for the identity of the issuing company and depositor of the separate account, the funding separate account, and the right of owners of Contracts and Policies to participate in the divisible surplus of Mutual of America, a mutual company. In addition, when Mutual of America issues policies in exchange for American Policies, it will waive the suicide clause and will not require medical underwriting. As a consequence, Owners will not be subject to new incontestability periods under their Policies for suicide or medical conditions.

18. The Underlying Funds, the current administrative charges and the maximum permitted administrative charges, the mortality and expense risk charges, and the rates for the cost of insurance charges in the case of the Policies are identical under the Contracts and Policies and the American Contracts and Policies, respectively. The unit values for the investment funds of the Annuity Account and the American Annuity

Account are identical, and the unit values for the investment funds of the VUL Account and the American VUL Account also are identical.

19. Mutual of America will send offers of exchange to Owners who, after being contacted by a Mutual of America representative, indicate their interest in receiving the exchange materials. The materials will include a current prospectus and any supplements thereto for the Contract or Policy, as appropriate. Owners who wish to accept the offers of exchange will complete and return the exchange materials to Mutual of America, which will review them for completeness. When an Owner's exchange materials are incomplete, a representative of Mutual of America will contact the Owner to attempt to obtain any missing information or signatures.

20. Applicants expect that Owners will have no adverse tax consequences from the exchanges. Exchanges of American IRA Contracts will be non-taxable direct transfers under the Internal Revenue Code, as amended (the "Code"), and exchanges of American FPA Contracts and American VUL Policies will be tax-free exchanges under Section 1035 of the Code.

21. In certain limited circumstances, a Policy may be treated differently for tax purposes than the American Policy being exchanged. Prior to making offers of exchange to Owners, Mutual of America will review the amount of insurance coverage under each American Policy, the initial premium to be paid under the Policy issued in exchange and the Policy's scheduled premiums to ascertain whether the Policy (a) Would be a modified endowment contract ("MEC") under the Code when the American Policy is not an MEC, (b) would be unable to accept additional premiums, because such payments would cause the Policy to not be treated as life insurance under the Code when premiums could be paid under the American Policy, (c) would become an MEC upon the payment of additional scheduled premiums, when payment of such premiums under the American Policy would not cause that Policy to become an MEC, or (d) would fail to continue to qualify as life insurance as defined in the Code. As part of any exchange offer made in such situation, Mutual of America will notify the Owner in writing of the potential change in tax treatment that would result from the issuance of a Policy in exchange for the Owner's American Policy. Mutual of America may suggest an increase in the face amount of the insurance coverage under the Policy in an amount sufficient so that the situations in (a)–(d), as the case may be, would not apply to the Policy, and Mutual of America will not issue a Policy if it would not be deemed life insurance under the Code.

22. When an Owner's exchange materials are complete, Mutual of America will provide the surrender request to American Life, which will redeem the shares of the Underlying Funds held by the American Accounts that are attributable to the American Contract or Policy exchanged and arrange for the withdrawal of any funds held in American Life's general account. An Owner's account balance as of the close of business on the date of surrender of the American Contract or Policy, without the imposition of any sales charge, as of the close of business on the purchase order date. The applicable Mutual Account will purchase shares of the Underlying Funds, and/or Mutual of America will allocate amounts to its General Account,[1] based on the allocation instruction set forth on the purchaser's application and the amount transferred to Mutual of America from American Life.

23. Because Mutual of America is providing all administrative services for the American Contracts and Policies and the American Accounts and has indemnity reinsured American Life's general account portion of the American Contracts and Policies, Mutual of America will implement the surrender of an American Contract or Policy and issue its Contract or Policy on the same day. As a result, the redemption order given to the Underlying Funds by Mutual of America, as servicer for American Life and the American Accounts, and the purchase order given to the Underlying Funds by Mutual of America, as issuer of the Contract or Policy, will be placed with the Underlying Funds on the same day. Assuming that the Owner selects the same investment allocations in the Mutual of America application as the Owner has selected under the American Contract or Policy, the Underlying Funds will be able to offset the redemption and purchase orders, and therefore the exchange will have no impact on the Underlying Funds' portfolio securities. The Underlying Funds are not parties to the exchange offers, and the terms of the Participation Agreements pursuant to which they sell shares to and redeem shares from the American Accounts and Mutual Accounts are not affected by the exchanges.

24. Applicants anticipate that some Owners will retain their American Contracts and Policies, which will remain unchanged. Mutual of America will continue to provide administrative services to these Owners pursuant to the Servicing Agreement, and will indemnity reinsure the general account portion of such Contracts and Policies pursuant to the Indemnity Agreement. As previously noted, the American Accounts are expected to decline in asset size and number of Owners over a period of time. Depending on the number of Owners who remain in each of the American Accounts, either one or both of the American Accounts may be deregistered pursuant to Section 8(f) of the Act, immediately following the exchanges made in response to the offers or at some future date.

Applicants Legal Analysis

1. Section 11(a) of the Act makes it unlawful for a registered open-end investment company or its principal underwriter to offer securities of an investment company in exchange for other securities of the same or another investment company, unless the exchange either is based on the respective net asset values of the securities or the terms of the offer have received prior approval of the Commission. Section 11(c) provides that in the case of a unit investment trust, the prohibition of Section 11(a) is applicable irrespective of the basis of exchange.

2. The exchange offers to be made to Owners by Mutual of America relate to contracts that participate in the American Accounts and the Mutual Accounts, which are registered unit investment trusts. Therefore, the offers of exchange fall within the prohibitions of Section 11(a) and (c).[2]

[1] The transfer of general account amounts under American Contracts and Policies to Contracts and Policies issued in exchange will be without charge or expense to the Owners.

[2] In *Alexander Hamilton Funds* (available July 20, 1994), the Commission stated that the legislative history of Section 11(a) shows "Congress primarily intended to deter switching between affiliated investment funds," rather than offers by unaffiliated investment companies, so long as offers are at relative net asset values. It noted, however, that "there may be circumstances when Section 11(a) would apply to exchange offers between unaffiliated funds," explaining in footnote 4: "For example, Section 11 would apply if two unaffiliated fund complexes agree, formally or informally, to offer a waiver of sales load or some other incentive for an exchange of shares from one fund family to the other." Mutual of America has an economic incentive to issue Contracts and Policies in place of American Contracts and Policies in order to reduce or eliminate the costs of administering the American Contracts and Policies and the American Accounts and of indemnity reinsuring the general account portion of the American Contracts and Policies. In addition, Owners may not place orders

UMI

3. The Commission in the Initial Order granted exemptions for exchange offers made in the context of opt-out rights and affirmative consent for assumption reinsurance transactions. Those exemptions are not applicable to the proposed exchange offers, solely because the proposed offers will not involve any assumption reinsurance transactions.

4. Applicants request an order pursuant to Section 11(a) approving the terms of Mutual of America's proposed offers of exchange to Owners of American Contracts and Policies.

5. Applicants submit that the terms of the proposed exchange offers are fair to Owners and should be approved by the Commission. Since no sales or other charges will be assessed in connection with the exchanges made pursuant to the offers, the sales charge abuse to which Section 11(a) is directed will not be present.[3] The only change resulting from the exchange of American Contracts and Policies for Mutual of America's Contracts and Policies is in the identity of the issuing insurance company and depositor of the separate account, the funding separate account, and the right of owners of Contracts and Policies to participate in Mutual of America's divisible surplus. In addition, the unit values of the investment funds in the Annuity Account are identical to those of the American Annuity Account, and the unit values of the investment funds in the VUL Account are identical to those of the American VUL Account. Applicants believe as well that the exchanges of American IRA Contracts will be tax-free direct transfers and that the exchanges of American FPA Contracts and American Policies will come within the provisions of Section 1035 of the Code, so that there will be no adverse tax consequences for Owners as a result of the exchanges. As part of the exchange offers, Mutual of America will disclose to each Owner when the tax treatment for the Policy would be different than that of the American Policy in that the Policy would be an MEC, would not be able to accept additional premiums because such payments would cause the Policy to not be treated as life insurance, would become an MEC upon the payment of additional scheduled premiums or would not qualify as life insurance under the Code. Mutual of America will not issue a Policy if it would not be deemed life insurance under the Code. Mutual of America has substantial assets and surplus to assure the performance of its obligations under the Contracts and Policies, and it currently performs all administrative services for the American Contracts and Policies pursuant to the Servicing Agreement.

6. Owners will receive current prospectuses for the Contracts or Policies, as applicable. The exchanges of interests will be made on the basis of relative net asset values. The provisions of the Contracts and Policies will be identical to the provisions of the American Contracts and American Policies, respectively, except for the addition of the right to participate in Mutual of America's divisible surplus. Owners will have investment funds available in the Mutual Accounts with the same Underlying Funds as available in the America Accounts.

7. Applicants note that the Commission has previously approved offers of exchange in circumstances when Rule 11a–2 would not apply because the insurance companies were not affiliated or might not be affiliated at the time certain exchange offers for variable annuities were made or consummated relating to assumption reinsurance transactions.[4] In *Family Life Insurance Company, et al.*, the applicants noted that the offers of exchange for the variable annuity contracts involved would satisfy all of the conditions of Rule 11a–2 if made prior to the sale of the ceding company. Applicants state that the terms of their proposed exchange offers would satisfy all of the conditions of Rule 11a–2 applicable to affiliated companies if they had been made prior to the sale of American Life by Mutual of America and that the offers satisfy the standards of the Commission for determining that the terms of an exchange offer are fair to contract holders. Applicants further state that the terms of the proposed exchange offers are identical to the exchange offers approved by the Commission in the Initial Order except that the proposed offers would not be made in connection with assumption reinsurance transactions.

Conclusion

On the basis of the precedents cited and the showing by Applicants that the terms of the exchange offers involved are fair, Applicants submit that the requested relief should be granted.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45094; File No. SR–ISE–00–17]

Self Regulatory Organizations; International Securities Exchange LLC; Order Granting Approval to Proposed Rule Change and Amendments No. 1 and No. 2 by the International Securities Exchange LLC Relating to Its Arbitration Program

November 21, 2001.

I. Introduction

On November 20, 2000, the International Securities Exchange LLC ("ISE") filed with the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change to make certain changes to its arbitration rules. These changes were intended to reflect and facilitate ISE's regulatory services agreement with NASD Regulation, Inc. ("NASDR") pursuant to which, among other things, NASDR provides services related to arbitration proceedings to involving ISE members.[3] On March 5, 2001, the Exchange filed Amendment

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] The Commission notes that although the regulatory services agreement at issue is between ISE and NASDR, the actual administration of arbitrations on behalf of ISE members pursuant to the agreement will be performed by a recently-created NASD subsidiary, NASD Dispute Resolution, which performs all arbitration and mediation services for NASD members.

No. 1 to the proposed rule change,[4] and on July 16, 2001, the Exchange filed Amendment No. 2 to the proposed rule change.[5]

The proposed rule change was published for comment in the **Federal Register** on July 26, 2001.[6] The Commission received no comments on the proposal. This order approves the proposed rule change, as amended.

II. Description of the Proposal

In its proposed rule change, the ISE proposed amendments to Chapter 18, Arbitration, of the ISE Rules. Specifically, the ISE proposes to repeal Rules 1800 through 1835 and create new Rule 1800, which will state that the NASD Code of Arbitration, as the same may be in effect from time to time, shall govern Exchange arbitrations. The proposed rule also states that the Exchange shall retain jurisdiction over its members for failure to honor arbitration awards and any right, action or determination by the Exchange which it would otherwise be authorized to adopt, administer or enforce is in no way limited or precluded by incorporation of the NASD Code of Arbitration.

The Exchange has contracted with NASDR to perform arbitrations under ISE's rules. Accordingly, the Exchange proposes to eliminate all of the arbitration rules currently contained in Chapter 18 of the ISE Rules and incorporate the NASD Code of Arbitration by reference.[7] The proposed rule also specifies that potential violations of ISE rules identified during an arbitration hearing may be referred to the ISE for investigation, and that disciplinary action may be brought by the ISE as a result thereof. Finally, a member or person associated with a member will be subject to discipline by the ISE if it fails to honor an award made as a result of an arbitration initiated under ISE Rules.[8]

III. Discussion

After careful review, the Commission finds that implementation of the proposed rule change is consistent with the requirements of section 6 of the Act[9] and the rules and regulations thereunder applicable to a national securities exchange.[10] Specifically, the Commission believes that the proposal is consistent with section 6(b)(5) of the Act.[11] Section 6(b)(5) requires, among other things, that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to facilitate transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system, and, in general, to protect investors and the public interest.[12] Section 6(b)(5) also requires that those rules not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers. In particular, the Commission believes that the proposed rule change eliminating the ISE's arbitration program and referring cases to NASDR for arbitration will help protect investors and the public interest by ensuring that there is a fair arbitration forum available for all ISE arbitration claims.

The proposed rule change submitted by the ISE would eliminate all of the arbitration rules currently contained in Chapter 18 of the ISE Rules and create new ISE Rule 1800, essentially incorporating the NASD Code of Arbitration by reference, by stating that the NASD Code of Arbitration, as the same may be in effect from time to time, shall govern Exchange arbitrations. The Commission believes that it is consistent with the Act to allow NASDR to administer ISE arbitrations, as the ISE has made the business decision to enter into an agreement with NASDR to provide a forum for its arbitrations for a flat annual fee, rather than to absorb the ongoing costs and administrative burden of continuing to manage its own arbitrations.

Procedurally, the Commission believes that the proposed rule change should ensure that all arbitration cases otherwise subject to ISE's arbitration process will be administered under the NASDR arbitration program by virtue of ISE members being deemed "members" of the NASD for purposes of arbitrating any claims involving the securities business of any members of ISE, except for narrowly enumerated exceptions. The proposed rule change accomplishes this by subjecting ISE members to the NASD Code of Arbitration for "[a]ny dispute, claim or controversy arising out of or in connection with the business of any member of the Exchange, or arising out of the employment or termination of employment of associated person(s) with any member may be arbitrated under this Rule 1800 except that (1) a dispute, claim, or controversy alleging employment discrimination (including a sexual harassment claim) in violation of a statute may only be arbitrated if the parties have agreed to arbitrate it after the dispute arose; and (2) any type of dispute, claim, or controversy that is not permitted to be arbitrated under the NASD Code of Arbitration, such as class action claims, shall not be eligible for arbitration under this Rule 1800."[13] In effect, the proposed rule change requires that ISE members abide by the NASD's Code of Arbitration as if they were members of the NASD for purposes of arbitration.

In addition, the Commission believes that the proposed rule change provides for enforcement of arbitration awards and discipline of members, as appropriate, in a manner consistent with the Act, because ISE will continue to have ultimate responsibility for the enforcement and disciplining of its members regarding arbitration. An ISE member's refusal to submit to arbitration pursuant to the NASD Code of Arbitration or failure to pay an arbitration award rendered pursuant to the NASD Code of Arbitration would constitute a violation of section (b) of new ISE Rule 1800, which subjects ISE members to NASD jurisdiction, as well as section (e) which reserves ISE's right to discipline its members.

As stated above, by virtue of ISE's agreement with NASDR to perform arbitrations for ISE members, as well as the proposed amendments to ISE's arbitration rules contained herein, the ISE proposes to incorporate by reference the NASD Code of Arbitration. Accordingly, the ISE has submitted to the Commission a letter requesting an

[4] *See* Letter from Katherine Simmons, Vice President and Associate General Counsel, ISE, to Nancy J. Sanow, Assistant Director, Division of Market Regulation, Commission, dated March 5, 2001 ("Amendment No. 1"). In Amendment No. 1, the ISE added paragraphs (a) and (b), which are jurisdictional provisions currently contained in ISE Rule 1800, to the proposed rule text.

[5] *See* Letter from Jennifer M. Lamie, Assistant General Counsel, ISE, to Nancy J. Sanow, Assistant Director, Division of Market Regulation, Commission, dated July 16, 2001 ("Amendment No. 2"). Amendment No. 2 replaced the initial filing and Amendment No. 1 in their entirety. In Amendment No. 2, the ISE made minor changes to the order of the subsections under ISE rule 1800, amended the language of its proposed jurisdictional provisions, and added subsection (c), which governs predispute arbitration agreements.

[6] *See* Securities Exchange Act Release No. 44572 (July 18, 2001), 66 FR 39069 (July 26, 2001).

[7] The ISE represents that, as of this date, no cases have been opened under the Exchange's existing arbitration rules.

[8] NASDR performs arbitrations for the Philadelphia Stock Exchange. *See* Securities Exchange Act Release No. 40517 (October 1, 1998), 63 FR 54177 (October 8, 1998). Because there have not been any arbitrations initiated under ISE rules, the proposed rule does not contain language found in the Phlx rules to address pending arbitrations.

[9] 15 U.S.C. 78f.

[10] 15 U.S.C. 78f(b)(5).

[11] *Id.*

[12] In approving this rule, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[13] *See* proposed ISE Rule 1800(b) ("Jurisdiction").

exemption pursuant to Section 36 of the Act from the rule filing procedures of Section 19(b) of the Act and Rule 19b–4 thereunder,[14] with respect to the arbitration and margin rules of other self-regulatory organizations it has incorporated by reference, in accordance with the section 36 exemptive request filing procedures published by the Commission.[15] According to the ISE, the purpose of this request is to avoid having to file duplicative proposed rule changes with the Commission pursuant to section 19(b) and Rule 19b–4 each time the NASD changes its Code of Arbitration. In its letter, the ISE also represents that its proposed incorporations by reference are regulatory in nature and are intended to be a comprehensive integration of the relevant rules of the other exchange into the ISE rules, and that the ISE agrees to provide written notice to its members whenever the Commission publishes for comment a proposed rule change to the NASD Code of Arbitration.

IV. Conclusion

It is therefore ordered, pursuant to section 19(b)(2) of the Act,[16] that the proposed rule change (SR–ISE–00–17), as amended, is hereby approved.

For the Commission, by the Division of market Regulation, pursuant to delegated authority.[17]

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45087; File No. SR–ISE–2001–29]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the International Securities Exchange LLC Relating to Changes to the Exchange's Delisting Criteria

November 20, 2001.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on November 19, 2001, the International Securities Exchange LLC ("ISE" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the ISE. The proposed rule change has been filed by the ISE as a "non-controversial" rule change under Rule 19b–4(f)(6) under the Act.[3] The Commission is publishing this notice to solicit comments on the proposed change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The ISE proposes to amend ISE Rule 503, Withdrawal of Approval of Underlying Securities, governing the circumstances under which the Exchange may not continue to add new options series for underlying securities.

The text of the proposed rule change is available at the ISE and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the ISE included statements concerning the purpose of and statutory basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

ISE Rule 503, Withdrawal of Approval of Underlying Securities, contains certain criteria with respect to the securities underlying options classes traded on the Exchange. The rule restricts the Exchange from adding additional series of an options class in the event that the underlying security fails to meet these criteria. These criteria currently are uniform across all of the options exchanges. However, due to the complexity of the requirements, it has become apparent that the options exchanges do not always interpret and apply these rules in a consistent manner.

ISE Rule 503 currently provides that the Exchange may not list additional series if, among other things, the underlying security has not closed above $5 for the majority of business days during the preceding six calendar months as measured by the highest closing price reported in any market in which the underlying security traded. ISE Rule 503 further provides that new series may not be added unless the closing price from the preceding day was at least $5. However, there is an exception to these two $5 criteria that permits the Exchange to add additional series, so long as the underlying security has closed above $3 for the majority of business days during the preceding six calendar months and the underlying price is at least $3 at the time the new series are authorized, in addition to certain other criteria being satisfied, provided that if this exception were relied upon to add any new series during the preceding calendar months, each of the $3 requirements becomes a $4 requirement.

The ISE represents that the application of the current requirements and exceptions in ISE Rule 503 creates unnecessary confusion and administrative burdens on the Exchange, and often results in disputes between the exchanges, as inconsistent application of the criteria can competitively disadvantage an exchange that interprets the requirements differently. Accordingly, the ISE proposes to amend ISE Rule 503 to simplify the criteria used to determine whether new options series may be added with respect to particular options classes, and to clarify when new options series may not be added by the Exchange. The Exchange believes its proposal is consistent with a similar proposal by the Chicago Board Options Exchange ("CBOE").[4]

Under the ISE proposal, the $5 criteria described above, as well as the $3 and $4 exceptions, would be replaced by a single $3 requirement. None of the other requirements currently contained in Rule 503 (such as the number of shares that must be held by non-insiders, number of holders and trading volume) would be changed. The new proposed requirement specifies the following: (1) New series may not be added for the next day unless, in addition to satisfying the other requirements of the rule, the underlying security closed at or above $3 on the previous trading day; and (2) new series may not be added intra-day unless, in addition to satisfying the other requirements of the rule, including that the underlying security

[16] 15 U.S.C. 78s(b)(2).

[17] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 17 CFR 240.19b–4(f)(6).

[4] *See* Securities Exchange Act Release No. 44964 (October 19, 2001), 66 FR 54559 (October 29, 2001) (order approving File No. SR–CBOE–2001–29).

closed at or above $3 on the previous trading day, the last reported trade in the underlying security at the time the Exchange determines to add the new series is at or above $3. When determining the closing price and last reported trade for an underlying security, the Exchange will look to the primary market in which the underlying security trades.

The Exchange believes this proposal is reasonably designed to assure that options are not listed on securities that lack sufficient liquidity needed to maintain fair and orderly markets, while removing unnecessarily complex requirements. In addition, the ISE does not believe that it is necessary or desirable to restrict the ability of investors to trade options on securities trading between $3 and $5. In determining to list any number of new options series under the new less restrictive standard, the Exchange will ensure that its own systems and those of the Options Price Reporting Authority can handle any increased capacity requirements.

2. Statutory Basis

The ISE believes that the proposed rule change is consistent with section 6 of the Act,[5] general, and with section 6(b)(5) of the Act,[6] specifically, in that is designated to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, and, in general, to protect investors and the public interest.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change, as amended: (1) Does not significantly affect the protection of investors or the public interest; (2) does not impose any significant burden on competition; and (3) does not become operative for 30 days after the date of filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest; provided that the self-regulatory organization has given the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change,[7] or such shorter time as designated by the Commission, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6)[9] thereunder.

A proposed rule change filed under Rule 19b–4(f)(6) normally does not become operative prior to 30 days after the date of filing. However, Rule 19b–4(f)(6)(iii) permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The ISE seeks to have the proposed rule change, as amended, become operative immediately. The Commission, consistent with the protection of investors and the public interest, has determined to make the proposed rule change, as amended, operative as of November 19, 2001.[10] The Commission notes that the proposed rule change, as amended, is substantially similar in all material respects to the rule of another exchange that the Commission has already noticed for public comment and approved[11] and, therefore, the proposed rule change raises no new issues of regulatory concern.

At any time within 60 days of the filing of the proposed rule change the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.[12]

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549–0609. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the ISE.

All submissions should refer to File No. SR–ISE–2001–29 and should be submitted by December 24, 2001.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[13]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–45096; File No. SR–NYSE–2001–28]

Self-Regulatory Organizations; the New York Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change To Administer NYSE Rule 91.10 Pursuant to the NYSE's Minor Rule Violation Plan

November 21, 2001.

On August 21, 2001, the New York Stock Exchange, Inc. ("NYSE" "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b-4 thereunder,[2] a proposed rule change to administer NYSE Rule 91.10, Taking or Supplying Securities Named in Order pursuant to the NYSE's Minor Rule Violation Plan ("Plan"). NYSE Rule 91.10 requires that whenever a specialist has elected to take or supply for his or her account the securities named in an order entrusted to the specialist, he or she must summon a representative of the firm that entered

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

the order to confirm, in written format, the acceptance or rejections of such transaction.

The proposal was published for comment in the **Federal Register** on September 7, 2001.[3] The Commission received no comments on the proposal.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange[4] and, in particular, the requirements of section 6 of the Act[5] and the rules and regulations thereunder. The Commission finds specifically that the proposed rule change is consistent with section 6(b)(6) of the Act[6] in that it will provide a procedure whereby member organizations can be appropriately disciplined in those instances when a rule violation is minor in nature, but a sanction more serious than an admonition letter is appropriate. Additionally, the Commission finds the proposed rule change is consistent with the requirements of sections 6(b)(7)[7] and 6(d)(1)[8] of the Act. Section 6(b)(7) requires the rules of an exchange to be in accordance with the provisions of section 6(d) of the Act, and, in general, to provide a fair procedure for the disciplining of members and persons associated with members. Section 6(d)(1) requires an exchange to bring specific charges, notify such member or person of, and give him an opportunity to defend against, such charges, and keep a record, in any proceeding to determine whether a member or person associated with a member should be disciplined. Finally, the Commission finds the proposal is consistent with Rule 19d-1(c)(2)[9] that governs minor rule violation plans.

In approving this proposal, the Commission in no way minimizes the importance of compliance with this rule, and all other rules subject to the imposition of fines under the Plan. The Commission believes that the violation of any self-regulatory organization's rules, as well as Commission rules, is a serious matter. However, in an effort to provide the Exchange with greater flexibility in addressing certain violations, the Plan provides a reasonable means to address the rule violations that do not rise to the level of requiring formal disciplinary proceedings. The Commission expects that the NYSE will continue to conduct surveillance with due diligence, and make a determination based on its findings whether fines of more or less than the recommended amount are appropriate for violations of rules under the Plan, on a case by case basis, or if a violation requires formal disciplinary action.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[10] that the proposed rule change (SR–NYSE–2001–28) be, and it hereby is, approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[11]

Margaret H. McFarland,

Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Economic Injury Disaster #9N60]

State of Florida

Franklin County and the contiguous counties of Gulf, Liberty and Wakulla in the State of Florida constitute an economic injury disaster loan area as a result of a Florida Red Tide. The Florida Red Tide was confirmed on October 16, 2001 in the waters of Apalachicola Bay, which includes the coast of Franklin County. Eligible small businesses and small agricultural cooperatives without credit available elsewhere may file applications for economic injury assistance as a result of this disaster until the close of business on August 21, 2002 at the address listed below or other locally announced locations: U.S. Small Business Administration, Disaster Area 2 Office, One Baltimore Place, Suite 300, Atlanta, GA 30308.

The interest rate for eligible small businesses and small agricultural cooperatives is 4 percent.

The number assigned for economic injury for the State of Florida is 9N6000.

The Social Security Administration (SSA) publishes a list of information

collection packages that will require clearance by the Office of Management and Budget (OMB) in compliance with Pub.L. 104–13 effective October 1, 1995, The Paperwork Reduction Act of 1995. SSA is soliciting comments on the accuracy of the agency's burden estimate; the need for the information; its practical utility; ways to enhance its quality, utility and clarity; and on ways to minimize burden on respondents, including the use of automated collection techniques or other forms of information technology.

Written comments and recommendations regarding the information collection(s) should be submitted to the OMB Desk Officer and the SSA Reports Clearance Officer and at the following addresses:

(OMB)
Office of Management and Budget, Attn: Desk Officer for SSA, New Executive Office Building, Room 10230, 725 17th St., NW., Washington, DC 20503

(SSA)
Social Security Administration, DCFAM, Attn: Reports Clearance Officer 1–A–21 Operations Bldg., 6401 Security Blvd., Baltimore, MD 21235

I. The information collections listed below will be submitted to OMB within 60 days from the date of this notice. Therefore, your comments should be submitted to SSA within 60 days from the date of this publication. You can obtain copies of the collection instruments by calling the SSA Reports Clearance Officer at 410–965–4145, or by writing to him at the address listed above.

1. Information Collections Conducted by State Disability Determination Services (DDS) on Behalf of SSA—0960–0555. The State DDSs collect certain information to administer SSA's disability program. The information collected is as follows: (1) Medical evidence of record (MER)—DDSs use MER information to determine a person's physical and/or mental status prior to making a disability determination; (2) consultative exam (CE) medical evidence—DDSs use CE medical evidence to make disability determinations when the claimant's own medical sources cannot or will not provide the information; (3) CE claimant forms—The DDSs request that claimants complete an authorization form for the release of consultative exam information to a personal physician and to complete an appointment form to confirm scheduled CE appointments; (4) CE provider information—DDSs use the CE provider information to verify medical providers' credentials and licenses before hiring them to conduct CEs; (5) activities of daily living (ADL)—this information and other medical evidence are part of the evidentiary documentation used by the DDS's in evaluating a person's disability; and (6) pain information—this information is used by the DDSs to assess the effects of symptoms on functionality for determining disability. The respondents are medical providers, other sources of MER and disability claimants.

(1) MER (Respondents—Medical Providers and Other Sources)

Number of Responses: 6,052,494
Frequency of Response: Unknown
Average Burden Per Response: 15 minutes
Estimate Annual Burden: 1,513,124

(2) CE Medical Evidence (Respondents—Medical Providers)

Number of Responses: 1,640,269
Frequency of Response: Unknown
Average Burden Per Response: 30 minutes
Estimated Annual Burden: 820,135 hours

(3) CE Forms (Respondents—Claimants)

	Appointment form	Medical release
Number of Respondents:	820,134	1,640,269.
Frequency of Response:	1	1.
Average Burden Per Response:	5 minutes	5 minutes.
Estimated Annual Burden:	68,345 hours	136,689 hours.

(4) CE Providers (Respondents—Medical Providers)

Number of Responses: 3,000
Frequency of Response: 1
Average Burden: 20 minutes
Estimated Annual Burden: 1,000 hours

(5) ADL (Respondents—Claimants)

Number of Responses: 2,000,000
Frequency of Response: 1
Average Burden Per Response: 15 minutes
Estimated Annual Burden: 500,000 hours

(6) Pain (Respondents—Claimants)

Number of Responses: 1,000,000
Frequency of Response: 1
Average Burden Per Response: 15 minutes
Estimated Average Burden: 250,000 hours

2. Application for U.S. Benefits Under the Canada-U.S. International Agreement—0960–0371. The information collected on Form SSA–1294 is used to determine entitlement to benefits. The respondents are individuals who live in Canada and file for U.S. Social Security Benefits.

Number of Respondents: 1,000
Frequency of Response: 1
Average Burden Per Response: 15 minutes
Estimated Annual Burden: 250 hours

3. Disability Hearing Officer's Report of Disability Hearing (DC)—0960–0507. The information collected on form SSA–1204–BK is used by the Disability Hearing Officer (DHO) to conduct and document disability hearings, and to provide a structured format that concerns all conceivable issues relating supplemental security income claims for disabled children. The completed form SSA–1204–BK will aid the DHO in preparing the disability decision and will provide a record of what transpired at the hearing.

The respondents are DHO's in the State Disability Determination Services.

Number of Respondents: 100,000
Frequency of Response: 1
Average Burden Per Response: 60 minutes
Estimated Annual Burden: 100,000 hours

4. Statement of Death by Funeral Director—0960–0142. The Social Security Administration (SSA) uses the information on form SSA–721 to make timely and accurate decisions based on a report of death. The respondents are funeral directors with knowledge of the fact of death.

Number of Respondents: 1,059,400
Frequency of Response: 1
Average Burden Per Response: 4 minutes
Estimated Annual Burden: 70,627 hours

5. Statement Regarding Marriage—0960–0017. Form SSA–753 elicits information from third parties to verify the applicant's statements about intent, cohabitation, and holding out to the public as married, which are the basic tenets of a common-law marriage. The responses are used by SSA to determine if a valid marital relationship exists and to make an accurate determination regarding entitlement to spouse/widow(er) benefits. The respondents are individuals who are familiar with and can provide confirmation of an applicant's common-law marriage.

Number of Respondents: 40,000
Frequency of Response: 1
Average Burden Per Response: 9 minutes

Estimated Annual Burden: 6,000

6. Quarterly Statistical Report on Recipients and Payments Under State-Administered Assistance Programs for Aged, Blind, and Disabled (Individuals and Couples) Recipients—0960–0130. The information collected on Form SSA–9741 is used by States to provide statistical data on recipients and assistance payments under the SSI State-administered State Supplementation Programs. The data are needed to complement information available for the programs administered by SSA and to fully explain the impact of the public income support programs on the needy, aged, blind, and disabled. The respondents are State agencies who administer supplementary payment programs under SSI.

Number of Respondents: 30
Frequency of Response: 4
Average Burden Per Response: 60 minutes
Estimated Annual Burden: 2 hours

II. The information collections listed below have been submitted to OMB for clearance. Your comments on the information collections would be most useful if received by OMB and SSA within 30 days from the date of this publication. You can obtain a copy of the OMB clearance packages by calling the SSA Reports Clearance Officer on (410) 965–4145, or by writing to him at the address listed above.

1. Modified Benefits Formula Questionnaire, Employer—0960–0477. Form SSA–58 is used by SSA to verify or disprove a claimant's allegation regarding a pension based on non-covered employment after 1956. It also shows whether that claimant was eligible for the pension before 1986. The respondents are persons who are eligible (after 1985) for both Social Security benefits and a pension from their employer, based on work not covered by SSA.

Number of Respondents: 30,000
Frequency of Response: 1
Average Burden Per Response: 20 minutes
Estimated Annual Burden: 10,000 hours

2. Application for Survivors Benefits—0960–0062. The information collected on Form SSA–24 is needed to satisfy the "Jointly Prescribed Application" of title 38 U.S.C. 5105. The provision requires that survivors who file with SSA or the VA shall be deemed to have filed with both agencies, and that each agency's forms must request information to constitute an application for both SSA and VA benefits. The respondents are survivors of military service veterans filing for Social Security benefits.

Number of Respondents: 3,200
Frequency of Response: 1
Average Burden Per Response: 15 minutes
Estimated Annual Burden: 800 hours

3. Medical Report (Individual With Childhood Impairment)—0960–0102. The information on Form SSA–3827–BK is needed to determine the claimant's physical and mental status prior to making a childhood disability determination. The respondents are medical sources.

Number of Respondents: 12,000
Frequency of Response: 1
Average Burden Per Response: 30 minutes
Estimated Annual Burden: 6,000 hours

4. Work Activity Report (Self-Employed)—0960–0598. Form SSA–820–F4 is used to determine whether work an individual performs in self-employment is at the substantial gainful activity (SGA) level. An individual's entitlement to benefits ends if he/she demonstrates an ability to perform SGA. The respondents are social security disability beneficiaries and Supplemental Security Income recipients.

Number of Respondents: 100,000
Frequency of Response: 1
Average Burden Per Response: 30 minutes
Estimated Annual Burden: 50,000 hours

5. Agreement to Sell Property—0960–0127. Form SSA–8060–U3 is used by SSA to document and ensure that individuals or couples who are otherwise eligible for Supplemental Security Income (SSI) payments, but who own in excess of the statutory limit, may receive conditional benefit payments if they agree to dispose of the excess resources and repay any overpayments with the proceeds of the disposition. The form is also used to ensure that the individuals understand their obligations under the agreement. The respondents are individuals (or couples) who are receiving (or will receive) conditional SSI payments.

Number of Respondents: 20,000
Frequency of Response: 1
Average Burden Per Response: 10 minutes
Estimated Annual Burden: 3,333 hours

6. Reconsideration Disability Report—0960–0144. SSA uses the information collected on Form SSA–3441 to determine if the claimant's medical or vocational situation changed after the initial disability determination, when the claimant requests a reconsideration of a denied disability claim. The form also elicits additional sources of medical and vocational evidence that were not considered in the initial determination. The respondents are disability beneficiaries who request a reconsideration of their claim.

Number of Respondents: 400,000
Frequency of Response: 1
Average Burden Per Response: 30 minutes
Estimated Average Burden: 200,000 hours

7. Electronic Benefit Verification Information—0960–0595. SSA provides verification of benefits, when requested, to individuals receiving title II and/or title XVI benefits. In order to provide to the public an easy and convenient means of requesting benefit information, SSA has developed an electronic request form that will allow persons to request the information through the Internet. The information collected on the electronic screens will be used by SSA to process the request for a benefit verification statement. To ensure appropriate confidentiality, the statement will be mailed to the recipient/beneficiary address shown in SSA's records. The respondents are title II and XVI recipients/beneficiaries who request benefit verification information using the Internet.

Number of Respondents: 133,920
Frequency of Response: 1
Average Burden Per Response: ½ minute
Estimated Average Burden: 1,116 hours

8. Statement by School Official About Student's Attendance; Statement to U.S. Social Security Administration By School Outside the United States About Student's Attendance—0960–0090. The information collected on Forms SSA–1371 and SSA–1371–FC is used by SSA to verify a student's alleged full-time attendance at an educational institution, in order to determine the student's eligibility for Social Security student benefits. The respondents are school officials who provide the information on these forms.

Number of Respondents: 5,000
Frequency of Response: 1
Average Burden Per Response: 10 minutes
Estimated Average Burden: 833 hours

9. Report of Continuing Disability Interview—0960–0072. SSA periodically reviews the cases of individuals who receive Social Security benefits and Supplemental Security Income (SSI) to determine if disability continues. During a review, SSA uses Form SSA–454–BK to collect information on disability. The information on the form is used to update the record of the disabled individual on recent medical treatment, vocational and educational experiences,

work activity, and evaluations of potential for return to work. Based on this information and other evidence, SSA makes a determination on whether disability continues or has ended, and if so, when disability ended. The respondents are individuals who receive Social Security or SSI disability benefits, or their representatives.

Number of Respondents: 852,000
Frequency of Response: 1
Average Burden Per Response: 30 minutes
Estimated Annual Burden: 426,000 hours

Dated: November 26, 2001.

Nicholas E. Tagliareni,

Director, Center for Publications Management, Social Security Administration.

BILLING CODE 4191–02–U

DEPARTMENT OF STATE

[Public Notice 3849]

Culturally Significant Objects Imported for Exhibition Determinations: "Korean Ceramics From the Fitzwilliam Museum, Cambridge"

AGENCY: Department of State.

ACTION: Notice.

SUMMARY: Notice is hereby given of the following determinations: Pursuant to the authority vested in me by the Act of October 19, 1965 [79 Stat. 985, 22 U.S.C. 2459], the Foreign Affairs Reform and Restructuring Act of 1998 [112 Stat. 2681 *et seq.*], Delegation of Authority No. 234 of October 1, 1999 [64 FR 56014], and Delegation of Authority No. 236 of October 19, 1999 [64 FR 57920], as amended, I hereby determine that the objects to be included in the exhibit "Korean Ceramics from the Fitzwilliam Museum, Cambridge," imported from abroad for the temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to a loan agreement with a foreign lender. I also determine that the temporary exhibition or display of the exhibit objects at The Metropolitan Museum of Art, of New York, NY, from on or about November 5, 2002, to on or about April 6, 2003, is in the national interest. Public Notice of these determinations is ordered to be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: For further information, including a list of exhibit objects, contact Julianne Simpson, Attorney-Adviser, Office of the Legal Adviser, U.S. Department of State (telephone: 202/619–6529). The address is U.S. Department of State, SA–44, 301 4th Street, SW, Room 700, Washington, DC 20547–0001.

Dated: November 28, 2001.

Patricia S. Harrison,

Assistant Secretary for Educational and Cultural Affairs, Department of State.

BILLING CODE 4710–05–P

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Request for Public Comment With Respect to the Annual National Trade Estimate Report on Foreign Trade Barriers

AGENCY: Office of the United States Trade Representative.

ACTION: Notice.

SUMMARY: Pursuant to section 303 of the Trade and Tariff Act of 1984, as amended, USTR is required to publish annually the National Trade Estimate Report on Foreign Trade Barriers (NTE). With this notice, the Trade Policy Staff Committee (TPSC) is requesting interested parties to assist it in identifying significant barriers to U.S. exports of goods, services and overseas direct investment for inclusion in the NTE. Particularly important are impediments materially affecting the actual and potential financial performance of an industry sector. The TPSC invites written comments that provide views relevant to the issues to be examined in preparing the NTE. Due to the disruption of postal service at the Office of the United States Trade Representative, the Department of Commerce will receive comments in response to this Notice. Commenters should review carefully the written comments section of this Notice for special procedures for filing comments this year.

DATES: Public comments are due not later than Monday, December 17, 2001.

ADDRESSES: *Paper submissions:* NTE Comments, Office of Trade and Economic Analysis, Room H–2815, U.S. Department of Commerce, Washington, DC 20230.

Submissions by electronic mail: ntecomments@ita.doc.gov.

FOR FURTHER INFORMATION CONTACT: Procedural questions about transmitting comments or viewing public submissions should be directed to Ms. Marva Thompson (202–482–2185) or Mr. Howard Schreier (202–482–4180), U.S. Department of Commerce. Questions regarding the report or its subject matter should be directed to Ms. Gloria Blue, Office of Policy Coordination, Office of the United States Trade Representative (202–395–3475).

SUPPLEMENTARY INFORMATION: Last year's report may be found on USTR's Internet homepage (*www.ustr.gov*) under the section on Reports. In order to ensure compliance with the statutory mandate for reporting foreign trade barriers that are significant, we will focus particularly on those restrictions where there has been active private sector interest.

The information submitted should relate to one or more of the following ten categories of foreign trade barriers:

(1) Import policies (*e.g.*, tariffs and other import charges, quantitative restrictions, import licensing, and customs barriers);

(2) Standards, testing, labeling, and certification (including unnecessarily restrictive application of phytosanitary standards, refusal to accept U.S. manufacturers' self-certification of conformance to foreign product standards, and environmental restrictions);

(3) Government procurement (*e.g.*, "buy national" policies and closed bidding);

(4) Export subsidies (*e.g.*, export financing on preferential terms and agricultural export subsidies that displace U.S. exports in third country markets);

(5) Lack of intellectual property protection (*e.g.*, inadequate patent, copyright, and trademark regimes);

(6) Services barriers (*e.g.*, limits on the range of financial services offered by foreign financial institutions, regulation of international data flows, restrictions on the use of data processing, quotas on imports of foreign films, and barriers to the provision of services by professionals (*e.g.*, lawyers, doctors, accountants, engineers, nurses, etc.));

(7) Investment barriers (*e.g.*, limitations on foreign equity participation and on access to foreign government-funded R&D consortia, local content, technology transfer and export performance requirements, and restrictions on repatriation of earnings, capital, fees and royalties);

(8) Anticompetitive practices with trade effects tolerated by foreign governments (including anticompetitive activities of both state-owned and private firms that apply to services or to goods and that restrict the sale of U.S. products to any firm, not just to foreign firms that perpetuate the practices);

(9) Trade restrictions affecting electronic commerce (*e.g.*, tariff and non-tariff measures, burdensome and discriminatory regulations and

standards, and discriminatory taxation); and

(10) Other barriers (*i.e.*, barriers that encompass more than one category, *e.g.* bribery and corruption, or that affect a single sector).

As in the case of last year's NTE, we are asking that particular emphasis be placed on any practices that may violate U.S. trade agreements. We are also interested in receiving any new or updated information pertinent to the barriers covered in last year's report as well as new information. Please note that the information not used in the NTE will be maintained for use in future negotiations.

It is MOST IMPORTANT that your submission contain estimates of the potential increase in exports that would result from the removal of the barrier, as well as a clear discussion of the method(s) by which the estimates were computed. Estimates should fall within the following value ranges: less than $5 million; $5 to $25 million; $25 million to $50 million; $50 million to $100 million; $100 million to $500 million; or over $500 million. Such assessments enhance USTR's ability to conduct meaningful comparative analyses of a barrier's effect over a range of industries.

Please note that interested parties discussing barriers in more than one country should provide a separate submission (*i.e.*, one that is self-contained) for each country.

Written Comments: U.S. Government agencies in the Washington, DC area and the Office of the United States Trade Representative, in particular, continue to apply restrictions causing disruptions and delays in receiving mail from the U.S. Postal Service and other commercial express delivery services.

In order to ensure the most timely receipt and consideration of comments submitted in response to this Notice, the following guidelines and special procedures have been established:

(1) All comments will be received at the U.S. Department of Commerce rather than the Office of the United States Trade Representative;

(2) The Department of Commerce has arranged to accept non-confidential, public submissions by electronic mail (e-mail). An automatic reply confirming receipt of e-mail submissions will be sent. E-mail submissions in Microsoft Word or Corel WordPerfect are preferred. If a word processing application other than those two is used, please advise us in your submission of the specific application used;

(3) In order to facilitate prompt processing of submissions, the Department of Commerce strongly urges and prefers e-mail submission of non-confidential, public comments.

(4) To ensure security, submissions containing business confidential information should not be sent by e-mail, but via the U.S. Postal Service or commercial express delivery (see paragraph 6 and 7 below for special requirements applying to such submissions). If a submission contains business confidential information, a non-confidential public version must also be submitted along with the business confidential version.

(5) Business-confidential submissions must be accompanied by a justification as to why the information contained in the submission should be treated confidentially. In addition, any submissions containing business confidential information must be clearly marked "Confidential" at the top and bottom of the cover page (or letter) and of each succeeding page of the submission. The version that does not contain confidential information should also be clearly marked, at the top and bottom of each page, "public version" or "non-confidential."

(6) When comments are submitted using the U.S. Postal Service or commercial couriers, it is strongly recommended that submitters notify the Department of Commerce by e-mail as to the date of transmittal and method of delivery (U.S. Postal Service or name of courier company). this will facilitate tracking in the event of delivery irregularities.

(7) All submissions must be in English and should conform to the information requirements of 15 CFR 2003. If submissions are made via U.S. Postal Service or commercial express delivery, a party must provide five copies of its submission and the submission should be accompanied by a computer disk containing a machine-readable version. The disk should have a label identifying the software used, the submitter and the title of the submission. In addition, business confidential and public or non-confidential submissions should be submitted on separate disks which are clearly marked "business confidential" or "non-confidential", as appropriate.

Submissions must be received at the Department of Commerce no later than Monday, December 17, 2001.

Written comments submitted in connection with this request, except for information granted "business confidential" status pursuant to 15 CFR 2003.6, will be available for public inspection shortly after the filing deadline in the Foreign Trade Reference Room (room 2233) in the U.S. Department of Commerce. The Department of Commerce is located at 14th St. and Constitution Ave., NW. in Washington, DC. Hours of operation for the Foreign Trade Reference Room are from 9 am to 4 pm, Monday through Friday. Questions regarding the operation of the Reference Room should be directed to Ms. Marva Thompson at 202–482–2185.

Carmen Suro-Bredie,

Chairman, Trade Policy Staff Committee.

BILLING CODE 3190–01–M

DEPARTMENT OF TRANSPORTATION

Coast Guard

[USCG 2001–10524]

Information Collection Under Review by the Office of Management and Budget (OMB): 2115–0514

AGENCY: Coast Guard, DOT.

ACTION: Request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, this request for comments announces that the Coast Guard has forwarded one Information Collection Report (ICR) abstracted below to OMB for review and comment. Our ICR describes the information we seek to collect from the public. Review and comment by OMB ensure that we impose only paperwork burdens commensurate with our performance of duties.

DATES: Please submit comments on or before January 2, 2002.

ADDRESSES: You may send comments by mail to (1) the Docket Management System (DMS), U.S. Department of Transportation (DOT), room PL–401, 400 Seventh Street S.W., Washington, DC 20590–0001; and (2) the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget (OMB), 725 17th Street N.W., Washington, DC 20503, to the attention of the Desk Officer for the USCG.

Copies of the complete ICRs are available for inspection and copying in public dockets. A copy of this complete ICR is available in docket USCG 2001–10524 of the Docket Management Facility between 10 a.m. and 5 p.m., Monday through Friday, except Federal holidays; for inspection and printing on the Internet at *http://dms.dot.gov;* and for inspection from the Commandant (G–CIM–2), U.S. Coast Guard, room 6106, 2100 Second Street SW., Washington, DC, between 10 a.m. and 4 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Barbara Davis, Office of Information Management, 202–267–2326, for questions on this document; Dorothy Beard, Chief, Documentary Services Division, U.S. Department of Transportation, 202–366–5149, for questions on the docket.

SUPPLEMENTARY INFORMATION

Regulatory History

This request constitutes the 30-day notice required by OMB. The Coast Guard has already published [66 FR 47055 (September 10, 2001) the 60-day notice required by OMB. That notice elicited no comments.

Request for Comments

The Coast Guard invites comments on the proposed collection of information to determine whether the collection is necessary for the proper performance of the functions of the Department. In particular, the Coast Guard would appreciate comments addressing: (1) The practical utility of the collections; (2) the accuracy of the Department's estimated burden of the collections; (3) ways to enhance the quality, utility, and clarity of the information that is the subject of the collections; and (4) ways to minimize the burden of collection on respondents, including the use of automated collection techniques or other forms of information technology.

Comments, to DMS or OIRA, must contain the OMB Control Number of the ICR addressed. Comments to DMS must contain the docket number of this request, USCG 2001–10524. Comments to OIRA are best assured of having their full effect if OIRA receives them 30 or fewer days after the publication of this request.

Information Collection Requests

Title: Submission of Continuous-Discharge Book, Revised Merchant Mariner's Application, Report of Entry-Level Physical, Report of Other Physical, Report of New Sea Service, and Report of Chemical Testing.

OMB Control Number: 2115–0514.

Type of Request: Extension of a currently approved collection.

Affected Public: Merchant Mariners.

Forms: CG–719A, CG–719B, CG–719K, CG–719S, CG 719P and CG–719K/E

Abstract: The Coast Guard needs this various information to evaluate the competency, character, and physical fitness of individuals applying for Coast Guard Licenses, Certificates of Registry, and Merchant Mariners' Documents.

Annual Estimated Burden Hours: The estimated burden is 21,359 hours a year.

Dated: November 21, 2001.

V.S. Crea,

Director of Information and Technology.

[FR Doc. 01–29886 Filed 11–30–01; 8:45 am]

BILLING CODE 4910–15–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Notice of Intent To Prepare an Environmental Impact Statement and To Conduct Environmental Scoping for Improvements to the Gary/Chicago Airport in Gary, IN

AGENCY: Federal Aviation Administration, DOT.

ACTION: Corrected notice to prepare an Environmental Impact Statement and to hold a public scoping meeting.

SUMMARY: Previous notices to prepare an Environmental Impact Statement and to conduct a public scoping meting for the Gary/Chicago Airport were published in the **Federal Register** on November 07, 2001 (page 56369) and on November 16, 2001 (page 57770). Due both to the anticipated high level of interest in matters pertaining to the Gary/Chicago Airport, and a desire to fully accommodate persons, agencies and other potentially interested entities, the Federal Aviation Administration (FAA) is issuing this corrected notice to advise the public that an Environmental Impact Statement or other appropriate environmental documentation will be prepared to assess certain improvements to the Gary/Chicago Airport. This corrected notice changes the comment receipt date from December 27, 2001 to January 29, 2002 and also changes the scoping meeting date from December 13, 2001 to January 15, 2002. The environmental review will assess various improvements associated with the existing air carrier Runway 12–30, including railroad relocation and improved runway safety areas; an extension of the existing air carrier Runway 12–30; expansion of the existing terminal site; and analysis of sites for new passenger terminal and air cargo areas. A public scoping process will be held in order that all significant issues related to the proposed actions are identified.

FOR FURTHER INFORMATION CONTACT: Michael W. MacMullen, Airports Environmental Program Manager, Federal Aviation Administration, Chicago Airports District Office, 2300 East Devon Avenue, Des Plaines, Illinois 60018. Mr. MacMullen can be contacted at (847) 294–7522 (voice), (847) 294–7046 (facsimile).

SUPPLEMENTARY INFORMATION: At the request of the Gary/Chicago Airport Authority, the FAA is preparing an Environmental Impact Statement or other appropriate environmental documentation. The review will address specific improvements of Gary/Chicago Airport as identified during the 2001 Airport Master Plan process and shown on the 2001 Airport Layout Plan. The following improvements have been grouped in four categories and are identified as ripe for review and decision: Improvements associated with Existing Runway 12–30, the primary air carrier runway at the airport, relocate E.J. & E. Railroad, acquire land northwest of airport to allow for modifications to runway safety area, relocate airside perimeter roadway, relocate Runway 12–30 navaids, improve Runway Safety Area for Runway 12, relocate Runway 12 threshold to remove prior displacement, and acquire land southeast of airport, located within or immediately adjacent to runway protection zone; Extension of Runway 12–30, including acquire land or rights northwest of existing runway, relocate/bury power lines, relocate airside perimeter roadway, extend Runway 12–30 (1,900 feet by 150 feet), relocate Runway 12–30 navaids, displace Runway 30 threshold using declared distance standards, extend parallel taxiway A to new end of Runway 12, construct deicing hold pads on Taxiway A at Runway 12 and Runway 30, and develop two high-speed exit taxiways; Expansion of existing passenger terminal to accommodate projected demands; and analysis of sites adjacent to extended runway for aviation related development, including new passenger terminal and air cargo areas.

The purpose and need for these improvements will be reviewed in the environmental documentation. All reasonable alternatives will be considered including the no-action alternative.

Copies of a scoping document with additional detail can be obtained by contacting the FAA informational contact person identified above. Federal, State, and local agencies and other interested parties are invited to make comments and suggestions to ensure that the full range of issues related to these proposed actions are addressed and all significant issues identified. The FAA informational contact person identified above should receive these comments and suggestions by January 29, 2002.

Public Scoping Meeting: To facilitate receipt of comments, two public scoping meetings will be held on January 15,

2002 at the Gary/Chicago Airport, 6001 Industrial Highway, Gary, Indiana. The first meeting will be held between 10 am and 2 pm Central Standard Time for Federal, State, and local agencies in the administrative offices. The second meeting will be held from 3 PM to 7 PM Central Standard Time for other interested parties in the passenger terminal facility.

Issued in Des Plaines, Illinois on November 19, 2001.

Philip M. Smithmeyer,

Manager, Chicago Airports District Office, Great Lakes Region.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Aviation Security Advisory Committee; Meeting

AGENCY: Federal Aviation Administration, DOT.

SUMMARY: Notice is hereby given of a meeting of the Aviation Security Advisory Committee.

DATES: The meeting will be held December 18, 2001, from 10 a.m. to 1 p.m.

ADDRESSES: The meeting will be held at the Capitol Holiday Inn, 550 C Street, SW, Discovery II Room, Washington, DC 20024, telephone 202–479–4000.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. 11), notice is hereby given of a meeting of the Aviation Security Advisory Committee to be held December 18, 2001, at the Capitol Holiday Inn, 550 C Street, SW., Discovery II Room, Washington, DC. The agenda for the meeting will include: Regulatory/Legislative Initiatives, Enforcement Policy, and Status of Rapid Response Team Recommendations. The meeting is open to the public but attendance is limited to space available. Members of the public may address the committee only with the written permission of the chair, which should be arranged in advance. The chair may entertain public comment if, in its judgment, doing so will not disrupt the orderly progress of the meeting and will not be unfair to any other person. Members of the public are welcome to present written material to the committee at any time. Persons wishing to present statements or obtain information should contact the Office of the Associate Administrator for Civil Aviation Security, 800 Independence Avenue, SW., Washington, DC 20591, telephone 202–267–7622.

Issued in Washington, DC, on November 28, 2001.

Lynne Osmus,

Deputy Associate Administrator for Civil Aviation Security.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Final Report of RTCA Future Flight Data Collection Committee

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Final Report of RTCA Future Flight Data Collection Committee.

SUMMARY: The FAA is issuing this notice to advise the public of a meeting on the Final Report of RTCA Future Flight Data Collection Committee.

DATES: The meeting will be held December 4, 2001, starting at 1 p.m.

ADDRESSES: The meeting will be held at RTCA, Inc. 1828 L Street, NW., Suite 805, Washington, DC, 20036.

FOR FURTHER INFORMATION CONTACT: RTCA Secretariat, 1828 L Street, NW., Suite 805, Washington, DC, 20036; telephone (202) 833–9339; fax (202) 833–9434; Web site *http://www.rtca.org.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C. Appendix 2), notice is hereby given for the Final Report of the Future Flight Data Collection Committee, being reviewed at an RTCA Policy Board meeting. The agenda will include:

- December 4:
  - Opening Session (Welcome and Introductory Remarks)
  - Consider Document for Publication: *Future Flight Data Collection Committee Final Report*
  - Closing Session (Other Business, Adjourn)

Attendance is open to the interested public but limited to space availability. With the approval of the chairmen, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on November 26, 2001.

Janice L. Peters,

FAA Special Assistant, RTCA Advisory Committee.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), notice is hereby given that the Federal Railroad Administration (FRA) received a request for a waiver of compliance with certain requirements of its safety standards. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested, and the petitioner's arguments in favor of relief.

Association of American Railroads

[Docket Number FRA–2001–10654]

The Association of American Railroads (AAR) has petitioned, on behalf of its member railroads, for a permanent waiver of compliance from the requirements of the 49 CFR Federal Track Safety Standards part 213.143; *Frog Guard Rails and Guard Faces; Gage.* This requirement prescribes a minimum and maximum value for guard check and guard face gages, respectively. Guard check gage is the distance between the gage line of a frog and the guard line of its guard rail or guarding face. Allowable minimum guard check dimensions vary with track classification, *i.e.*, train speed. FRA minimum safety standards permit a variation of 4-feet 6 ⅛-inches in Class 1 track, 4-feet 6 ¼-inches in Class 2 track, 4-feet 6 ⅜-inches in Class 3 and 4 track, and 4-feet 6 ½-inches in Class 5 and above track.

The AAR petition seeks relief from the guard check requirements for Class 5 track for a particular type of frog design called a "heavy-point" frog. The AAR seeks a waiver for its member railroads permitting application of the minimum guard check for Class 3 and 4 track to Class 5 track when through gage plates are used to control the movement of a "heavy-point" frog relative to its guard rails.

The heavy-point frog is a unique design, which has a thicker frog point. The AAR states that it offers safety benefits over a traditional frog because there is more insert mass to reduce metal fatigue from impact loading,

greater durability, reduced susceptibility to point rollover, and better ability to guide the wheel flange toward the proper flangeway. Heavy-point frog insert design characteristics gradually widen to 31/32-inch (0.9688) overall, resulting in the heavy-point frog insert point being thicker at the actual 5/8-inch (0.6250) frog point gage lines. The gage line is actually 11/32 (0.3438) thicker than a traditional 5/8-inch (0.6250) RBM frog point. Heavy-point frogs reduce standard guard check distance from 4-feet 6 5/8 (54.6250) inches to 4-feet 6 29/64 inches (54.4531) which does not comply with minimum safety standards for Class 5 track.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number (*e.g.*, Waiver Petition Docket Number FRA–2001–10654) and must be submitted in triplicate to the Docket Clerk, DOT Central Docket Management Facility, Room PL–401, Washington, DC, 20590–0001. Communications received within 45 days of the date of this notice will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9:00 a.m.—5:00 p.m.) at above facility. All documents in the public docket are also available for inspection and copying on the Internet at the docket facility's Web site at *http://dms.dot.gov*.

Issued in Washington, DC, on November 27, 2001.

Grady C. Cothen, Jr.,

Deputy Associate Administrator for Safety Standards and Program Development.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Docket No. AB–33 (Sub-No. 183)]

Salt Lake City Corporation—Adverse Abandonment—in Salt Lake City, UT

On November 13, 2001, Salt Lake City Corporation (City) filed an adverse application under 49 U.S.C. 10903 requesting that the Surface Transportation Board (Board) authorize the abandonment by Union Pacific Railroad Company (UP) of a portion of a line of railroad known as the 900 South Line extending from milepost 781.0 to milepost 782.32 in Salt Lake City, UT, a distance of 1.32 miles. The line traverses United States Postal Service ZIP Codes 84101 and 84104 and includes no stations.

The City filed the adverse abandonment application to prevent UP from reactivating the line. At issue is a Franchise Agreement, dated March 20, 1989, between the City and UP, which the City submits obligates UP to remove its track on the line and to take the necessary steps to permit that removal. The City views UP's use of the line as "creating conflicts" with the City's plans for the area. If the line is reactivated, the City states that trains will run through a minority community and cross a major thoroughfare, posing safety risks and creating environmental justice violations.

In a decision served in this proceeding on October 5, 2001, the City was granted a waiver from many of the filing requirements of the Board's abandonment regulations at 49 CFR 1152 that were not relevant to its adverse abandonment application. Specifically, the City was granted waiver from 49 CFR 1152.10–14 and 1152.24(e)(1), pertaining to System Diagram Maps, from 49 CFR 1152.20(a)(3), pertaining to posting notice requirements, and from 49 CFR 1152.24(f) and 1152.29(e)(2), pertaining to abandonment consummation notice. However, the City was required to comply with 49 CFR 1152.20(a)(2), which pertains to service requirements, and 49 CFR 1152.20(a)(4), which pertains to publishing requirements. Also, the Board did not waive the environmental regulations at 49 CFR 1105, 49 CFR 1152.20(c), and 49 CFR 1152.22(f).

The City states that the line does not contain federally granted rights-of-way. Any documentation in the City's possession will be made available promptly to those requesting it. The City's entire abandonment case in chief was filed with the application, except for its Environmental and Historic Report filed on October 22, 2001, and errata thereto filed on October 31, 2001.

The City states that the interests of railroad employees will not be adversely affected because there have been no freight operations for the past 2 years.

Any interested person may file written comments concerning the proposed abandonment or protests (including protestant's entire opposition case) by December 28, 2001. All interested persons should be aware that, following any abandonment of rail service and salvage of the line, the line may be suitable for other public use, including interim trail use. Any request for a public use condition under 49 U.S.C. 10905 (49 CFR 1152.28) or for a trail use condition under 16 U.S.C. 1247(d) (49 CFR 1152.29) must be filed by December 28, 2001. Each trail use request must be accompanied by a $150 filing fee. *See* 49 CFR 1002.2(f)(27). The due date for applicant's reply is January 14, 2002.

Persons opposing the proposed adverse abandonment who wish to participate actively and fully in the process should file a protest. Persons who may oppose the abandonment but who do not wish to participate fully in the process by submitting verified statements of witnesses containing detailed evidence should file comments. Parties seeking information concerning the filing of protests should refer to 49 CFR 1152.25.

All filings in response to this notice must refer to STB Docket No. AB–33 (Sub-No. 183) and must be sent to: (1) Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street; NW., Washington, DC 20423–0001; and (2) Charles A. Spitulnik, McLeod, Watkinson & Miller, One Massachusetts Ave., NW, Suite 800, Washington, DC 20001. The original and 10 copies of all comments or protests shall be filed with the Board with a certificate of service. Except as otherwise set forth in part 1152, every document filed with the Board must be served on all parties to the abandonment proceeding. 49 CFR 1104.12(a).

Persons seeking further information concerning abandonment procedures may contact the Board's Office of Public Services at (202) 565–1592 or refer to the full abandonment or discontinuance regulations at 49 CFR part 1152.

The October 5 decision noted that the City had requested waiver from the environmental requirements of 49 CFR 1152.22(f), arguing that its proposal has no environmental impact because there has been no traffic for 2 years and, in effect, qualifies for treatment under 49

CFR 1105.6(c). However, the October 5 decision indicated that the City should make that showing in its application, rather than seeking a waiver. As noted, on October 22, 2001, the City filed a Combined Environmental and Historic Report and, on October 31, 2001, filed errata thereto. Questions concerning environmental issues may be directed to the Section of Environmental Analysis (SEA) at (202) 565–1552. [TDD for the hearing impaired is available at 1–800–877–8339.]

An environmental assessment (EA) (or environmental impact statement (EIS), if necessary) prepared by SEA will be served upon all parties of record and upon any agencies or other persons who commented during its preparation. Any other persons who would like to obtain a copy of the EA (or EIS) may contact SEA. EAs in these abandonment proceedings normally will be made available within 33 days of the filing of the application. The deadline for submission of comments on the EA will generally be within 30 days of its service. The comments received will be addressed in the Board's decision. A supplemental EA or EIS may be issued where appropriate.

Board decisions and notices are available on our Web site at *www.stb.dot.gov*.

Decided: November 27, 2001.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

DEPARTMENT OF THE TREASURY

Office of the Comptroller of the Currency

Proposed Extension of Information Collection; Comment Request

AGENCY: Office of the Comptroller of the Currency (OCC), Treasury.

ACTION: Notice and request for comment.

SUMMARY: The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. An agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid OMB control number. The OCC is soliciting comment concerning its information collection titled, "(MA)—Loans in Areas Having Special Flood Hazards (12 CFR 22)."

DATES: You should submit written comments by February 1, 2002.

ADDRESSES: You should direct written comments to the Communications Division, Office of the Comptroller of the Currency, Public Information Room, Mailstop 1–5, Attention: 1557–0202, 250 E Street, SW., Washington, DC 20219. In addition, comments may be sent by facsimile transmission to (202) 874–4448, or by electronic mail to *regs.comments@occ.treas.gov*. You can inspect and photocopy the comments at the OCC's Public Information Room, 250 E Street, SW., Washington, DC 20219. You can make an appointment to inspect the comments by calling (202) 874–5043.

FOR FURTHER INFORMATION CONTACT: You can request additional information or a copy of the collection from Jessie Dunaway, OCC Clearance Officer, or Camille Dixon, (202) 874–5090, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 250 E Street, SW, Washington, DC 20219.

SUPPLEMENTARY INFORMATION: The OCC is proposing to extend OMB approval of the following information collection:

Title: (MA)–Loans in Areas Having Special Flood Hazards (12 CFR 22).

OMB Number: 1557–0202.

Description: This submission covers an existing regulation and involves no change to the regulation or to the information collection. The OCC requests only that OMB extend its approval of the information collection. This regulation requires national banks to make disclosures and keep records regarding whether a property securing a loan is located in a special flood hazard area.

This information collection is required by section 303(a) and title V of the Riegle Community Development and Regulatory Improvement Act, Pub. L. 103–325, title V, 108 Stat. 2160, the National Flood Insurance Reform Act of 1994 amendments to the National Flood Insurance Act of 1968 (42 U.S.C. 4104a and 4104b), the Flood Disaster Protection Act of 1973 (42 U.S.C. 4012a and 4106(b)), and by OCC regulations implementing those statutes. The information collection requirements are contained in 12 CFR part 22.

Section 22.6 requires a national bank to use and maintain a copy of the Standard Flood Hazard Determination Form developed by the Federal Emergency Management Agency (FEMA).

Section 22.7 requires a national bank or its loan servicer, if a borrower has not obtained flood insurance, to notify the borrower to obtain adequate flood insurance coverage or the bank or servicer will purchase flood insurance on the borrower's behalf.

Section 22.9 requires a national bank making a loan secured by a building or a mobile home to advise the borrower and the loan servicer that the property is, or is not, located in a special flood hazard area, if flood insurance is available under the National Flood Insurance Program, and if Federal disaster relief may be available in the event of flooding. The bank must maintain a record of the borrower and loan servicer's receipts of these notices.

Section 22.10 requires a national bank making a loan secured by a building or a mobile home located in a special flood hazard area to notify FEMA of the identify of the servicer, and of any change in servicers.

These information collection requirements ensure bank compliance with applicable Federal law, further bank safety and soundness, provide protections for banks and the public, and further public policy interests.

Type of Review: Extension of OMB approval.

Affected Public: Businesses or other for-profit (national banks).

Estimated Number of Respondents: 2,600.

Estimated Total Annual Responses: 262,600.

Frequency of Response: On occasion.

Estimated Total Annual Burden: 67,600 hours.

Comments submitted in response to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;

(b) The accuracy of the agency's estimate of the burden of the collection of information;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

(e) Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

Dated: November 26, 2001.

Mark J. Tenhundfeld,

Assistant Director, Legislative and Regulatory Activities Division.

DEPARTMENT OF THE TREASURY

Fiscal Service

Surety Companies Acceptable on Federal Bonds: Name Change—Commercial Union Insurance Company

AGENCY: Financial Management Service, Fiscal Service, Department of the Treasury.

ACTION: Notice.

SUMMARY: This is Supplement No. 14 to the Treasury Department Circular 570; 2001 Revision, published July 2, 2001, at 66 FR 35024.

FOR FURTHER INFORMATION CONTACT: Surety Bond Branch at (202) 874–6507.

SUPPLEMENTARY INFORMATION: Commercial Union Insurance Company, a Massachusetts corporation, has formally changed its name to OneBeacon America Insurance Company, effective August 31, 2001. The Company was last listed as an acceptable surety Federal bonds at 66 FR 30533, July 2, 2001.

A Certificate of Authority as an acceptable surety on Federal bonds, dated today, is hereby issued under Sections 9304 to 9308 of Title 31 of the United States Code, to OneBeacon America Insurance Company, Boston, Massachusetts. This new Certificate replaces the Certificate of Authority issued to the Company under its former name. The underwriting limitation of $28,750,000 established for the Company as of July 2, 2001, remains unchanged until June 30, 2002.

Certificates of Authority expire on June 30, each year, unless revoked prior to that date. The Certificates are subject to subsequent annual renewal as long as the Company remains qualified (31 CFR, part 223). A list of qualified companies is published annually as of July 1, in the Department Circular 570, which outlines details as to underwriting limitations, areas in which licensed to transact surety business and other information. Federal bond-approving officers should annotate their reference copies of the Treasury Circular 570, 2001 Revision, at page 35050 to reflect this change.

The Circular may be viewed and downloaded through the Internet (*http://www.fms.treas.gov/c570/index.html*). A hard copy may be purchased from Government Printing Office (GPO), Subscription Service, Washington, DC, telephone (202) 512–1800. When ordering the Circular from GPO, use the following stock number: 769–004–04067–1.

Questions concerning this notice may be directed to the U.S. Department of the Treasury, Financial Management Service, Financial Accounting and Services Division, Surety Bond Branch, 3700 East-West Highway, Room 6F04, Hyattsville, MD 20782.

Dated: November 19, 2001.

ELECTRONIC RESEARCH

World Wide Web

Full text of the daily Federal Register, CFR and other publications is located at: **http://www.access.gpo.gov/nara**

Federal Register information and research tools, including Public Inspection List, indexes, and links to GPO Access are located at: **http://www.nara.gov/fedreg**

E-mail

FEDREGTOC-L (Federal Register Table of Contents LISTSERV) is an open e-mail service that provides subscribers with a digital form of the Federal Register Table of Contents. The digital form of the Federal Register Table of Contents includes HTML and PDF links to the full text of each document.

To join or leave, go to **http://listserv.access.gpo.gov** and select *Online mailing list archives, FEDREGTOC-L, Join or leave the list (or change settings);* then follow the instructions.

PENS (Public Law Electronic Notification Service) is an e-mail service that notifies subscribers of recently enacted laws.

To subscribe, go to **http://hydra.gsa.gov/archives/publaws-l.html** and select *Join or leave the list* (or change settings); then follow the instructions.

FEDREGTOC-L and **PENS** are mailing lists only. We cannot respond to specific inquiries.

Reference questions. Send questions and comments about the Federal Register system to: **info@fedreg.nara.gov**

The Federal Register staff cannot interpret specific documents or regulations.

FEDERAL REGISTER PAGES AND DATE, DECEMBER

60139–61124..... 3

CFR PARTS AFFECTED DURING DECEMBER

At the end of each month, the Office of the Federal Register publishes separately a List of CFR Sections Affected (LSA), which lists parts and sections affected by documents published since the revision date of each title.

REMINDERS
The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance.

RULES GOING INTO EFFECT DECEMBER 3, 2001

AGRICULTURE DEPARTMENT
Agricultural Marketing Service

LIST OF PUBLIC LAWS

This is a continuing list of public bills from the current session of Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. This list is also available online at *http://www.nara.gov/fedreg/plawcurr.html.*

The text of laws is not published in the **Federal Register** but may be ordered in "slip law" (individual pamphlet) form from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–1808). The text will also be made available on the Internet from GPO Access at *http://*

www.access.gpo.gov/nara/nara005.html. Some laws may not yet be available.

H.R. 768/P.L. 107–72
Need-Based Educational Aid Act of 2001 (Nov. 20, 2001; 115 Stat. 648)

H.R. 2620/P.L. 107–73
Departments of Veterans Affairs and Housing and Urban Development, and Independent Agencies Appropriations Act, 2002 (Nov. 26, 2001; 115 Stat. 651)

H.R. 1042/P.L. 107–74
To prevent the elimination of certain reports. (Nov. 28, 2001; 115 Stat. 701)

H.R. 1552/P.L. 107–75
Internet Tax Nondiscrimination Act (Nov. 28, 2001; 115 Stat. 703)

H.R. 2330/P.L. 107–76
Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Act, 2002 (Nov. 28, 2001; 115 Stat. 704)

H.R. 2500/P.L. 107–77
Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies Appropriations Act, 2002 (Nov. 28, 2001; 115 Stat. 748)

H.R. 2924/P.L. 107–78
To provide authority to the Federal Power Marketing Administration to reduce vandalism and destruction of property, and for other purposes. (Nov. 28, 2001; 115 Stat. 808)

Last List November 23, 2001

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service of newly enacted public laws. To subscribe, go to *http://hydra.gsa.gov/archives/publaws-l.html* or send E-mail to **listserv@listserv.gsa.gov** with the following text message:

SUBSCRIBE PUBLAWS-L Your Name.

Note: This service is strictly for E-mail notification of new laws. The text of laws is not available through this service. **PENS** cannot respond to specific inquiries sent to this address.

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The CFR is available free on-line through the Government Printing Office's GPO Access Service at http://www.access.gpo.gov/nara/cfr/index.html. For information about GPO Access call the GPO User Support Team at 1-888-293-6498 (toll free) or 202-512-1530.

The annual rate for subscription to all revised paper volumes is $1195.00 domestic, $298.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, Master Card, or Discover). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 512–1800** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512-2250**.

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period January 1, 2000, through January 1, 2001. The CFR volume issued as of January 1, 2000 should be retained.

[5] No amendments to this volume were promulgated during the period April 1, 2000, through April 1, 2001. The CFR volume issued as of April 1, 2000 should be retained.

[6] No amendments to this volume were promulgated during the period July 1, 2000, through July 1, 2001. The CFR volume issued as of July 1, 2000 should be retained..

TABLE OF EFFECTIVE DATES AND TIME PERIODS—DECEMBER 2001

This table is used by the Office of the Federal Register to compute certain dates, such as effective dates and comment deadlines, which appear in agency documents. In computing these dates, the day after publication is counted as the first day.

When a date falls on a weekend or holiday, the next Federal business day is used. (See 1 CFR 18.17)

A new table will be published in the first issue of each month.

DATE OF FR PUBLICATION	15 DAYS AFTER PUBLICATION	30 DAYS AFTER PUBLICATION	45 DAYS AFTER PUBLICATION	60 DAYS AFTER PUBLICATION	90 DAYS AFTER PUBLICATION
Dec 3	Dec 18	Jan 2	Jan 17	Feb 1	March 4

INFORMATION ABOUT THE SUPERINTENDENT OF DOCUMENTS' SUBSCRIPTION SERVICE

Know when to expect your renewal notice and keep a good thing coming. To keep our subscription prices down, the Government Printing Office mails each subscriber *only one renewal notice*. You can learn when you will get your renewal notice by checking the number that follows month/year code on the top line of your label *as shown in this example:*

A renewal notice will be sent approximately 90 days **before the shown date.**

```
                                        DEC97 R 1
AFR SMITH212J
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20704
```

A renewal notice will be sent approximately 90 days **before the shown date.**

```
                                        DEC97 R 1
AFRDO SMITH212J
JOHN SMITH
212 MAIN STREET
FORESTVILLE MD 20704
```

To be sure that your service continues without interruption, please return your renewal notice promptly. If your subscription service is discontinued, simply send your mailing label from any issue to the Superintendent of Documents, Washington, DC 20402–9372 with the proper remittance. Your service will be reinstated.

To change your address: Please SEND YOUR MAILING LABEL, along with your new address to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To inquire about your subscription service: Please SEND YOUR MAILING LABEL, along with your correspondence, to the Superintendent of Documents, Attn: Chief, Mail List Branch, Mail Stop: SSOM, Washington, DC 20402–9373.

To order a new subscription: Please use the order form provided below.

Public Laws

107th Congress, 1st Session, 2001

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 107th Congress, 1st Session, 2001.

Individual laws also may be purchased from the Superintendent of Documents, U.S. Government Printing Office. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws or access the online database at http://www.access.gpo.gov/nara005.html

REGULATORY INFORMATION SERVICE CENTER

Introduction to The Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions

AGENCY: Regulatory Information Service Center.

ACTION: Introduction to The Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions.

SUMMARY: The Regulatory Flexibility Act requires that agencies publish semiannual regulatory agendas describing regulatory actions they are developing (5 U.S.C. 602). Executive Order 12866 "Regulatory Planning and Review" (58 FR 51735; October 4, 1993) and Office of Management and Budget memoranda implementing section 4 of that Order establish minimum standards for agencies' agendas, including specific types of information for each entry.

The Unified Agenda helps agencies fulfill all of these requirements. All Federal regulatory agencies have chosen to publish their regulatory agendas as part of this publication.

Section 4 of Executive Order 12866 also directs that, as part of their submissions to the October edition of the Unified Agenda, agencies prepare a regulatory plan of the most important significant regulatory actions that the agency reasonably expects to issue in proposed or final form during the upcoming fiscal year. The agency plans appear as the first section of this joint publication; the agency agendas follow.

The Regulatory Plan begins with an introduction, and then The RegulatoryPlans of 28 Federal departments and agencies. Each of these agencies has also submitted a regulatory agenda describing its other regulatory actions. The regulatory agendas for these and 32 other Federal agencies appear in Parts III-LXII of this issue of the **Federal Register**, followed by indexes to both Plan and Agenda entries.

ADDRESSES: Regulatory Information Service Center (MI), General Services Administration, 1800 F Street NW., Suite 3039, Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: For further information about specific regulatory actions, please refer to the Agency Contact listed for each entry.

To provide comment on or to obtain further information about this publication, contact: Ronald C. Kelly, Executive Director, Regulatory Information Service Center (MI), General Services Administration, 1800 F Street NW., Suite 3039, Washington, DC 20405, (202) 482-7340. INTRODUCTION TO THE REGULATORY PLAN AND THE UNIFIED AGENDA OF FEDERAL REGULATORY AND DEREGULATORY ACTIONS

I. What Are The Regulatory Plan and the Unified Agenda?

The Regulatory Plan (Plan) serves as a defining statement of the Administration's regulatory and deregulatory policies and priorities. The Plan is part of the fall edition of the Unified Agenda. Each participating agency's regulatory plan contains: (1) A narrative statement of the agency's regulatory priorities and, for most agencies, (2) a description of the most important significant regulatory and deregulatory actions that the agency reasonably expects to issue in proposed or final form during the upcoming fiscal year. This edition includes the regulatory plans of 28 departments and agencies.

The Unified Agenda of Federal Regulatory and Deregulatory Actions (Unified Agenda) provides information, in a uniform format, about regulations that the Government is considering or reviewing. The Unified Agenda has appeared in the **Federal Register** twice each year since 1983. This edition includes regulatory agendas from 60 Federal departments and agencies. Agencies of the United States Congress are not included.

The Regulatory Information Service Center (the Center) compiles the Plan and the Unified Agenda for the Office of Information and Regulatory Affairs (OIRA), part of the Office of Management and Budget. OIRA is responsible for overseeing the Federal Government's regulatory, paperwork, and information resource management activities, including implementation of E.O. 12866. The Center also provides information about Federal regulatory activity to the President and his Executive Office, the Congress, agency managers, and the public.

The activities included in the Agenda are, in general, those that will have a regulatory action within the next 12 months. Agencies may include activities that will have a longer timeframe than 12 months. Agency agendas also show actions or reviews completed or withdrawn since the last agenda. The agendas do not contain regulations that were excluded under Executive Order 12866, such as those concerning military or foreign affairs functions or regulations related to agency organization, management, or personnel matters.

Agencies prepared entries for this publication to give the public notice of their plans to review, propose, and issue regulations. They have tried to predict their activities over the next 12 months as accurately as possible, but dates and schedules are subject to change. Agencies may withdraw some of the regulations now under development, and they may issue or propose other regulations not included in their agendas. Agency actions in the rulemaking process may occur before or after the dates they have listed.

The Regulatory Plan and the Unified Agenda do not create a legal obligation on agencies to adhere to schedules within it or to confine their regulatory activities to those regulations that appear in this publication. The information in this edition is accurate as of October 1, 2001, in the judgment of the submitting agencies, except as otherwise noted by the agencies. In addition, some agencies submitted updates after that date.

Where applicable, individual actions will be subject to review for compliance with applicable Executive orders, the Regulatory Flexibility Act, and the Paperwork Reduction Act at appropriate points in the regulatory process.

II. Why Are The Regulatory Plan and the Unified Agenda Published?

The Regulatory Plan and the Unified Agenda help agencies comply with their obligations under the Regulatory Flexibility Act and various Executive orders and other statutes.

Regulatory Flexibility Act

The *Regulatory Flexibility Act* requires agencies to identify those rules that may have a significant economic impact on a substantial number of small entities (5 U.S.C. 602). Agencies meet that requirement by including the information in their submissions for the Unified Agenda. Agencies may also indicate those regulations that they are reviewing as part of their periodic review of existing rules under the Regulatory Flexibility Act (5 U.S.C. 610).

Executive Order 12866

Executive Order 12866 entitled "Regulatory Planning and Review" (September 30, 1993; 58 FR 51735) requires covered agencies to prepare an agenda of all regulations under development or review. The Order also requires that certain agencies prepare annually a regulatory plan of their

"most important significant regulatory actions," which appears as part of the October Unified Agenda.

Executive Order 13132

Executive Order 13132 entitled "Federalism" (August 4, 1999; 64 FR 43255) directs agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have "federalism implications" as defined in the Order. Under the Order, an agency that is proposing regulations with federalism implications, which either preempt State law or impose nonstatutory unfunded substantial direct compliance costs on State and local governments, must consult with State and local officials early in the process of developing the regulation. In addition, the agency must provide to the Director of the Office of Management and Budget a federalism summary impact statement for such regulations, which consists of a description of the extent of the agency's prior consultation with State and local officials, a summary of their concerns and the agency's position supporting the need to issue the regulation, and a statement of the extent to which those concerns have been met. As part of this effort, agencies include in their submissions for the Unified Agenda information on whether their regulatory actions may have an effect on the various levels of government and whether those actions have federalism implications.

Unfunded Mandates Reform Act of 1995

The *Unfunded Mandates Reform Act of 1995* (P.L. 104-4, title II) requires agencies to prepare written assessments of the costs and benefits of significant regulatory actions "that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100,000,000 or more . . . in any 1 year . . . ." The requirement does not apply to independent regulatory agencies, nor does it apply to certain subject areas excluded by section 4 of the Act. Affected agencies identify in the Unified Agenda those regulatory actions they believe are subject to title II of the Act.

Executive Order 13211

Executive Order 13211 entitled "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" (May 22, 2001, 66 FR 28355) directs agencies to provide, to the extent possible, information regarding the adverse effects that agency actions may have on the supply, distribution, and use of energy. Under the Order, the agency must prepare and submit a Statement of Energy Effects to the Administrator of the Office of Information and Regulatory Affairs, Office of Management and Budget, for "those matters identified as significant energy actions." As part of this effort, agencies may optionally include in their submissions for the Unified Agenda, information on whether they have prepared or plan to prepare a Statement of Energy Effects for their regulatory actions.

Small Business Regulatory Enforcement Fairness Act

The *Small Business Regulatory Enforcement Fairness Act* (P.L. 104-121, title II) established a procedure for congressional review of rules (5 U.S.C. 801 et seq.), which defers, unless exempted, the effective date of a "major" rule for at least 60 days from the publication of the final rule in the **Federal Register**. The Act specifies that a rule is "major" if it has resulted or is likely to result in an annual effect on the economy of $100 million or more or meets other criteria specified in that Act. If the issuing agency believes that a rule may be major, it indicates this under the "Priority" heading of the entry. The Act provides that the Administrator of OIRA will make the final determination as to whether a rule is major.

III. How Are The Regulatory Plan and the Unified Agenda Organized?

The Regulatory Plan appears in Part II of this edition of the **Federal Register**. Following the Plan, each agency's agenda appears as a separate part. The sections of the Plan and the parts of the Unified Agenda are organized alphabetically in four groups: Cabinet departments; other executive agencies; the Federal Acquisition Regulation, a joint authority (Agenda only); and independent regulatory agencies. Departments may in turn be divided into subagencies.

Each department's or agency's section of the Plan contains a narrative statement of regulatory priorities, and, for most agencies, a description of each of the department's or agency's most important significant regulatory and deregulatory actions.

Each department's or agency's part of the Agenda begins with a preamble providing information specific to that part. Following the preamble, for each agency that requests it, the Center provides a table of contents that appears in the Agenda after the agency preamble. Next is a description of each of the department's or agency's regulatory and deregulatory actions.

In the Agenda, each agency presents its entries under one of five headings according to the rulemaking stage of the entry. In the Plan, only the first three stages are applicable. The stages are:

1. *Prerule Stage* — actions agencies will undertake to determine whether or how to initiate rulemaking. Such actions occur prior to a Notice of Proposed Rulemaking (NPRM) and may include Advance Notices of Proposed Rulemaking (ANPRMs) and reviews of existing regulations.

2. *Proposed Rule Stage* — actions for which agencies plan to publish a Notice of Proposed Rulemaking as the next step in their rulemaking process or for which the closing date of the NPRM Comment Period is the next step.

3. *Final Rule Stage* — actions for which agencies plan to publish a final rule or an interim final rule or to take other final action as the next step in their rulemaking process.

4. *Long-Term Actions* — items under development but for which the agency does not expect to have a regulatory action within the 12 months after publication of this edition of the Unified Agenda. Some of the entries in this section may contain abbreviated information.

5. *Completed Actions* — actions or reviews the agency has completed or withdrawn since publishing its last agenda. This section also includes items the agency began and completed between issues of the Agenda.

In the Agenda, an agency may use subheadings to identify regulations that it has grouped according to particular topics. When these subheadings are used, they appear above the title of the first regulation in each group.

A bullet (•) preceding the title of an entry indicates that the entry appears in this publication for the first time.

All entries are numbered sequentially from the beginning to the end of the publication. The sequence number preceding the title of each entry identifies the location of

the entry in this edition. This sequence number is used as the reference in the table of contents and in all indexes to enable readers to find entries. Entries in the Plan are also in the Unified Agenda with the same RIN but with different sequence numbers. For these entries, the Plan sequence number is used as the reference in all indexes.

This publication contains six indexes. Index A lists entries for which agencies have indicated that they are conducting a periodic review under section 610(c) of the Regulatory Flexibility Act. Index B lists the regulatory actions for which agencies believe that the Regulatory Flexibility Act may require a Regulatory Flexibility Analysis. Index C lists additional regulatory actions for which agencies have chosen to indicate that some impact on small entities is likely even though a Regulatory Flexibility Analysis may not be required. Index D lists entries that agencies believe may have effects on levels of government. Index E lists entries that agencies believe may have federalism implications as defined in Executive Order 13132. Index F is a subject index based on the **Federal Register Thesaurus of Indexing Terms**.

IV. What Information Appears for Each Entry?

All entries in the Unified Agenda contain uniform data elements including, at a minimum, the following information:

Title of the Regulation — a brief description of the subject of the regulation, possibly including section 610 review designation. The notation "Section 610 Review" following the title indicates that the agency has selected the rule for its periodic review of existing rules under the Regulatory Flexibility Act (5 U.S.C. 610(c)). Some agencies have indicated completions of section 610 reviews or rulemaking actions resulting from completed section 610 reviews

Priority — an indication of the significance of the regulation. Agencies assign each entry to one of the following five categories of significance.

(1) Economically Significant

As defined in Executive Order 12866, a rulemaking action that will have an annual effect on the economy of $100 million or more or will adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities. The definition of an "economically significant" rule is similar but not identical to the definition of a "major" rule under 5 U.S.C. 801 (P. L. 104-121). (See below.)

(2) Other Significant

A rulemaking that is not economically significant but is considered significant by the agency. This category includes rules that the agency anticipates will be reviewed under E.O. 12866 or rules that are a priority of the agency head. These rules may or may not be included in the agency's regulatory plan.

(3) Substantive, Nonsignificant

A rulemaking that has substantive impacts but is neither Significant, nor Routine and Frequent, nor Informational/Administrative/Other.

(4) Routine and Frequent

A rulemaking that is a specific case of a multiple recurring application of a regulatory program in the Code of Federal Regulations and that does not alter the body of the regulation.

(5) Informational/Administrative/Other

A rulemaking that is primarily informational or pertains to agency matters not central to accomplishing the agency's regulatory mandate but that the agency places in the Unified Agenda to inform the public of the activity.

In addition, if an agency believes that a rule may be "major" under 5 U.S.C. 801 (P.L. 104-121) because it has resulted or is likely to result in an annual effect on the economy of $100 million or more or meets other criteria specified in that Act, the agency indicates this under the "Priority" heading. (The Act provides that the Administrator of the Office of Information and Regulatory Affairs will make the final determination as to whether a rule is major.)

Unfunded Mandates — whether the rule is covered by section 202 of the Unfunded Mandates Reform Act of 1995 (P.L. 104-4). The Act requires that, before issuing an NPRM likely to result in a mandate that may result in expenditures by State, local, and tribal governments, in the aggregate, or by the private sector of more than $100 million in 1 year, agencies, other than independent regulatory agencies, shall prepare a written statement containing an assessment of the anticipated costs and benefits of the Federal mandate. If the agency believes the entry is not subject to the Act, this data element will not be printed.

Legal Authority — the section(s) of the United States Code (U.S.C.) or Public Law (P.L.) or the Executive order (E.O.) that authorize(s) the regulatory action. Agencies may provide popular name references to laws in addition to these citations.

CFR Citation — the section(s) of the Code of Federal Regulations that will be affected by the action.

Legal Deadline — whether the action is subject to a statutory or judicial deadline, the date of that deadline, and whether the deadline pertains to an NPRM, a Final Action, or some other action.

Abstract — a brief description of the problem the regulation will address; the need for a Federal solution; to the extent available, alternatives that the agency is considering to address the problem; and potential costs and benefits of the action.

Timetable — the dates and citations (if available) for all past steps and a projected date for at least the next step for the regulatory action. A date printed in the form 12/00/01 means the agency is predicting the month and year the action will take place but not the day it will occur. In some instances, agencies may indicate what the next action will be, but the date of that action is "To Be Determined." "Next Action Undetermined" indicates the agency does not know what action it will take next. Dates after 1999 are printed in the same form as other dates, using the last two digits of the year.

Regulatory Flexibility Analysis Required — whether an analysis is required by the Regulatory Flexibility Act (5 U.S.C. 601 et seq.) because the rulemaking action is likely to have a significant economic impact on a substantial number of small entities as defined by the Act.

Small Entities Affected — the types of small entities (businesses, governmental jurisdictions, or organizations) on which the rulemaking action is likely to have an impact as defined by the Regulatory Flexibility Act. Some agencies have chosen to indicate likely effects on small entities even

though they believe that a Regulatory Flexibility Analysis will not be required.

Government Levels Affected — whether the action is expected to affect levels of government and, if so, whether the governments are State, local, tribal, or Federal.

Federalism — whether the action has "federalism implications" as defined in Executive Order 13132. This term refers to actions "that have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government." If the action does not have federalism implications, this data element will not be printed. Independent regulatory agencies are not required to supply this information.

Agency Contact — the name and phone number of one or more persons in the agency who is knowledgeable about the rulemaking action. The agency may also provide the title, address, fax number, e-mail address, and TDD for each agency contact.

Procurement — whether the action is related to procurement and, if so, whether it is required by statute and whether it involves a paperwork burden. The Procurement heading appears only if the entry is related to procurement.

Some agencies have provided the following optional information:

Compliance Cost to the Public — the estimated gross compliance cost of the action.

Affected Sectors — the industrial sectors that the action may most affect, either directly or indirectly. Affected Sectors are identified by North American Industry Classification System (NAICS) codes.

Energy Effects — an indication of whether the agency has prepared or plans to prepare a Statement of Energy Effects for the action, as required by Executive Order 13211 "Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use" issued on May 18, 2001 (66 FR 28355; May 22, 2001).

Entries appearing in **The Regulatory Plan** should also include the following information:

Statement of Need — a description of the need for the regulatory action.

Summary of the Legal Basis — a description of the legal basis for the action, including whether any aspect of the action is required by statute or court order.

Alternatives — a description of the alternatives the agency has considered or will consider as required by section 4(c)(1)(B) of E.O. 12866.

Anticipated Costs and Benefits — a description of preliminary estimates of the anticipated costs and benefits of the action.

Risks — a description of the magnitude of the risk the action addresses, the amount by which the agency expects the action to reduce this risk, and the relation of the risk and this risk reduction effort to other risks and risk reduction efforts within the agency's jurisdiction.

V. Abbreviations

The following abbreviations appear throughout this publication:

ANPRM — An Advance Notice of Proposed Rulemaking is a preliminary notice, published in the **Federal Register**, announcing that an agency is considering a regulatory action. The agency issues an ANPRM before it develops a detailed proposed rule. The ANPRM describes the general area that may be subject to regulation and usually asks for public comment on the issues and options being discussed. An ANPRM is issued only when an agency believes it needs to gather more information before proceeding to a notice of proposed rulemaking.

CFR — The Code of Federal Regulations is an annual codification of the general and permanent regulations published in the **Federal Register** by the departments and agencies of the Federal Government. The Code is divided into 50 titles, and each title covers a broad area subject to Federal regulation. The CFR is keyed to and kept up to date by the daily issues of the **Federal Register**.

EO — An Executive order is a directive from the President to executive agencies, issued under constitutional or statutory authority. Executive orders are published in the **Federal Register** and in title 3 of the Code of Federal Regulations.

FR — The **Federal Register** is a daily Federal Government publication that provides a uniform system for publishing Presidential documents, all proposed and final regulations, notices of meetings, and other official documents issued by Federal departments and agencies.

FY — The Federal fiscal year runs from October 1 to September 30.

NPRM — A Notice of Proposed Rulemaking is the document an agency issues and publishes in the **Federal Register** that describes and solicits public comments on a proposed regulatory action. Under the Administrative Procedure Act (5 U.S.C. 553), an NPRM must include, at a minimum:

- a statement of the time, place, and nature of the public rulemaking proceeding;
- a reference to the legal authority under which the rule is proposed; and
- either the terms or substance of the proposed rule or a description of the subjects and issues involved.

PL — A Public Law is a law passed by Congress and signed by the President or enacted over his veto. It has general applicability, unlike a private law that applies only to those persons or entities specifically designated. Public laws are numbered in sequence throughout the 2-year life of each Congress; for example, PL 105-4 is the fourth public law of the 105th Congress.

RFA — A Regulatory Flexibility Analysis is a description and analysis of the impact of a rule on small entities, including small businesses, small governmental jurisdictions, and certain small not-for-profit organizations. The Regulatory Flexibility Act (5 U.S.C. 601 et seq.) requires each agency to prepare an initial RFA for public comment when it is required to publish an NPRM and to make available a final RFA when the final rule is published, unless the agency head certifies that the rule would not have a significant economic impact on a substantial number of small entities.

RIN — The Regulation Identifier Number is assigned by the Regulatory Information Service Center to identify each regulatory action listed in **The Regulatory Plan** and the Unified Agenda, as directed by E.O. 12866 (section 4(b)). Additionally, OMB has asked agencies to include RINs in the headings of their Rule and Proposed Rule documents when publishing them in the **Federal Register**, to make it easier for the public and agency officials to track the publication history of regulatory actions throughout their development.

Seq. No. — The Sequence Number identifies the location of an entry in this publication. Note that a specific regulatory action will have the same RIN throughout its development but will generally have different sequence numbers in different editions of **The Regulatory Plan** and the Unified Agenda.

USC — The United States Code is a consolidation and codification of all general and permanent laws of the United States. The USC is divided into 50 titles, and each title covers a broad area of Federal law.

VI. How Can Users Get Copies of the Plan and the Agenda?

Printed copies of this edition of the Federal Register are available from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402-9325, (202) 512-1800.

Copies of individual agency materials may be available directly from the agency. Please contact the particular agency for further information.

All editions of **The Regulatory Plan** and the **Unified Agenda of Federal Regulatory and Deregulatory Actions** since October 1995 are also available in electronic form. You can search the Agenda and the Plan on the World Wide Web at:

http://reginfo.gov

You may also search the Agenda and the Plan on the Government Printing Office's GPO Access, which is accessible through:

http://www.access.gpo.gov

Dated: November 5, 2001.

Ronald C. Kelly,

Executive Director.

[FR Doc. 01–28099 Filed 11–30–01; 8:45 am]

BILLING CODE 6820–27–S

DEPARTMENT OF AGRICULTURE (USDA)

Statement of Regulatory Priorities

The Department of Agriculture, consistent with its reputation as the "people's Department," will pursue regulations that enhance and protect the quality of American agriculture, assist and promote America's farmers and ranchers, and benefit the lives of all Americans. USDA will remain vigilant to ensure the safety of our Nation's food supply and to address the potential threats posed by bioterrorism.

- Farmers, ranchers, and other USDA customers will find significant changes in all aspects of regulations that govern their interaction with the Department and its programs. Farm credit, a mainstay of the Nation's rural economy, is being significantly streamlined by the merger of cumbersome loan-making regulations with forms and certifications simplified to facilitate the application process. Existing forms and procedures are also being reviewed for their applicability to electronic submission and collection. The Department is undertaking a number of actions in the regulation of commodities that will increase efficiency, improve customer service, and reduce intervention in markets.
- USDA will develop new regulations and review existing ones that address the potential threats posed by domestic outbreaks of exotic animal diseases such as Foot-and-Mouth Disease (FMD) and Bovine Spongiform Encephalopathy (BSE).
- In the area of food safety, the Department will continue to refine existing regulations to assist industry in implementing a consistent, science-based process control system while developing new regulations that address emerging and exotic threats to the safety of the Nation's meat, poultry, and egg products supply.
- The Department is also improving the regulations that serve rural communities. Regulations are being streamlined and simplified so that they will be more customer friendly while providing for more efficient and effective program management.
- Nutrition programs are being improved to strengthen dietary quality by providing a wider variety of food packages to children and low-income participants while also improving the efficiency and integrity of program operations.

Reducing Paperwork Burden on Farmers

The Department has made substantial progress in implementing the goal of the Paperwork Reduction Act of 1995 to reduce the burden of information collection on the public. The Government Paperwork Elimination Act (GPEA) is leading all agencies in the Department to evaluate how they conduct business and migrate toward electronically oriented methods. The Farm Service Agency, Natural Resources Conservation Service, Rural Development, and Risk Management Agency are also working to implement the Freedom to E-File Act. Freedom to E-File directs the agencies, to the maximum extent practicable, to modify forms into user-friendly formats with user instructions and permits those forms to be downloaded and submitted via facsimile, mail, or similar means. As a result, producers should have the capability to electronically file forms and all other documentation if they so desire. Underlying these efforts will be analyses to identify and eliminate redundant data collections and streamline collection instructions. The end result of implementing both of these pieces of legislation will be better service to our customers so that they can choose when and where to conduct business with USDA.

The Role of Regulations

The programs of the Department are diverse and far reaching, as are the regulations that attend their delivery. Regulations codify how the Department will conduct its business, including the specifics of access to, and eligibility for, USDA programs. Regulations also specify the behavior of State and local governments, private industry, businesses, and individuals that is necessary to comply with their provisions. The diversity in purpose and outreach of our programs contributes significantly to the USDA being near the top of the list of departments that produce the largest number of regulations annually. These regulations range from nutrition standards for the school lunch program, to natural resource and environmental measures governing national forest usage and soil conservation, to regulations protecting American agribusiness (the largest dollar value contributor to exports) from the ravages of domestic or foreign plant or animal pestilence, and they extend from farm to supermarket to ensure the safety, quality, and availability of the Nation's food supply. Many regulations function in a dynamic environment, which requires their periodic modification. The factors determining various entitlement, eligibility, and administrative criteria often change from year to year. Therefore, many significant regulations must be revised annually to reflect changes in economic and market benchmarks. Almost all legislation that affects departmental programs has accompanying regulatory needs, often with a significant impact. The Federal Agriculture Improvement and Reform Act of 1996 (the 1996 Act), the Farm Bill of 1996, Public Law 104-127, had considerable regulatory consequences. This key legislation affects most agencies of USDA and resulted in the addition of new programs, the deletion of others, and modification to still others. In addition, the "Agricultural Risk Protection Act of 2000," Public Law 106-224, provides further assurances that agricultural programs will continue to achieve long-term improvements, particularly in reforms to the crop insurance programs. This legislation also provides for improvements in market loss and conservation assistance, crop and livestock disease pest protection, marketing program enhancements, child nutrition program measures, pollution control, and research and development for biomass.

Major Regulatory Priorities

Five agencies are represented in this regulatory plan. They include the Farm Service Agency, the Food and Nutrition Service, the Food Safety and Inspection Service, the Animal and Plant Health Inspection Service, and the Agricultural Marketing Service. This document represents summary information on prospective significant regulations as called for in Executive Order 12866. A brief comment on each of the five agencies appears below, which summarizes the Agency mission and its key regulatory priorities. The Agency summaries are followed by the regulatory plan entries.

Farm Service Agency

Mission: The Farm Service Agency (FSA) administers contract commodity, conservation, farm loan, commodity purchase and emergency loan, and disaster programs as prescribed by various statutes. The Agency's objective is to support farming certainty and flexibility, ensure compliance with highly erodible land, farm conservation and wetland protection requirements, and to assist owners and operators of farms and ranches to conserve and enhance soil, water, and related natural resources.

Priorities: FSA's priority for 2002 will be to continue to emphasize service to our customers. As Administration initiatives and changes in law require revisions to the Agency's regulations, the Agency's focus will be to implement the changes in such a way as to provide benefits for, while minimizing program complexity and regulatory burden for, program participants. As regulations are revised for program changes, opportunities will be taken to clarify, simplify, and reduce confusion whenever possible. The FSA regulations that operate the contract commodity programs, such as production flexibility contracts and marketing assistance loans, were revised a few years ago to remove the link between income support payments and farm prices and provide for seven annual payments. More changes to the laws governing those programs and the related regulations changes are anticipated in 2002. However, the Agency's ability to promote new policy initiatives when implementing these regulations is limited, due to the need to adhere to legislative intent. Therefore, due to their economic magnitude, they are noted here to acknowledge their significance in the overall USDA regulatory plan but are not further listed in the body of the plan that appears below.

A primary mission of FSA is to administer commodity payment and commodity marketing assistance loan programs. Generally, these programs are authorized by the 1996 Act with respect to the 1996 through 2002 crop years. Accordingly, FSA envisions no major changes in the last year of the regulations used to administer these programs but anticipates major initiatives once legislation is enacted which would authorize such programs for the 2003 and subsequent crops.

FSA is committed to the Paperwork Reduction Act of 1995's goal of reducing the information collection burden on the public. FSA is streamlining its farm loan-making and servicing regulations and reducing the information collection burden associated with the programs. FSA plans to reduce the number of CFR parts containing its farm loan program regulations by approximately 70 percent. In addition, FSA hopes to achieve a significant reduction in the total number of CFR pages by removing administrative provisions and internal policy and eliminating duplicative material. Furthermore, FSA intends to improve the clarity of the farm loan program regulations by following the guidelines established in the Plain Language in Government Writing Initiative.

As part of this project, all farm program regulations and internal Agency directives will be completely rewritten. All application processes and information collections will be reviewed, and unnecessary or redundant requirements will be eliminated. All forms associated with the programs were reviewed and assigned to one of the following categories:

- Prepared by the public;
- Prepared by the Agency, reviewed by the public; or
- Internal agency use only.

FSA will concentrate on streamlining forms assigned to the first category to reduce public burden. In addition, a data base was developed listing each field contained on the forms. This information will be used to identify duplicate collections and ensure consistency in terminology.

FSA has completed the streamlining of the Guaranteed Loan Program, Indian Tribal Land Acquisition Loan Program, and portions of the direct loan program. The balance of the direct loan program will be published in three separate rulemaking packages. A final rule streamlining the loan-making process for emergency loans should be published by the end of the 2001 calendar year. A proposed rule streamlining the loan-making process for farm ownership and operating loans and servicing of direct loans will be published in the spring of 2002. A proposed rule streamlining special loan programs, including boll weevil eradication, drainage and irrigation, and grazing associations is planned for the fall of 2002.

Finally, FSA is a full participant in the USDA Electronic Access Initiative and is taking the lead on the implementation of the Government Paperwork Elimination Act. All FSA information collections, forms, and procedures are reviewed for their applicability to electronic submission and collection.

Food and Nutrition Service

Mission: FNS increases food security and reduces hunger in partnership with cooperating organizations by providing children and low-income people access to food, a healthful diet, and nutrition education in a manner that supports American agriculture and inspires public confidence.

Priorities: In addition to responding to provisions of legislation authorizing and modifying Federal nutrition assistance programs, FNS' 2002 regulatory plan supports the broad goals and objectives in the Agency's strategic plan, which include:

- *Improved nutrition of children and low-income people*. This goal represents FNS' efforts to improve nutrition by providing access to program benefits (Food Stamps, WIC food vouchers, commodities, and State administrative funds), nutrition education, and quality meals and other benefits. It includes three major objectives: 1) improved food security, which reflects nutrition assistance benefits issued to program participants; 2) improved ability of FNS program participants to make healthy food choices, which represents our efforts to improve nutrition knowledge and behavior through nutrition education and breastfeeding promotion; and 3) improved nutritional quality of meals, food packages, commodities, and other program benefits, which represents our efforts to ensure that program benefits meet the appropriate nutrition standards to effectively improve nutrition for program participants.

In support of this goal, FNS plans to propose a rule mandated under Public Law 106-387 to increase food stamp benefits for household with high shelter costs and to make it easier for low-income working families to receive food stamps and own a reliable vehicle. The Agency also plans a proposed rule to amend regulations governing food packages provided in WIC to improve their variety and consistency with the *Dietary Guidelines for Americans* and to increase the nutritional adequacy of food packages for those with special medical needs.

- *Improved Stewardship of Federal Funds*. This goal represents FNS' ongoing commitment to maximize the accuracy of benefits issued, maximize the efficiency and effectiveness of program operations, and minimize participant and vendor fraud. It includes two major objectives: 1) improved benefit accuracy and reduced fraud, which represents the Agency's effort to reduce participant and Agency errors and to control Food Stamp and WIC trafficking and participant, vendor, and administrative Agency fraud, and 2) improved efficiency of program administration, which represents our efforts to streamline program

operations and improve program structures as necessary to maximize their effectiveness.

In support of this goal, FNS plans to publish a final rule making changes in Child and Adult Care Food Program (CACFP) rules designed to improve management and financial integrity in this important program. FNS also plans to publish a final rule, mandated under the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 and the Balanced Budget Act of 1997, which is designed to provide State agencies that administer the Food Stamp Program greater flexibility to support personal responsibility and independence and encourage work.

Food Safety and Inspection Service

Mission: The Food Safety and Inspection Service (FSIS) is responsible for ensuring that meat, poultry, and egg products in commerce are safe and not adulterated or misbranded.

Priorities: Since the mid-1990's, FSIS has been reviewing its regulations to eliminate duplication of and inconsistency with its own and other agencies' regulations and to convert "command-and-control" regulations to performance standards. The review effort is directed, in particular, at improving the consistency of the regulations with the Agency's pathogen reduction and hazard analysis and critical control point (PR/HACCP) regulations. HACCP is a science-based process control system for producing safe food products. FSIS-inspected meat and poultry establishments are required to develop and implement HACCP plans incorporating the controls the establishments have determined are necessary and appropriate to produce safe products. Under the HACCP regulations, establishments assume the responsibility for producing meat and poultry products that are safe, but they are able to tailor their control systems to their particular needs and processes and to take advantage of the latest technological innovations.

FSIS is continuing to revise its numerous command-and-control regulations, which prescribe the exact means establishments must use to ensure the safety of their products. Some of these regulations specify precise time-and-temperature combinations for processing meat, poultry, or egg products. Others require the prior approval by FSIS of equipment and procedures, in effect assigning to the Agency the responsibility for determining the means used by establishments to comply with the regulations. As a general matter, such command-and-control regulations are incompatible with HACCP because they deprive plants of the flexibility to innovate, and they undercut the clear delineation of responsibility for food safety.

In addition to undertaking regulatory amendments based on the results of its review activities, FSIS has been developing regulations for emergency use. Such regulations are an outcome of the Agency's proactive, risk-based policy toward emerging and exotic threats to the safety of the Nation's meat, poultry, and egg product supply.

Following are some of the Agency's recent and planned initiatives to convert command-and-control regulations to performance standards, to streamline and simplify the regulations, and to make the meat, poultry products, and egg products inspection regulations more consistent with the pathogen reduction and HACCP systems final rule:

FSIS has proposed a rule clarifying requirements for meat produced using advanced recovery systems by replacing the compliance program parameters in the current regulations with non-compliance criteria for bone solids, bone marrow, and neural tissue. Establishments would have to have process control procedures in place before labeling or using the product derived by use of such systems.

FSIS has proposed a rule to establish food safety performance standards for all processed ready-to-eat meat and poultry products and partially heat-treated meat and poultry products that are not ready-to-eat.

FSIS plans to propose generic Eshcerichia coli process control criteria based on the sponge method of sampling, for cattle, wine, and geese slaughtering establishments and for turkey slaughtering establishments based on both the sponge and the whole-bird rinse sampling methods. The Agency also plans to propose updated Salmonella performance standards for all market classes of cattle and swine.

FSIS will propose removing from the poultry products inspection regulations the requirement for ready-to-cook poultry products to be chilled to 40 degrees or below within certain time periods according to the weight of the dressed carcasses.

In addition, FSIS will be proposing to require federally inspected egg product establishments to develop and implement HACCP systems and sanitation standard operating procedures. The Agency will be proposing pathogen reduction performance standards for pasteurized egg products. Further, the Agency will be proposing to remove requirements for approval by FSIS of egg-product plant drawings, specifications, and equipment prior to use and to end the system for pre-marketing approval of labels for egg products.

Besides the foregoing initiatives, FSIS has proposed requirements for the nutrition labeling of ground or chopped meat and poultry products and single-ingredient products. This proposed rule would require nutrition labeling, on the label or at the point-of-purchase, for themajor cuts of single-ingredient, rawproducts and will require nutrition information on the label of ground or chopped products.

Finally, FSIS is planning to propose stand-by emergency procedures for dealing with any occurrences of bovine spongiform encephalopathy (BSE), known as mad-cow disease, to prevent any meat or meat products of animals affected by BSE from entering commerce. To date, no cases of BSE have been found in the United States herd. Any final rule that may be developed after the proposal would become effective when and if a native case of BSE is detected in the United States.

Animal and Plant Health Inspection Service

Mission: The major part of the mission of the Animal and Plant Health Inspection Service (APHIS) is to protect U.S. animal and plant resources from destructive pests and diseases. APHIS conducts programs to prevent the introduction of exotic pests and diseases into the United States and monitors and manages pests and diseases existing in this country. These activities enhance agricultural productivity and competitiveness and contribute to the national economy and the public health.

Priorities: APHIS is reviewing its existing regulations and developing new regulatory initiatives to ensure that a comprehensive framework is in place to address the threats posed by exotic and endemic animal diseases. Prompted in part by recent outbreaks of foot-and-mouth disease elsewhere in the world, APHIS is developing a proposed rule to amend its regulations for the cooperative control and eradication of animal diseases to ensure their adequacy with regard to the valuation of animals and materials, as well as the payment of indemnity, should an

outbreak of foot-and-mouth disease occur in the United States. APHIS has also published, or is developing, proposed and final rules pertaining to the group of neurological diseases known as transmissible spongiform encephalopathies, which includes scrapie (a disease of sheep and goats), bovine spongiform encephalopathy (BSE, which affects cattle), and chronic wasting disease (a disease of deer and elk). APHIS has recently established an expanded regulatory program incorporating interstate movement restrictions and compensation for scrapie, strengthened its restrictions on the importation of ruminant-derived animal products that present a risk of introducing BSE, and is in the early stages of developing a cooperative eradication program for chronic wasting disease. In addition, APHIS, in coordination with the Department's Food Safety and Inspection Service, has begun developing an advance notice of proposed rulemaking to solicit public comment on BSE-related issues, including mandatory testing of down/dead/dying animals and requirements for the disposal of the carcasses of such animals.

APHIS documents published in the Federal Register and related information, including the names of organizations and individuals who have commented on APHIS dockets, are available on the Internet at http://www.aphis.usda.gov /ppd/rad/webrepor.html.

Agricultural Marketing Service

Mission: The Agricultural Marketing Service (AMS) facilitates the marketing of agricultural products in domestic and international markets, while ensuring fair trading practices and promoting a competitive and efficient marketplace to the benefit of producers, traders, and consumers of U.S. food and fiber products.

Priorities: (1) AMS is proposing to develop a Lamb Promotion, Research, and Information Order (Order). The proposed Order, if implemented, would establish an industry-funded program that would be subject to a referendum within 3 years after assessments begin under the Order. The proposed Order provides for an assessment of one-half per pound of live lambs sold to be paid by producers, seedstock producers, feeders, and exporters and remitted to a 12-member industry board by the first handler or exporter. The program would generate an estimated $3 million annually, all from the domestic lamb industry. Importers of lamb would not be assessed.

(2) AMS plans to amend the National Organic Program (NOP) to add practice standards for Organic Certification of Wild Captured Aquatic Animals. The Organic Foods Production Act states that an organic certification program be established for producers and handlers of agricultural products that have been produced using organic methods. The NOP has been reviewing organic certification of fish including wild captured and aquaculture operations in response to a FY 2000 congressional mandate to develop regulations for the certification of seafood. The NOP has engaged in public meetings and workshops and conducted public comment proceedings on this subject. The NOP considers it advantageous to proceed with a proposed rule for wild capture operations prior to issuing a proposed rule for aquaculture systems because of the significant impact that wild capture standards will have on the production and use of fish meal confined systems.

(3) AMS published in the Federal Register on July 13, 2001, a proposed rule implementing the Hass Avocado Promotion, Research, and Information Order (Order) and a proposed rule containing referendum procedures for the program. Under the proposed Order, producers and importers would pay an assessment to the proposed Hass Avocado Board (Board). The Board would use the assessment collected to conduct a promotion, research, and information program to maintain, develop, and expand markets for Hass avocados in the United States. The comment period ended August 27, 2001. On August 28, 2001, AMS published a notice extending the comment period until September 12, 2001, due to several requests that were received. AMS plans to publish a final rule before the end of this calendar year.

AMS Program Rulemaking Pages. Most of AMS' rules as published in the Federal Register are available on the Internet at: http://www.ams.usda.gov/rulemaking. This site also includes commenting instructions and addresses, links to news releases and background material, and comments received so far on various rules.

USDA—Agricultural Marketing Service (AMS)

PROPOSED RULE STAGE

1. • ESTABLISHING A LAMB PROMOTION, RESEARCH, AND INFORMATION ORDER (LS-01-12)

Priority:

Other Significant

Legal Authority:

7 USC 7401 through 7425

CFR Citation:

7 CFR 1280

Legal Deadline:

None

Abstract:

The Agricultural Marketing Service (AMS) is planning to issue a proposed rule establishing an industry-funded promotion, research, and information program for lamb and lamb products including pelts but excluding wool and wool products. In response to an invitation published in the Federal Register to submit proposals for a Lamb Promotion, Research, and Information (Order), AMS received a proposal from the lamb industry.

Statement of Need:

The United States sheep industry has identified this program as a key to its future viability. Due to the negative impact on producer prices caused by high levels of imports, the sheep industry has sought Government assistance and is seeking to fund this self-help program to improve industry profitability. A $100 million trade adjustment assistance package has been provided based on a Presidential Proclamation. The proposed Lamb Promotion, Research, and Information Program would be a self-help program funded through assessments on sales of live lambs. The assessments would be paid by producers, feeders, and lamb slaughters.

Summary of Legal Basis:

Section 512(b) of the Commodity Promotion, Research, and Information Act (Act) of 1996 indicates that the purpose of the Act is to authorize the Secretary to establish programs of promotion, research, and information for agricultural commodities to strengthen their position in domestic and foreign markets. Section 514 of the Act provides that to carry out the

purpose of the Act, the Secretary may issue orders applicable to producers of an agricultural commodity and others in the marketing chain.

Alternatives:

Not issue a proposed Order.

Anticipated Cost and Benefits:

The proposed program would generate approximately $3 million annually for promotion, research, and information activities designed to benefit the sheep and lamb industry. These funds would be generated from assessments on sales of lamb paid by producers, feeders, and lamb slaughters. The Department of Agriculture costs associated with the implementation and oversight of the program would be reimbursed from the assessments collected under the program. The activities funded under the program would likely increase the demand for lamb and lamb products and have a positive impact on producer profitability.

Risks:

None.

USDA—AMS

FINAL RULE STAGE

2. HASS AVOCADO PROMOTION, RESEARCH, AND INFORMATION ORDER (FV-01-705)

Priority:

Other Significant

Legal Authority:

7 USC 7801 to 7813

CFR Citation:

7 CFR 1219

Legal Deadline:

None

Abstract:

Under the Hass Avocado Promotion, Research, and Information Order, Hass avocado producers and importers will pay an assessment of 2.5 cents per pound on Hass avocados produced and imported into the U.S. The funds will be used by the Hass Avocado Board to increase demand for Hass avocados in the U.S.

Statement of Need:

The Agricultural Marketing Service (AMS) is proposing an industry-funded research, promotion, industry information, and consumer information program for Hass avocado. A proposed program—the Hass Avocado Research, Promotion, and Consumer Information Order (Order)—was submitted to AMS by the California Avocado Commission. In addition, Mexican, Chilean, and New Zealand producers and associations submitted partial proposals. Under the proposed order, producers and importers would pay an initial assessment of 2.5 cents per pound of Hass domestic and imported avocados to the Hass Avocado Board (Board). The Board would be appointed by the Secretary of Agriculture to conduct research, promotion, industry information, and consumer information needed for the maintenance, expansion, and development of domestic markets for Hass avocados. The purpose of the program is to increase consumption of Hass avocados in the United States.

Summary of Legal Basis:

The proposed Order is issued under the Hass Avocado Research, Promotion, and Consumer Information Act (Pub.L. 104-127), enacted on October 23, 2000.

Alternatives:

Not issue a proposed Order.

Anticipated Cost and Benefits:

The proposed Order would authorize assessments on producers (to be collected by first handlers) and on importers (collected by Customs) of Hass avocados at an initial rate of 2.5 cents a pound. Exports of domestic Hass avocados are exempt from assessment. At the initial rate of assessment, about $10 million will be collected to administer the program—about 65 percent from domestic production and 35 percent from imports. All costs of program administration, including conducting the program, AMS oversight, and collection of assessments by Customs will be covered by the collected assessments.

Risks:

None.

PROPOSED RULE STAGE

3. • FOOT-AND-MOUTH DISEASE; PAYMENT OF INDEMNITY

Priority:

Other Significant

Legal Authority:

21 USC 111; 21 USC 114 to 114a; 21 USC 134a to 134h

CFR Citation:

9 CFR 53

Legal Deadline:

None

Abstract:

APHIS is proposing to amend its regulations for the cooperative control

and eradication of livestock or poultry diseases. These changes would provide APHIS with much needed flexibility in responding in an effective manner in the event of an outbreak of foot-and-mouth disease so that eligible claimants may be compensated while at the same time protecting the U.S. livestock and poultry population from the further spread of this highly contagious disease.

Statement of Need:

APHIS has recently reviewed these regulations to determine their sufficiency should an occurrence of foot-and-mouth disease occur in the United States. This review has been prompted, in part, by the series of outbreaks of foot-and-mouth disease that have taken place in the United Kingdom and elsewhere around the world. Based on this review, APHIS has determined that changes to the regulations are needed with regard to the valuation of animals and materials, as well as the payment of an indemnity to those persons who suffer loss of property as a result of foot-and-mouth disease.

Summary of Legal Basis:

The Secretary of Agriculture, either independently or in cooperation with States or political subdivisions, farmers' associations and similar organizations, and individuals, is authorized to control and eradicate any communicable diseases of livestock or poultry and contagious or infectious diseases of animals that, in the opinion of the Secretary, constitute an emergency and threaten the livestock industry of the country, including the payment of claims growing out of destruction of animals (including poultry), and of materials affected by or exposed to any such disease, in accordance with such regulations as the Secretary may prescribe (21 U.S.C. 114a).

Alternatives:

The proposed rule would comprise several regulatory changes, each of which is intended to facilitate the control and eradication of foot-and-mouth disease, should an outbreak of this disease occur in the United States. Reasonable alternatives to the proposed rule would be to (1) not make any changes at all or (2) to provide alternative levels of compensation.

Anticipated Cost and Benefits:

The proposed rule is expected to affect livestock operations and Federal and State government agencies. The vast majority of livestock operations are small entities. The potential costs and benefits would depend upon the degree of compensation provided should a compensation alternative be chosen.

Risks:

The changes contained in the proposed rule would be particularly important in facilitating early and effective intervention should an outbreak of foot-and-mouth disease occur in the United States. An effective response in the early stages of such an outbreak greatly reduces the risk of the disease's wider dissemination.

4. • CHRONIC WASTING DISEASE IN ELK; INTERSTATE MOVEMENT RESTRICTIONS AND PAYMENT OF INDEMNITY

Priority:

Other Significant

Legal Authority:

21 USC 111 to 114a-1; 21 USC 120 to 121; 21 USC 125; 21 USC 134b

CFR Citation:

9 CFR 55; 9 CFR 81

Legal Deadline:

None

Abstract:

APHIS is proposing to establish minimum requirements for the interstate movement of farmed elk and to provide indemnity for the depopulation of farmed elk that have been infected with, or exposed to, chronic wasting disease (CWD).

Statement of Need:

CWD has been confirmed in free-ranging deer and elk in a limited number of counties in northeastern Colorado and southeastern Wyoming and has also been diagnosed in farmed elk herds in South Dakota, Nebraska, Oklahoma, Montana, and Colorado. The proposed rule is intended to prevent the spread of, and perhaps eliminate altogether, CWD in farmed elk herds in the United States. APHIS believes that establishing restrictions on the interstate movement of infected and exposed farmed elk, coupled with the payment of some level of indemnity for infected and exposed animals, will encourage elk producers who are not yet engaging in surveillance activities to begin doing so. To date, the level of support from States and the farmed elk industry for such a program has been high. Without a Federal program in place to depopulate infected and exposed animals, the movement of infected elk into new herds and States with no known infection will continue or may even accelerate. APHIS needs to take action to document the prevalence of the disease and to prevent its further spread.

Summary of Legal Basis:

The Secretary of Agriculture, either independently or in cooperation with States or political subdivisions, farmers' associations and similar organizations, and individuals, is authorized to control and eradicate any communicable diseases of livestock or poultry and contagious or infectious diseases of animals that, in the opinion of the Secretary, constitute an emergency and threaten the livestock industry of the country, including the payment of claims growing out of destruction of animals (including poultry), and of materials affected by or exposed to any such disease, in

accordance with such regulations as the Secretary may prescribe (21 U.S.C. 114a).

Alternatives:

APHIS has identified two alternatives to the proposed rule. The first—to maintain the status quo—was rejected because it would not address the animal disease risks associated with CWD. The second option would have been to provide financial and technical assistance to the elk industry for continuation and expansion of a variety of herd management practices to reduce or eliminate CWD. Although this option may be less costly than the option chosen by APHIS (i.e., the proposed rule), this option was not selected because it would not advance CWD eradication as quickly or effectively as the chosen option. However, APHIS will continue to work with industry to develop voluntary herd management practices to preserve and increase the reduction in CWD levels that the proposed program is expected to achieve.

Anticipated Cost and Benefits:

The presence of CWD in elk causes significant economic and market losses to U.S. producers. Recently Canada has begun to require, as a condition for importing U.S. elk into Canada, that the animals be accompanied by a certificate stating that the herd of origin is not located in Colorado or Wyoming, and CWD has never been diagnosed in the herd of origin. The Republic of Korea recently suspended the importation of deer and elk and their products from the United States and Canada. The domestic prices for elk are severely affected by fear of CWD; it is extremely difficult for producers to sell elk that are associated with any hint of exposure to CWD.

Risks:

Aggressive action in controlling this disease now will decrease the chance of having to deal with a much larger, widespread, and costly problem later, such as the situation with bovine spongiform encephalopathy ("mad cow disease") in Europe. Although there is currently no evidence that CWD is linked to disease in humans, or in domestic animals other than deer and elk, a theoretical risk of such a link exists.

USDA—Food and Nutrition Service (FNS)

PROPOSED RULE STAGE

5. SPECIAL SUPPLEMENTAL NUTRITION PROGRAM FOR WOMEN, INFANTS, AND CHILDREN (WIC): REVISIONS IN THE WIC FOOD PACKAGES

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 1786

CFR Citation:

7 CFR 246

Legal Deadline:

None

Abstract:

This proposed rule will amend regulations governing the WIC food packages to disallow low-iron WIC formulas in food packages for infants; revise the maximum monthly allowances and minimum requirements for certain WIC foods; revise the substitution rates for certain WIC foods and allow additional foods as alternatives; make technical adjustments in all of the food packages to accommodate newer packaging and physical forms of the WIC foods; add vegetables as a food category in Food Packages III-VII for women and children; require that State agencies make available the full maximum foods allowed in each package; revise the criteria for developing State agency proposals for alternative food packages to accommodate participant food preferences more effectively; revise the purpose, content, and requirements for Food Package III; and address general provisions that apply to all the food packages. These revisions will improve the likelihood that WIC recipients achieve the food servings recommendations of the Dietary Guidelines for Americans and nutritional recommendations, providing WIC participants with a wider variety of foods, accommodating newer packaging and physical forms of WIC foods, and providing WIC State agencies with greater flexibility in prescribing food packages, especially to accommodate participants with hardships or cultural/food preferences. (99-006)

Statement of Need:

While WIC has been successful in many areas, obesity and inappropriate dietary patterns have become equal, if not greater, problems for many in WIC's target population. WIC food packages and nutrition education are the chief means by which WIC affects the dietary quality and habits of participants. Results of a recent WIC study found that the supplemental food package is consistently ranked by pregnant and postpartum women as the leading positive attribute of the program. Therefore, revised food packages, which will foster greater consistency with the Dietary Guidelines for Americans, are an appropriate response to further increase the positive effects of the program among the WIC eligible population.

The overarching objective of this rule is to improve disease prevention and nutritional status by improving dietary quality and nutritional adequacy of the WIC food packages by:

1. Improving the manner in which the nutrients lacking in the target population's diet are provided by revising food packages to reflect more closely the Dietary Guidelines for Americans as represented by the diet recommendations of the Food Guide Pyramid; and

2. Increasing the nutritional adequacy of the WIC food packages for medically needy participants.

Summary of Legal Basis:

The WIC Program was established to provide nutritious supplemental foods, nutrition education, and referrals to related health and social services to low-income pregnant, breastfeeding, and non-breastfeeding postpartum women, infants, and children up to age 5. Section 17 of the Child Nutrition Act of 1966 (as amended, 42 U.S.C. 1786) clearly established the WIC Program as a supplemental nutrition program designed to provide nutrients determined by nutritional research to be lacking in the diets of the WIC target population. WIC law requires that, to the extent possible, the fat, sugar, and salt content of WIC foods be appropriate. The law gives substantial latitude to the Department in designing WIC food offerings but obligates the Department to prescribe foods that effectively and economically supply the target nutrients.

Alternatives:

None.

Anticipated Cost and Benefits:

None.

Risks:

This rule is intended to improve the nutritional status and dietary patterns of the WIC target population, as a response to the threat of increasing risk factors for nutrition-related diseases—obesity, diabetes, coronary heart disease, stroke, and cancer, to name a few—in the WIC eligible population.

6. • FOOD STAMP PROGRAM: VEHICLE AND MAXIMUM EXCESS SHELTER EXPENSE DEDUCTION PROVISIONS OF PUBLIC LAW 106-387

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

PL 106-387

CFR Citation:

7 CFR 272.1; 7 CFR 273.8; 7 CFR 273.9

Legal Deadline:

None

Abstract:

This proposed rule will (1) implement a revision of the Food Stamp Program's resource eligibility standards regarding vehicle ownership and (2) set the maximum excess shelter expense deduction for fiscal year 2001 and, for future years, index it to the Consumer Price Index. (01-006)

Statement of Need:

This rule is necessary to implement revisions to the Food Stamp Program's resource eligibility standards regarding vehicle ownership and maximum excess shelter expense deduction.

Summary of Legal Basis:

All provisions of this proposed rule are mandated by Public Law 106-387.

Alternatives:

The alternative would be not to revise current rules, which have been superseded by changes brought about by Public Law 106-387.

Anticipated Cost and Benefits:

Low-income households will benefit by claiming larger income deductions for shelter expenses, thereby obtaining higher food stamp benefits. The new vehicle ownership provisions will make more low-income households eligible for food stamps and make it easier for them to own a reliable vehicle. States will benefit by having more flexibility and simpler administrative options for determining the effect of vehicle ownership upon food stamp eligibility.

Risks:

Not implementing this proposed rule would ignore the mandates contained in Public Law 106-387.

USDA—FNS

FINAL RULE STAGE

7. CHILD AND ADULT CARE FOOD PROGRAM: IMPROVING MANAGEMENT AND PROGRAM INTEGRITY

Priority:

Other Significant

Legal Authority:

42 USC 1766; PL 103-448; PL 104-193; PL 105-336

CFR Citation:

7 CFR 226

Legal Deadline:

None

Abstract:

This rule amends the Child and Adult Care Food Program (CACFP) regulations. The changes in this rule result from the findings of State and Federal program reviews and from audits and investigations conducted by the Office of Inspector General. This rule will revise: State agency criteria for approving and renewing institution applications; program training and other operating requirements for child care institutions and facilities; State- and institution-level monitoring requirements; and criteria for terminating agreements with institutions and day care homes. This rule also includes changes that are required by the Healthy Meals for Healthy Americans Act of 1994 (Pub. L. 103-448), the Personal Responsibility and Work Opportunities Reconciliation Act of 1996 (Pub. L. 104-193), the William F. Goodling Child Nutrition Reauthorization Act of 1998 (Pub. L. 105-336), the Agricultural Risk Protection Act of 2000 (Pub. L. 106-224), and the Grain Standards and Warehouse Improvement Act of 2000 (Pub. L. 106-472).

The changes are designed to improve program operations and monitoring at the State and institution levels and, where possible, to streamline and simplify program requirements for State agencies and institutions. (95-024)

Statement of Need:

In recent years, State and Federal program reviews have found numerous cases of mismanagement, abuse, and in some instances, fraud by child care institutions and facilities in the CACFP. These reviews revealed weaknesses in management controls over program operations and examples of regulatory noncompliance by institutions, including failure to pay facilities or failure to pay them in a timely manner; improper use of program funds for non-program expenditures; and improper meal reimbursements due to incorrect meal counts or to mis-categorized or incomplete income eligibility statements. In addition, audits and investigations conducted by the Office of Inspector General (OIG) have raised serious concerns regarding the adequacy of financial and administrative controls in CACFP. Based on its findings, OIG recommended changes to CACFP review requirements and management controls.

Summary of Legal Basis:

Some of the changes proposed in the rule are discretionary changes being made in response to deficiencies found in program reviews and OIG audits. Other changes codify statutory changes made by the Healthy Meals for Healthy Americans Act of 1994 (Pub. L. 103-448), the Personal Responsibility and Work Opportunities Reconciliation Act of 1996 (Pub. L. 104-193), the William F. Goodling Child Nutrition Reauthorization Act of 1998 (Pub. L. 105-336), the Agricultural Risk Protection Act of 2000 (Pub. L. 106-224), and the Grain Standards and Warehouse Improvement Act of 2000 (Pub. L. 106-472).

Alternatives:

In developing the proposal, the Agency considered various alternatives to minimize burden on State agencies and institutions while ensuring effective program operation. Key areas in which alternatives were considered include State agency reviews of institutions and sponsoring organization oversight of day care homes.

Anticipated Cost and Benefits:

This rule contains changes designed to improve management and financial integrity in the CACFP. When implemented, these changes would affect all entities in CACFP, from USDA to participating children and children's households. These changes will primarily affect the procedures used by State agencies in reviewing applications submitted by, and monitoring the performance of, institutions which are participating or wish to participate in the CACFP. Those changes which would affect institutions and facilities will not, in the aggregate, have a significant economic impact.

Data on CACFP integrity is limited, despite numerous OIG reports on individual institutions and facilities that have been deficient in CACFP management. While program reviews and OIG reports clearly illustrate that there are weaknesses in parts of the program regulations and that there have been weaknesses in oversight, neither program reviews, OIG reports, nor any other data sources illustrate the prevalence and magnitude of CACFP fraud and abuse. This lack of information precludes USDA from estimating the amount of money lost due to fraud and abuse or the reduction in fraud and abuse the changes in this rule will realize.

Risks:

Continuing to operate the CACFP under existing provisions of the regulations that do not sufficiently protect against fraud and abuse in CACFP puts the program at significant risk. This rule includes changes designed to strengthen current program regulations to reduce the risk associated with the program.

USDA—Food Safety and Inspection Service (FSIS)

PRERULE STAGE

9. POULTRY INSPECTION: REVISION OF FINISHED PRODUCT STANDARDS WITH RESPECT TO INGESTA

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

21 USC 451 to 470 et seq

CFR Citation:

9 CFR 381

Legal Deadline:

None

Abstract:

FSIS is seeking to clarify its Poultry Inspection regulations regarding visible ingesta on poultry carcasses and parts. A preliminary regulatory impact analysis conducted by FSIS determined that costs to achieve a zero tolerance for ingesta far outweighed benefits. This action was precipitated by a civil suit filed against USDA.

Statement of Need:

FSIS is seeking to clarify the regulations respecting visible ingesta on poultry carcasses and parts. In 1997, FSIS issued a final rule removing the process tolerance level for fecal contamination on poultry carcasses, in effect, adopting a zero process tolerance for poultry fecal matter. During the comment period on the final rule, several commenters supported a zero tolerance for ingesta. As a result, FSIS solicited comments and information on ingesta to determine whether there was a need for additional regulatory measures regarding ingesta. No comments were received. Lacking any information to suggest the current tolerance standards were inadequate, FSIS let stand the current process tolerance for ingesta contamination. However, partly in view of a civil suit, now dismissed, that alleged disparate regulation of the meat and poultry industries by FSIS and challenged the existing process tolerance for ingesta contamination of poultry carcasses, FSIS is issuing an ANPRM to determine how it should proceed on this issue.

Summary of Legal Basis:

This action is authorized under the Poultry Products Inspection Act (21 U.S.C. 451-470).

Alternatives:

No action.

Anticipated Cost and Benefits:

FSIS is seeking information and data from the public about the costs of establishing any of several alternative tolerance levels for ingesta and the effects on operations of large and small poultry establishments. In addition, we are soliciting comments on the availability of new technology that would reduce the levels of contamination of birds. FSIS is interested in having information on new research that identifies microbial hazards and determines whether or not their presence results in pathogen contamination of the poultry.

Risks:

None.

USDA—FSIS

PROPOSED RULE STAGE

10. PERFORMANCE STANDARDS FOR BACON

Priority:

Other Significant

Legal Authority:

21 USC 601 et seq; 21 USC 451 et seq

CFR Citation:

9 CFR 424.22(b)

Legal Deadline:

None

Abstract:

FSIS is proposing to revise the regulatory provisions concerning the production and testing of bacon (9 CFR 424.22(b)). FSIS is proposing to remove provisions that require the Agency to test bacon for nitrosamines and to remove provisions that prescribe the substances and amounts of such substances that must be used to produce bacon. FSIS is proposing to replace these provisions with performance standards that establishments producing bacon must meet. To meet these proposed performance standards, the process used would be required to limit the presence of nitrosamines when the product is cooked. Under the hazard analysis and critical control points (HACCP) system, establishments would incorporate the proposed performance standards into their HACCP plans.

Statement of Need:

FSIS is proposing to replace restrictive provisions concerning the processing of bacon with a performance standard. The proposed performance standard concerns limiting the presence of volatile nitrosamines in bacon products. The Agency is also proposing to remove provisions that require the Agency to sample and test bacon for the presence of nitrosamines. These proposed changes are necessary to make the bacon regulations consistent with those governing Hazard Analysis and Critical Control Point (HACCP) systems.

Summary of Legal Basis:

Under the Federal Meat Inspection Act (21 U.S.C. 601-695) a meat or meat food product is adulterated "if it bears or contains any poisonous or deleterious substance which may render it injurious to health; but in case the substance is not an added substance, such article shall not be considered adulterated under this clause if the quantity of such substance in or on such article does not ordinarily render it injurious to health" (21 U.S.C. 601(m)(1)). Volatile nitrosamines are deleterious because carcinogenic and, though not added directly to bacon, they may be produced when the bacon is fried. Processors can control the levels of nitrosamines that may be present when the product is fried by controlling the levels of nitrite and nitrosamine inhibitors that are used in the bacon curing process. In 1978, USDA stated that nitrosamines present at confirmable levels in bacon after preparation for eating were deemed to be adulterative. FSIS still maintains that bacon with confirmable levels of nitrosamines after preparation for eating is adulterated. In this proposed rule, processors would control the levels of nitrosamines by complying with a performance standard.

Alternatives:

No action; performance standards for all types of bacon (not just pumped bacon, as proposed); removal of the FSIS testing provisions without converting prescriptive regulations to performance standard.

Anticipated Cost and Benefits:

Because FSIS is proposing to convert existing regulations to a performance standard and is not proposing any new requirements for establishments producing bacon, FSIS does not anticipate that this proposed rule would result in any significant costs or benefits. Bacon-processing establishments whose HACCP plans do not address nitrosamines as hazards reasonably likely to occur may incur some costs. Also, establishments that choose to test their products for nitrosamines may incur some costs. Because this rule provides establishments the flexibility to develop new procedures for producing bacon, this rule may result in profits to processors who develop cheaper means of producing product or who develop a product with wide consumer appeal.

Risks:

None.

11. EGG AND EGG PRODUCTS INSPECTION REGULATIONS

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

21 USC 1031 to 1056

CFR Citation:

9 CFR 590.570; 9 CFR 590.575; 9 CFR 590.146; 9 CFR 590.10; 9 CFR 590.411; 9 CFR 590.502; 9 CFR 590.504; 9 CFR 590.580; 9 CFR 591; ...

Legal Deadline:

None

Abstract:

The Food Safety and Inspection Service (FSIS) is proposing to require shell egg packers and egg products plants to develop and implement Hazard Analysis and Critical Control Points (HACCP) systems and Sanitation Standard Operating Procedures (SOPs). FSIS also is proposing pathogen reduction performance standards that would be applicable to pasteurized shell eggs and egg products. Plants would be expected to develop HACCP systems that ensure products meet the pathogen reduction performance standards. Finally, FSIS is proposing to amend the Federal egg and egg products inspection regulations by removing current requirements for prior approval by FSIS of egg products plant drawings, specifications, and equipment prior to their use in official plants. The Agency also plans to eliminate the prior label approval system for egg products.

The actions being proposed are part of FSIS's regulatory reform effort to improve FSIS's egg and egg products food safety regulations, better define the roles of Government and the regulated industry, encourage innovations that will improve food safety, remove unnecessary regulatory burdens on inspected egg products plants, and make the egg and egg products regulations as consistent as possible with the Agency's meat and poultry products regulations. FSIS is also taking these actions in light of changing inspection priorities and recent findings of salmonella in pasteurized egg products.

Statement of Need:

FSIS is proposing to require egg products plants to develop and implement HACCP systems and Sanitation Standard Operating Procedures (SSOPs). FSIS also is proposing a pathogen reduction performance standard that would be applicable to pasteurized egg products. Plants would be expected to develop HACCP systems that ensure egg products meet the lethality required by the pathogen reduction performance standard. In addition, FSIS is proposing to amend the Federal shell egg and egg products inspection regulations by removing current requirements for approval by FSIS of egg product plant drawings, specifications, and equipment prior to their use in official (FSIS-inspected) plants. Finally, the Agency plans to eliminate the pre-marketing label approval system for egg products but to require safe-handling labels on shell eggs and egg products.

The actions being proposed are part of FSIS's regulatory reform effort to improve FSIS's shell egg and egg products food safety regulations, better define the roles of Government and the regulated industry, encourage innovations that will improve food safety, remove unnecessary regulatory burdens on inspected egg products plants, and make the shell egg and egg products regulations as consistent as possible with the Agency's meat and poultry products regulations. FSIS also is taking these actions in light of changing inspection priorities and recent findings of Salmonella in pasteurized egg products.

This proposal is directly related to FSIS's PR/HACCP initiative.

Summary of Legal Basis:

This proposed rule is authorized under the Egg Products Inspection Act (21 U.S.C. 1031-1056). It is not the result of any specific mandate by the Congress or a Federal court.

Alternatives:

A team of FSIS economists and food technologists is conducting a cost-benefit analysis to evaluate the potential economic impacts on the public, the egg products industry, and FSIS of several alternatives. These alternatives include: (1) taking no regulatory action; (2) requiring all inspected egg products plants to develop, adopt, and implement written Sanitation SOPs and HACCP plans; and (3) converting to a lethality-based pathogen reduction performance standard many of the current highly prescriptive egg products processing requirements. The team will consider the effects of a uniform, across-the-board standard for all egg products; a performance standard based on the relative risk of different classes of egg products; and a performance standard based on the relative risks to public health of different production processes.

Anticipated Cost and Benefits:

FSIS is analyzing the potential costs of this proposed rulemaking to industry, to FSIS and to other Federal agencies, to State and local governments, to small entities, and to foreign countries. The expected costs to industry will depend on a number of factors. These costs include the required lethality, or level of pathogen reduction, and the cost of HACCP plan and SSOP development, implementation, and associated employee training. The pathogen reduction costs will depend on the amount of reduction sought and in what classes of product, product formulations, or processes.

Relative enforcement costs to FSIS and FDA may change because the two agencies share responsibility for inspection and oversight of the egg industry and a common farm-to-table approach for shell egg and egg products food safety. Other Federal agencies and local governments are not likely to be affected.

FSIS has cooperative agreements with six States and the Commonwealth of Puerto Rico under which they provide inspection services to egg processing plants under Federal jurisdiction. FSIS reimburses the States for staffing costs and expenses for full-time State inspectors. HACCP implementation may result in a reduction of staffing resource requirements in the States and a corresponding reduction of the Federal reimbursement. As a result, some States may decide to stop providing inspection services and convert to Federal inspection of egg products plants.

Egg and egg product inspection systems of foreign countries wishing to export eggs and egg products to the U.S. must be equivalent to the U.S. system. FSIS will consult with these countries, as needed, if and when this proposal becomes effective.

This proposal is not likely to have a significant impact on small entities. The entities that would be directly affected by this proposal would be the approximately 75 federally inspected egg-processing establishments, most of which are small businesses, according to Small Business Administration criteria. If necessary, FSIS will develop compliance guides to assist these small firms in implementing the proposed requirements.

The impacts on the FSIS budget will be influenced by the alternatives proposed and industry responses. Most likely, fewer FSIS inspection personnel will be required over time as more uniform inspection practices are employed among the meat, poultry, and egg products industries.

Potential benefits associated with this rulemaking include: Improvements in human health due to pathogen reduction; improved utilization of FSIS inspection program resources; and cost savings resulting from the flexibility of egg products plants in achieving a lethality-based pathogen reduction performance standard. Once specific alternatives are identified, economic analysis will identify the quantitative and qualitative benefits associated with each.

Human health benefits from this rulemaking are likely to be small because of the low level of (chiefly post-processing) contamination of pasteurized egg products. In light of recent scientific studies that raise questions about the efficacy of current regulations, however, it is likely that measurable reductions will be achieved in the risk of foodborne illness.

Risks:

FSIS believes that this regulatory action may result in a further reduction in the risks associated with egg products. The development of a lethality-based pathogen reduction performance standard for egg products, replacing command-and-control regulations, will remove unnecessary regulatory obstacles to, and provide incentives for, innovation to improve the safety of egg products.

To assess the potential risk-reduction impacts of this rulemaking on the public, an interagency panel of scientific and technical experts is conducting a risk management analysis. The panel has been charged with identifying the lethality requirement sufficient to ensure the safety of egg products and the alternative methods for implementing the requirement. The egg products processing and distribution module of the Salmonella enteritidis Risk Assessment, made public June 12, 1998, will be appropriately modified to evaluate the risk associated with the regulatory alternatives.

USDA—FSIS

12. PATHOGEN REDUCTION; HAZARD ANALYSIS AND CRITICAL CONTROL POINTS (HACCP) SYSTEMS; ADDITIONS TO GENERIC E. COLI CRITERIA

Priority:

Other Significant

Legal Authority:

21 USC 601 to 695; 21 USC 451 to 470

CFR Citation:

9 CFR 310; 9 CFR 381

Legal Deadline:

None

Abstract:

FSIS is proposing to add generic E. coli criteria to the regulations. In addition, FSIS is proposing to revise the terms used to identify and define certain classes of product listed in the Salmonella tables.

FSIS is proposing to delay making the proposed criteria and standards applicable for 1 year for small establishments and for 2 years for very small establishments.

Statement of Need:

FSIS is proposing to update its pathogen reduction (PR)/Hazard Analysis and Critical Control Point (HACCP) System regulations by adding generic Escherichia coli (E. coli) criteria for cattle, swine, and goose carcasses based on the sponging method of sample collection and for turkey carcasses based on the sponging and rinse methods of sample collection. FSIS is also proposing new pathogen reduction performance standards for Salmonella in cattle, swine, young turkey, and goose carcasses by the sponging method and fresh pork sausage by direct sampling. The new cattle performance standard would replace the existing Salmonella performance standards for steers/heifers and cows/bulls. The new swine standard would replace the existing standard for hogs. These new standards apply to all market classes of cattle and swine, respectively.

The National Academy of Sciences and the National Advisory Committee on Microbiological Criteria for Foods are examining the Salmonella performance standards and generic E. coli criteria. FSIS will take into account their findings and concerns before issuing rules on this matter.

In addition, FSIS is proposing to revise the terms used to identify and define certain classes of product listed in the Salmonella tables to more accurately reflect the products sampled in the baseline studies that are the basis for the standards. The Agency also intends to correct some errors in the E. coli and Salmonella tables and to change the footnotes to the tables for greater clarity.

These changes would ensure that the pathogen reduction performance standards and process control criteria applying to products and establishments regulated by FSIS are appropriate and accurate. The additional performance standards for Salmonella and criteria for E. coli will help establishments to improve process controls for certain classes of raw product. Improved process controls will help reduce pathogens on certain raw products and may result in the reduction of foodborne illness. The provision of E. coli criteria based on the sponge method of sampling would provide affected establishments with flexibility in complying with the rule.

In addition to the need to update and add flexibility to existing PR/HACCP requirements, the rule is needed to help address the market failure associated with the consumer's lack of information about pathogens that may be present in certain classes of meat and poultry products and to help meet the commitments made by FSIS in its PR/HACCP and associated regulatory reform initiatives.

Summary of Legal Basis:

This action is authorized under the Federal Meat Inspection Act (21 U.S.C. 601-695) and the Poultry Products Inspection Act (21 U.S.C. 451-470).

Alternatives:

No action.

Anticipated Cost and Benefits:

The costs of the proposal are estimated to be in the $18 million to $20 million range and are attributable to the need for some firms to modify their processes to meet the new standards.

Benefits would accrue from reductions in pathogen levels, which in turn, might lead to reductions in foodborne illness. There is, however, a great deal of uncertainty associated with the human health benefits estimates, including data reflecting a decline in foodborne illness after implementation of the PR/HACCP regulations, because of the lack of prevalence data for the period before and after implementation of the regulations.

Risks:

None.

USDA—FSIS

13. • ELIMINATION OF CHILLING TIME AND TEMPERATURE REQUIREMENTS FOR READY-TO-COOK POULTRY (SECTION 610 REVIEW)

Priority:

Other Significant

Legal Authority:

21 USC 451 to 470

CFR Citation:

9 CFR 381.66

Legal Deadline:

None

Abstract:

FSIS is proposing to eliminate the time and temperature requirements for chilling ready-to-cook poultry carcasses and giblets. The Agency is taking this action because the requirements are inconsistent with the Agency's Pathogen Reduction/Hazard Analysis and Critical Control Point (HACCP) System regulations, with its final rule further restricting retained water in raw meat and poultry, and with the Agency's regulatory reform program. Moreover, because of these regulations, the meat and poultry industries receive disparate regulatory treatment: No regulations that apply to the chilling of poultry apply to the chilling of meat. This proposal responds to longstanding petitions by industry trade associations.

Statement of Need:

This proposed rule addresses Federal regulations that are inconsistent with the PR/HACCP regulations because they restrict the ability of poultry processors to choose appropriate and effective measures to eliminate, reduce, or control biological hazards identified in their hazard analyses. The regulations also complicate efforts by establishments to comply with the terms of the January 9, 2001, final rule further restricting the amount of water that may be retained in raw meat or poultry products after post-evisceration processing; some establishments may have to use chilling procedures that result in higher levels of retained water in carcasses than may be necessary to achieve the same food safety objective. For example, establishments that operate automated chillers may have to subject poultry carcasses to higher agitation rates or longer dwell times in the chillers. Also, as discussed above, the time/temperature chilling regulations for poultry result in disparate regulatory treatment of the meat and poultry industries.

Summary of Legal Basis:

This regulatory action is authorized under the Poultry Products Inspection Act (21 U.S.C. 451-470).

Alternatives:

FSIS evaluated five regulatory alternatives: (1) taking no regulatory action; (2) replacing the command-and-control requirements with a performance standard; (3) requiring meatpackers, as well as poultry processors, to comply with such a performance standard; (4) requiring all establishments that prepare raw meat or poultry products or handle, transport, or receive the products in transportation to comply with a performance standard; or (5) removing the command-and-control requirements from the poultry products inspection regulations. The Agency chose the fifth alternative.

Anticipated Cost and Benefits:

Poultry processors would gain the flexibility to choose the best processing techniques and procedures for achieving production efficiencies, meeting HACCP food safety objectives, and preventing economic adulteration of raw product with retained water in amounts greater than unavoidable for food-safety purposes. They would be able to operate with a wider range of chilling temperatures consistently with the requirements of the PR/HACCP regulations. The poultry products industry could achieve energy efficiencies resulting in annual savings of as much as $2.8 million.

The industry could also reduce carcass "dwell times" in immersion chillers and thereby reduce the amount of water absorbed and retained by the carcasses. The reduction in dwell time might enable some establishments, particularly those currently operating at the throughput capacity of their chillers, to increase production by installing additional evisceration lines. Poultry establishments would therefore be able to operate more efficiently to provide consumers with product that is not adulterated.

FSIS also would gain some flexibility by being able to reallocate some inspection resources from measuring the temperature of chilled birds to such activities as HACCP system verification.

This proposed rule would directly impose no new costs on the regulated industry. It would relieve burdens arising from the disparate impacts of the current regulations on the meat and poultry industries.

USDA—FSIS

14. • EMERGENCY REGULATIONS TO PREVENT MEAT FOOD AND MEAT PRODUCTS THAT MAY CONTAIN THE BSE AGENT FROM ENTERING COMMERCE

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

21 USC 601 et seq

CFR Citation:

Not Yet Determined

Legal Deadline:

None

Abstract:

FSIS is proposing to amend the meat inspection regulations to add emergency regulations to prevent meat and meat food products that may contain the bovine spongiform encephalopathy (BSE) agent from entering commerce. The emergency regulations would become effective when, and if, BSE is diagnosed in native cattle in the United States. The proposed regulations provide for periodic review by FSIS to determine their effectiveness and to evaluate the need to modify or remove some measures or impose additional measures.

Statement of Need:

FSIS is proposing to amend the meat inspection regulations to add provisions to prevent meat and meat products that may contain the BSE agent from entering commerce in the event that BSE is diagnosed in native cattle in the U.S. Any final rule that is developed as a result of this proposal will become effective when, and if, a native case of BSE is detected in the U.S.

BSE is a chronic, degenerative, neorological disorder of cattle. Worldwide, there have been more than

178,000 cases since the disease was first diagnosed in 1986 in Great Britain. There have been no cases of BSE detected in the United States despite 10 years of active surveillance for the disease. Recent laboratory and epidemiological research indicate that there is a causal association between BSE and variant Creutzfeldt-Jakob Disease (vCJD), a slow degenerative disease that affects the central nervous system of humans. Like BSE, vCJD has not been detected in the United States. Both BSE and vCJD are always fatal.

Although BSE has not been detected in the U.S., USDA policy in regard to BSE has been to be proactive and preventive. Therefore, FSIS is proposing these regulations so that the Agency will have an immediate regulatory response in the event that BSE is detected in the U.S. Once finalized, the proposed measures will be incorporated in the meat inspection regulations but would only become effective when, and if, BSE is detected in native cattle.

Summary of Legal Basis:

Under the Federal Meat Inspection Act (21 U.S.C. 601-695), FSIS issues regulations governing the production of meat and meat food products. The regulations, along with FSIS inspection programs, are designed to ensure that meat food products are safe, not adulterated, and properly marked, labeled, and packaged.

Alternatives:

As an alternative to the proposed requirements, FSIS considered taking no action. FSIS rejected this option because, as previously mentioned, USDA policy in regard to BSE has been to be proactive and preventive. Publishing a proposed rule will inform the public of the type of regulatory response it can expect from FSIS when, and if, BSE is detected in native cattle.

In addition to the proposed requirements, FSIS is considering taking actions prior to the detection of BSE in the U.S. to minimize human exposure to materials from cattle that could potentially contain the BSE agent. The measures under consideration are targeted at the materials of cattle that are most likely to contain the BSE agent, if such animals have been infected with BSE, and those cattle that have consumed feed prohibited by Food and Drug Administration's (FDA) regulations (i.e., mammalian meat and bone meal in ruminant feed).

Anticipated Cost and Benefits:

None.

Risks:

Although vCJD is a rare condition, the symptoms are severe, and it is always fatal. This proposed rule is intended to reduce the risk of humans developing vCJD in the U.S. in the event BSE is detected in native cattle. The measures proposed by FSIS are intended to minimize human exposure to materials from cattle that could potentially contain the BSE agent. In April 1998, USDA entered into a cooperative agreement with Harvard University's School of Public Health to conduct a risk analysis to assess the potential pathways for entry into U.S. cattle and the U.S. food supply, to evaluate existing regulations and policies, and to identify any additional measures that could be taken to protect human and animal health. FSIS will use the findings of the risk assessment to evaluate the level of risk reduction associated with the proposed measures.

Unlike bacterial and viral pathogens that may be found in or on meat food products, the BSE agent cannot be destroyed by conventional methods, such as cooking or irradiation. Also, although it is rare, vCJD, the human disease associated with exposure to the BSE agent, is generally more severe than the human illnesses associated with exposure to bacterial and viral pathogens. Thus, if BSE were detected in the U.S., additional measures to reduce the risk of human exposure to the BSE agent are necessary to protect public health.

USDA—FSIS

FINAL RULE STAGE

15. MEAT PRODUCED BY ADVANCED MEAT/BONE SEPARATION MACHINERY AND RECOVERY SYSTEMS

Priority:

Economically Significant

Legal Authority:

21 USC 601 to 695

CFR Citation:

9 CFR 301.2; 9 CFR 318.24 (Revision); 9 CFR 320.1(b)(10)

Legal Deadline:

None

Abstract:

In 1994, the Food Safety and Inspection Service amended its regulations to recognize that product resulting from advanced meat/bone separation machinery comes within the definition of meat when recovery systems are operated to assure that the characteristics and composition of the resulting product are consistent with those of meat. Subsequent compliance problems and other concerns have made it apparent that the regulations are inadequate to prevent misbranding and economic adulteration. Therefore, FSIS is developing a rule to clarify the regulations and supplement the rules for assuring compliance.

Statement of Need:

In 1998, FSIS proposed to clarify the meat inspection regulations regarding mechanically separated meat contained in a final rule issued in December 1994. The proposed rule would replace the present compliance program parameters with non-compliance criteria for bone and bone-related material. The proposed rule would require, as a prerequisite to labeling or using product derived by mechanically separating skeletal muscle tissue from cattle bones as meat, that

UMI
VOL
66
ISS
2
3
2
DE
3
2001
UMI

establishments implement and document procedures for ensuring that their production process is in control. FSIS intends to issue a final rule in the first quarter of 2002 that prohibits central nervous system tissue in meat produced by advanced meat separation and recovery systems.

Summary of Legal Basis:

This action is authorized under the Federal Meat Inspection Act (21 U.S.C. 601-695).

Alternatives:

No action.

Anticipated Cost and Benefits:

Although the 1998 proposed rule was determined to be not economically significant, FSIS restudied the projected costs using data from various FSIS data bases and other sources to develop an improved estimate of the benefits and costs of implementing the final rule. To date, it appears that the final rule will not be economically significant, but data evaluation continues. The benefit of publishing a rule that prohibits central nervous system tissue is that the meat industry would be producing a product that is not misbranded or economically adulterated.

Risks:

None.

16. PERFORMANCE STANDARDS FOR ON-LINE ANTIMICROBIAL REPROCESSING OF PRE-CHILL POULTRY CARCASSES

Priority:

Other Significant

Legal Authority:

21 USC 451 to 470

CFR Citation:

9 CFR 381; 9 CFR 424

Legal Deadline:

None

Abstract:

This rule is proposing to allow, on a voluntary basis, the on-line reprocessing of pre-chill poultry carcasses that are accidentally contaminated with digestive tract contents during slaughter. The treated carcasses must meet pre-chill performance standards that are substantially lower than the current performance standard and criteria.

Statement of Need:

On December 1, 2000, FSIS issued a proposed rule to permit on-line antimicrobial reprocessing of pre-chill poultry carcasses on a voluntary basis. It is estimated that approximately 90 poultry slaughter establishments are now engaged in on-line processing. Permitting pre-chill poultry to be reprocessed on-line rather than off-line yields great benefits to industry and reduces microbial loads on visibly contaminated and visibly clean birds.

Summary of Legal Basis:

This action is authorized by the Poultry Products Inspection Act (21 U.S.C. 456 et seq.) Exercise of the Secretary of Agriculture's functions under this Act has been delegated to the Under Secretary for Food Safety (7 CFR 2.18) and by the Under Secretary to the Administrator of FSIS (7 CFR 2.53).

Alternatives:

Executive Order 12866 requires that FSIS identify and assess alternative forms of regulation. FSIS considered two alternatives to this proposed rule: (1) not proposing to allow for the on-line reprocessing of contaminated carcasses and (2) proposing to require plants to perform on-line reprocessing of pre-chill contaminated carcasses and establishing specific numerical performance standards that the reprocessed poultry must meet using a mandated antimicrobial treatment or process. FSIS rejected both alternatives for the reasons explained below.

Failing To Propose

FSIS is committed to reducing the levels of microbial pathogens in poultry products. On-line reprocessing of poultry in commercial trials using solutions of TSP/chlorine and acidified sodium chlorite has been shown to be a highly effective method of reducing the microbial levels of raw poultry to levels substantially below the performance standards and criteria established by the pathogen reduction/HACCP final rule.

Mandating Procedures, Materials, and Methods

FSIS is proposing to give all establishments the option of adopting on-line reprocessing of visibly contaminated birds. By not mandating that all plants adopt on-line reprocessing, FSIS is recognizing that there are other solutions to reducing bacterial loads that may be more appropriate and cost-effective for small plants. There are many possible solutions for pathogen reduction of raw poultry and poultry products, and the industry continues to seek out new products and equipment that will be effective.

Pathogen reduction is central to the FSIS food safety strategy. However, eliminating as many prescriptive or command-and-control regulations as possible also is an important part of the overall strategy for updating and improving inspection in light of HACCP. Therefore, there will be no mandate proposed for establishments to use TSP or any other substance as the antimicrobial reprocessing aid. Various substances have undergone trials to determine their potential as antimicrobial processing agents. Such substances include acidified sodium chlorite; organic acids such as lactic, acetic, and formic acids; chlorine dioxides; and ozone. Plants will be free to use other products that have demonstrated their efficacy in reducing levels of microorganisms in in-plant commercial trials. This is consistent with the Agency's strategy of encouraging the industry to take advantage of new technology to reduce the risks associated with the consumption of meat and poultry products.

Anticipated Cost and Benefits:

The economic impact of this rule is likely to be minimal because of the voluntary nature of the practice this

proposal would authorize. An establishment will use on-line reprocessing if it is consistent with the objectives of the firm, conforms with plant configuration, provides increased efficiency in achieving product standards, improves product characteristics, and other factors. The poultry industry is highly competitive; an increase in product price by a single producer is likely to result in a loss of market share. A firm is not likely to purchase new equipment that will increase overall production costs or reduce profits.

The cost for a poultry plant to adopt an acceptable on-line reprocessing system will vary from plant to plant and will be contingent on the location, physical structure, and age of the plant and the adaptability of the equipment. Available information indicates that the capital cost per line ranges from $10,000 to more than $55,000, with an average cost of $35,600, which is close to the manufacturer's estimate for a single line cost of $30,000.

Operating costs associated with on-line reprocessing systems also can vary significantly as a result of plant size, number of lines, processing capacity, plant configuration, and other factors. Rhodia estimates that the TSP application cost will be about 0.2 cents per pound for an average chicken slaughter plant. The application of other antimicrobial substances may vary slightly in cost. Plant data suggest that total annual operating costs, which include labor, water softener, TSP, and water, are very close to the manufacturer's estimate. Available information suggests annual operating costs of about $125,000 per line for an average plant. Costs associated with off-line reprocessing would be expected to decline following installation of on-line reprocessing equipment because of reduced labor and other operating requirements. Available data suggest the decrease in operating costs because of reduced off-line reprocessing is about $70,000 per line, somewhat more than half of the increase in operating costs associated with TSP on-line reprocessing. The available plant information suggests that about two-thirds of the plants would not experience any change in sewage treatment. The remaining third would be required to perform additional treatment at the plant to meet discharge limits. Two-thirds of the plants would show no change in water use, while the remaining plants will have to increase use by 1 to 2 gallons per bird, or about 10 percent.

For the average plant, the net present value of capital costs and the net change in operating costs of TSP on-line reprocessing is about $1.2 million over a 10-year period using a discount rate of 7 percent. Based on the assumptions that the average plant processes about 200,000 birds per day, that an average bird has a dressed weight of 3.6 pounds, and the plant operates an average of 255 days per year over the next 10 years, the increase in total production costs is slightly more than .2 cents per pound. The capital costs amortized over a 10-year period are minimal on a per pound basis. The costs to the poultry processing industry would accrue to plants engaged in slaughter, either exclusively or in combination with processing. In 1996, there were 281 federally inspected plants of this description. Only one Federal-State cooperative inspection plant is currently engaged in poultry slaughter. If all such plants voluntarily install an on-line reprocessing system, the total cost to the poultry industry would be about $345 million over a 10-year period.

Risks:

The cost of a TSP on-line reprocessing system represents an insignificant portion of the retail price per pound of poultry. If there is any increase in the retail price of poultry, it will be modest and offset by consumer confidence that the product presents lower microbial risks.

DEPARTMENT OF COMMERCE (DOC)

Statement of Regulatory and Deregulatory Priorities

Enhancing long-term economic growth is a central focus of the President's policies and priorities. The mission of the Department of Commerce is to promote job creation, economic growth, technological competitiveness, sustainable development, and improved living standards for all Americans by working in partnership with businesses, universities, communities, and workers to:

- Build for the future and promote U.S. economic competitiveness in the global marketplace by strengthening and safeguarding the Nation's economic infrastructure;
- Keep America competitive with cutting-edge science and technology and an unrivaled information base; and
- Provide effective management and stewardship of our Nation's resources and assets to ensure sustainable economic opportunities.

The DOC mission statement, containing our three strategic themes, provides the vehicle for understanding the Department's aims, how they interlock, and how they are to be implemented through our programs. This statement was developed with the intent that it serves as both a statement of departmental philosophy and as the guiding force behind the Department's programs.

The importance that this mission statement and these strategic themes have for the Nation is amplified by the vision they pursue for America's communities, businesses, and families. Commerce is the smallest Cabinet agency, yet our presence is felt, and our contributions are found, in every State.

The DOC touches Americans, daily, in many ways—we make possible the weather reports that all of us hear every morning; we facilitate the technology that all of us use in the workplace and in the home each day; we support the development, gathering, and transmitting of information essential to competitive business; we make possible the diversity of companies and goods found in America's (and the world's) marketplace; and we support environmental and economic health for the communities in which Americans live.

The DOC has a clear and powerful vision for itself, for its role in the Federal Government, and for its roles supporting the American people, now and in the future. We confront the intersection of trade promotion, civilian technology, economic development, sustainable development, and economic analysis, and we want to provide leadership in these areas for the Nation.

We work to provide programs and services that serve our country's businesses, communities, and families, as initiated and supported by the President and the Congress. We are dedicated to making these programs and services as effective as possible, while ensuring that they are being delivered in the most cost-effective ways. We seek to function in close concert with other agencies having complementary responsibilities so that our collective impact can be most powerful. We seek to meet the needs of our customers quickly and efficiently, with programs, information, and services they require and deserve.

As a permanent part of the Federal Government, but serving an Administration and Congress that can vary with election results, we seek to serve the unchanging needs of the Nation, according to the priorities of the President and the Congress. The President's priorities for the Department range from issues concerning the economy to the environment. For example, the President directs the Department to promote and develop alternative sources of energy that conserve the environment; promote electronic commerce activities; encourage open and free trade; represent American business interests abroad; and assist small businesses expand and create jobs. We are able to address these priorities effectively by functioning in accordance with the legislation that undergirds our programs and by working closely with the President and the committees in Congress, which have programmatic and financial oversight for our programs.

Among the President's priorities, the DOC works to advance alternative energy sources as discussed in the President's national energy policy. In his State of the Union address, the President acknowledged that many citizens were struggling with the high cost of energy. In response to the energy crisis, the President charged Vice President Cheney and Cabinet secretaries to develop a national energy policy that encourages production of energy while protecting our environment. In doing so, the President emphasized the need to promote alternative energy to ensure that "future generations of Americans will have access to the energy they need."

The DOC is working to reform the hydropower licensing process so that applicants will encounter less uncertainty. Hydropower ranks as the fourth largest source of the Nation's energy; it accounted for 7 percent of the Nation's total energy needs in 2000. To promote the use of this renewable source of power, the Department is streamlining the licensing process to ensure more public participation, adopt more effective fish and wildlife conditions, and provide interagency resolution before conflicting mandatory license conditions are implemented.

The DOC also promotes and expedites American exports, helps nurture business contacts abroad, protects U.S. firms from unfair foreign competition, and makes how-to-export information accessible to small and mid-sized companies throughout the Nation, thereby ensuring that U.S. market opportunities span the globe.

The DOC encourages development in every community, clearing the way for private-sector growth by building and rebuilding economically deprived and distressed communities. We promote minority entrepreneurship to establish businesses that frequently anchor neighborhoods and create new job opportunities. We work with the private sector to enhance competitive assets.

As the Nation looks to revitalize its industries and communities, The DOC works as a partner with private entities to build America with an eye on the future. Through technology, research and development, and innovation, we are making sure America continues to prosper in the short-term, while also helping industries prepare for long-term success.

The DOC's considerable information capacities help businesses understand clearly where our national and world economies are going, and take advantage of that knowledge by planning the road ahead. Armed with the Department's economic and demographic statistics, businesses can undertake the new ventures, investments, and expansions that make our economy grow.

The DOC has instituted programs and policies that lead to cutting-edge, competitive, and better paying jobs. We work every day to boost exports, to deregulate business, to help smaller manufacturers battle foreign competition, to advance the technologies critical to our future prosperity, to invest in our

communities, and to fuse economic and environmental goals.

The DOC is American business' surest ally in job creation, serving as a vital resource base, a tireless advocate, and its Cabinet-level voice.

The Regulatory Plan directly tracks these policy and program priorities, only a few of which involve regulation of the private sector by the Department.

Responding to the Administration's Regulatory Philosophy and Principles

The vast majority of the Department's programs and activities do not involve regulation. Of the Department's 12 primary operating units, only two—the Bureau of Export Administration (BXA) and the National Oceanic and Atmospheric Administration (NOAA)—plan significant preregulatory or regulatory actions for this Regulatory Plan year. However, none of these significant actions rise to the level of "most important" of the Department's "significant regulatory actions" planned for the Regulatory Plan year.

Though not principally a regulatory agency, the DOC has long been a leader in advocating and using market-oriented regulatory approaches in lieu of traditional command-and-control regulations when such approaches offer a better alternative. All regulations are designed and implemented to maximize societal benefits while placing the smallest possible burden on those being regulated.

The DOC is also refocusing on its regulatory mission by taking into account, among other things, the President's regulatory principles. To the extent permitted by law, all preregulatory and regulatory activities and decisions adhere to the Administration's statement of regulatory philosophy and principles, as set forth in section 1 of Executive Order 12866. Moreover, we have made bold and dramatic changes, never being satisfied with the status quo. We have emphasized, initiated, and expanded programs that work in partnership with the American people to secure the Nation's economic future. At the same time we have downsized, cut regulations, closed offices, and eliminated programs and jobs that are not part of our core mission. The bottom line is that, after much thought and debate, we have made many hard choices needed to make this Department "state of the art."

The Secretary has prohibited the issuance of any regulation that discriminates on the basis of race, religion, gender, or any other suspect category and requires that all regulations be written so as to be understandable to those affected by them. The Secretary also requires that the Department afford the public the maximum possible opportunity to participate in departmental rulemakings, even where public participation is not required by law.

National Oceanic and Atmospheric Administration

The National Oceanic and Atmospheric Administration (NOAA) establishes and administers Federal policy for the conservation and management of the Nation's oceanic, coastal, and atmospheric resources. It provides a variety of essential environmental services vital to public safety and to the Nation's economy, such as weather forecasts and storm warnings. It is a source of objective information on the state of the environment. NOAA plays the lead role in achieving the departmental goal of promoting stewardship by providing assessments of the global environment.

Recognizing that economic growth must go hand-in-hand with environmental stewardship, the Department, through NOAA, conducts programs designed to provide a better understanding of the connections between environmental health, economics, and national security. Commerce's emphasis on "sustainable fisheries" is saving fisheries and confronting short-term economic dislocation, while boosting long-term economic growth. The Department is where business and environmental interests intersect, and the classic debate on the use of natural resources is transformed into a "win-win" situation for the environment and the economy.

Three of NOAA's major components, the National Marine Fisheries Services (NMFS), the National Ocean Service (NOS), and the National Environmental Satellite, Data, and Information Service (NESDIS), exercise regulatory authority.

NMFS oversees the management and conservation of the Nation's marine fisheries, protects marine mammals, and promotes economic development of the U.S. fishing industry. NOS assists the coastal states in their management of land and ocean resources in their coastal zones, including estuarine research reserves; manages the Nation's national marine sanctuaries; monitors marine pollution; and directs the national program for deep-seabed minerals and ocean thermal energy. NESDIS administers the civilian weather satellite program and licenses private organizations to operate commercial land-remote sensing satellite systems.

The Administration is committed to an environmental strategy that promotes sustainable economic development and rejects the false choice between environmental goals and economic growth. The intent is to have the Government's economic decisions guided by a comprehensive understanding of the environment. The Department, through NOAA, has a unique role in promoting stewardship of the global environment through effective management of the Nation's marine and coastal resources and in monitoring and predicting changes in the Earth's environment, thus linking trade, development, and technology with environmental issues. NOAA has the primary Federal responsibility for providing sound scientific observations, assessments, and forecasts of environmental phenomena on which resource management and other societal decisions can be made.

In the environmental stewardship area, NOAA's goals include: rebuilding U.S. fisheries by refocusing policies and fishery management planning on increased scientific information; increasing the populations of depleted, threatened, or endangered species of marine mammals by implementing recovery plans that provide for their recovery while still allowing for economic and recreational opportunities; promoting healthy coastal ecosystems by ensuring that economic development is managed in ways that maintain biodiversity and long-term productivity for sustained use; and modernizing navigation and positioning services. In the environmental assessment and prediction area, goals include: modernizing the National Weather Service; implementing reliable seasonal and interannual climate forecasts to guide economic planning; providing science-based policy advice on options to deal with very long-term (decadal to centennial) changes in the environment; and advancing and improving short-term warning and forecast services for the entire environment.

Magnuson-Stevens Act Rulemakings

Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) rulemakings concern the conservation and management of fishery resources in the U.S. 3-to-200-mile Exclusive Economic Zone (EEZ). Among the several hundred

rulemakings that NOAA plans to issue in the Regulatory Plan year, a number of the preregulatory and regulatory actions will be significant. The exact number of such rulemakings is unknown, since they are usually initiated by the actions of eight regional Fishery Management Councils (FMCs) that are responsible for preparing fishery management plans (FMPs) and FMP amendments, and for drafting implementing regulations for each managed fishery. Once a rulemaking is triggered by an FMC, the Magnuson-Stevens Act places stringent deadlines upon NMFS by which it must exercise its rulemaking responsibilities. Most of these rulemakings will be minor, involving only the opening or closing of a fishery under an existing FMP. While no one Magnuson-Steven Act rulemaking is among the Department's most important significant regulatory actions, and, therefore, none is specifically described below, the sum of these actions, and a few of the individual actions themselves, are highly significant.

The Magnuson-Stevens Act, which is the primary legal authority for Federal regulation to conserve and manage fishery resources, establishes eight regional FMCs, responsible for preparing FMPs and FMP amendments. NMFS issues regulations to implement FMPs and FMP amendments. FMPs address a variety of fishery matters, including depressed stocks, overfished stocks, gear conflicts, and foreign fishing. One of the problems that FMPs may address is preventing overcapitalization (preventing excess fishing capacity) of fisheries. This may be resolved by limiting access to those dependent on the fishery in the past and/or by allocating the resource through individual transferable quotas, which can be sold on the open market to other participants or those wishing access. Quotas set on sound scientific information, whether as a total fishing limit for a species in a fishery or as a share assigned to each vessel participant, enable stressed stocks to rebuild. Other measures include staggering fishing seasons or limiting gear types to avoid gear conflicts on the fishing grounds, and establishing seasonal and area closures to protect fishery stocks.

The FMCs provide a forum for public debate and, using the best scientific information available, make the judgments needed to determine optimum yield on a fishery-by-fishery basis. Optional management measures are examined and selected in accordance with the national standards set forth in the Magnuson-Stevens Act. This process, including the selection of the preferred management measures, constitutes the development, in simplified form, of an FMP. The FMP, together with draft implementing regulations and supporting documentation, is submitted to NMFS for review against the national standards set forth in the Magnuson-Stevens Act, in other provisions of the Act, and other applicable laws. The same process applies to amending an existing approved FMP.

The Magnuson-Stevens Act contains ten national standards against which fishery management measures are judged. NMFS has supplemented the standards with guidelines interpreting each standard, and has updated and added to those guidelines. One of the national standards requires that management measures, where practicable, minimize costs and avoid unnecessary duplication. Under the guidelines, NMFS will not approve management measures submitted by an FMC unless the fishery is in need of management. Together, the standards and the guidelines correspond to many of the Administration's principles of regulation as set forth in section 1(b) of Executive Order 12866. One of the national standards establishes a qualitative equivalent to the Executive Order's "net benefits" requirement—one of the focuses of the Administration's statement of regulatory philosophy as stated in section 1(a) of the Order.

Bureau of Export Administration

The Bureau of Export Administration (BXA) promotes U.S. national and economic security and foreign policy interests by managing and enforcing the Department's security-related trade and competitiveness programs. BXA plays a key role in challenging issues involving national security and nonproliferation, export growth, and high technology. The Bureau's continuing major challenge is combating the proliferation of weapons of mass destruction while furthering the growth of U.S. exports, which are critical to maintaining our leadership in an increasingly competitive global economy. BXA strives to be the leading innovator in transforming U.S. strategic trade policy and programs to adapt to the changing world.

Major Programs and Activities

The Export Administration Regulations (EAR) provide for export controls on dual use goods and technology (primarily commercial goods that have potential military applications) not only to fight proliferation, but also to pursue other national security, short supply, and foreign policy goals (such as combating terrorism). Simplifying and updating these controls in light of the end of the Cold War has been a major accomplishment of BXA.

BXA is also responsible for:

- Enforcing the export control and antiboycott provisions of the Export Administration Act (EAA), as well as other statutes such as the Fastener Quality Act. The EAA is enforced through a variety of administrative, civil, and criminal sanctions.
- Analyzing and protecting the defense industrial and technology base, pursuant to the Defense Production Act and other laws. As the Defense Department increases its reliance on dual-use high technology goods as part of its cost-cutting efforts, ensuring that we remain competitive in those sectors and sub-sectors is critical to our national security.
- Helping Ukraine, Kazakstan, Belarus, Russia, and other newly emerging countries develop effective export control systems. The effectiveness of U.S. export controls can be severely undercut if "rogue states" or terrorists gain access to sensitive goods and technology from other supplier countries.
- Working with former defense plants in the Newly Independent States to help make a successful transition to profitable and peaceful civilian endeavors. This involves helping remove unnecessary obstacles to trade and investment and identifying opportunities for joint ventures with U.S. companies.
- Assisting U.S. defense enterprises to meet the challenge of the reduction in defense spending by converting to civilian production and by developing export markets. This work assists in maintaining our defense industrial base as well as preserving jobs for U.S. workers.

BILLING CODE 3510-BW-S

DEPARTMENT OF DEFENSE (DOD)

Statement of Regulatory Priorities

Background

The Department of Defense (DoD) is the largest Federal department consisting of 3 military departments (Army, Navy, and Air Force), 9 unified combatant commands, 15 Defense agencies, and 7 DoD field activities. It has over 1,370,000 military personnel and 670,000 civilians assigned as of May 31, 2001, and over 500 military installations and properties in the continental United States, U. S. territories, and foreign countries. The overall size, composition, and dispersion of the Department of Defense, coupled with an innovative regulatory program, presents a challenge to the management of the Defense regulatory efforts under Executive Order 12866 "Regulatory Planning and Review" of September 30, 1993.

Because of its diversified nature, DoD is impacted by the regulations issued by regulatory agencies such as the Departments of Energy, Health and Human Services, Housing and Urban Development, Labor, Transportation, and the Environmental Protection Agency. In order to develop the best possible regulations that embody the principles and objectives embedded in Executive Order 12866, there must be coordination of proposed regulations among the regulating agencies and the affected Defense components. Coordinating the proposed regulations in advance throughout an organization as large as DoD is straightforward, yet a formidable undertaking.

DoD is not a regulatory agency but occasionally issues regulations that have an impact on the public. These regulations, while small in number compared to the regulating agencies, can be significant as defined in Executive Order 12866. In addition, some of DoD's regulations may impact the regulatory agencies. DoD, as an integral part of its program, not only receives coordinating actions from the regulating agencies, but coordinates with the agencies that are impacted by its regulations as well.

The regulatory program within DoD fully incorporates the provisions of the President's priorities and objectives under Executive Order 12866. Promulgating and implementing the regulatory program throughout DoD presents a unique challenge to the management of our regulatory efforts.

Coordination

Interagency

DoD annually receives regulatory plans from those agencies that impact the operation of the Department through the issuance of regulations. A system for coordinating the review process is in place, regulations are reviewed, and comments are forwarded to the Office of Management and Budget. The system is working in the Department, and the feedback from the Defense components is most encouraging, since they are able to see and comment on regulations from the other agencies before they are required to comply with them. The coordination process in DoD continues to work as outlined in Executive Order 12866.

Internal

Through regulatory program points of contact in the Department, we have established a system that provides information from the Administrator of the Office of Information and Regulatory Affairs (OIRA) to the personnel responsible for the development and implementation of DoD regulations. Conversely, the system can provide feedback from DoD regulatory personnel to the Administrator, OIRA. DoD continues to refine its internal procedures, and this ongoing effort to improve coordination and communication practices is well received and supported within the Department.

Overall Priorities

The Department of Defense needs to function at a reasonable cost, while ensuring that it does not impose ineffective and unnecessarily burdensome regulations on the public. The rulemaking process should be responsive, efficient, cost-effective, and both fair and perceived as fair. This is being done in the Department while it must react to the contradictory pressures of providing more services with fewer resources. The Department of Defense, as a matter of overall priority for its regulatory program, adheres to the general principles set forth in Executive Order 12866 as amplified below.

Problem Identification

Congress typically passes legislation to authorize or require an agency to issue regulations and often is quite specific about the problem identified for correction. Therefore, DoD does not generally initiate regulations as a part of its mission.

Conflicting Regulations

Since DoD plans to issue just two significant regulations this year, the probability of developing conflicting regulations is low. Conversely, DoD is impacted to a great degree by the regulating agencies. From that perspective, DoD is in a position to advise the regulatory agencies of conflicts that appear to exist using the coordination processes that exist in the DoD and other Federal agency regulatory programs. It is a priority in the Department to communicate with other agencies and the affected public to identify and proactively pursue regulatory problems that occur as a result of conflicting regulations both within and outside the Department.

Alternatives

DoD will identify feasible alternatives that will obtain the desired regulatory objectives. Where possible, the Department encourages the use of incentives to include financial, quality of life, and others to achieve the desired regulatory results.

Risk Assessment

Assessing and managing risk is a high priority in the DoD regulatory program. The Department is committed to risk prioritization and an "anticipatory" approach to regulatory planning, which focuses attention on the identification of future risk. Predicting future regulatory risk is exceedingly difficult due to rapid introduction of new technologies, side effects of Government intervention, and changing societal concerns. These difficulties can be mitigated to a manageable degree through the incorporation of risk prioritization and anticipatory regulatory planning into DoD's decisionmaking process, which results in an improved regulatory process and increases the customer's understanding of risk.

Cost-Effectiveness

One of the highest priority objectives of DoD is to obtain the desired regulatory objective by the most cost-effective method available. This may or may not be through the regulatory process. When a regulation is required, DoD considers incentives for innovation to achieve desired results, consistency in the application of the regulation, predictability of the activity outcome (achieving the expected results), and the costs for regulation development, enforcement, and compliance. These will include costs to the public, Government, and regulated entities, using the best available data or parametric analysis methods, in the

cost-benefit analysis and the decisionmaking process.

Cost-Benefit

Conducting cost-benefit analyses on regulation alternatives is a priority in the Department of Defense so as to ensure that the potential benefits to society outweigh the costs. Evaluations of these alternatives are done quantitatively or qualitatively or both, depending on the nature of the problem being solved and the type of information and data available on the subject. DoD is committed to considering the most important alternative approaches to the problem being solved and providing the reasoning for selecting the proposed regulatory change over the other alternatives.

Information-Based Decisions

The Defense Department uses the latest technology to provide access to the most current technical, scientific, and demographic information in a timely manner through the world-wide communications capabilities that are available on the Internet. Realizing that increased public participation in the rulemaking process improves the quality and acceptability of regulations, DoD is committed to exploring the use of Information Technology (IT) in rule development and implementation. IT provides the public with easier and more meaningful access to the processing of regulations. Furthermore, the Department endeavors to increase the use of automation in the Notice and Comment rulemaking process in an effort to reduce time pressures in the regulatory process.

Performance-Based Regulations

Where appropriate, DoD is incorporating performance-based standards that allow the regulated parties to achieve the regulatory objective in the most cost-effective manner.

Outreach Initiatives

DoD endeavors to obtain the views of appropriate State, local, and tribal officials and the public in implementing measures to enhance public awareness and participation both in developing and implementing regulatory efforts. Historically, this has included such activities as receiving comments from the public, holding hearings, and conducting focus groups. This reaching out to organizations and individuals that are affected by or involved in a particular regulatory action remains a significant regulatory priority of the Department and, we feel, results in much better regulations.

The Department is actively engaged in addressing the requirements of the Government Paperwork Elimination Act (GPEA) in implementing electronic government and in achieving IT accessibility for individuals with disabilities. One of the Department's regulatory priorities, specifically Defense Acquisition, will, as a goal, establish acquisition policy on electronic and IT accessibility.

Coordination

DoD has enthusiastically embraced the coordination process between and among other Federal agencies in the development of new and revised regulations. Annually, DoD receives regulatory plans from key regulatory agencies and has established a systematic approach to providing the plans to the appropriate policy officials within the Department. Feedback from the DoD components indicates that this communication among the Federal agencies is a major step forward in improving regulations and the regulatory process, as well as in improving Government operations.

Minimize Burden

In the regulatory process, there are more complaints concerning burden than anything else. In DoD, much of the burden is in the acquisition area. Over the years, acquisition regulations have grown and become burdensome principally because of legislative action. But, in coordination with Congress, the Office of Federal Procurement Policy, and the public, DoD is initiating significant reforms in acquisition so as to effect major reductions in the regulatory burden on personnel in Government and the private sector. DoD has implemented a multi-year strategy for reducing the paperwork burden imposed on the public. This plan shows that DoD has met and will exceed the goals set forth in the Paperwork Reduction Act. It is the goal of the Department of Defense to impose upon the public the smallest burden viable, as infrequently as possible, and for no longer than absolutely necessary.

Plain Language

Ensuring that regulations are simple and easy to understand is a high regulatory priority in the Department of Defense. All too often, the regulations are complicated, difficult to understand, and subject to misinterpretation, all of which can result in the costly process of litigation. The objective in the development of regulations is to write them in clear, concise language that is simple and easy to understand.

DoD recognizes that it has a responsibility for drafting clearly written rules that are reader-oriented and easily understood. Rules will be written for the customer using natural expressions and simple words. Stilted jargon and complex construction will be avoided. Clearly written rules will tell our customers what to do and how to do it. DoD is committed to a more customer-oriented approach and uses plain language rules thereby improving compliance and reducing litigation.

In summary, the rulemaking process in DoD should produce a rule that addresses an identifiable problem, implements the law, incorporates the President's policies defined in Executive Order 12866, is in the public interest, is consistent with other rules and policies, is based on the best information available, is rationally justified, is cost-effective, can actually be implemented, is acceptable and enforceable, is easily understood, and stays in effect only as long as is necessary. Moreover, the proposed rule or the elimination of a rule should simply make sense.

Specific Priorities

For this regulatory plan, there are three specific DoD priorities, all of which reflect the established regulatory principles. One of these, "Improve Health Care Delivery in the Defense Department," will have two significant regulatory actions as defined by E.O. 12866. In those areas where rulemaking or participation in the regulatory process is required, DoD has studied and developed policy and regulations that incorporate not only the provisions of the President's priorities and objectives under the Executive order.

DoD has focused its regulatory resources on the most serious environmental, health, and safety risks. Perhaps most significant is that each of the three priorities described below promulgates regulations to offset the resource impacts of Federal decisions on the public or to improve the quality of public life, such as those regulations concerning civil functions of the U.S. Army Corps of Engineers, acquisition, and improving health care delivery in the Department of Defense.

U.S. Army Corps of Engineers, Directorate of Civil Works

Preserve Quality and Quantity of Wetlands

During Fiscal Year (FY) 2002, the U.S. Army Corps of Engineers is not

proposing any significant regulations as defined by Executive Order 12866. The Office of the Assistant Secretary of the Army (Civil Works) and the Corps have completed one regulation.

On May 10, 1999, the Corps issued a Final Rule in the Federal Register (64 FR 25120) modifying our definition of "discharge of dredged material" in response to the Court of Appeals holding in *National Mining Association* v. *United States Army Corps of Engineers*, 145 F.3rd 1339 (D.C. Cir. 1998) ("NMA") and to ensure compliance with the District Court's injunction. That rule made those changes that were necessary to conform the Corps' regulations to the Court's decision. The preamble to the Corps' May 10, 1999, rulemaking stated that they would be undertaking additional notice and comment rulemaking to further the Clean Water Act's objective to "restore and maintain the chemical, physical, and biological integrity of the Nation's waters." On April 17, 2001, the Corps published a Final Rule in the Federal Register (66 FR 10367) amending the Clean Water Act section 404 regulations defining the term "discharge of dredged material." This action was coordinated with the Office of Management and Budget.

On April 20, 2001, the Corps also proposed revisions to the Clean Water Act regulatory definitions of "Fill Material" and "Discharge of Fill Material" (65 FR 21292). This proposal would revise the definitions in order to clarify those pollutants that are regulated by the Corps. The Corps intends to issue a Final Rule in late FY 2001 or early FY 2002. Development of the rule is being facilitated by the Office of Management and Budget.

Natural Disaster Procedures

The President's Federal Response Plan, developed through the efforts of 27 departments and agencies, describes the basic methodology by which the Federal Government will mobilize resources and conduct activities to assist States in coping with the consequences of significant disasters. Within the Plan, the Department of Defense has designated the U.S. Army Corps of Engineers as the primary agency for planning, preparedness, and response under the Emergency Support Function #3, Public Works and Engineering. The purpose of this Emergency Support Function is to provide lifesaving or life protecting assistance to augment efforts of the affected State(s) and local response efforts following a major or catastrophic disaster.

The Corps supports the Nation and other agencies during times of crisis by providing "All Hazards Response," while maintaining a high level of preparedness. The Corps is proposing revisions to 33 CFR 203 (Natural Disaster Procedures: Preparedness, Response, and Recovery Activities of the Corps of Engineers). This revision is necessary to reflect current policy, add features required by the Water Resources Development Act of 1996 (Public Law 104-303), and streamline procedures regarding Corps authority.

Defense Acquisition

The Department continues its efforts to reengineer its acquisition system to achieve its vision of an acquisition system that is recognized as being the smartest, most efficient, most responsive buyer of best value goods and services, which meet the warfighter's needs from a globally competitive base. To achieve this vision, the Department will focus in the acquisition regulations arena during this next year on implementing and institutionalizing initiatives that may include additional changes to existing and recently modified regulations to ensure that we are achieving the outcomes we desire (continuous process improvement).

The Department of Defense is committed to acquisition reform and continues to make significant improvements in this area, consistent with Executive Order 12866. DoD continuously reviews its supplement to the Federal Acquisition Regulation (FAR) and continues to lead Government efforts to simplify the following acquisition processes:

- Rewrite of FAR part 45, Government Property. The primary objectives of the rewrite are to: Reduce the amount of Government property in the possession of contractors; rely to a greater extent on the contractors' own processes and procedures; eliminate Government reviews; hold the contractor accountable and liable for property provided for their use; rely on the Government's own internal records as the official recordkeeping and reporting mechanism for compliance with the Chief Financial Officers Act and related legislation; and make greater use of property management contracts for long-term storage or use concurrently on multiple contracts.
- Rewrite of FAR part 27, Patents, Data, and Copyrights. The goals of the FAR part 27 rewrite are to clarify, streamline, and update guidance and clauses on patents, data, and copyrights.
- Revise policy on profit. The goal of this initiative is to make changes to DoD profit policy that would reduce and eventually eliminate emphasis on facilities investment, increase emphasis on performance risk, and encourage contractor cost efficiency.
- Establish policy on Electronic Commerce in Federal Procurement. The goal of this initiative is to establish policies and procedures to employ electronic commerce in the conduct and administration of the procurement system.

Improve Health Care Delivery in the Defense Department

The Military Health System (MHS) supports the Department of Defense and our Nation's security by providing health support for the full range of military deployments and sustaining the health of members of the Armed Forces, their families, and others to advance our national security interests. Major goals of the Military Health System emphasize readiness, wellness and fitness, managed care growth, and integration of technologies to enable the best possible and most cost beneficial clinical and management outcomes.

The principal health-related regulatory publications of the Department involve CHAMPUS, the Civilian Health and Medical Program of the Uniformed Services (32 CFR part 199). CHAMPUS regulations comprehensively address such issues as eligibility, benefits, authorized providers, claims payment, appeals procedures, and similar topics. Amendments to the CHAMPUS regulations generally focus on program changes arising from revisions to the statutory base or from DoD initiatives to improve the program, such as TRICARE.

During FY 2001, the Department submitted two Interim Final Rules, affecting the Military Health System, which are categorized as economically significant, as defined by E.O. 12866. Both are promulgated to comply with statutory requirements. One action, "Civilian Health and Medical Program of the Uniformed Services (CHAMPUS)/TRICARE; Partial Implementation of Pharmacy Benefits Program; Implementation of National Defense Authorization Act Medical Benefits for Fiscal Year 2001," implements several sections of the Floyd D. Spence National Defense Authorization Act. Specifically, the rule: Allows coverage of physical examinations for beneficiaries ages 5

through 11 that are required in connection with school enrollment; provides an additional 2-year period for survivors of deceased active-duty members to remain eligible for TRICARE medical and dental benefits at active-duty dependent rates; extends eligibility for medical and dental benefits to Medal of Honor recipients and their immediate dependents in the same manner as if the recipient were entitled to retired pay; partially implements the Pharmacy Benefits Program establishing revised copays and cost-shares for the prescription drug benefit; and implements the TRICARE Senior Pharmacy Program by establishing a new eligibility for prescription drug benefits for Medicare-eligible retirees. Additionally the rule: Allows a waiver of copayments, cost-shares, and deductibles for all Uniformed Services TRICARE eligible active duty family members residing with their sponsor within a TRICARE Prime Remote designated area; provides for the elimination of TRICARE Prime copayments for active duty family members enrolled in TRICARE Prime; provides for the reimbursement of reasonable travel expenses for TRICARE Prime beneficiaries referred by a primary care provider; and reduces the maximum amount which retirees, their family members, and survivors would be liable.

The other significant action, "TRICARE; Civilian Health and Medical Program of the Uniformed Services (CHAMPUS); Eligibility and Payment Procedures for CHAMPUS Beneficiaries Age 65 and Over," implements section 712 of the National Defense Authorization Act for Fiscal Year 2001. Section 712 extends TRICARE eligibility to persons age 65 and over who would otherwise have lost their TRICARE eligibility due to attainment of entitlement to hospital insurance benefits under Part A of Medicare. In order for these individuals to retain their TRICARE eligibility, they must be enrolled in the supplementary medical insurance program under part B of Medicare. In general, in the case of medical or dental care provided to these individuals for which payment may be made under both Medicare and TRICARE, Medicare is the primary payer and TRICARE will normally pay the actual out-of-pocket costs incurred by the person. This rule prescribes TRICARE payment procedures and makes revisions to TRICARE rules to accommodate Medicare-eligible CHAMPUS beneficiaries.

DOD

FINAL RULE STAGE

---

17. • CHAMPUS/TRICARE; PARTIAL IMPLEMENTATION OF PHARMACY BENEFITS PROGRAM; IMPLEMENTATION OF NATIONAL DEFENSE AUTHORIZATION ACT MEDICAL BENEFITS FOR FISCAL YEAR 2001

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

10 USC 55; 5 USC 301

CFR Citation:

32 CFR 199

Legal Deadline:

Final, Statutory, April 1, 2001, Implements Public Law 106-398.

Provisions of act effective October 30, 2000, or 180 days thereafter.

Abstract:

This rule implements several sections of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001. The rule allows coverage of physical examinations for beneficiaries ages 5 through 11 that are required in connection with school enrollment; provides an additional 2-year period for survivors of deceased active-duty members to remain eligible for TRICARE medical and dental benefits at active-duty dependent rates; extends eligibility for medical and dental benefits to Medal of Honor recipients and their immediate dependents in the same manner as if the recipient were entitled to retired pay; partially implements the Pharmacy Benefits Program establishing revised copays and cost-shares for the prescription drug benefit; implements the TRICARE Senior Pharmacy Program by establishing a new eligibility for prescription drug benefits for Medicare-eligible retirees; allows a waiver of copayments, cost-shares, and deductibles for all Uniformed Services TRICARE eligible active duty family members residing with their TRICARE Prime Remote eligible Active Duty Service Member Sponsor within a TRICARE Prime Remote designated area until implementation of the TRICARE Prime Remote for Family Member Program or October 30, 2001, whichever is later; provides for the elimination of TRICARE Prime copayments for active-duty family members enrolled in TRICARE Prime; provides for the reimbursement of reasonable travel expenses for TRICARE Prime beneficiaries referred by a primary care provider to a specialty care provider who provides services over 100 miles away; and reduces the maximum amount which retirees, their family members, and survivors would be liable from $7,500 to $3,000. The Department is publishing this rule as an interim final rule in order to meet statutorily required effective dates.

Statement of Need:

The rule implements requirements of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001. In addition, because of the effect on the overall pharmacy program of the new statutorily required TRICARE Senior Pharmacy Program and the change in TRICARE Prime active duty dependent copayments, this rule also partially implements the Pharmacy Benefits Program.

Summary of Legal Basis:

The rule implements provisions of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 that were effective upon the date of enactment or a date within 180 days thereafter. Specifically, the rule implements the following sections of the Act:

Section 703, school required physicals, which was effective on the date of enactment;

Section 704, 2-year extension of benefits for survivors, which was effective on the date of enactment;

Section 706, benefits for Medal of Honor recipients, which was effective on the date of enactment;

Section 711, TRICARE Senior Pharmacy Program, which was effective April 1, 2001;

Section 722, that portion of TRICARE Prime Remote for Family Members that was effective on the date of enactment;

Section 752, elimination of copayments for active-duty dependents in TRICARE Prime, which the statute requires be implemented within 180 days;

Section 758, reimbursement of certain travel expenses for TRICARE Prime beneficiaries, which was effective on the date of enactment; and

Section 759, reduction of retiree catastrophic cap, which was effective on the date of enactment.

Alternatives:

The rule implements statutorily required provisions to expand TRICARE benefits. No other alternatives are applicable.

Anticipated Cost and Benefits:

For FY02, it is anticipated that costs for the programs covered by this rule will be about $900 million. Provides for coverage of physical examinations in connection with school enrollment; extends eligibility for medical and dental benefits; partially implements the Pharmacy Benefits Program; allows a waiver of copayments, cost-shares, and deductibles for members within a TRICARE Prime Remote designated area; provides for the elimination of TRICARE Prime copayments; provides for the reimbursement of reasonable travel expenses; and reduces the maximum amount which retirees, their family members, and survivors would be liable from $7,500 to $3,000.

Risks:

The rule implements statutorily required provisions to expand TRICARE benefits. No risk to the public is applicable.

DOD

18. • TRICARE; CIVILIAN HEALTH AND MEDICAL PROGRAM OF THE UNIFORMED SERVICES (CHAMPUS); ELIGIBILITY AND PAYMENT PROCEDURES FOR CHAMPUS BENEFICIARIES AGE 65 AND OVER

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

10 USC 55; 5 USC 301

CFR Citation:

32 CFR 199

Legal Deadline:

Final, Statutory, October 1, 2001, Implements section 712 of FY 2001 NDAA.

Abstract:

This rule implements section 712 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001. Section 712 extends TRICARE eligibility to persons age 65 and over who would otherwise have lost their TRICARE eligibility due to attainment of entitlement to hospital insurance benefits under Part A of Medicare. In order for these individuals to retain their TRICARE eligibility, they must be enrolled in the supplementary medical insurance program under Part B of Medicare. In general, in the case of medical or dental care provided to these individuals for which payment may be made under both Medicare and TRICARE, Medicare is the primary payer and TRICARE will normally pay the actual out-of-pocket costs incurred by the person. This rule prescribes TRICARE payment procedures and makes revisions to TRICARE rules to accommodate Medicare-eligible CHAMPUS beneficiaries. The Department is publishing this rule as an interim final rule in order to meet the statutorily required effective date.

Statement of Need:

This rule is necessary to comply with the statutory requirement. It implements procedures which help to ensure that military retirees do not incur substantial out-of-pocket expenses for necessary health care.

Summary of Legal Basis:

This rule is required by section 712 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (Pub. L. 106-398), as codified at section 1086(d) of title 10, United States Code.

Alternatives:

The rule implements statutorily required provisions to expand TRICARE benefits. No other alternatives are applicable.

Anticipated Cost and Benefits:

The provisions of this rule will affect an estimated 1.5 million beneficiaries. In most cases, these beneficiaries will have no out-of-pocket expenses for health care. For FY01 we expect to incur about $90 million in start-up costs, and we estimate FY02 health care and administration costs will be about $3 billion.

Risks:

The provisions of this rule will ensure that beneficiaries have a seamless coordination of benefits between two Federal entitlement programs. This coordination will minimize the risk of any personal liability or out-of-pocket costs on the part of the beneficiary when the service or supply is payable under both plans.

DEPARTMENT OF EDUCATION (ED)

Statement of Regulatory and Deregulatory Priorities

General

We support States, local communities, institutions of higher education, and others to improve education nationwide. Our roles include providing leadership and financial assistance for education to agencies, institutions, and individuals in situations in which there is a national interest; monitoring and enforcing Federal civil rights laws in programs and activities that receive Federal financial assistance; and supporting research, evaluation, and dissemination of findings to improve the quality of education.

To connect our customers to a "one-stop-shopping" center for information about our programs and initiatives, we instituted 1-800-USA-LEARN (1-800-872-5327). We also set up 1-800-4FED-AID (1-800-433-3243) for information on student aid; and we provide an on-line library of information on education legislation, research, statistics, and promising programs at the following Internet address:

http://www.ed.gov

More than 660,000 people take advantage of these resources every week. We have forged effective partnerships with customers and others to develop policies, regulations, guidance, technical assistance, and approaches to compliance. We have a record of successful communication and shared policy development with affected persons and groups, including parents, students, educators, representatives of State and local governments, neighborhood groups, schools, colleges, special education and rehabilitation service providers, professional associations, advocacy organizations, business, and labor.

In particular, we continue to seek greater and more useful customer participation in our rulemaking activities through the use of consensual rulemaking and new technology. If we determine that the development of regulations is absolutely necessary, we seek customer participation at all stages—in advance of formal rulemaking, during rulemaking, and after rulemaking is completed in anticipation of further improvements through statutory or regulatory changes. We have expanded our outreach efforts through the use of satellite broadcasts, electronic bulletin boards, and teleconferencing. For example, we invite comments on all proposed regulations through the Internet.

We are streamlining information collections, reducing burden on information providers involved in our programs, and making information maintained by us easily available to the public. We are looking into coordinating similar information collections across programs as one possible approach to reduce overlapping or inconsistent paperwork requirements. To the extent permitted by statute, we'll revise regulations to eliminate barriers that inhibit coordination across programs (such as by creating common definitions). This should help reduce the frequency of reports and eliminate unnecessary data requirements.

Recently, we have piloted two new Internet-based software applications, e-Application and e-Reports. These enable applicants, grantees, and grant teams to process applications and file performance reports online. We have received positive feedback from participants in the pilot programs. Our goal over time is to encourage applicants and grantees to make electronic commerce, or the process of conducting business over the Internet, their preferred method of doing business.

New Initiatives

The Secretary's initiatives include No Such Thing as a Vacation from Reading, our campaign to encourage families to read together during the summer to help school-aged children develop and strengthen reading skills and prevent summer fall-off. The Secretary has designed this initiative to counter the documented loss of reading skills that can take place when children do not practice through the extended vacation from school. No Such Thing as a Vacation from Reading is supported by our Partnership for Family Involvement in Education, which we initially formed to involve businesses, community organizations, faith-based organizations, foundations, schools, and other groups in building and supporting strong relationships between children and adults.

Also, at the National Summit on the 21st Century Workforce, the Secretary announced a partnership between our Department and the Department of Labor to enhance the quality of basic skills training in reading and math offered to young adults and adults through workforce training programs.

One of the Secretary's first initiatives, the management improvement initiative, has resulted in actions to address and close more than 300 audit and management recommendations. This initiative focuses on strengthening financial management, addressing audit deficiencies, modernizing student aid delivery and management, and reducing student loan default costs to taxpayers. In addition to recovering $65 million in student loan default costs through the use of a new data base, we have recovered almost $350 million in Department funds previously called into question by our Inspector General.

Principles for Regulating

Our Principles for Regulating determine when and how we will regulate. Through aggressive application of the following principles, we have eliminated outdated or unnecessary regulations and identified situations in which major programs could be implemented without any regulations or with only limited regulations:

We will regulate only if regulating improves the quality and equality of services to our customers, learners of all ages. We will regulate only if absolutely necessary and then in the most flexible, most equitable, and least burdensome way possible.

Whether to Regulate:

- When essential to promote quality and equality of opportunity in education.
- When a demonstrated problem cannot be resolved without regulation.
- When necessary to provide legally binding interpretation to resolve ambiguity.
- Not if entities or situations to be regulated are so diverse that a uniform approach does more harm than good.

How to regulate:

- Regulate no more than necessary.
- Minimize burden and promote multiple approaches to meeting statutory requirements.
- Encourage federally funded activities to be integrated with State and local reform activities.
- Ensure that benefits justify costs of regulation.
- Establish performance objectives rather than specify compliance behavior.
- Encourage flexibility so institutional forces and incentives achieve desired results.

Regulatory and Deregulatory Priorities for the Next Year

Making No Child Left Behind a Reality

Reauthorization of the Elementary and Secondary Education Act of 1965 will reflect President Bush's No Child Left Behind plan for reforming our public schools. Our priorities include amending existing regulations in 34 CFR chapter II (Office of Elementary and Secondary Education) to make the No Child Left Behind plan a reality and to implement various changes in statutes as they are enacted.

ED

PROPOSED RULE STAGE

19. REAUTHORIZATION OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965 (SECTION 610 REVIEW)

Priority:

Other Significant

Legal Authority:

20 USC 6301 to 8962

CFR Citation:

34 CFR 299

Legal Deadline:

None

Abstract:

These regulations would implement changes made by the reauthorization of the Elementary and Secondary Education Act of 1965. This action is a notice that ED is reviewing the regulations in 34 CFR chapter II under section 610 of the Regulatory Flexibility Act (5 U.S.C. 610). The purpose of this review is to determine if these regulations should be continued without change, or should be amended or rescinded, to minimize any significant economic impact upon a substantial number of small entities. We are requesting comment on the continued need for the regulations; the complexity of the regulations; the extent to which they overlap, duplicate, or conflict with other Federal, State, or local government rules; and the degree to which technology, economic conditions, or other relevant factors have changed since the regulations were promulgated.

Statement of Need:

These regulations may be necessary to implement new legislation. The Department is also completing its review of these regulations under section 610(c) of the Regulatory Flexibility Act. In developing any regulations, the Department will seek to reduce regulatory burden and increase flexibility to the maximum extent possible.

Summary of Legal Basis:

Anticipated legislation.

Alternatives:

In addition to implementing new legislation, the purpose of reviewing these regulations is to determine whether there are appropriate alternatives.

Anticipated Cost and Benefits:

Existing regulatory provisions may be eliminated or improved as a result of this review.

Risks:

These regulations would not address a risk to public health, safety, or the environment.

BILLING CODE 4000-01-S

DEPARTMENT OF ENERGY (DOE)

Statement of Regulatory and Deregulatory Priorities

The Department makes vital contributions to the Nation's welfare through its extraordinary scientific and technical capabilities in energy research, environmental remediation, and national security. The Department's mission is to:

- Foster a secure and reliable energy system that is environmentally and economically sustainable;
- Provide responsible stewardship of the Nation's nuclear weapons;
- Clean up the Department's facilities;
- Lead in the physical sciences and advance the biological, environmental and computational sciences; and,
- Provide premiere instruments of science for the Nation's research enterprise.

The Department of Energy's regulatory plan reflects the Department's continuing commitment to enhance safety, cut costs, reduce regulatory burden, and increase responsiveness to the public. While not primarily a major Federal regulatory agency, the Department's regulatory activities are essential to achieving its critical mission and to implementing major initiatives in the President's National Energy Plan.

Energy Efficiency Program for Consumer Products and Commercial Equipment

The Department's rulemaking activities, related to energy efficiency standards and determinations, have been categorized as high, medium, or low priority. These priorities were established with significant input from the public and are reflected in the rulemaking schedules set forth in The Regulatory Plan and the Unified Agenda of Federal Regulatory and Deregulatory Actions.

During the past year, the Department published final rules that revised existing energy efficiency standards for clothes washers and for residential water heaters. It is estimated that the revised standards will reduce energy consumption by an amount equivalent to 1.7 billion barrels of oil over the next 27 years. Once fully implemented, the revised standards also will reduce annual greenhouse gas emissions by an amount equal to that produced by 7.8 million cars and conserve enough water to meet the annual needs of 6.6 million households. The Department also published a final rule that set efficiency standards for certain types of commercial equipment that fall under the scope of the American Society for Heating, Refrigerating, and Air Conditioning Engineers (ASHRAE) Standard 90.1.

During the coming year, the Department expects to publish a final rule that would establish new energy efficiency standards for residential central air conditioners and heat pumps. The Department will also begin action to revise the existing statutory standards for residential furnaces, boilers and mobile home furnaces, for electric distribution transformers, and for commercial central air conditioners and heat pumps rated 65-240 kBtu's/hr. Additional information and timetables for these high priority actions can be found below.

The Department also expects to publish in the coming months final rules concerning test procedures for dishwashers, residential central air conditioners and heat pumps, electric distribution transformers, commercial warm air furnaces and air conditioning equipment, package boilers, and commercial water heaters. Information and timetables concerning these actions, other medium and low priority standards rulemakings, and other test procedures can be found in the Department's regulatory agenda, which appears elsewhere in this issue of the **Federal Register**.

Nuclear Safety Regulations

The Department is committed to openness and public participation as it addresses one of its greatest challenges—managing the environment, health, and safety risks posed by its nuclear activities. A key element in the management of these risks is to establish the Department's expectations and requirements relative to nuclear safety and to hold its contractors accountable for safety performance. The 1988 Price-Anderson Amendments Act revisions to the Atomic Energy Act of 1954 (AEA) provide for the imposition of civil and criminal penalties for violations of DOE nuclear safety requirements. As a result, new nuclear safety requirements were initiated with the publication of four notices of proposed rulemaking for review and comment in 1991. The Department's nuclear safety procedural regulations (10 CFR part 820) were published as a final rule in 1993. The Department's substantive nuclear safety requirements (10 CFR parts 830 and 835) were finalized in 2001 and 1998, respectively. The remaining action, 10 CFR part 834, Radiation Protection and the Environment, is scheduled for publication by the end of fiscal year 2002.

DOE—Energy Efficiency and Renewable Energy (EE)

PRERULE STAGE

20. ENERGY EFFICIENCY STANDARDS FOR RESIDENTIAL FURNACES, BOILERS, AND MOBILE HOME FURNACES

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

42 USC 6295

CFR Citation:

10 CFR 430

Legal Deadline:

Final, Statutory, January 1, 1994.

Abstract:

The Energy Policy and Conservation Act, as amended, establishes initial energy efficiency standard levels for most types of major residential appliances and generally requires DOE to undergo two subsequent rulemakings, at specified times, to determine whether the extant standard for a covered product should be amended.

This is the initial review of the statutory standards for furnaces, boilers and mobile home furnaces.

Statement of Need:

This rulemaking is required by statute. Experience has shown that the choice of residential appliances and commercial equipment being purchased by both builders and building owners is generally based on the initial cost rather than on life-cycle costs. Thus, the law requires minimum energy efficiency standards for appliances to eliminate inefficient appliances and equipment from the market.

Summary of Legal Basis:

The Energy Policy and Conservation Act (EPCA), as amended, establishes initial energy efficiency standard levels for most types of major residential

appliances and certain commercial equipment. The EPCA generally requires DOE to undergo rulemakings, at specified times, to determine whether the standard for a covered product should be made more stringent.

Alternatives:

The statute requires the Department to conduct rulemakings to review standards and to revise standards to achieve the maximum improvement in energy efficiency that the Secretary determines is technologically feasible and economically justified. In making this determination, the Department conducts a thorough analysis of the alternative standard levels, including the existing standard, based on criteria specified by statute. The process improvements that were recently announced (61 FR 36974, July 15, 1996) further enhance the analysis of alternatives in the appliance standards development process. For example, under this process, the Department will ask stakeholders and private sector technical experts to review its analyses of the likely impacts, costs and benefits of alternative standard levels. In addition, the Department will solicit and consider information on nonregulatory approaches for encouraging the purchase of energy efficient products.

Anticipated Cost and Benefits:

The specific costs and benefits for these rulemakings have not been established because the final standard levels have not been determined. Nevertheless, existing appliance standards are projected to save 23 quadrillion Btu's from 1993 to 2015, resulting in estimated consumer savings of $1.7 billion per year in 2000 and estimated annual emission reductions of 107 million tons of carbon dioxide and 280 thousand tons of nitrogen oxides in that year. Under the existing standards, the discounted energy savings for consumers are 2.5 times greater than the up-front price premium paid for the appliance.

Risks:

Without appliance standards, energy use will continue to increase with resulting damage to the environment caused by atmospheric emissions. Enhancing appliance energy efficiency reduces atmospheric emissions such as CO2 and NOx. Establishing standards that are too stringent could result in excessive increases in the cost of the product, possible reductions in product utility and may place an undue burden on manufacturers that could result in loss of jobs or other adverse economic impacts

RIN: 1904–AB09

DOE—EE

FINAL RULE STAGE

---

23. ENERGY EFFICIENCY STANDARDS FOR CENTRAL AIR CONDITIONERS AND HEAT PUMPS

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

42 USC 6295

CFR Citation:

10 CFR 430.32

Legal Deadline:

Final, Statutory, January 1, 1994.

Abstract:

The Energy Policy and Conservation Act, as amended, establishes initial energy-efficiency standard levels for most types of major residential appliances and generally requires DOE to undergo two subsequent rulemakings, at specified times, to determine whether the extant standard for a covered product should be amended.

This is the initial review of the statutory standards for central air conditioners and heat pumps.

Statement of Need:

This rulemaking is required by statute. Experience has shown that the choice of residential appliances and commercial equipment being purchased by both builders and building owners is generally based on the initial cost rather than on life-cycle cost. Thus, the law requires minimum energy efficiency standards for appliances to eliminate inefficient appliances and equipment from the market.

Summary of Legal Basis:

The Energy Policy and Conservation Act (EPCA), as amended, establishes initial energy efficiency standard levels for most types of major residential appliances and certain types of commercial equipment and generally requires DOE to undergo rulemakings, at specified times, to determine whether the standard for a covered product should be made more stringent.

Alternatives:

The statute requires DOE to conduct rulemakings to review standards and to revise standards to achieve the maximum improvement in energy efficiency that the Secretary determines is technologically feasible and economically justified. In making this determination, the Department conducts a thorough analysis of alternative standard levels, including the existing standard, based on criteria specified by statute. The process improvements that were announced (61 FR 36974, July 15, 1996) further enhance the analysis of alternative standards. For example, DOE will ask stakeholders and private sector technical experts to review its analyses of the likely impacts, costs, and benefits of alternative standard levels. In addition, the Department will solicit and consider information on nonregulatory approaches for encouraging the purchase of energy efficient products.

Anticipated Cost and Benefits:

The proposed energy efficiency standards for central air conditioners would provide significant energy savings to the Nation. Over a 25-year period more than 4 quadrillion Btu's of energy would be saved, equivalent to all the energy consumed by nearly 12 million Americans in a single year. These energy savings would also significantly reduce the emissions of air pollutants and greenhouse gases associated with electricity production by avoiding the emission of 60 million tons of carbon and 150 thousand tons of nitrogen oxide. Also, the standards would eliminate the need for the construction of at least 6 new 500-megawatt power plants.

Risks:

Without appliance efficiency standards, energy use will continue to increase with resulting damage to the environment caused by atmospheric emissions. Enhancing appliance energy efficiency reduces atmospheric emissions of carbon dioxide and nitrogen oxides. Establishing standards that are too stringent could result in excessive increases in the cost of the product, possible reductions in product utility and may place an undue burden on manufacturers that could result in a loss of jobs or other adverse economic impacts.

RIN: 1904–AA77

DOE—Departmental and Others (ENDEP)

FINAL RULE STAGE

24. RADIATION PROTECTION OF THE PUBLIC AND THE ENVIRONMENT

Priority:

Other Significant

Legal Authority:

42 USC 2201; 42 USC 7191

CFR Citation:

10 CFR 834

Legal Deadline:

None

Abstract:

This action would add a new 10 CFR 834 to DOE's regulations establishing a body of rules setting forth the basic requirements for ensuring radiation protection of the public and environment in connection with DOE nuclear activities. These requirements stem from the Department's ongoing effort to strengthen the protection of health, safety, and the environment from the nuclear and chemical hazards posed by these DOE activities. Major elements of the proposal included a dose limitation system for protection of the public; requirements for liquid discharges; reporting and monitoring requirements; and residual radioactive material requirements.

Statement of Need:

The purpose of this rule is to ensure that the Department's obligation to protect health and safety is fulfilled and to provide, if needed, a basis for the imposition of civil and criminal penalties consistent with the Price-Anderson Amendments Act of 1988. This action is consistent with the Department's commitment to the issuance of nuclear safety requirements using notice and comment rulemaking.

UMI

VOL 66 ISS 232 DEC 3 2001

Summary of Legal Basis:

Under the Atomic Energy Act of 1954, as amended, the Department of Energy has the authority to regulate activities at facilities under its jurisdiction. The Department is committed to honoring its obligation to ensure the health and safety of the public and workers affected by its operations and the protection of the environs around its facilities.

Alternatives:

The Department could continue to impose nuclear safety requirements through directives made applicable to DOE contractors through the terms of their contracts.

Anticipated Cost and Benefits:

The incremental costs of the proposed rules should be minimal because contractors are currently bound by comparable contractual obligations. Full compliance by contractors with nuclear safety standards will result in substantial societal benefits.

Risks:

This rulemaking should reduce the risk of nuclear safety problems by clarifying safety requirements applicable to DOE contractors and improving compliance.

BILLING CODE 6450-01-S

DEC 3 2001 UMI

DEPARTMENT OF HEALTH AND HUMAN SERVICES (HHS)

When it comes to serving the American people, the status quo just isn't good enough. That's why, when it comes to regulations, we need to move aggressively to streamline, revise and, where necessary, to cut those rules that keep us from fulfilling our most fundamental mission — enhancing the health and quality of life for every American.

Tommy G. Thompson

Statement of Regulatory Priorities

The Department of Health and Human Services (HHS) is responsible for a vast array of programs designed to protect and promote the health and the social and economic well being of the American public. These programs affect some of the Nation's most vulnerable populations, including children, the elderly and persons with disabilities. In one way or another, HHS programs and activities touch the lives of virtually every person in our country, citizens and non-citizens alike.

HHS' programs and activities include: Medicare, Medicaid, the State Children's Health Insurance Program (SCHIP), support for biomedical research, substance abuse and mental health treatment, assuring food safety, assuring safe and effective drugs and other medical products, financial assistance to low income families, Head Start, services to older Americans and direct health services delivery. These programs and activities are essential to the well-being of millions of Americans across our country—people of every age, in every location and in every walk of life.

To improve the administration and conduct of these programs and activities, Secretary Thompson has made it clear that the Department must operate under a culture of responsiveness, where listening and responding to those we serve—State, Local and Tribal governments, our business partners and stakeholders—is our cornerstone. For example, Secretary Thompson has launched a nationwide series of community listening sessions to give voice to persons receiving benefits from the Temporary Assistance for Needy Families (TANF) program. This will help HHS better meet the needs of those on the downside of advantage as they work to become productive members of our society, and to prepare for major policy discussions about TANF reauthorization that will occur this fiscal year.

In the same way, we will hold listening sessions to provide individuals across the country with an opportunity to offer personal input concerning their health needs, their problems with the existing system and their ideas for how to make the delivery of health care simpler, better and more efficient. From health care to child welfare to food safety, the Secretary is committed to widening communication between consumers, beneficiaries and Federal administrators.

Given the size and scope of the Department's responsibilities, effective program regulations are critical. Yet too often, excessive regulation can be more of a hindrance than a help. Programs become caught in a web of mandates, rules and paperwork. And those the programs were intended to serve fail to receive the help they need. Regulations do not exist for their own sake. They exist to help implement good policies. If they deter that implementation, they have to change—or be eliminated altogether.

Earlier this year, Secretary Thompson announced an initiative to reduce regulatory burdens. A major part of his initiative is to encourage a more rapid response to those affected by HHS rules and to listen to their concerns more closely. Consequently, the Department is establishing the Secretary's Advisory Committee on Regulatory Reform to provide recommendations regarding potential regulatory changes.

These changes will enable HHS programs to reduce burdens and costs associated with Departmental regulations, while at the same time maintaining or enhancing the effectiveness, efficiency, impact and accessibility of HHS programs. Over the next year, the Advisory Committee will hold public hearings, listen to public concerns and make recommendations for beneficial changes in four broad areas: health care delivery; health systems operations; biomedical and health research, and the development of pharmaceuticals and other medical products. While the Department will strive to reduce regulatory burdens on the public, to fulfill its mission, it must also issue new regulations to protect the public from health hazards, other threats and to improve the lives of all Americans.

FY 2002 Themes

The Secretary has adopted four overarching regulatory themes for FY 2002:

- Improving America's health and well-being;
- Protecting America's consumers;
- Improving the Department's ability to respond to emergencies and disasters; and
- Modernizing and simplifying the Department's programs.

The Department's regulatory priorities for this fiscal year will fall under these themes. It should be noted, however, that the Secretary's overall priorities go beyond these four regulatory categories, and include for example: Medicare modernization; disease prevention; long-term care improvement; children's health and development, and intra-Departmental management reform.

Improving America's Health and Well Being

The 20th century brought remarkable and unprecedented improvements in the health of the American people. We saw the infant mortality rate plummet and life expectancy increase by 30 years. The challenge for the 21st century is twofold. First, we must ensure that significant health advances continue. Second, we must make certain that quality of life applies throughout this extended life span for all Americans.

Over the years, it has become clear that individual health is closely linked to community health—the health of the communities and environments in which individuals live, work, and play. Consequently, the Secretary plans to work to improve not only the health of individuals, but also the health of America's communities.

Regulations in the Plan that address this theme include:

- A proposed rule to establish a Medicare prescription drug discount card program;
- A proposed rule establishing new conditions of coverage and performance measures for organ procurement organizations;
- A proposed rule that would improve services to long-term care facility residents;
- Medicare and Medicaid managed care rules that will enhance these programs for beneficiaries, potential beneficiaries, providers and States;
- A final rule designed to make it easier for certain prescription drugs to be purchased over-the-counter, thereby providing increased access to a number of drugs.

Protecting America's Consumers

Consumer safety is a major concern for the public and the Secretary. A

recent Institute of Medicine report highlighted the risks of medical errors in the health delivery system. Similarly, ensuring a safer food supply is paramount. Every year, tens of thousands of Americans become sick and many die from food borne pathogens. The size of vulnerable populations (e.g., the elderly and those with compromised immune systems) is growing. The Secretary is especially interested in identifying opportunities that exist to make patient care and the food supply safer.

Regulations under this theme include:

- A proposed rule controlling the manufacturing and packaging of dietary supplements;
- A final rule to require that amounts of trans fatty acids be included in food labeling because such information has significant potential to reduce the risk of coronary heart disease;
- Several proposed rules designed to reduce the frequency of medical errors associated with prescription drug use; and
- Several regulations addressing the importation and re-importation of foods and drugs.

Improving the Ability of HHS to Respond to Emergencies and Disasters

HHS is responsible for directing and coordinating the medical and public health response to natural disasters, terrorism, major accidents and other events that can result in mass casualties. Timely and well-focused responses to such events are key to limiting mortality and morbidity. The Department and its partners must be able to react quickly, and tailor responses to the specific emergency without being encumbered by unnecessary or counter productive activities.

Regulations in the Plan that are designed to help ensure that HHS has appropriate authority and flexibility to address emergencies and disasters include:

- A final rule on new procedures for establishing the efficacy of a new drug or biologic product designed to combat chemical or biological terrorism, (e.g. new anti-viral drugs to treat smallpox);
- A proposed rule to permit use of an investigational medical product during a potential chemical or biological terrorism event;
- A proposed rule issued by the Centers for Disease Control and Prevention to update provisions dealing with the spread of communicable disease; and
- A set of proposed rules that will implement Administration sponsored legislation dealing with bioterrorism. These rules would address, among other things: biological agents that could pose a threat to national security; detention and recall of foods presenting a serious health threat; tampering with food products; record keeping regarding the distribution of foods, food-shipment importation procedures and related matters.

Modernizing and Simplifying the Department's Programs

To ensure that beneficiaries and taxpayers continue to receive the most effective and highest quality services, we need to streamline program requirements and bring openness and responsiveness into the regulatory process. Payment systems and regulatory requirements need to be modernized to reflect the significant advances in today's changing health care delivery system.

While the impressive improvements made in health information technology have helped make the American health care system the best in the world, new and updated requirements are needed so that the health care system can capture the full benefit of these technological advances. At the same time, patients are concerned about unwanted and invasive access to their health records. Rules are needed to ensure that all Americans have confidence that their medical records will remain private.

Most of the regulations under this theme are associated with either Medicare reimbursement issues, or implementation of provisions under the Health Insurance Portability and Accountability Act of 1996 (HIPAA). Priority Medicare reimbursement rules include:

- A new prospective payment scheme for long-term care hospitals;
- A fee schedule for ambulance services; and
- A variety of other prospective payment revisions and updates.

With regard to HIPAA, the law requires the Secretary to adopt a series of regulations. While some of these have already been issued, others are expected during FY 2002. These include regulations addressing:

- Security of information held by providers;
- National provider and employer ID's; and
- Modifications to existing electronic transaction requirements.

Public Comments and Reactions

The Secretary welcomes comments not only on specific regulations as they are published in the **Federal Register**, but also on the themes he has established for 2002 and the regulatory priorities noted above. The regulations we issue affect a wide array of health care consumers, providers and others, and the Secretary wants to hear from those affected by the rules most directly. Comments, as well as ideas and specific suggestions for regulatory improvements and initiatives should be sent to: The Honorable Tommy G. Thompson, Secretary of Health and Human Services, Attention Ann Agnew, Executive Secretary to the Department, Room 603, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

Listing of Priority Regulations by Theme

1. Improving America's Health and Well Being

- Program to Endorse Prescription Drug Discount Programs
- Organ Procurement Organizations Condition for Coverage
- Requirement for Paid Feeding Assistants in Long-Term Care Facilities
- Additional Criteria and Procedures for Classifying Over-the-Counter Drugs as Generally Recognized as Safe and Effective and Not Misbranded
- Medicaid Managed Care
- Modification to Medicare Managed Care Rules Based on Provisions of BIPA and Technical Corrections

2. Protecting America's Consumers

- Current Good Manufacturing Practice in Manufacturing, Packing or Holding Dietary Ingredients and Dietary Supplements
- Food Labeling: Trans Fatty Acids in Nutrition Labeling, Nutrient Content Claims, and Health Claims;
- Control of Salmonella Enteritidis in Shell Eggs During Production and Retail
- Marking Requirements for and Prohibitions on the Reimportation of Imported Food Products That Have Been Refused Admission into the United States
- Foreign Establishment Registration and Listing
- Labeling for Human Prescription Drugs, Revised Format

- Safety Reporting Requirements for Human Drug and Biological Products
- CGMPs for Blood and Blood Components: Notification of Consignees and Transfusion Recipients Receiving Blood and Blood Components at Increased Risk of Transmitting HCV (Lookback)
- Bar Code Label Requirements for Human Drug Products

3. Improving the Department's Ability to Respond to Emergencies and Disasters

- Implementing the Bioterrorism Prevention Response Act of 2001
- Control of Communicable Diseases
- Efficacy Evidence Needed for Products to be Used Against Toxic Substances When Human Studies are Unethical
- Exception from General Requirements for Informed Consent; Request for Comments and Information

4. Modernizing and Simplifying the Department's Programs, Rules and Systems

HIPAA Administrative Simplification Regulations

- Modifications to the Standards for Privacy of Individually Identifiable Health Information
- Health Insurance Reform: Standards for Electronic Claims Attachments
- Health Insurance Reform: Modifications to Standards for Electronic Transactions
- Revisions to Transaction and Code Set Standards for Electronic Transactions
- Health Insurance Reform: Standard Unique Health Care Provider Identifier
- National Standard Employer Identifier
- Security Standards
- National Standard for Identifiers of Health Plans

Payment Modernization Rules

- Prospective Payment System for Long Term Care Hospitals for FY 2003
- Fee Schedule for the Payment of Ambulance Services and Revisions to the Physician's Certification Requirements for Coverage of Non-emergency Ambulance Services
- Home Health Prospective Payment System Refinements
- Home Health Prospective Payment System Rate Update for FY 2003
- Hospital Inpatient Prospective Payment System for FY 2003
- Hospital Outpatient Prospective Payment System for CY 2003
- Revisions to Payment Policies Under the Physician Fee Schedule for CY 2003
- Hospital Inpatient Rehabilitation Prospective Payment System FY 2003
- Tribal Self-Governance Amendments
- Prospective Payment System and Consolidated Billing for Skilled Nursing Facilities-Update
- Modification of the Medicaid Upper Payment Limit for Inpatient Hospital Services and Outpatient Hospital Services

---

HHS—Office of the Secretary (OS)

PROPOSED RULE STAGE

25. • MODIFICATIONS TO STANDARDS FOR PRIVACY OF INDIVIDUALLY IDENTIFIABLE HEALTH INFORMATION

Priority:

Other Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect State, local or tribal goverments.

Legal Authority:

42 USC 1320d-2; 42 USC 1320d-3; PL 104-191, sec 262; PL 104-191, sec 264

CFR Citation:

45 CFR 160; 45 CFR 164

Legal Deadline:

None

Abstract:

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) required the Department of Health and Human Services (the Department) to issue standards for health plans, health care clearinghouses, and certain health care providers to protect the privacy of individually identifiable health information. The Department published these standards, entitled "Standards for Privacy of Individually Identifiable Health Information," (the Privacy Rule) as a final rule on December 28, 2000. The final rule was effective on April 14, 2001. The proposed rule would amend the Privacy Rule to, among other things, support the delivery of the highest quality of health care to patients and address concerns regarding the workability of the rule for entities subject to its requirements.

Statement of Need:

The Department received many inquires from Congress, industry, and private citizens about how the rule will operate, and concerns over the complexity and workability of the rule. On July 6, 2001, in response to these and other comments, the Department issued guidance to address some of the misunderstandings regarding the rule, and to provide clarifications on various provisions. The Department has preliminarily determined that some modifications to the Privacy Rule would be appropriate. Entities covered by the Privacy Rule have until April 14, 2003 to come into compliance (and until April 14, 2004 for small health plans). Timely action is needed so that covered entites can implement these modifications to meet these deadlines with minimal cost and disruption.

Summary of Legal Basis:

Section 262 of the Health Insurance Portability and Accountability Act of 1996, adding Section 1174 to the Social Security Act (42 U.S.C. 1320d-3), generally provides that the Department, in reference to the privacy and other standards, "shall review the standards ... and shall adopt modifications to the standards (including additions to the standards), as determined appropriate .... Any addition or modification to a standard shall be completed in a manner which minimizes the disruption and cost of compliance."

Alternatives:

Modifications to the Privacy Rule requires rulemaking. Therefore, there are no alternatives to regulatory action.

Anticipated Cost and Benefits:

The anticipated cost and benefits are not known at this time because decisions have not been made regarding specific changes in the Privacy Rule. The options being considered to address workability are expected to reduce cost and to remove barriers to access to or the quality of health care.

Risks:

Not applicable.

Timetable:

Action	Date	FR Cite

HHS—OS

26. • IMPLEMENTING THE BIOTERRORISM PREVENTION AND RESPONSE ACT OF 2001

Priority:

Other Significant

Legal Authority:

Not Yet Determined

CFR Citation:

None

Legal Deadline:

None

Abstract:

A variety of regulations will be required once the Bioterrorism Prevention and Response Act has been signed into law. These regulations would among other things address: biological agents that have the potential to pose a national security threat; detention and recall of foods presenting a serious health threat; tampering with food products; recordkeeping regarding the distribution of foods, food-shipment importation procedures and related matters. For example, laboratories possessing certain biological agents would have to adhere to strict safety and security provisions.

Statement of Need:

The Secretary has testified before Congress that, while the Nation is currently prepared to respond to a biological attack, we must accelerate current efforts to build the strongest, most coordinated capacity possible for responses to acts of terrorism involving biological agents. He stressed that a strong and flexible public health infrastructure is the best defense against any disease outbreak.

Summary of Legal Basis:

Congressional enactment of the Bioterrorism Prevention and Response Act of 2001 is required.

Alternatives:

Not applicable.

Anticipated Cost and Benefits:

Not applicable.

Risks:

Regulations implementing legislation to protect the health of citizens against biological terrorism would advance the development, organization and enhancement of public health prevention systems and tools. The magnitude of the risks addressed by such systems and tools is at least as great as the other risk reduction efforts within HHS's jurisdiction.

Timetable:

HHS—Centers for Disease Control and Prevention (CDC)

PROPOSED RULE STAGE

---

27. CONTROL OF COMMUNICABLE DISEASES

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

42 USC 216; 42 USC 243; 42 USC 264; 42 USC 271

CFR Citation:

42 CFR 70; 42 CFR 71

Legal Deadline:

None

Abstract:

This proposal updates existing regulations related to prevention of the introduction, transmission, or spread of communicable diseases from foreign countries to the U.S. and from State to State. The regulation addresses the: process by which persons infected with, or who have been exposed to, modern communicable diseases should be quarantined; surveillance of quarantined persons; and requirements for carriers (e.g., airlines, etc.) to maintain passenger manifests for a determined period of time.

Statement of Need:

The quarantine of persons believed to be infected with communicable diseases is a long-term prevention measure that has been used effectively to contain the spread of disease. As diseases evolve due to the natural occurrences or bioterrorist events, it is important to assure procedures reflect new threats and uniform ways to contain them.

The existing regulations are outdated and do not address communicable diseases that currently pose a substantial public health threat.

Summary of Legal Basis:

USC 42 section 264 authorizes the Surgeon General, with the approval of the Secretary, to make and enforce regulations as are necessary to prevent the introduction, transmission, or spread of communicable diseases from foreign countries into the States or possessions, or from one State or possession into any other State or possession.

Alternatives:

In the absence of this regulation, uniform application of procedures for the quarantine of individuals exposed to or infected with a communicable disease would be unavailable.

Anticipated Cost and Benefits:

It is anticipated that there will be a cost to carriers to maintain passenger manifests for an extended period of time. However, these costs are undetermined.

Risks:

This rule would allow for improvements to existing quarantine

procedures and clarify due process procedures.

HHS—Food and Drug Administration (FDA)

PROPOSED RULE STAGE

28. SAFETY REPORTING REQUIREMENTS FOR HUMAN DRUG AND BIOLOGICAL PRODUCTS

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

42 USC 216; 42 USC 241; 42 USC 242a; 42 USC 262; 42 USC 263; 42 USC 263a-n; 42 USC 264; 42 USC 300aa; 21 USC 321; 21 USC 331; 21 USC 351 to 353; 21 USC 355; 21 USC 360; 21 USC 360b-j; 21 USC 361a; 21 USC 371; 21 USC 374; 21 USC 375; 21 USC 379e; 21 USC 381

CFR Citation:

21 CFR 310; 21 CFR 312; 21 CFR 314; 21 CFR 600; 21 CFR 320; 21 CFR 601; 21 CFR 606

Legal Deadline:

None

Abstract:

This regulation is one component of the Secretary's initiative to reduce medical errors. The proposed rule would amend the expedited and periodic safety reporting regulations for human drugs and biological products to revise certain definitions and reporting formats as recommended by the International Conference on Harmonisation and to define new terms; to possibly add to or revise current reporting requirements; to consider revising certain reporting time frames; and to suggest other revisions to these regulations to enhance the quality of safety reports received by FDA.

Statement of Need:

FDA currently has safety reporting requirements in section 21 CFR 312.32 for sponsors of investigational drugs for human use. FDA also has safety reporting requirements in sections 21 CFR 310.305, 314.80, 314.98 and 600.80 for applicants, manufacturers, packers and distributors of approved human drug and biological products. FDA has undertaken a major effort to clarify and revise these regulations to improve the management of risks associated with the use of these products. For this purpose, the agency is proposing to implement certain definitions and reporting formats and standards recommended by the International Conference on Harmonisation of Technical Requirements for Registration of Pharmaceuticals for Human Use (ICH) to provide more effective and efficient safety reporting to regulatory authorities worldwide. Currently, the United States, European Union, and Japan require submission of safety information for marketed drug and biological products using different reporting formats and different reporting intervals.

Summary of Legal Basis:

The agency has broad authority under sections 505 and 701 of the Federal Food, Drug, and Cosmetic Act (the Act) (21 U.S.C. 355 and 371) and section 351 of the Public Health Service Act (42 U.S.C. 262) to monitor the safety of drug and biological products for human use.

Alternatives:

The alternatives to the proposal include not amending our existing safety reporting requirements. This alternative would be inconsistent with FDA's efforts to harmonize its safety reporting requirements with international initiatives and with its mission to protect public health.

Anticipated Cost and Benefits:

Manufacturers of human drug and biological products currently have limited incentives to invest capital and resources in standardized global safety reporting systems because individual firms acting alone cannot attain the economic gains of harmonization. This proposed rule would harmonize FDA's safety reporting requirements with certain international initiatives, thereby providing the incentive for manufacturers to modify their safety reporting systems. Initial investments made by manufacturers to comply with the rule are likely to ultimately result in substantial savings to them over time.

The impact on industry includes costs associated with revised safety reporting and recordkeeping requirements. The benefits of the proposed rule are public health benefits and savings to the affected industries. The expected public health benefits would result from the improved timeliness and quality of the safety reports and analyses; making it possible for health care practitioners and consumers to expedite corrective actions and to make more informed decisions about treatments. Savings to the affected industry would accrue from more efficient allocation of resources resulting from international harmonization of the safety reporting requirements.

Abstract:

The Food and Drug Administration (FDA) announced in an advance notice of proposed rulemaking (ANPRM) of February 6, 1997 (62 FR 5700), its plans to consider developing regulations establishing current good manufacturing practices (CGMP) for dietary supplements and dietary ingredients. The ANPRM was published in order for FDA to solicit comments on whether it should initiate action to establish CGMP regulations and if so, what constitutes CGMP for these products. FDA announced that this effort was in response to the section of the Federal Food, Drug, and Cosmetic Act (the Act) that provides authority to the Secretary of Health and Human Services to promulgate CGMP regulations and to a submission from the dietary supplement industry asking that FDA consider an industry-proposed CGMP framework as a basis for CGMP regulations. The ANPRM also responds to concerns that such regulations are necessary to ensure that consumers are provided with dietary supplement products which have not been adulterated as a result of manufacturing, packing, or holding; which have the identity and provide the quantity of dietary ingredients declared in labeling; and which meet the quality specifications that the supplements are represented to meet.

Statement of Need:

FDA intends to publish a proposed rule to establish current good manufacturing practices (CGMP) for dietary supplements and dietary ingredients for several reasons. First, FDA is concerned that some firms may not be taking appropriate steps during the manufacture of dietary supplements and dietary ingredients to ensure that products are not adulterated as a result of manufacturing, packing, or holding. There have been cases of misidentified ingredients harming consumers using dietary supplements. FDA is also aware of products that contain potentially harmful contaminants because of apparently inadequate manufacturing controls and quality control procedures. The agency believes that a system of CGMP is the most effective and efficient way to ensure that these products will not be adulterated during manufacturing, packing, or holding.

Summary of Legal Basis:

If CGMP regulations were adopted by FDA, failure to manufacture, pack, or hold dietary supplements or dietary ingredients under CGMP regulations would render the dietary supplement or dietary ingredients adulterated under section 402(g) of the Act.

Alternatives:

The two principal alternatives to comprehensive CGMP are end-product testing and Hazard Analysis Critical Control Points (HACCP). In the ANPRM, FDA asked for public comment on approaches to ensure that dietary supplements and dietary ingredients are not adulterated during the manufacturing process. The agency asked whether HACCP may be a more effective approach than a comprehensive CGMP, and whether different approaches may be better able to address the needs of the broad spectrum of firms that conduct one or more distinct operations, such as the manufacture of finished products, or solely the distribution and sale of finished products at the wholesale or retail level. FDA will consider the information it received in response to the ANPRM and from other sources, such as public meetings and small business outreach meetings, in its consideration of whether CGMP or other approaches are most appropriate.

Anticipated Cost and Benefits:

A comprehensive CGMP (or other system of ensuring that dietary supplements and dietary ingredients are not adulterated during manufacturing, packing, or holding) would permit more effective and efficient oversight by Federal, State, and local governments. It would place primary responsibility for ensuring that these products are not adulterated during manufacturing, packing, or holding on the manufacturer, packer or holder by requiring that they implement a system to control their processes. FDA anticipates that costs to industry generated by implementing a comprehensive manufacturing process, whether CGMP or other plan, would be offset in four ways: (1) by reducing the amount of supplement-associated illnesses or adverse events; (2) by increasing public confidence in dietary supplements marketed in the United States; (3) by enabling U.S. supplements companies to compete more effectively in the world market; and (4) by decreasing the number of future product recalls.

Risks:

Any potential for consumers to be provided adulterated (e.g., contaminated with industrial chemicals, pesticides, microbial pathogens, or dangerous misidentified ingredients or toxic components of ingredients) products must be considered a very serious risk because of the possibility that such contamination could be widespread, affecting whole segments of the population, causing some severe long-term effects and even loss of life. Dietary supplements are used by a large segment of the American public. Moreover they are often used by segments of the population that are particularly vulnerable to adulterated products, such as the elderly, young children, pregnant and nursing women, and persons who may have serious illnesses or are taking medications that may adversely interact with dietary supplements. FDA has adopted or proposed manufacturing controls for a number of foods and commodities that present potential health hazards to consumers if not processed properly, including seafood, juice products, and fruits and vegetables and it is appropriate that FDA consider whether manufacturing controls are necessary to assure consumers that dietary supplements are not adulterated during the manufacturing, packing, or holding process.

Abstract:

The President's Council on Food Safety was established in August 1998 to improve the safety of the food supply through science-based regulations and well-coordinated inspection, enforcement, research, and education programs. The Council has identified egg safety as one component of the public health issue of food safety that warrants immediate Federal, interagency action.

In July 1999, the Food and Drug Administration (FDA) and the Food Safety Inspection Service (FSIS) committed to developing an action plan to address the presence of salmonella enteritidis (SE) in shell eggs and egg products using a farm-to-table approach. FDA and FSIS held a public meeting on August 26, 1999, to obtain stakeholder input on the draft goals, as well as to further develop the objectives and action items for the action plan. The Egg Safety Action Plan was announced on December 11, 1999. The goal of the Action Plan is to reduce egg-related SE illnesses by 50 percent by 2005 and eliminate egg-related SE illnesses by 2010.

The Egg Safety Action Plan consists of eight objectives covering all stages of the farm-to-table continuum as well as support functions. On March 30, 2000 (Columbus, OH), April 6, 2000 (Sacramento, CA), and July 31, 2000 (Washington, DC), joint public meetings were held by FDA and FSIS to solicit and discuss information related to the implementation of the objectives in the Egg Safety Action Plan.

In accordance with discussions at the public meetings, FDA intends to publish a proposed rule to require that shell eggs be produced under an SE risk reduction plan that is designed to prevent transovarian SE from contaminating eggs at the farm during production.

Because egg safety is a farm-to-table effort, FDA intends to include in its proposal certain provisions of the 1999 Food Code that are relevant to how eggs are handled, prepared, and served at certain retail establishments. In addition, the agency plans to propose specific requirements for certain retail establishments that serve populations most at-risk of egg-related illness (i.e., the elderly, children, and the immunocompromised).

Statement of Need:

FDA is proposing regulations as part of the farm-to-table safety system for eggs outlined by the President's Council on Food Safety in its Egg Safety Action Plan to require that shell egg producers implement SE risk reduction plans at the farm and that retail establishments institute certain egg-relevant provisions of the 1999 Food Code. FDA intends to propose these regulations because of the continued reports of outbreaks of foodborne illness and death caused by SE that are associated with the consumption of shell eggs. The agency believes these regulations can have significant effect in reducing the risk of illness from SE-contaminated eggs and will contribute significantly to the interim public health goal of the Egg Safety Action Plan of a 50 percent reduction in egg-related SE illness by 2005.

Summary of Legal Basis:

FDA's legal basis for the proposed rule derives in part from sections 402(a)(4), and 701(a) of the Federal Food, Drug and Cosmetic Act (the Act)((21 U.S.C. 342(a)(4) and 371(a)). Under section 402(a)(4) of the Act, a food is adulterated if it is prepared, packed, or held in insanitary conditions whereby it may have been contaminated with filth or may have been rendered injurious to health. Under section 701(a) of the Act, FDA is authorized to issue regulations for the efficient enforcement of the Act. FDA also intends to rely on section 361 of the Public Health Service Act (42 U.S.C. 264), which gives FDA authority to promulgate regulations to control the spread of communicable disease.

Scientific reports in published literature and data gathered from existing voluntary egg quality assurance programs indicates that measures designed to prevent SE from entering a poultry house (e.g., rodent/pest control, use of chicks from SE-monitored breeders, and biosecurity programs) can be very effective in reducing SE-contamination of eggs and related foodborne illness.

Moreover, the use of shell eggs or egg products that have been treated to destroy SE or thorough cooking of untreated eggs in retail establishments will significantly contribute to the reduction of egg-related SE illnesses.

Alternatives:

There are several alternatives that the agency intends to consider in the proposed rule. The principal alternatives include: (1) no new regulatory action; (2) alternative testing requirements; (3) alternative on-farm mitigation measures; (4) alternative retail requirements; and (5) HACCP. FDA will consider the information that it receives in response to the public meetings in its consideration of the various alternatives.

Anticipated Cost and Benefits:

The benefits from a regulation designed to reduce the risk of SE contamination on the farm and at retail derive from better farming practices and safer handling and cooking of eggs at the retail level. While numerical estimates of benefits currently are not yet available, FDA believes that the benefits of the proposed rule will be significant. FDA plans to estimate benefits using data from the United

States Department of Agriculture (USDA) Risk Assessment for SE in Eggs, the Layers '99 study of on-farm SE controls, and from other available information on the effectiveness of SE controls.

The costs of the proposed rule are undetermined at this time.

Risks:

Any potential for contamination of eggs with SE and its subsequent survival or growth must be considered a very serious risk because of the possibility that such contamination, survival and growth could cause widespread foodborne illness, including some severe long-term effects and even loss of life. FDA made a decision to publish a proposed rule to require that shell egg producers have on-farm SE risk reduction plans and that retail establishments institute certain egg-relevant provisions of the 1999 Food Code based on a considerable body of evidence, literature and expertise in this area. In addition, this decision was also based on the USDA risk assessment on SE in shell eggs and egg products and the identified public health benefits associated with controlling SE in eggs at the farm and retail levels.

31. • EXCEPTION FROM GENERAL REQUIREMENTS FOR INFORMED CONSENT; REQUEST FOR COMMENTS AND INFORMATION

Priority:

Other Significant

Legal Authority:

21 USC 321; 21 USC 346; 21 USC 346a; 21 USC 348; 21 USC 352; 21 USC 353; 21 USC 355; 21 USC 360; 21 USC 360bbb; 21 USC 360c; 21 USC 360d; 21 USC 360e; 21 USC 360f; 21 USC 360h; 21 USC 360i; 21 USC 360j; 21 USC 371; 21 USC 379e; 21 USC 381; 42 USC 241; 42 USC 262; 42 USC 263b-263n

CFR Citation:

21 CFR 50.23(e)

Legal Deadline:

None

Abstract:

FDA is proposing to add a new exception from the general requirement for informed consent to address situations associated with preparedness and response to chemical and biological terrorism, when investigational products regulated by FDA need to be used.

Statement of Need:

The agency is proposing this action because it is concerned that during a potential chemical or biological terrorism event, delaying the use of investigational products may threaten the lives of subjects. In many instances, there may also be others who have been exposed to or be at risk of exposure to a dangerous chemical or biological agent.

Summary of Legal Basis:

FDA believes the statutory authority provided in the Federal Food, Drug, and Cosmetic Act (the Act) would permit a limited exception to obtaining informed consent for chemical or biological terrorism events. The Act specifically states when an exception from informed consent is permissible. The statutory provision governing informed consent for investigational devices 520(g)(3)(D) of the Act, provides that informed consent is required unless the clinical investigator determines in writing that: (1) there exists a life-threatening situation involving the human subject of such testing which necessitates the use of such device; (2) it is not feasible to obtain informed consent from the subject; and (3) there is not sufficient time to obtain such consent from his representative. Further, a licensed physician uninvolved in the testing must agree with this three-part determination in advance of using the product unless immediate use of the device is required to save the life of the human subject of such testing and there is not sufficient time to obtain such concurrence. The statute states that the exceptions to requiring informed consent are subject to such conditions as the Secretary may prescribe. This proposed rule is not required by statute or court order.

Alternatives:

The only other option open to the agency is to do nothing. FDA believes that this option is not acceptable because it could result in improper treatment or no treatment for persons with serious illnesses because the health professionals could not use these investigational products in absence of informed consent.

Anticipated Cost and Benefits:

The minimal burdens imposed by this rule are offset by the fact that, in the absence of this rule, the sponsor would be required to obtain informed consent, which is just as burdensome, if not more so. The rule would permit use of investigational products without

which patients' lives might be threatened. Because of uncertainty about the nature or extent of any chemical or biological terrorism event, FDA cannot estimate the extent of the benefits of this rule.

Risks:

The primary risk addressed by this rule is the risk that patients may go untreated or may be improperly treated because health professionals could not use an investigational product in the absence of informed consent. FDA cannot determine the extent of this risk without knowing the nature or extent of any chemical or biological terrorism event.

32. • BAR CODE LABEL REQUIREMENTS FOR HUMAN DRUG PRODUCTS

Priority:

Other Significant. Major under 5 USC 801.

Legal Authority:

21 USC 321; 21 USC 331; 21 USC 351 to 353; 21 USC 355; 21 USC 358; 21 USC 360; 21 USC 360b; 21 USC 360gg to 360ss; 21 USC 371; 21 USC 374; 21 USC 379e; 42 USC 216; 42 USC 241; 42 USC 262; 42 USC 264

CFR Citation:

21 CFR 201.25; 21 CFR 601.67

Legal Deadline:

None

Abstract:

This regulation is one component of the Secretary's initiative to reduce medical errors. The proposal would require human drug products and biological products to have a bar code. The bar code would contain certain information about the product and, when used in conjunction with bar code scanners and computer equipment, will help reduce the number of medication errors.

Statement of Need:

In 1999, the Institute of Medicine (IOM) report titled, To Err Is Human: Building a Safer Health System, cited studies and articles estimating that between 44,000 and 98,000 Americans may die each year due to medical mistakes made by health care professionals, with most deaths attributable to medication errors. The report also indicated that, between 1983 and 1993, the medication error rate leading to a patient's death may have increased by over 2.5 times. While later medical articles have questioned the IOM's estimates, other studies have indicated that, regardless of the medication error rate, many medication errors are or were preventable.

Medication errors are a significant economic cost to the United States. An article published in 1995 estimated the direct cost of preventable drug-related mortality and morbidity to be $76.6 billion, with drug-related hospital admissions accounting for much of the cost. The authors suggested that indirect costs, such as those relating to lost productivity, might be two to three times greater than the direct costs, making the total cost of all preventable, drug-related mortality and morbidity range from $138 to $182 billion. Another article, published in 2001, used updated cost estimates derived from current medical and pharmaceutical literature to revise the $76.6 billion estimate to exceed $177.4 billion; hospital admissions accounted for $121.5 billion in costs, and long-term care admissions accounted for another $32.8 billion.

Various organizations and health professional associations have advocated the use of bar codes as a method for reducing medication errors. For example, if a health professional could use a bar code scanner to compare the bar code on a human drug product to a specific patient's drug regimen, the health professional would be able to verify that the patient is receiving the right drug, at the right dose, and at the right time. Most organizations and associations have recommended that the bar code contain the drug's National Drug Code number (a unique numerical code identifying the manufacturer, product, and package size or type), lot number, and expiration date.

Thus, FDA is proposing to require human drug products and biological products to be bar coded. The bar code would contain certain information about the product, such as its National Drug Code number. The agency is considering whether to require other information, such as the drug's expiration date and lot number, to make it easier to identify expired drugs and recalled drugs that may not be safe and effective for use. The bar code, when used in conjunction with bar code scanners and computer equipment, will enable health professionals to decrease the medication error rate.

Summary of Legal Basis:

Section 502 of the Federal Food, Drug, and Cosmetic Act (the Act) considers a drug to be misbranded unless it bears a label containing (in part) the name of the manufacturer and the drug's name (see sections 502(b) and 502(e)(1)(A) of the Act).

Section 501(a)(1) of the Act considers a drug to be adulterated if, among other things, the methods used in, or the facilities and controls used for, its manufacture, processing, packing, or holding do not conform to or are not operated or administered in conformity with current good manufacturing practice to assure that the drug meets the requirements of the Act as to safety and "has the identity and strength, and meets the quality and purity characteristics, which it purports or is represented to possess...."

Section 701(a) of the Act, in turn, authorizes FDA to issue regulations for the efficient enforcement of the Act.

A bar code requirement for human drug products and biological products would be consistent with, and aid in the efficient enforcement of, sections 501 and 502 of the Act. For example, if the bar code merely contained the drug's National Drug Code number, the bar code would identify the manufacturer and the drug, and this would be consistent with sections 502(b) and 502(e)(1)(A) of the Act. If the bar code contained other information, such as lot

number and expiration date (pieces of information required under FDA's good manufacturing practice regulations (see 21 CFR 211.130 and 211.137), this would be consistent with section 501(a)(1) of the Act.

Therefore, using its general rulemaking authority at section 701(a) of the Act, the agency finds that it has sufficient authority to propose requiring human drug products to have a bar code.

Alternatives:

FDA considered a voluntary bar coding program, but this would be akin to a "no action" alternative as many products are not bar coded or not coded in a manner that would help health professionals. A voluntary bar coding system might also lead to the adoption of incompatible bar coding formats on human drug products and biological products, thereby deterring hospitals and health care professionals from buying bar code scanners and computer equipment.

FDA also considered decreasing the amount of information it would require on the bar code. This would decrease bar coding costs to drug manufacturers and labelers, but also decrease the usefulness of the bar code and its ability to reduce medication errors.

Anticipated Cost and Benefits:

FDA is continuing to examine the potential costs and benefits associated with bar coding. The anticipated costs may vary greatly depending on the amount of information required in a bar code and the products to be bar coded. FDA's preliminary estimate is that the rule would cost between $500 million and $1.4 billion over a 10-year period; the wide range in the cost estimate reflects the agency's uncertainty as to the costs associated with various pieces of information that might go into a bar code, whether all or some human drug products and biological products are bar coded, and possible changes in labeling operations.

The rule's principal benefit would be a reduction in the number of medication errors, including reduced mortality and morbidity. As stated earlier, medication error costs have been estimated in the billions of dollars, and the agency is trying to determine the extent to which medication errors would be reduced.

Risks:

There is a possible risk that some manufacturers and repackagers, if required to bar code individual unit dose packages, would eliminate such types of packaging and only supply their products in bulk containers. Individual unit dose packages are convenient for hospitals, health professionals, and patients, but are expensive to produce, and bar coding may increase production costs. Consequently, a manufacturer or repackager who wanted to reduce its expenses might decide to reduce the number of packages, particularly individual unit dose packages, that would be subject to a bar coding requirement.

FINAL RULE STAGE

---

33. LABELING FOR HUMAN PRESCRIPTION DRUGS; REVISED FORMAT

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

21 USC 321; 21 USC 360gg to 360ss; 21 USC 371; 21 USC 374; 21 USC 379e; 21 USC 331; 21 USC 351 to 353; 21 USC 355; 21 USC 358; 21 USC 360; 21 USC 360b; 42 USC 216; 42 USC 241; 42 USC 262; 42 USC 264

CFR Citation:

21 CFR 201

Legal Deadline:

None

Abstract:

This regulation is one component of the Secretary's initiative to reduce medical errors. The regulation would amend the regulations governing the format and content of professional labeling for human prescription drug and biologic products, 21 CFR 201.56 and 201.57. The regulation would require that professional labeling include a section containing highlights of prescribing information, and a section containing an index to prescribing information; reorder currently required information and make minor changes to its content, and establish minimum graphical requirements for professional labeling. The regulation would also eliminate certain unnecessary statements that are currently required to appear on prescription drug labels and move certain information to professional labeling.

Statement of Need:

The current format and content requirements in sections 201.56 and 201.57 were established to help ensure that labeling includes adequate information to enable health care practitioners to prescribe drugs safely and effectively. However, various developments in recent years, such as technological advances in drug product development, have contributed to an increase in the amount, detail, and complexity of labeling information. This has made it harder for practitioners to find specific information and to discern the most critical information in product labeling.

FDA took numerous steps to evaluate the usefulness of prescription drug labeling for its principal audience and to determine whether, and how, its format and content can be improved. The agency conducted focus groups and a national survey of office-based physicians to ascertain how prescription drug labeling is used by health care practitioners, what labeling information is most important to practitioners, and how professional labeling should be revised to improve its usefulness to prescribing practitioners.

Based on the concerns cited by practitioners in the focus groups and physician survey, FDA developed and tested two prototypes of revised labeling formats designed to facilitate

access to important labeling information. Based on this testing, FDA developed a third revised prototype that it made available to the public for comment. Ten written comments were received on the prototype. FDA also presented the revised prototype at an informal public meeting held on October 30, 1995. At the public meeting, the agency also presented the background research and provided a forum for oral feedback from invited panelists and members of the audience. The panelists generally supported the prototype.

The proposed rule discribed format and content requirements for prescription drug labeling that incorporate information and ideas gathered during this process. The agency has received several comments on the proposal and the comment period was extended until June 22, 2001.

Summary of Legal Basis:

The agency has broad authority under sections 201, 301, 501, 502, 503, 505, and 701 of the Federal Food, Drug, and Cosmetic Act (the Act)(21 U.S.C. 321, 331, 351, 352, 353, 355 and 371) and section 351 of the Public Health Service Act (42 U.S.C. 262) to regulate the content and format of prescription drug labeling to help ensure that products are safe and effective for their intended uses. A major part of FDA's efforts regarding the safe and effective use of drug products involves FDA's review, approval, and monitoring of drug labeling. Under section 502(f)(1) of the Act, a drug is misbranded unless its labeling bears "adequate directions for use" or it is exempted from this requirement by regulation. Under section 201.100 (21 CFR 201.100), a prescription drug is exempted from the requirement in section 502(f)(1) only if, among other things, it contains the information required, in the format specified, by sections 201.56 and 201.57.

Under section 502(a) of the Act, a drug product is misbranded if its labeling is false or misleading in any particular. Under section 505(d) and 505(e) of the Act, FDA must refuse to approve an application and may withdraw the approval of an application if the labeling for the drug is false or misleading in any particular. Section 201(n) of the Act provides that in determining whether the labeling of a drug is misleading, there shall be taken into account not only representations or suggestions made in the labeling, but also the extent to which the labeling fails to reveal facts that are material in light of such representations or material with respect to the consequences which may result from use of the drug product under the conditions of use prescribed in the labeling or under customary usual conditions of use.

These statutory provisions, combined with section 701(a) of the Act and section 351 of the Public Health Service Act, clearly authorize FDA to promulgate a final regulation designed to help ensure that practitioners prescribing drugs (including biological products) will receive information essential to their safe and effective use in a format that makes the information easier to access, read, and use.

Alternatives:

The alternatives to the final rule include not amending the content and format requirements in sections 201.56 and 201.57 at all, or amending them to a lesser extent. The agency has determined that although drug product labeling, as currently designed, is useful to physicians, many find it difficult to locate specific information in labeling, and some of the most frequently consulted and most important information is obscured by other information. In addition, the agency's research showed that physicians strongly support the concept of including a highlights section of the most important prescribing information, an index and numbering system that permits specific information to be easily located, and other requirements, such as the requirement for a minimum type size. Thus, the agency believes that the requirements in the final rule will greatly facilitate health care practitioners' access and use of prescription drug and biological labeling information.

Anticipated Cost and Benefits:

The expected benefits from the final rule include reduced time needed for health care professionals to read or review labeling for desired information, increased effectiveness of treatment, and a decrease in adverse events resulting from avoidable drug-related errors. For example, the proposed revised format is expected to significantly reduce the time spent on reading labeling by highlighting often used information at the beginning of labeling and facilitating access to detailed information.

The potential costs associated with the final rule include the cost of redesigning labeling for previously approved products to which the proposed rule would apply and submitting the new labeling to FDA for approval. In addition, one-time and ongoing incremental costs would be associated with printing the longer labeling that would result from additional required sections. These costs would be minimized by applying the amended requirements only to newer products and by staggering the implementation date for previously approved products.

Risks:

None.

Legal Deadline:

None

Abstract:

The final rule requires persons who manufacture, prepare, propagate, compound, or process a drug or device that is imported or offered for import into the United States to register the name and place of business of the establishment and to identify a United States agent for the establishment.

Statement of Need:

Section 417 of the Food and Drug Modernization Act (PL 105-115) requires any establishment in any foreign country that is engaged in the manufacture, preparation propagation, compounding, or processing of a drug or device that is imported or offered for import into the United States to register the name and place of business of the establishment and to identify a United States agent.

The final rule implements the statutory requirement by amending the establishment registration and listing regulations for human drugs and biological products (21 CFR part 207), blood and blood products (21 CFR part 607), and devices (21 CFR part 807). The final rule also discusses the duties of the United States agent. The United States agent's duties, under the final rule, include facilitating communications with the foreign establishment and responding to inquiries about the foreign establishment's products that are imported or offered for import into the United States. The final rule will strengthen FDA's procedures for ensuring that products imported or offered for import into the United States are safe and effective.

Summary of Legal Basis:

The principal legal basis can be summarized as follows. Section 510 of the Federal Food, Drug, and Cosmetic Act (the Act) requires establishment registration and listing. Section 417 of the Food and Drug Modernization Act amended section 510 by requiring foreign establishments to register, to list their products, and to identify a United States agent.

Section 701(a) of the Act gives FDA authority to promulgate regulations for the efficient enforcement of the Act. Thus, the final rule represents FDA's effort to enforce section 510 of the Act, as amended by section 417 of the Food and Drug Modernization Act.

Alternatives:

FDA considered requiring less establishment registration information, but the information required by the rule is quite minimal, consisting largely of the establishment's address, names of owners or responsible officials, and additional identifying information (such as the type of establishment). An alternative that would have required less information would not give FDA sufficient information to identify a foreign establishment's location, type, or responsible persons, and this would complicate efforts to locate or contact the foreign establishment.

FDA also rejected requiring less frequent registration by foreign establishments because this would increase the likelihood that the information would become incorrect or obsolete and would hinder regulatory actions involving foreign establishments.

FDA also considered comments seeking an exemption from the United States agent requirement or to allow the United States agent to be in a foreign country. However, the statute requires foreign establishments to have a United States agent, and the most logical interpretation of the statute is that the United States agent must be in the United States rather than in a foreign country. FDA did state that the United States agent may be an entity or a person.

Anticipated Cost and Benefits:

FDA examined the potential costs and benefits associated with foreign establishment registration. Given its experience with establishment registration for domestic firms, FDA estimates the total registration costs for foreign establishments to be $809,820. Recordkeeping costs are estimated at $810,000.

The rule's principal benefit would be the creation of an accurate, comprehensive list of foreign establishments. This list will make it easier for FDA to identify foreign establishments, schedule inspections, and contact foreign establishments when needed. The United States agent is another benefit as the United States agent will help FDA in communications with the foreign establishment, respond to questions regarding the foreign establishment's products that are imported or offered for import into the United States, and help schedule inspections of the foreign establishment.

Risks:

Before the enactment of the Food and Drug Modernization Act, Federal law required domestic establishments to register with FDA and to list their products. Foreign manufacturers could register their establishments voluntarily, but were required to list their products. The different treatment between domestic and foreign establishments created some confusion among foreign establishments. Some foreign establishments erroneously believed that listing was voluntary; others neither registered their establishments nor listed their products.

Establishment registration enables FDA to identify manufacturers and other FDA-regulated entities for inspection, communication, and other administrative or regulatory action. For example, if a foreign product presented a health or safety concern, FDA would contact the foreign manufacturer, but if the foreign establishment was not registered, the agency might find it difficult to contact the foreign manufacturer promptly or to contact the manufacturer at all.

Requiring foreign establishments to register will facilitate FDA's regulatory and enforcement actions and treat domestic and foreign establishments alike. Moreover, the regulation implements section 417 of the Food and Drug Modernization Act.

35. FOOD LABELING: TRANS FATTY ACIDS IN NUTRITION LABELING, NUTRIENT CONTENT CLAIMS, AND HEALTH CLAIMS

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

21 USC 321; 21 USC 331; 21 USC 342; 21 USC 343; 21 USC 348; 21 USC 371; ...

CFR Citation:

21 CFR 101

Legal Deadline:

None

Abstract:

Section 403(q) of the Federal Food, Drug, and Cosmetic Act, which was added by the Nutrition Labeling and Education Act of 1990 (NLEA), requires that the label or labeling of food products bear nutrition information. Among other things, section 403(q) of the Act authorizes the Food and Drug Administration (FDA) to add or delete nutrients that are to be declared on the labels or labeling of food products by regulation if it finds such action necessary to assist consumers in maintaining healthy dietary practices. FDA issued final regulations implementing NLEA in 1993. FDA subsequently received a citizen petition requesting that FDA amend its regulations on food labeling to require that the amount of trans fatty acids be listed in the nutrition label and be limited wherever saturated fat limits are placed on nutrient content claims, health claims, or disqualifying levels and disclosure levels. In response to this petition and based on new evidence, FDA proposed the actions requested in the petition on November 17, 1999 (64 FR 62746). In addition, FDA proposed to define the claim "trans fat free."

Statement of Need:

FDA intends to publish a final rule amending its nutrition labeling regulations to incorporate requirements for trans fatty acids in labeling, nutrient content and health claims for several reasons. First, this final rule responds, in part, to a citizen petition on trans fatty acids in food labeling from the Center for Science in the Public Interest. Also, recent research shows that dietary trans fatty acids raise low density lipoprotein cholesterol (LDL-C), the major diet related risk factor for coronary heart disease (CHD). Finally, the information on trans fatty acids in nutrition labeling is needed to assist consumers in maintaining healthy dietary practices.

Summary of Legal Basis:

The NLEA (Pub. L. 101-535) amended the Federal Food, Drug, and Cosmetic Act (the Act) to provide, among other things, that certain nutrients and food components be included in nutrition labeling. Sections 403(q)(2)(A) and (q)(2)(B) of the Act provide the agency with authority to, by regulation, add or delete nutrients included in the food label or labeling if the agency finds that such action will assist consumers in maintaining healthy dietary practices.

Alternatives:

FDA proposed, in the November 1999 proposal, that when trans fatty acids are present in a food, the declaration of saturated fat must bear a symbol that refers to a footnote at the bottom of the nutrition label that states the number of grams of trans fatty acids present in a serving of the product, i.e., "Includes ——— g trans fat." In addition to the proposed option, the agency considered a variety of other options for the declaration of trans fatty acids in the Nutrition Facts panel. The other options were: (1) include trans fatty acids with saturated fat and call the total value "saturated fat;" (2) include trans fatty acids with saturated fat and call the total value "saturated fat," and add an asterisk after the term "saturated fat" when the food contains trans fatty acids that refers to a footnote stating "Contains ——— g trans fat;" (3) include trans fatty acids with saturated fat and call the total value "saturated + trans fat;" and (4) list trans fatty acids separately under saturated fat.

Anticipated Cost and Benefits:

FDA has estimated the benefits of the proposed rule in the range of $25 to $50 billion compared with costs in the range of $400 to $900 million (discounted at 7 percent for 20 years). The value of the benefits were estimated based on CHD morbidity and mortality prevented. The costs were estimated based on a formula that included costs for testing, decisionmaking, information panel reprinting, relabeling of the principal display panels and product reformulation.

Risks:

The American Heart Association estimates that CHD causes 1.1 million heart attack cases annually, with 33 percent of them fatal. FDA used these estimates as the baseline to estimate the number of cases and fatalities prevented by this rule. The agency estimated the rule would annually prevent 6,300 to 17,100 cases of CHD and 2,100 to 5,600 deaths, using three different methods to estimate these benefits. Thus, the labeling changes resulting from this rule are expected to reduce the risk of CHD, preventing, at a minimum, 6,300 cases of CHD and 2,100 deaths annually.

CFR Citation:

21 CFR 606; 21 CFR 610

Legal Deadline:

None

Abstract:

This rulemaking is one of a number of actions being taken to amend the biologics regulations to remove, revise, or update the regulations applicable to blood, blood components, and blood derivatives. These actions are based on a comprehensive review of the regulations performed by FDA, and are also based on reports by the U.S. House of Representatives Committee on Government Reform and Oversight, Subcommittee on House Resources and Intergovernmental Relations, the General Accounting Office, and the Institute of Medicine, as well as public comments. In this rulemaking, FDA will amend the biologics regulations to require that blood establishments prepare and follow written procedures for appropriate action when it is determined that blood and blood components pose an increased risk for transmitting hepatitis C virus (HCV) infection because they have been collected from a donor who, at a later date, tested repeatedly reactive for evidence of HCV.

Statement of Need:

In the Federal Register of June 22, 1999 (64 FR 33309), FDA announced the availability of guidance, which updated previous guidance, providing recommendations for donor screening and further testing for antibodies to HCV, notification of consignees, transfusion recipient tracing and notification, and counseling by physicians regarding transfusion with blood components at increased risk for transmitting HCV (often called "lookback"). While available evidence indicates that blood establishments are following these recommendations, FDA believes that regulations should be codified, consistent with the previous recommendations, to assure there is clear enforcement authority in case deficiencies in an establishment's lookback program are found and to provide clear instructions for continuing lookback activities.

Summary of Legal Basis:

The Public Health Service Act (21 U.S.C. 216 et seq.) and the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 321 et seq.) authorize FDA to regulate biological products and to ensure that the products are safe, pure, potent, and effective. The Public Health Service Act also contains the authority under which FDA can promulgate regulations to prevent the spread of communicable diseases. These regulations would assure that appropriate action is taken when blood components have been transfused which may potentially be capable of transmitting HCV, that persons who have been transfused with such blood components are notified so that they receive proper counseling and treatment, and to help prevent the further transmission of HCV.

Alternatives:

FDA has considered permitting the continued voluntary compliance with the recommendations that have already issued. However, lookback will remain appropriate for the foreseeable future, and FDA believes that the procedures should be clearly established in the regulations.

Anticipated Cost and Benefits:

FDA is in the process of analyzing the costs related to the rulemaking. Monetary burdens will be associated to the tracing of previous donations of donors, identifying the recipients of these previous blood donations, and notifying these recipients, as appropriate. FDA believes these costs will be more than compensated by the public health benefits, including benefits related to the notification of past transfusion recipients who may be unaware that they may be infected with HCV.

Risks:

FDA believes there are minimum risks posed by requiring that appropriate lookback procedures for HCV be prepared and followed.

37. MARKING REQUIREMENTS FOR AND PROHIBITIONS ON THE REIMPORTATION OF IMPORTED FOOD PRODUCTS THAT HAVE BEEN REFUSED ADMISSION INTO THE UNITED STATES

Priority:

Other Significant

Legal Authority:

15 USC 145; 15 USC 1454; 15 USC 1455; 21 USC 321; 21 USC 343; 21 USC

352; 21 USC 355; 21 USC 360b; 21 USC 362; 21 USC 371; 21 USC 374; 21 USC 381; 21 USC 382; 21 USC 393; 42 USC 216; 42 USC 241; 42 USC 243; 42 USC 262; 42 USC 264

CFR Citation:

21 CFR 1.98

Legal Deadline:

None

Abstract:

The rule would require food products that have been refused entry into the United States for safety reasons to be marked, "United States Refused Entry." The proposed rule is intended to protect the public health against contaminated or unsafe imported food products and to facilitate FDA's examination of imported products.

Statement of Need:

In 1998, the General Accounting Office issued a report titled, "Food Safety: Federal Efforts to Ensure the Safety of Imported Foods Are Inconsistent and Unreliable." The report stated that some food importers evade import controls and are able to introduce contaminated, adulterated, or unsafe food into the United States even after FDA refused to admit the food and the Customs Service ordered the food to be reexported or destroyed.

Additionally, in 1998, the Senate Permanent Subcommittee on Investigations conducted hearings on the safety of food imports. The subcommittee heard testimony about reimporting refused foods through another port (a practice known as "port shopping)." On July 3, 1999, the President issued a memorandum to the Secretary of Health and Human Services and the Secretary of the Treasury directing them, in part, to take all actions available to "prohibit the reimportation of food that has been previously refused admission and has not been brought into compliance with United States laws and regulations" by requiring the marking of shipping containers and/or papers of imported food that is refused admission for safety reasons.

Consequently, FDA and the Department of the Treasury jointly prescribed a rule to require that imported food that has been refused admission for safety reasons be marked as "UNITED STATES REFUSED ENTRY." The mark will make it easier to detect previously refused food and reduce, if not eliminate, "port shopping."

Summary of Legal Basis:

Section 801(a) of the Federal Food, Drug, and Cosmetic Act (the Act) authorizes FDA to refuse to admit imported food if the food has been manufactured, processed, or packed under insanitary conditions, is forbidden or restricted in sale in the country in which is was produced, or is adulterated or misbranded. Sections 402 and 403 of the Act describe when a food is adulterated or misbranded respectively. Section 701(a) of the Act authorizes FDA to issue regulations for the efficient enforcement of the Act, while section 701(b) of the Act authorizes FDA and the Department of the Treasury to jointly prescribe regulations for the efficient enforcement of section 801 of the Act.

The final rule is within FDA's authority at sections 402, 403, 701, and 801 of the Act. In general, unsafe food is often adulterated under section 402 of the Act, and may also be misbranded under section 403 of the Act if the food purports to meet a particular definition, standard of identity, or standard of quality. Marking refused foods will make it easier for FDA to refuse to admit previously-refused, adulterated or misbranded food imports into the United States.

Additionally, section 301 of the Public Health Service Act (PHS Act) authorizes FDA to "render assistance" to appropriate health authorities in the conduct of or to promote coordination of research, investigations, experiments, demonstrations, and studies relating to the causes, diagnosis, treatment, control, and prevention of disease. Section 361 of the PHS Act authorizes FDA to issue regulations to prevent the introduction, transmission, or spread of communicable diseases into the United States. Marking refused food products will help foreign health officials determine whether to take regulatory action against a particular product. It would also alert foreign officials to previously refused food and help prevent the introduction, transmission, or spread of communicable diseases into the United States by making it more difficult for unsafe food to reenter the United States.

Alternatives:

FDA considered exempting small businesses from the rule, but, because most importers and consignees would qualify as small businesses, this would negate the rule's purpose.

The agency also considered ordering the destruction of all refused food imports, but this would not be feasible because it would divert federal resources to supervising or otherwise ensuring that the refused food imports are stored until they can be destroyed and that they are destroyed.

A "no action" alternative was rejected because it would allow illegal practices, such as port shopping, to continue, resulting in unsafe food entering the United States.

FDA also rejected marking some, but not all, imported food refused entry for safety reasons. While this alternative would be less costly, it would also be less efficient because some refused food imports would be able to reenter the United States and because a previously-refused, but unmarked, food would be difficult to detect compared to a previously-refused and marked food. This alternative would also result in arguments as to the criteria to be applied and whether a particular food should be marked.

Anticipated Cost and Benefits:

FDA examined the potential costs and benefits associated with marking refused food imports. Importers and consignees would bear the costs associated with marking refused food imports. If these importers and consignees use labeling (an inexpensive and time efficient method) as their marking method, the annual cost to importers and consignees would be $398,663 with an additional $39,600 in costs for labeling equipment. FDA would incur an estimated $308,131 in hourly wage costs associated with refusals to admit an imported food and for supervising the marking process.

The rule's principal benefit would be a reduction in the number of illnesses and injuries caused by unsafe imported food. The agency is unable to quantify the amount of illegal importation of previously refused foods, so it cannot accurately predict the value of reduced illnesses and injury.

Risks:

There is a possible risk that previously refused, unpackaged food (such as loose grain in a railroad car) would be able to enter the United States because the food itself cannot be marked, although the final rule would require the importer or consignee to affix the mark on papers accompanying the product.

38. EFFICACY EVIDENCE NEEDED FOR PRODUCTS TO BE USED AGAINST TOXIC SUBSTANCES WHEN HUMAN STUDIES ARE UNETHICAL

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

15 USC 1451 to 1561; 21 USC 331; 21 USC 351 to 353; 21 USC 355; 21 USC 360; 21 USC 360c to 360f; 21 USC 360h to 360j; 21 USC 371; 21 USC 374; 21 USC 379e; 21 USC 381; 42 USC 216; 42 USC 241; 42 USC 262; 42 USC 263b; 21 USC 321; PL 105-115, sec 122, 111 stat 2322 (21 USC 355 note)

CFR Citation:

21 CFR 314; 21 CFR 601

Legal Deadline:

None

Abstract:

The agency plans to publish a final rule that would amend its new drug and biological product regulations to identify the information needed to provide substantial evidence of the efficacy of new drug and biological products used to reduce or prevent the toxicity of chemical, biological, radiological, or nuclear substances when adequate and well-controlled efficacy studies in humans ethically cannot be conducted. Efficacy studies in humans cannot be conducted ethically if: 1) the studies would involve administering a potentially lethal or permanently disabling toxic substance or organism to healthy human volunteers without a proven treatment; and 2) field trials (assessment of use of the product after accidental or hostile exposure to the substance) are not feasible. FDA is taking this action because it recognizes the importance of improving medical responses to the use of lethal or permanently disabling chemical, biological, radiological, and nuclear substances in order to protect individuals exposed to these substances.

Statement of Need:

A distinct possibility exists that American military personnel and civilians may be exposed to lethal or permanently disabling chemical, biological, or radiological substances in the course of conventional or unconventional warfare, as a result of terrorist actions, or as a consequence of an industrial accident. Significant difficulties are presented in conducting efficacy studies on drug and biological products intended to reduce or prevent the toxicity of these substances in humans. The incidence of exposure is so low that field efficacy studies cannot be conducted and the toxicity of the substances prevents them from being ethically given to healthy volunteers. The only practical and ethical means of evaluating the efficacy of drugs and biological products in these situations is to rely on data from animal studies that are an adequate model for the action of both the toxin and the drug or biological product in humans.

Summary of Legal Basis:

FDA approves new drugs under the authority of the Federal, Food, Drug, and Cosmetic Act (the Act) and biological products under section 351 of the Public Health Service Act. Section 505(d) (21 USC 355(d)) of the Act authorizes the Secretary of Health and Human Services to issue an order refusing to approve a new drug application if the Secretary finds that "there is a lack of substantial evidence that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the proposed labeling thereof ...." The term substantial evidence is defined in section 505(d) of the Act as"... evidence consisting of adequate and well-controlled investigations, including clinical investigations, by experts qualified by scientific training and experience to evaluate the effectiveness of the drug involved, on the basis of which it could fairly and responsibly be concluded by such experts that the drug will have the effect it purports or is represented to have under the conditions of use prescribed, recommended, or suggested in the labeling or proposed labeling thereof."

In interpreting the term "substantial evidence," FDA has viewed the phrase "adequate and well-controlled investigations, including clinical investigations" as meaning that efficacy determinations must include studies of efficacy in humans. The agency's regulations did not contemplate situations in which efficacy studies cannot ethically be conducted in humans, and FDA believes that it would be inconsistent with the statute's public health objectives to conclude that FDA cannot use some other basis for considering the efficacy of such products. The legislative history does not address this issue. Concluding that such products cannot ever be approved because human efficacy trials cannot be conducted is contrary to the public interest and inconsistent with the Act's purpose of public health protection.

FDA has therefore concluded that, where definitive human efficacy studies cannot ethically be conducted because they would necessarily expose healthy subjects to a potentially lethal or permanently disabling substance, the statutory standard permits efficacy to be based on adequate and well-controlled investigations that are not conducted in humans. This conclusion is consistent with the recognition by Congress of the importance of ethical behavior in the study of unapproved products. For FDA to approve products where definitive efficacy studies cannot be conducted in humans there must be sufficient data available to meet the statutory standard. The data must be such that experts are able to fairly and responsibly conclude "that the drug will have the effect it purports or is represented to have ..." in humans. Where data from adequate and well-controlled animal studies meet this standard, FDA may approve the product.

Alternatives:

FDA did not identify any valid alternatives to using efficacy data from animal studies to approve drug and biological products used to treat or

prevent the toxicity of chemical, biological, or radiological substances where the normal incidence of exposure is so low that normal clinical trials would be impractical and the deliberate exposure of volunteers to the substances would be unethical. The rule would not apply if product approval can be based on standards described elsewhere in FDA's regulations (for example, accelerated approval based on human surrogate markers or clinical endpoints other than survival or irreversible morbidity).

Anticipated Cost and Benefits:

The potential public health benefits of having new drugs and biological products approved under this rule are difficult to measure. The cost of approving new drugs and biological products under this rule should not exceed the cost of approving similar drugs based on clinical efficacy data.

Risks:

Risks from the use of drugs and biological products approved under this rule should be minimal. The safety of these products will be studied in human volunteers comparable to the people who would be exposed to the product.

39. • ADDITIONAL CRITERIA AND PROCEDURES FOR CLASSIFYING OVER-THE-COUNTER DRUGS AS GENERALLY RECOGNIZED AS SAFE AND EFFECTIVE AND NOT MISBRANDED

Priority:

Economically Significant

Legal Authority:

21 USC 321; 21 USC 351 to 353; 21 USC 355; 21 USC 360; 21 USC 371

CFR Citation:

21 CFR 330

Legal Deadline:

None

Abstract:

The OTC drug review establishes conditions under which OTC drugs are generally recognized as safe and effective and not misbranded. After a final monograph (i.e., final rule) is issued, only OTC drugs meeting the conditions of the monograph, or having an approved new drug application, may be legally marketed. This final rule establishes additional criteria and procedures by which other OTC conditions may become eligible for consideration in the OTC drug monograph system. The additional criteria and procedures describe how OTC drugs marketed in the United States after the OTC drug review began in 1972 and OTC drugs without any U.S. marketing experience may become eligible and, if found eligible, how the drug would be evaluated for general recognition of safety and effectiveness.

Statement of Need:

This final rule establishes additional criteria and procedures by which over-the-counter (OTC) conditions (e.g., ingredients, combinations of ingredients, uses) may become eligible for inclusion in the OTC drug monograph system. This rule benefits manufacturers and consumers because it provides for increased access to certain OTC drugs under certain conditions.

Summary of Legal Basis:

The legal basis is the Federal Food, Drug, and Cosmetic Act, 21 U.S.C. sections 321, 351, 352, 353, 355, 360 and 371. No aspect of the action is required by statute or court order.

Alternatives:

Without this final rule, the only alternative to marketing approval for drugs subject to the rule would be an NDA.

Anticipated Cost and Benefits:

The major benefit of this rule will be increased over the counter access to drugs, and potential cost savings to consumers. Considering potential one-time cost savings associated with prescription drug user fees and reduced reporting requirements of marketing under an OTC drug monograph vs. an NDA, the agency calculates a one-time cost savings to industry of around $300,000 per submission. Future yearly cost savings could total around $21,000 per product and $142,000 per establishment if the submitted product were the establishment's only product. If FDA receives 25 to 50 submissions a year, industry would save between $7.3 and $14.5 million in one-time costs alone.

Risks:

There are minimal risks associated with this final rule. The flexibility to market drug products under FDA's OTC drug monograph system provides an overall net benefit to the companies seeking to use this approach, as well as to the American public. One important benefit to sponsoring companies is the saving of NDA user fees (see Anticipated Costs and Benefits above). The American public benefits by having OTC drugs without any U.S. marketing experience but sufficient foreign marketing experience become available in the U.S.

PROPOSED RULE STAGE

40. TRIBAL SELF-GOVERNANCE AMENDMENTS

Priority:

Other Significant

Legal Authority:

PL 106-260, sec 517(a)(2); 25 USC 450, Tribal Self-Governance Amendments

CFR Citation:

None

Legal Deadline:

NPRM, Statutory, August 18, 2001, Expiration of authority to promulgate final rule: May 18, 2002.

Abstract:

Title V of the Tribal Self-Governance Amendments of 2000 (Pub. L. 106-260) made permanent the demonstration program which allowed tribes full control over the operation and redesign of various activities historically managed by IHS. The proposal includes provisions that govern how IHS and Tribes will carry out their responsibilities under the Act.

Statement of Need:

Given the success of the Self-Governance demonstration program that had been in operation since 1992, Congress elected to make the program permanent. Under the Act, Tribal compacts initiated under the demonstration program will continue with up to 50 additional compact awards each year. Currently, almost 44 percent of IHS funds are allocated for tribally controlled programs.

Summary of Legal Basis:

Section 517(a) of the Act requires the Secretary to initiate procedures to negotiate and promulgate the regulations.

Alternatives:

Negotiated rulemaking is prescribed by the Act and is consistent with Federal policy on coordination and consultation with tribal governments. Given the number of Indian and Alaska Native Tribes and extent of the provisions covered by the Act, absence of this regulation would have a substantial negative impact on the implementation of title V. The proposed rule represents a consensus of Tribal and Federal representatives on most of the provisions. Failure to implement the rule would result in wide variation in interpretation of the provisions and potential for increased litigation. Further, failure to implement the rule would be received poorly by Tribal leaders who have worked in good faith to reach consensus on the provisions.

Anticipated Cost and Benefits:

Not appicable.

Risks:

Not applicable.

PROPOSED RULE STAGE

41. NATIONAL STANDARD FOR IDENTIFIERS OF HEALTH PLANS (CMS-4145-P)

Priority:

Other Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect State, local or tribal goverments.

Legal Authority:

42 USC 1320d-2(b)(1) of the Social Security Act

CFR Citation:

45 CFR 160.103; 45 CFR 162

Legal Deadline:

Final, Statutory, February 21, 1998.

Abstract:

This rule would implement a standard identifier to identify health plans that process and pay certain electronic health care transactions. It would implement one of the requirements for administrative simplification in section 262 of the Health Insurance Portability and Accountability Act of 1996.

Statement of Need:

This rule would implement the national health plan identifier; one of the requirements for administrative simplification in section 262 of the Health Insurance Portability and Accountability Act of 1996.

Summary of Legal Basis:

Health Insurance Portability and Accountability Act of 1996 (Pub. L. 104-191, August 21, 1996, sec. 1173).

Alternatives:

Three alternatives were considered:

Option 1: Federal and State Medicaid Agencies Cost : $38.1M

Option 2: Private Organizations Cost : $38.1M

Option 3: Registry Cost : $34.9M

Duration: Every option is required to complete the enumeration process within two years of the promulgation and effective date of the Final Rule for all health plans, except that small health plans have three years to comply.

Option 1: Two or more coordinating entities will share responsibility for enumerating health plans. The entities would consist of Federal and State Medicaid programs.

Option 2: Same as option one, except that coordinating entities would consist of private organizations.

Option 3: CMS, acting through a contractor, would be the single entity enumerating all health plans and maintaining the registry.

Decision: The Secretary has selected option three, not only because its costs are lower, but also because it would result in less burden on organization in coordinating enumeration, less confusion for health plans, better quality control of data control, and better management of the enumeration process.

Anticipated Cost and Benefits:

A benefit/cost analysis was conducted with three contribution rates of PlanID toward overall HIPPA cost savings. Given a 1 percent contribution rate, the PlanID project shows a net present value of over $12.8 M and a benefit/cost ratio of 1.45. For 5 and 15 percent rates, the net present values are $179.2M and $595.3M, respectively, and the benefit cost ratios are 7.23 and 21.69, respectively. These values indicate that the implementation of the PlanID project will result in a considerable positive return on investment.

Risks:

There are three categories of risk:

Technical and Operational—physical/logical system

Schedule—delays/slippage

Cost/Budget—cost overruns, funding shortfalls, unexpected funding needs

An assessment and mitigation of risks was conducted as part of the information technology documentation. The subsequent risk analysis determined the project to be a low risk endeavor.

42. HEALTH INSURANCE REFORM: STANDARDS FOR ELECTRONIC CLAIMS ATTACHMENTS (CMS-0050-P)

Priority:

Other Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect State, local or tribal goverments.

Legal Authority:

42 USC 1320d-2(a)(2)(B)

CFR Citation:

45 CFR 162

Legal Deadline:

Final, Statutory, August 21, 1998.

Abstract:

This rule proposes an electronic standard transmissions for claims attachments. The standard is required by HIPAA. It would be used to transmit clinical data, beyond those data contained in the claims standard, to help establish medical necessity or coverage.

Statement of Need:

The Administrative Simplification subtitle of the Health Insurance Portability and Accountability Act (HIPAA) of 1996 requires the Secretary of Health and Human Services to adopt standards for electronically requesting and supplying additional information to support submitted claims data. This rule stipulates the requirements necessary to comply with the law.

Summary of Legal Basis:

The Administrative Simplification provisions of HIPAA require the Secretary to establish standards that additionally support information attached to claims.

Alternatives:

In the absence of this regulation, claims attachments in electronic form would be left with the private industry to develop. This action may create an inconsistent standard use of electronic claims attachments within the health care industry.

Anticipated Cost and Benefits:

As the effect of any one of the HIPAA standards is affected by the implementation of other standards, it is misleading to discuss the impact of one standard by itself. Therefore, an Impact Analysis on the total effect of all standards was published in the proposed rule concerning the national provider identifier (HCFA-0045-P) which was published on May 7, 1998 (63 FR 25320).

Risks:

Failure to publish this rule would mean that no standard for electronic claims attachments would be established for use within the health care system. Lack of a standard electronic claims attachments would decrease the amount of savings in health care costs.

HHS—CMS

43. HEALTH INSURANCE REFORM: MODIFICATIONS TO STANDARDS FOR ELECTRONIC TRANSACTIONS (CMS-0003-P)

Priority:

Other Significant

Unfunded Mandates:

Undetermined

Legal Authority:

Social Security Act, sec 1871

CFR Citation:

45 CFR 162

Legal Deadline:

None

Abstract:

This proposed rule would adopt modifications to certain standards for retail pharmacies adopted in our regulations entitled "Health Insurance Reform: Standards for Electronic Transactions" published in the Federal Register on August 17, 2000 (65 FR 50312), which implemented some of the requirements of the Administrative Simplification subtitle of the Health Insurance Portability and Accountability Act of 1996. This rule proposes to adopt the National Council for Prescription Drug Programs Batch Standard Batch Implementation Guide, Version 1, Release 1 (Version 1.1), January 2000 for the following standards for retail pharmacy transactions: health care claims or equivalent encounter information; eligibility for a health plan; referral certification and authorization; and coordination of benefits. Additionally, we propose to modify the standard for the health care claim payment and remittance advice transaction as the standard for the retail pharmacy sector by adopting, in place of the current standard, the ASC X12N 835, Health Care Claim Payment/Advice, as the standard for the retail pharmacy transaction.

This rule also proposes to repeal the adoption of National Drug Codes as the standard medical data code set for reporting drugs and biologics in all standard transactions, except those for retail pharmacy transactions, for which standards have been adopted.

Statement of Need:

The Administrative Simplification subtitle of the Health Insurance Portability and Accountability Act (HIPAA) of 1996 requires the Secretary of Health and Human Services to adopt standards for electronic transactions. This rule modifies previous adopted standards to standards that are currently in use throughout the health care industry.

Summary of Legal Basis:

The Administrative Simplification provisions of HIPAA require the Secretary to establish standards of electronic transactions for health plans, health care clearing houses, and certain health care providers.

Alternatives:

Failure to publish this rule would cause non-compliance with standards that are already in widespread use throughout the health care industry.

Anticipated Cost and Benefits:

The estimated costs and benefits of this rule would not change the impact of the Standard for Electronic Transaction final rule published on August 17, 2000 (65 FR 50312).

Risks:

This rule would permit compliance with standards currently used within the health care industry.

44. PROSPECTIVE PAYMENT SYSTEM FOR LONG-TERM CARE HOSPITALS FOR FY 2003 (CMS-1177-P)

Priority:

Other Significant

Unfunded Mandates:

Undetermined

Legal Authority:

BBRA, sec 123; BIPA, sec 307; PL 105-33, sec 4422; PL 106-113, sec 123; PL 106-544, sec 307(b)

CFR Citation:

42 CFR 412

Legal Deadline:

NPRM, Statutory, December 31, 2001, Final rule 4/30/02.

Abstract:

This rule would implement a prospective payment system for long-term care hospitals.

Statement of Need:

The Medicare inpatient hospital acute-care PPS was established by the Social Security Amendments of 1983 (Pub. L. 98-21). This prospective payment system (PPS) generally applies to all hospitals participating in the Medicare program with certain exclusions, exemptions, and adjustments specifically set out under the law. Long-term care hospitals (LTCHs), established under section 101 of Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982, which amended section 1886(b) of the Social Security Act, was one of four classes of specialty hospitals (the others being children's, psychiatric, rehabilitation, and psychiatric and rehabilitation units in acute-care hospitals) that were excluded from the inpatient acute-care PPS. These classes of hospitals and cancer hospitals, which were added to the category of, excluded hospitals beginning in fiscal year 1990, under section 6004 of the Omnibus Budget Reconciliation Act (OBRA) of 1989, continued to be paid for under TEFRA. The exemption of these facilities from the PPS was intended to be a temporary measure, pending the development of more appropriate systems to pay these providers under a PPS.

Section 123 of Public Law 106-113, the Balanced Budget Refinement Act of 1999 (BBRA), requires the establishment and implementation of a prospective payment system (PPS) for long-term care hospitals (LTCHs) by October 1, 2002. Section 307(b) of Public Law 106-554, the Benefits Improvement and Protection Act of 2000 (BIPA), authorized the Secretary to examine and evaluate a number of adjustment factors for inclusion in the LTCH PPS. Congressional intent regarding a timely implementation of the LTCH PPS is reflected in the statutory establishment of a default model under which LTCHs will receive

Medicare payments for services furnished on or after October 1, 2002.

Summary of Legal Basis:

Section 123 of Public Law 106-113, the BBRA, requires that the Secretary develops and implements the PPS for LTCHs by October 1, 2002. Section 307(b) of Public Law 106-554 confers broad authority on the Secretary to determine whether and which payment adjustments should be included in the system.

Alternatives:

None.

Anticipated Cost and Benefits:

Section 123(a) of the BBRA requires that the PPS for LTCH maintain budget neutrality. Payment will be estimated using the excluded hospitals' market basket update. The ability to pay for long-term care prospectively at LTCHs will have a direct, positive impact on the Medicare system by controlling the increase in costs for services that these hospitals provide. Although some hospitals will benefit more than others during the first year of the PPS due to variations in individual case mix indices, we anticipate that the system to "self-correct" within two years, because the more accurate coding and data-reporting required by a PPS will affect payment rates. Operating under a PPS will also have a beneficial impact on the efficient management and planning capability of individual LTCHs.

Risks:

Failure to develop and implement the PPS for LTCHs by October 1, 2002 would place us in violation of the BBRA and BIPA. Moreover, failure to meet the deadlines imposed by the notice and comment rulemaking process (citation) would make it impossible to comply with statutory requirements for implementation.

45. MODIFICATIONS TO MEDICARE MANAGED CARE RULES BASED ON PROVISIONS OF BIPA AND TECHNICAL CORRECTIONS (CMS-1180-P)

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

BIPA, sec 601 to 608; BIPA, sec 611 to 621; BIPA, sec 623; BIPA, sec 634

CFR Citation:

Not Yet Determined

Legal Deadline:

None

Abstract:

This regulation would implement certain Medicare payment provisions of the Medicare, Medicaid and SCHIP Benefits Improvement and Protection Act (BIPA) of 2000. The policy changes include premium reductions for M+C enrollees, uniform coverage for M+C plans in multiple locations, eliminating health disparities, M+C program compatibility with employer or union group plans, ESRD enrollees, and increased civil money penalties for M+C organizations that terminate contracts mid-year. Moreover, this regulation describes CMS' authority to waive or modify requirements that hinder the design of, the offering of, or the enrollment in such M+C plans offered to employers or labor unions.

Statement of Need:

This rule would implement changes to the Social Security Act (the Act) enacted in sections 606, 612, 615, 616, 617, 620, 621, and 623 of the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA), relating to the Medicare+Choice (M+C) program. These changes include permitting premium reductions as additional benefits, restricting implementation of significant new regulatory requirements midyear, allowing a uniform local coverage policy for M+C plans covering multiple localities, and allowing us to waive or modify certain requirements that hinder the offering of M+C plans to employers or labor unions.

Summary of Legal Basis:

Sections 606, 612, 615, 616, 617, 620, 621, and 623 of BIPA.

Alternatives:

None.

Anticipated Cost and Benefits:

These changes to the M+C regulations, implementing the provisions of BIPA pertaining to the M+C program would result in more flexibility for the M+C plans, enabling them to better serve their Medicare enrollees, including ESRD enrollees. The changes would also assist the M+C organizations in the marketplace by allowing them to waive or modify certain regulatory requirements that hinder the offering of M+C plans to employers or labor unions.

Risks:

If not published timely, the regulations will not implement changes mandated by the Congress. With the exception of one, all of the provisions of BIPA have already taken effect consistent with the effective dates established by the BIPA.

46. REVISIONS TO TRANSACTION AND CODE SET STANDARDS FOR ELECTRONIC TRANSACTIONS (CMS-0005-P)

Priority:

Other Significant

Legal Authority:

Social Security Act, sec 1171 to 1179; PL 104-191

CFR Citation:

45 CFR 162

Legal Deadline:

None

Abstract:

This rule would adopt modifications to the standards for electronic health care transactions adopted by the Secretary in regulations published August 2000. These modifications enable covered entities to comply with the standards and area result of the Designated Standard Maintenance Organization (DSMO) process.

Statement of Need:

The Administrative Simplification subtitle of the Health Insurance Portability and Accountability Act (HIPAA) of 1996 requires the Secretary of Health and Human Services to adopt standards for electronic transactions. This rule modifies previous adopted standards as a result of the Designated Standard Maintenance Organization (DSMO) process.

Summary of Legal Basis:

The Administrative Simplification provisions of HIPAA require the Secretary to establish standards of electronic transactions for health plans, health care clearing houses, and certain health care providers.

Alternatives:

In the absence of this regulation, standard for electronic transactions would be left with the private industry to develop. This action may create an inconsistent standard use of electronic claims attachments within the health care industry.

Anticipated Cost and Benefits:

The estimated costs and benefits of this rule would not change the impact of the Standard for Electronic Transaction Final Rule published on August 17, 2000 (65 FR 50312).

Risks:

Modifying standards established in the Standard for Electronic Transaction Final Rule (65 FR 50312), as a result of the Designated Standard Maintenance Organization (DSMO) process, will allow the health care industry to be in compliance with regulations under HIPAA. This proposed rule would enable providers, health plans, and clearinghouses to utilize a consistent set of electronic standards that are in compliance throughout the entire health care community.

47. ORGAN PROCUREMENT ORGANIZATION CONDITION FOR COVERAGE (CMS-3064-IFC)

Priority:

Other Significant

Legal Authority:

42 USC 1320b-8(b)(1)(A)(i); 42 USC 273(b)(2)

CFR Citation:

42 CFR 486.301

Legal Deadline:

Final, Statutory, January 1, 2002, Requires promulgation of new conditions.

Abstract:

This rule would establish conditions for coverage for organ procurement organizations (OPOs) to be certified by the Secretary to receive payment from Medicare and Medicaid for organ procurement costs and to be designated by the Secretary for a specific geographic service area.

Statement of Need:

This rule contains new conditions for coverage for organizations OPOs, including new performance standards. This rule would also increase the rectification cycle for OPOs from two years to four years.

Summary of Legal Basis:

Section 1138(b) of the Social Security Act (the Act) provides the statutory qualifications and requirements that an OPO must meet in order to receive payment for organ procurement costs associated with procuring organs for hospitals under the Medicare and Medicaid programs. This section gives the Secretary broad authority to establish performance-related standards for OPOs. Under this authority, the Secretary established conditions for coverage for OPOs at 42 CFR 486.301, et seq. Section 1138(b) of the Act specifies that an OPO must be certified or rectified by the Secretary as meeting the standards to be a qualified OPO as described in section 371(b) of the Public Health Service (PHS) Act. The PHS Act requirements were established by the National Organ Transplant Act of 1984 and include provisions for OPO board membership, staffing, agreements with hospitals, and membership in the OPTN. The Organ Procurement Organization Certification Act of 2000 (section 701 of Pub. L. 106-505, 42 U.S.C. section 273(b)(1)(D)) amended section 371(b) of the PHS Act to require CMS to increase the certification cycle for OPOs from two years to four years and promulgate new performance standards for OPOs.

Alternatives:

CMS is considering various alternatives in the development of performance measures and additional conditions for coverage and will solicit public comments in order to identify additional alternatives.

Anticipated Cost and Benefits:

Undetermined.

Risks:

Undetermined.

48. • HOME HEALTH PROSPECTIVE PAYMENT SYSTEM REFINEMENTS (CMS-1161-P)

Priority:

Other Significant. Major under 5 USC 801.

Legal Authority:

PL 105-33, sec 4603(a); PL 105-277, sec 5101(c); PL 105-277, sec 5101(d); PL 106-113, sec 305 to 306; PL 106-554, sec 502; PL 106-554, sec 508; 42 USC 1395ff

CFR Citation:

Not Yet Determined

Legal Deadline:

None

Abstract:

This rule proposes refinements to the case-mix policies governing the home health prospective payment system (PPS) for FY 2004.

Statement of Need:

This rule proposes refinements to the PPS case-mix for FY 2004. Future refinements may include, but are not limited to, accuracy, modification of existing adjustments to the PPS to improve distributional integrity of the system, and changes to improve case-mix.

Summary of Legal Basis:

Section 1895 of the Social Security Act allows the Secretary to establish a prospective payment system for payment of all costs of Medicare home health services. Section 1895(b)(3)(B) allows the Secretary to adjust the standards prospective payment amount (or amounts) for subsequent fiscal years so as to eliminate the effect of coding or classification changes that do not reflect real changes in case mix.

Alternatives:

In this regulation, we will explore the possibility of PPS refinements based on an analysis of the appropriateness and accuracy of payments for different case mixes and the overall distributional effects of PPS.

Anticipated Cost and Benefits:

At this point, it is too early to determine any specific costs and benefits of this regulatory action. We believe the overall effect of such refinements will be a more equitable distribution of payments to home health agencies.

Risks:

The home health industry will benefit from refinements that will result in more precise and equitable payments based on ongoing analysis of the PPS environment and refinements to the case mix methodology. Beneficiaries will similarly benefit from payment methodology improvements which more accurately distribute Medicare payments based on relative patient needs. We believe any risk will be minimized by assuring that proposed refinements are based on objective analysis of ongoing data reflecting HHA behavior and beneficiary impacts under the current system.

49. • MEDICAID MANAGED CARE (CMS-2104-F)

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

Undetermined

Legal Authority:

Sec 4701 to 4710, Balanced Budget Act of 1997; sec 1932, Social Security Act

CFR Citation:

42 CFR 400; 42 CFR 430; 42 CFR 431; 42 CFR 434; 42 CFR 435; 42 CFR 438; 42 CFR 440; 42 CFR 447

Legal Deadline:

None

Abstract:

This rule will revise recently published provisions for the Medicaid Managed Care program. It would also address quality of care and services under Medicaid managed care arrangements. In addition, this rule would affect enrollee rights and responsibilities, as well as contracts between State agencies and managed care organizations.

Statement of Need:

This regulation is necessary in order to implement the Medicaid managed care provisions of the Balanced Budget Act of 1997 (BBA). The Secretary has committed to releasing this final regulation as soon as possible so that States can begin to make necessary changes to their systems and operations.

Summary of Legal Basis:

Section 4701 through 4710 of the Balanced Budget Act of 1997; Section 1932 of the Social Security Act.

Alternatives:

To not publish a final regulation, which will leave States with no guidance for implementing the BBA's managed care provisions.

Anticipated Cost and Benefits:

This regulation is economically significant. However, the regulation includes new managed care rate setting provisions that will be of great benefit to States and health plans. We have heard repeatedly from States and health plans that they are in support of the rate setting provisions as they will help offset the cost of other provisions within the regulation.

50. • MEDICAID UPPER PAYMENT LIMIT FOR NON-STATE GOVERNMENT-OWNED OR OPERATED HOSPITALS (CMS-2134-P)

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

Sec 1902(a)(30), Social Security Act

CFR Citation:

42 CFR 447.321

Legal Deadline:

None

Abstract:

This rule concerns the Medicaid upper payment limit (UPL) for inpatient hospital services and outpatient hospital services furnished by non-State government-owned or operated hospitals.

Statement of Need:

This rule addresses the Medicaid upper payment limit for inpatient and outpatient hospitals furnished by non-State government-owned or operated facilities.

Summary of Legal Basis:

Section 1902(a)(30)(A) of the Social Security Act requires the State plan provide such methods and procedures relating to the utilization of, and the payment for, care and services available under the plan as may be necessary to safeguard against unnecessary utilization of such care and services and to assure that payments are consistent with efficiency, economy, and quality of care and are sufficient to enlist the plan at least to the extent that such care and services are available to the general population in the geographic area.

Legal Deadline:

Other, Statutory, October 1, 2002, Publish by 07/01/2002.

Abstract:

This notice with comment period updates rates for the home health prospective payment system for FY 2003.

Statement of Need:

This annual rate update is required by section 1895(b)(3)(B) of the Social Security Act.

Summary of Legal Basis:

Section 1895 of the Social Security Act allows the Secretary to establish a prospective payment system for payment of all costs of Medicare home health services. Section 1895(b)(3)(B) provides for the Secretary's adjustment of the standard prospective payment amount (or amounts) for subsequent fiscal years.

Alternatives:

There are no alternatives to a home health prospective payment system rate update for FY 2003 without new legislation.

Anticipated Cost and Benefits:

At this time, the data are not available to determine the specific rate updates for FY 2003.

Risks:

We risk being out of compliance with the statutory requirement that the home health prospective payment system rates be updated annually for inflation.

52. • REQUIREMENTS FOR PAID FEEDING ASSISTANTS IN LONG-TERM CARE FACILITIES (CMS-2131-P)

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

Sec 1819(a) to (f) of the Social Security Act; sec 1919(a) to (g) of the Social Security Act; PL 100-203

CFR Citation:

42 CFR 483.73; 42 CFR 483.75(c)

Legal Deadline:

None

Abstract:

This rule would permit long-term care facilities to use paid feeding assistants to supplement the services of certified nurse aids. If facilities choose this option, feeding assistants must complete a specified training program. This proposed rule would benefit residents by ensuring that more of them will receive the help with eating and drinking that they need.

Statement of Need:

The Secretary wants to revise the policy in order to permit long term care facilities to employ paid feeding assistants.

Summary of Legal Basis:

Sections 1819(a) through (f) and 1919(a) through (g) of the Social Security Act, PL 100-203.

Alternatives:

None.

Anticipated Cost and Benefits:

This rule may help nursing homes to supplement staffing in order to help more residents who have eating and drinking difficulties.

Risks:

This rule may cause confusion in State survey agencies, which have the responsibility for surveying long-term care facilities. It may also cause concerns for nursing home resident advocates.

53. • HOSPITAL OUTPATIENT PROSPECTIVE PAYMENT SYSTEM FOR CALENDAR YEAR 2003 (CMS-1206-P)

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

42 USC 1395 L; BBA'97; BBRA' 99; BIPA' 00

CFR Citation:

Not Yet Determined

Legal Deadline:

None

Abstract:

These rules would revise the Medicare hospital outpatient department prospective payment system for the January 2, 2003 update.

Statement of Need:

Annual updates to the hospital outpatient prospective payment systems rates are required by section 1833 of the Social Security Act (the Act), as amended by the Medicare, Medicaid, and SCHIP Balanced Budget Refinement Act of 1999 (BBRA), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA), relating to Medicare payments for hospital outpatient department patient prospective payment systems.

Summary of Legal Basis:

Section 1833(t) of the Act sets forth a system of payment for hospital outpatient department services furnished to Medicare beneficiaries based on prospectively set rates.

Alternatives:

None.

Anticipated Cost and Benefits:

Undetermined.

Risks:

Failure to update the hospital outpatient department prospective payment systems would place us in violation of the Act. Moreover, failure to meet the publication deadline imposed by the Act would also constitute a violation.

54. • PROSPECTIVE PAYMENT SYSTEM AND CONSOLIDATED BILLING FOR SKILLED NURSING FACILITIES-UPDATE FOR FY 2003 (CMS-1202-P)

Priority:

Other Significant. Major under 5 USC 801.

Legal Authority:

Sec 1888(e) of the Social Security Act

CFR Citation:

42 CFR 410; 42 CFR 411; 42 CFR 413; 42 CFR 424; 42 CFR 489

Legal Deadline:

NPRM, Statutory, March 29, 2002.

Final, Statutory, July 31, 2002.

Abstract:

This rule sets forth updates to the payment rates under the prospective payment system (PPS) for skilled nursing facilities (SNFs) for fiscal year (FY) 2003.

Statement of Need:

The Medicare SNF PPS was established by section 4432 of the Balances Budged Act of 1997 (BBA). The PPS applies to all costs (routine, ancillary, and capital) of covered SNF services furnished to beneficiaries under part A of the Medicare program, effective for cost reporting periods beginning on or after July 1, 1998. Annual updates to the PPS rates are required by section 1888(e) of the Social Security Act (the Act), as amended by the Medicare, Medicaid, and SCHIP Balanced Budged Refinement Act of 1999 (BBRA), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA), relating to Medicare payments and consolidated billing for SNFs.

Summary of Legal Basis:

Section 1888(e)(4)(H) requires that annual updates to the SNF PPS rates be published in the Federal Register before August 1 of each year, to be effective on the first day of the fiscal year.

Alternatives:

None.

Anticipated Cost and Benefits:

Section 1888(e) of the Act established the SNF PPS for the payment of Medicare SNF services for cost reporting periods beginning on or after July 1, 1998. This section also specifies that the base year cost date to be used in computing the Resource Utilization Group III (RUG-III) payment rates must be from FY 1995. The Act also requires that a number of elements be incorporated into the SNF PPS, such as case-mix classification methodology, the Minimum Data Set (MDS) assessment schedule, a market basket index, a wage index, and the urban and rural distinction used in the development or adjustment of the Federal rates. Payment for SNF care prospectively has a direct, positive impact on the Medicare program by controlling the increase in costs for services provided by SNFs. Operating under a PPS also has a beneficial impact on the efficient management and planning capability of individual SNFs.

Risks:

Failure to update the SNF PPS by October 1, 2002 would place us in violation of the Act. Moreover, failure to meet the publication deadline imposed by the Act would also constitute a violation.

HHS—CMS

55. • REVISIONS TO PAYMENT POLICIES UNDER THE PHYSICIAN FEE SCHEDULE FOR CALENDAR YEAR 2003 (CMS-1204-P)

Priority:

Other Significant. Major under 5 USC 801.

Legal Authority:

42 USC 1395W-4

CFR Citation:

Not Yet Determined

Legal Deadline:

None

Abstract:

This rule would make several changes affecting Medicare part B payment.

Statement of Need:

Since January 1, 1992, Medicare has paid for physicians' services under section 1848 of the Social Security Act (the Act), "Payment for Physicians' Services." This section provides for three major elements: 1) a fee schedule for the payment of physicians' services; 2) a sustainable growth rate for the rates of increase in Medicare expenditures for physicians' services; and 3) limits on the amounts that nonparticipating physicians can charge beneficiaries. The Act requires that payments under the fee schedule be based on national uniform relative value units (RVUs) based on the resources used in furnishing a service. Section 1848(c) of the Act requires that national RVUs be established for physician work, practice expense, and malpractice expense.

Summary of Legal Basis:

Section 6102 of the Omnibus Reconciliation Act of 1989 (Pub. L. 101-239) amended the Act by adding section 1848, "Payment for Physicians' Services" that requires Medicare to pay for physicians' services under a fee schedule. Section 4644 of the Balanced Budget Act of 1997 (Pub. L. 105-33)

amended section 1848(b)(1) of the Act by requiring that we publish fee schedules that establish payment amount of all physicians' services before November 1 of the preceding year, each year.

Alternatives:

None.

Anticipated Cost and Benefits:

The statute requires that annual adjustments to physician fee schedule RVUs not cause annual payments to differ by more than $20 million from what they would have been had the adjustments not been made. If this threshold is exceeded, we would make adjustments to the conversion factor (the dollar amount that converts relative values into a payment amount for a physician's service) to preserve budget neutrality.

Because changes to RVUs must be budget neutral, if we increase a service's RVUs, we must reduce the overall multiplier (or the actual RVUs) that converts the RVUs to a dollar amount. Therefore, certain physician specialty groups may experience an increase in payment and some may experience a decrease in payment.

Risks:

Failure to establish payment amounts for physicians' services would place us in violation of section 1848 of the Act.

HHS—CMS

56. • HOSPITAL INPATIENT REHABILITATION PROSPECTIVE PAYMENT SYSTEM FOR FY 2003 (CMS-1205-P)

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

PL 105-33, sec 4421; 42 USC 1395ww(j), sec 1886(j) of the Social Security Act

CFR Citation:

Not Yet Determined

Legal Deadline:

None

Abstract:

We will revise the Medicare inpatient rehabilitation hospital PPS to implement statuary requirements and incorporate changes that arise from our experience with the system. We will also review the amounts and factors used to determine rates for Medicare rehabilitation hospitals and rehabilitation units of a hospital.

The provision specified in the prospective payment system inpatient rehabilitation for hospitals 2002 final regulation will become effective for cost reporting periods on or after January 2002.

Statement of Need:

The Balanced Budget Act (BBA) significantly changed the way we will pay for Medicare covered services furnished to a Medicare inpatient in a rehabilitation facility. The BBA requires payments to be based on the inpatient operating and capital costs of rehabilitation facilities and adjusted for: 1) case mix using patient classification groups; 2) area wages; 3) inflation; 4) outlier and special payments; and 5) other factors necessary to reflect variations in costs of treatment. Total payments made under the system to rehabilitation facilities during fiscal year 2002 are required to equal 100 percent of the estimated payments that would have been made under the current TEFRA payment system. Outlier payments in a fiscal year may not exceed five percent of the total projected payments for the fiscal year.

The BBA gives us considerable discretion in designing the prospective payment system. Payment rates must be based on the discharge. The case mix classification groups may be based on those factors as the Secretary deems appropriate such as impairment, age, related prior hospitalization, co-morbidities, and functional capability of the patient.

Summary of Legal Basis:

Section 1886(j) to the Social Security Act, as added by section 4421 of the BBA, and as amended by section 125 of BBRA and section 305 of BIPA, to provide prospective payment for inpatient rehabilitation facilities (freestanding and units).

Alternatives:

None.

Anticipated Cost and Benefits:

Based on the results of implementation of other Medicare prospective payment systems, CMS believes that the implementation of the prospective payment system, as the method to pay for the services furnished to Medicare beneficiaries who are inpatients in rehabilitation facilities, will yield significant savings to the Medicare program. We estimate that the inpatient rehabilitation facilities prospective payment system costs for FY 2003 will be $10 million. The FY 2003 estimated costs of $10 million are associated with the portion of inpatient rehabilitation facilities cost reporting periods between October 1, 2002, and September 30, 2003 using the FY 2002 rates. However, we have not completed our analysis, so we can not be specific about the expected full costs and benefits of the FY 2003 rates.

Risks:

Altering the method that we pay rehabilitation facilities for the services they furnish to Medicare inpatients has the potential to affect a beneficiary's access to care and the quality of care furnished to a beneficiary. Therefore, we will be implementing methods to monitor the effect of the prospective payment system on these two associated patient care concerns.

HHS—CMS

57. • HOSPITAL INPATIENT PROSPECTIVE PAYMENT SYSTEM FOR FY 2003 (CMS-1203-P)

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

Undetermined

Legal Authority:

Sec 1886(d) of the Social Security Act

CFR Citation:

Not Yet Determined

Legal Deadline:

NPRM, Statutory, April 1, 2002.

Final, Statutory, August 2, 2002.

Abstract:

We would revise the Medicare hospital inpatient prospective payment system for operating costs to implement changes arising from our continuing experience with the system. In addition, in the Addendum, we describe changes to the amounts and factors used to determine the rates for Medicare hospital inpatient services for operating costs and capital-related costs. These changes apply to discharges occurring on or after October 2, 2002.

Statement of Need:

Annual updates to the hospital inpatient prospective payment system rates are required by section 1886 of the Social Security Act (the Act), as amended by the Medicare, Medicaid, and SCHIP Balanced Budged Refinement Act of 1999 (BBRA), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA), relating to Medicare payments for hospital inpatient prospective payment systems.

We are proposing to revise the Medicare hospital inpatient prospective payment systems for operating and capital costs to: describe proposed changes to the amounts and factors used to determine the rates for Medicare hospital inpatient services for operating costs and capital-related costs. These changes would be applicable to discharges occurring on or after October 1, 2002. We also are setting forth proposed rate-of-increase limits as well as proposed policy changes for hospitals and hospital units excluded from the prospective payment systems.

Summary of Legal Basis:

Section 1886(d) of the Social Security Act sets forth a system of payment for the operating costs of the acute care hospital inpatient system under Medicare part A based on prospectively set rates. Section 1866(g) of the Act requires the Secretary to pay for the capital-related costs of hospital inpatient stays under a prospective payment system.

Section 1886(e)(5)(B) requires that annual updates to the hospital inpatient prospective payment systems rates be published in the Federal Register before August 1 of each year, to be effective on the first day of the fiscal year (FY).

Alternatives:

None.

Anticipated Cost and Benefits:

The cost and benefits of this regulation will depend upon the market basket projection by the Office of the Actuary. Under current law, the update for FY 2003 will be market basket minus .55 percentage points. A one percent change in payments under the inpatient prospective payment system represents an approximately $760 million change.

Risks:

Inadequately paying for the services hospitals furnish to Medicare beneficiaries has the potential to affect a beneficiary's access to care and the quality of care furnished to a beneficiary. Therefore, we will carefully assess the impacts of all of the changes we implement through this regulation to mitigate these risks.

Failure to update the hospital inpatient prospective payment systems by October 1, 2003 would place us in violation of the Act. Moreover, failure to meet the publication deadline imposed by the Act would also constitute a violation.

HHS—CMS

58. • INITIATIVE TO ENDORSE PRESCRIPTION DRUG DISCOUNT PROGRAMS (CMS-4027-P)

Priority:

Economically Significant

Legal Authority:

42 USC 1395b-3; 42 USC 1302; 42 USC 1302b-10

CFR Citation:

None

Legal Deadline:

None

Abstract:

The proposed rule would set forth a Department of Health and Human Services' initiative for a Medicare endorsement to entities currently offering prescription drug discounts to the general public to offer prescription drug discount cards to Medicare beneficiaries. The proposed rule would set forth the criteria the Department proposes to establish for participation in the initiative, including qualifications for entities for endorsement, and the proposed method by which entities could apply for Medicare endorsement. The proposed rule would request public comment on all aspects of the prescription drug discount card initiative.

Statement of Need:

Currently, Medicare beneficiaries have limited opportunities to obtain

discounts on prescription drugs, and lack information on how to pursue such opportunities that exist. The proposed rule would propose a program, among other things: (1) to educate Medicare beneficiaries about private market methods available for securing discounts on the purchase of prescription drugs; (2) to provide a mechanism for Medicare beneficiaries to gain access to the effective tools widely used in the private sector to receive lower priced, quality pharmaceuticals; (3) to endorse qualified private sector prescription drug discount card programs; and (4) to provide Medicare beneficiaries an opportunity to enroll in a prescription drug discount card program.

Because of the limited opportunities Medicare beneficiaries have to obtain discounts on prescription drugs, on July 12, 2001, President George W. Bush and Secretary Tommy Thompson announced an initiative to provide Medicare beneficiaries with a way to obtain a Medicare-endorsed prescription drug discount card and to educate them about such discount card programs. On September 11, 2001, a District Court judge preliminarily enjoined the Secretary from implementing that Medicare-Endorsed Prescription Drug Discount Card initiative, published in the Federal Register on July 18, 2001. The judge's order was based in part on a preliminary finding that the Secretary should have issued the initiative through notice and comment rulemaking. This proposed rule would open to public comment the discount card initiative as a whole, as well as the qualifications necessary for the Medicare endorsement.

Summary of Legal Basis:

There are a number of legal authorities that support the Secretary's endorsement of available prescription drug discount programs, including 42 U.S.C. 1395b-3; 42 U.S.C. 1302 (authority to make and publish such rules and regulations as are necessary to the efficient administration of the functions charged under the Social Security Act); and 42 U.S.C. 1320b-10.

Alternatives:

Rather than offering Medicare endorsement to entities that meet defined qualifications, the Secretary could perform a study of prescription drug discount cards currently available in the market and provide recommendations to Medicare beneficiaries regarding which prescription drug discount cards provide the highest-quality services.

The Secretary could also serve as a clearinghouse for currently available prescription drug discount card sponsors to provide information on their products. Such information could include information on enrollment fees, the names or types of drugs for which discounts are offered, the discounts available on such drugs, and the scope of discount cards' networks of pharmacies.

Anticipated Cost and Benefits:

The benefits of this proposed initiative will be: (1) the education of Medicare beneficiaries about private market methods available for securing discounts on the purchase of prescription drugs, and (2) the provision of a mechanism for Medicare beneficiaries to gain access to the effective tools widely used by prescription benefit managers and by discount card programs to get lower drug prices and higher quality pharmaceutical care. The Department anticipates that, as a result of this proposed initiative, Medicare recipients could obtain prescription drugs they currently may be unable to afford and may, thus, remain healthier. The Department anticipates that this, in turn, may ultimately lead to cost-savings for Medicare.

The Department will incur some program costs associated with developing educational materials on discount programs and providing such information to Medicare beneficiaries, evaluating applicants, and assisting the start-up of a consortium of prescription drug programs to run the program. Applicants and entities offering endorsed prescription drug discount cards will incur certain costs, but such costs are voluntary since participation in the program is voluntary.

HHS—CMS

FINAL RULE STAGE

59. HEALTH INSURANCE REFORM: STANDARD UNIQUE HEALTH CARE PROVIDER IDENTIFIER (CMS-0045-F)

Priority:

Other Significant. Major under 5 USC 801.

Legal Authority:

42 USC 1320D-2(b)(1)

CFR Citation:

42 CFR 160; 42 CFR 162

Legal Deadline:

Final, Statutory, February 21, 1998.

Abstract:

This rule addresses the health care industry's need for a standardized provider identifier. It implements one of the requirements for administrative simplification in section 262 of the Health Insurance Portability and Accountability Act of 1996. A standard provider identifier will save the health insurance industry significant costs incurred in maintaining multiple identifier systems.

Statement of Need:

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) (Pub. L. 104-191) creates a new part C, entitled "Administrative Simplification," to title XI of the Social Security Act. One of the standards for health identifiers that is mandated by part C is a standard unique health care provider identifier, to be used in the

health care system. This regulation announces the adoption of the National Provider Identifier (NPI) as the standard unique health care provider identifier. It also provides information on how health care providers will be assigned NPIs and defines the requirements of health plans, health care providers, and health care clearinghouses with respect to obtaining and using this standard. Implementation of the NPI and the other Administrative Simplification standards will increase the efficiency of the processing of standard transactions within the health care system.

Summary of Legal Basis:

Currently, health plans assign identification numbers to their member health care providers. Different health plans assign different numbers to the same health care providers. The identifiers are frequently not standard within a health plan or across health plans. This results in health care providers having different identification numbers for different health programs, often having multiple billing numbers issued within a single health program. This complicates the health care providers' claims submissions and other transactions and increases the costs incurred by health care providers in conducting those transactions.

The Administrative Simplification provisions of HIPAA were designed to improve the efficiency and effectiveness of the health care system by encouraging the development of a health information system through the establishment of the standard unique health care provider identifier and other standards and requirements to facilitate the electronic transmission of certain health information.

Alternatives:

This regulation announces the NPI as the standard unique health care provider identifier. The NPI is a 10-position all numeric identifier, with a check-digit in the tenth position. There is no intelligence in the number. This design and our assignment strategy will allow more than 200 million NPIs to be issued. The NPI meets the principles established by the Department of Health and Human Services (HHS) for designation as a national standard. This final regulation defines "health care provider" in terms of the entities that will receive NPIs.

Health care providers will be enumerated by a federally directed registry (the enumeration contractor). The enumeration contractor will use the National Provider System (NPS) to uniquely identify a health care provider and issue it an NPI. The NPS will be developed by CMS. Health care providers must supply updates to their NPS data to the enumeration contractor within 30 days of the effective dates of the changes.

The NPS will establish the National Provider File (NPF), which will contain information collected from health care providers in order to assign them NPIs. The NPS will assign a single, unique NPI to a health care provider. Upon the dissolution of an organization health care provider or the death of a individual health care provider, the NPS will deactivate the NPI that had been issued to that health care provider and will not assign a deactivated NPI to any other health care provider.

Anticipated Cost and Benefits:

Our analysis of the costs and savings of the HIPAA Administrative Simplification standards is an aggregate impact of all the standards. Assessing the impact of each standard independently would inflate the costs and would yield inaccurate results. While each individual standard is beneficial, the standards as a whole have a synergistic effect on savings. A difficulty in this analysis was the fact that we have no historical experience in assessing the costs and benefits of such a sweeping change. The costs of implementing the standards specified in HIPAA are primarily one-time or short-term costs related to conversion. These costs will be incurred during the first three years of implementation. Benefits will accrue almost immediately, but will not exceed costs for health care providers until after the third year of implementation. After the third year, the benefits will continue to accrue into the fourth year and beyond. The impact analysis for the costs and benefits associated with all the Administrative Simplification standards indicates that the combined net savings for health plans and health care providers would amount to $1.5 billion dollars after five years.

Risks:

This rule will formally establish the standard for the unique health care provider identifier and will communicate the requirements for health plans, health care providers, and health care clearinghouses in implementing this standard.

Failure to publish this rule would jeopardize the benefits of administrative simplification. Payers would continue to maintain their own system of enumerating providers, and providers would need to maintain systems to store the different identifiers. Additional costs would thus be incurred.

60. SECURITY STANDARDS (CMS-0049-F)

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

PL 104-191; 42 USC 1320d-2(d)

CFR Citation:

45 CFR 162

Legal Deadline:

Final, Statutory, February 21, 1998.

Abstract:

This rule implements some of the requirements of the Administrative Simplification subtitle of the Health Insurance Portability and Accountability Act of 1996. It establishes standards for the security of health information used by health

plans, health care clearinghouses, and certain health care providers. These entities would use the security standards to develop and maintain the security of all electronic health information.

Statement of Need:

The Health Insurance Portability and Accountability Act of 1996 requires the Secretary of Health and Human Services to adopt security standards that require reasonable and appropriate administrative, technical and physical safeguards to: 1) ensure the integrity and confidentiality of health information; 2) protect against any reasonably anticipated threats or hazards to the security or integrity of the information; and 3) protect against unauthorized uses or disclosures of the information. This rule stipulates the requirements necessary to comply with the law.

Summary of Legal Basis:

The Administrative Simplification provisions of HIPAA require the Secretary to establish standards for the security of health information use by health plans, health care clearing houses, and certain health care providers.

Alternatives:

In the absence of Federal regulations, the security of health care information in electronic form would be left to the private sector to develop. It is believed that this course of action would result in an extremely uneven level of protection (ranging from none to excessive) for electronic health information pertaining to individuals and make it difficult, if not impossible, to provide for privacy of this information.

Anticipated Cost and Benefits:

As the effect of any one of the HIPAA standards is affected by the implementation of other standards, it is misleading to discuss the impact of one standard by itself. Therefore, an Impact Analysis on the total effect of all the standards was published in the proposed rule concerning the national provider identifier (HCFA-0045-P) which was published on May 7, 1998 (63 FR 25320). Security protection for health care information is not a "stand alone" type requirement. Appropriate security protections will be a business enabler, encouraging the growth and use of electronic data interchange. The synergistic effect of the employment of the recommended security practices, procedures and technologies will enhance all aspects of HIPAA's Administrative Simplification requirements.

Risks:

The storage, handling and transmission of health information has long been a paper process. However, the transition from paper to electronic media has begun and is increasing at a rapid pace. This transition has brought on a significantly increased risk to the security and confidentiality of health information, particularly for information pertaining to individuals. This rule formally establishes a baseline set of requirements for security that must be adopted by health care providers, health plans and health care clearinghouses. Compliance with these requirements will greatly decrease risk to the security, integrity and confidentiality of health information.

RIN: 0938–AI57

HHS—CMS

61. NATIONAL STANDARD EMPLOYER IDENTIFIER (CMS-0047-F)

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

PL 104-191; 42 USC 1320d to 1320-d-8

CFR Citation:

45 CFR 162

Legal Deadline:

Final, Statutory, February 21, 1998.

Abstract:

This rule institutes the employer identification number (EIN) as the standard for identifying employers for purposes of administrative simplification, as required by the Health Insurance Portability and Accountability Act of 1996. Use of one standard in the health care industry will reduce the cost of identifying employers in electronic health care transactions.

Statement of Need:

The Health Insurance Portability and Accountability Act of 1996 (Pub. L. 104-191) includes Subtitle F-Administrative Simplification, whose purpose is to improve the Medicare and Medicaid programs under the Social Security Act, and the efficiency and effectiveness of the health care system, by the establishment of standards and requirements for the electronic transmission of certain health information. This regulation establishes the standard for a unique employer identifier, as required by the Administrative Simplification provisions of Public Law 104-191.

Summary of Legal Basis:

The Administrative Simplification provisions of HIPAA require the Secretary of HHS to adopt a standard unique health identifier for each employer for use in the health care system and to specify the purposes for which a unique health identifier may be used.

Alternatives:

HHS examined several existing identifiers that might be adopted for the standard. In keeping with the requirements of HIPAA, because no standard setting organization had developed, adopted, or modified a standard for an employer identifier, HHS consulted with the National Uniform Billing Committee, the National Uniform Claim Committee, the Workgroup for Electronic Data Interchange and the American Dental Association in selecting this standard. HHS also relied on the recommendations of the National Committee on Vital and Health Statistics.

Anticipated Cost and Benefits:

As the effect of any one standard is affected by the implementation of other standards, it can be misleading to discuss the impact of one standard by itself. Therefore HHS did an impact analysis showing total costs and savings of all the HIPAA standards in the proposed rule concerning the national provider identifier (HCFA-0045-P), which can be found at 63 FR 25320. HHS determined that the requirements concerning the employer identifier would have a one time impact on those providers, clearinghouses, and health plans that have to convert to use the EIN, and on those employers that would have to disclose the EIN to covered entities.

Risks:

Failure to publish this rule would mean that no standard employer identifier would be established for use in the health care system. Lack of a standard employer identifier would decrease the savings in health care costs to be realized from administrative simplification.

HHS—CMS

62. FEE SCHEDULE FOR PAYMENT OF AMBULANCE SERVICES AND REVISIONS TO THE PHYSICIAN'S CERTIFICATION REQUIREMENTS FOR COVERAGE OF NONEMERGENCY AMBULANCE SERVICES (CMS-1002-FC)

Priority:

Other Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

PL 105-33, sec 4531(b)

CFR Citation:

42 CFR 410; 42 CFR 414

Legal Deadline:

Final, Statutory, January 1, 2000.

Abstract:

The Balanced Budget Act (BBA) of 1997 requires that the Secretary establish a fee schedule for ambulance services through negotiated rulemaking. The fee schedule was to be effective beginning with services furnished on or after January 1, 2000. However, other statutory obligations and the scope of systems changes required to implement the ambulance fee schedule were so numerous as to make it impossible for us to accomplish this concurrent with the critical work that we and our contractors had to perform to assure that our respective systems were compliant with the year 2000 requirements.

In the September 12, 2000 proposed rule, we indicated our intention to implement the fee schedule beginning January 1, 2001. However, although the proposed rule was largely based on an agreement reached as part of a negotiated rulemaking process with representatives of the ambulance industry and other interests, we received over 340 public comments. We did not have sufficient time to carefully consider all comments and publish a final rule in time to implement the fee schedule by January 1, 2001. This final rule establishes an implementation date of January 1, 2002. Our objective is to have the ambulance fee schedule become effective as soon as feasibly possible after the statutory date, in this case, April 1, 2002.

In addition to setting the payment rates, the Secretary is to ensure that the aggregate amount of payment made for ambulance services in 2001 may not exceed the amount of payment that would have been made absent the fee schedule. This is a cap on payment, not a budget neutrality adjustment. Negotiations were conducted by a committee chartered under the Federal Advisory Committee Act (FACA) (5 U.S.C. App. 2). We used the services of an impartial conveyer to help identify interests that would be significantly affected by the proposed rule (including residents of rural areas) and the names of persons who were willing and qualified to represent those interests. The Negotiated Rulemaking Committee on the Medicare Ambulance Services Fee Schedule consisted of national representatives of interests that were likely to be significantly affected by the fee schedule. To the extent that this proposed rule accurately reflected the Committee Statement as signed on February 14, 2000, each member to the Committee agreed not to comment on those issues on which consensus was reached.

In our proposed rule (65 FR 55078), we discussed the negotiated rulemaking procedure used to formulate our policy for the ambulance fee schedule. We also proposed additions to part 414, based on recommendations of the Committee. We discussed operational and regional variations, cost of living differences, services furnished in rural areas and mileage. The structure of the fee schedule, the ambulance inflation factor and phase-in methodology were also covered.

In addition, we proposed changes not based on the negotiated rulemaking, on matters including coverage of ambulance services, physician certification requirements, payment during the first year, and billing method. We discussed local or State ordinances, mandatory assignment, and miscellaneous payment policies, including multiple patients, pronouncement of death, multiple arrivals, and BLS services furnished in an ALS vehicle.

We presented our methodology for determining the conversion factor (CF) and for implementing the fee schedule. We discussed expenditure control for ambulance services, adjustments to account for inflation and the medical conditions list.

Statement of Need:

The establishment of this fee schedule is required by section 4531 of the BBA. In going through the negotiated rulemaking process, a fairer payment system will be implemented that is

consistent with the services furnished and that takes into account the variations caused by regional and operational differences among ambulance companies.

Summary of Legal Basis:

Section 4531 of the BBA requires the establishment of this fee schedule.

Alternatives:

Because section 4531 of the BBA requires the establishment of this fee schedule, no alternatives to this regulation exist.

Anticipated Cost and Benefits:

Benefits include establishing a fee schedule that will be commensurate with the services furnished, and will take into account the regional and operational variations in providing ambulances. The current reasonable charge/reasonable cost systems do not result in a fair geographic variation in payment allowances, since some areas receive two to three times the payment of other areas for the same services.

Risks:

Failing to implement the Medicare ambulance fee schedule would perpetuate an inequitable payment system that sometimes overpays and other times underpays for this critical aspect of medical care. The current system also has unintentional incentives to provide inefficient ambulance services in some areas, and inadequate ambulance services in areas of low population.

BILLING CODE 4150-24-S

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT (HUD)

Statement of Regulatory Priorities

The Department of Housing and Urban Development is the Federal agency responsible for national policy and programs that address Americans' housing needs, work to improve and develop the Nation's communities, and enforce fair housing laws. HUD's mission is to help to provide a decent, safe and sanitary home and suitable living environment for every American. HUD also plays a major role in supporting homeownership by underwriting homeownership for lower- and moderate-income families through its mortgage insurance programs.

HUD's regulatory plan for fiscal year 2002 reflects the leadership of Secretary Mel Martinez, who has called upon HUD to focus on activities that support its core mission. By concentrating on its basic responsibilities of helping to provide and maintain affordable housing and homeownership opportunities and promote economic growth in our Nation's communities, HUD minimizes the number of initiatives and programs that are not central to its mission, that consume critical resources, and consequently undermine HUD's ability to administer programs that are key to the success of achieving its mission.

Consistent with the Secretary's direction, the regulations highlighted in this regulatory plan and in the semiannual agenda of regulations, published elsewhere in today's **Federal Register**, are directed to implementing policies, procedures and programs that support HUD's core mission.

Priority: Expand Homeownership Opportunities

Homeownership plays a vital role in creating strong communities by giving families a stake in their neighborhoods and helping them to build wealth. Although a period of sustained economic growth has helped to raise the overall homeownership rate to a record level, the homeownership rates for minorities and low-income families lag far behind those of other families. For example, while more than two-thirds of Americans own their own homes, fewer than half of African-American and Hispanic families are homeowners.

While many of HUD's core programs, including the HOME Investment Partnerships Program, Federal Housing Administration mortgage insurance and the Community Development Block Grant program, help low-income families achieve the goal of homeownership, Secretary Martinez is moving forward with regulatory initiatives to create homeownership opportunities for low-income residents of public and assisted housing.

Regulatory Action: Implement the Section 8 Downpayment Initiative and Improve the Section 8 Homeownership Program

This initiative expands the use of Section 8 vouchers for homeownership. Section 301 of the American Homeownership and Economic Opportunity Act of 2000 authorizes the public housing agency to provide, in lieu of paying a monthly homeownership assistance payment, a single downpayment assistance grant to be used toward the purchase of a home. The final rule to be published in fiscal year 2002 follows publication of a June 2001 proposed rule, and will take into consideration public comment received on the proposed rule.

Regulatory Action: Implement the Public Housing Homeownership Program

This program, authorized by the Quality Housing and Work Responsibility Act of 1998, allows a public housing agency to make public housing dwelling units, public housing developments, and other housing developments available for purchase by low-income families as their principal residence. The final rule to be published in fiscal year 2002 follows publication of a September 1999 proposed rule, and will take into consideration public comment received on the proposed rule.

Priority: Maintaining Homeownership—Prohibiting Predatory Lending Practices

Over the last several years, our Nation has made enormous progress in expanding access to capital for previously underserved borrowers. Despite this progress, however, too many families are suffering today because of a growing incidence of predatory lending practices in this segment of the mortgage lending market. Predatory lending involves engaging in deception or fraud, manipulating the borrower through aggressive sales tactics, or taking unfair advantage of a borrower's lack of understanding about loan terms. These practices are often combined with loan terms that are abusive or make the borrower more vulnerable to abusive practices. Predatory lending threatens homeownership by placing on borrowers loans that are so expensive or have such high rates that borrowers are unable to repay and risk default. This significantly undercuts the Department's efforts to revitalize communities and expand homeownership for millions of Americans.

To address predatory lending, the Department is pursuing several regulatory initiatives.

Regulatory Action: Prohibition of Property Flipping in HUD's Single Family Mortgage Insurance Programs

This rule will prohibit "property flipping," a practice whereby recently acquired properties are immediately resold at an artificially inflated value, often abetted by collusion with the appraiser. The rule is designed to protect FHA borrowers from becoming unwitting victims of property flipping. The final rule to be published in fiscal year 2002 follows publication of a September 2001 proposed rule and ngle Family Loan Feestakes into consideration public comment received on the proposed rule.

Regulatory Action: Limitation on FHA Single Family Loan Fees

This proposed rule would cap the total amount of expenses and fees that can be charged on a mortgage insured by FHA. The cap would vary depending on the original principal amount of the mortgage. The cap would not include legitimate fees paid to service providers (such as settlement attorneys, property inspectors, appraisers), reasonable and customary discount points, and prepaid expenses (including escrows for taxes and insurance).

Regulatory Action: Appraiser Qualifications for Placement on FHA Single Family Appraiser Roster

This rule is designed to strengthen the integrity of FHA appraisals by requiring that appraisers have the minimum professional credentials required by the Appraiser Qualifications Board of the Appraisal Foundation. This rule helps ensure that homebuyers seeking FHA-insured mortgages receive accurate and complete appraisal of the homes they seek to purchase.

Priority: Providing and Maintaining Affordable Rental Housing

While seeking to expand homeownership opportunities, HUD recognizes that homeownership may not be practical for all families. To assist these families obtain safe, decent and affordable housing, HUD's regulatory plan will strengthen its current rental assistance programs rather than proposing any new ones. HUD will

focus in particular on improving housing agencies utilization of assistance.

Regulatory Action: Fully Implement the Capital Fund Program

The Capital Fund Program rule will fully implement the primary "bricks and mortar" program assisting public housing. The Capital Fund Program addresses the capital and management improvement needs of public housing agencies through the use of assistance made available under the Capital Fund Formula. The Capital Fund Formula was established by a final rule published on March 16, 2000. This Capital Fund Program rule continues and expands the streamlining of procedures and requirements initiated under the Comprehensive Grant and CIAP (Comprehensive Improvement Assistance Program) programs, and will remove and replace those program regulations as well as the existing development program requirements. The new Capital Fund Program Rule will govern not only the modernization of public housing, but the development of replacement housing and public housing management improvements as well as more flexible use of funds allowed by the Quality Housing and Work Responsibility Act of 1998.

Regulatory Action: Implement the Final Requirements for the Operating Fund Formula

This final rule will complete the rulemaking that establishes the new Operating Fund Formula, which began with a proposed rule developed through the negotiated rulemaking process. The Operating Fund Formula rule governs the payment of operating subsidies to public housing agencies. The interim rule, published on March 29, 2001, followed publication of a June 20, 2000 proposed rule, and took into consideration the public comments received on the proposed rule. The policies and procedures described in the interim rule will govern the determination of funding distributions to public housing agencies under the Operating Fund until a final rule, reflecting the results of a congressionally requested public housing cost study is developed and published.

Regulatory Action: Implement the Project-Based Voucher Program

This proposed rule will begin the rulemaking process to implement the new Project-Based Voucher Program. The Project-Based Voucher Program will extensively revise the existing project-based voucher program and further the Department's efforts to provide affordable housing to very low-income families. The rule will also implement congressional intent to make project-basing of voucher assistance more flexible.

Regulatory Action: Improve the Public Housing Assessment System

This proposed rule will propose changes to the Public Housing Assessment System (PHAS) and the regulations implementing that system. The PHAS, established in 1998, assesses the management performance of public housing agencies and resident management corporations in four critical areas of public housing operations: the physical condition of public housing; the financial condition of the public housing agency or resident management corporation; the management operations of the public housing agency or resident management corporation; and the satisfaction of the residents with the housing and services. The Department has begun meeting with public housing agencies, residents, representatives of these groups and other interested parties, to solicit input on how the PHAS can be improved and expects to put PHAS into effect on an interim basis shortly. The proposed rule to be issued will incorporate the input from these important stakeholders. Improvements made to the PHAS will in turn promote maintaining affordable rental housing.

Priority: Building Assets and Skills Among Low-Income Families

Central to HUD's mission of promoting strong communities are activities to help low-income working families acquire skills that will increase their earnings and to help families on welfare make progress towards self-sufficiency. HUD also seeks to help low-income families accumulate assets so that they can achieve homeownership, pursue educational opportunities, start a new business, and attain other important goals.

Regulatory Action: Revisions to Resident Participation Regulation

This rule will help promote building assets and skills among public housing residents. Among other changes, the proposed rule would establish policies, procedures, and requirements for participating in the Resident Opportunities and Self-Sufficiency Program. Overall, the rule will promote effective resident participation in public housing and assist in creating and maintaining a positive living environment.

Priority: Supporting Community and Economic Development

Regulatory Action: Making Brownfields Activities a CDBG-Eligible Activity

This rule will improve the ability of entitlement communities and States' grant recipients to use Community Development Block Grant (CDBG) funds for brownfields activities. By making eligible under the CDBG Program the cleanup and development of environmentally contaminated properties, the Department will move toward achieving one of the objectives under the CDBG Program, which is eliminating slums or blighting conditions.

The Priority Regulations That Comprise HUD's FY 2002 Regulatory Plan

A more detailed description of the priority regulations that comprise HUD's FY 2002 Regulatory Plan follows.

HUD—Office of Housing (OH)

PROPOSED RULE STAGE

---

63. PROHIBITION OF PROPERTY FLIPPING IN HUD'S SINGLE FAMILY MORTGAGE INSURANCE PROGRAMS (FR-4615)

Priority:

Other Significant

Legal Authority:

12 USC 1709; 12 USC 1710; 12 USC 1715b; 12 USC 1715u; 42 USC 3535(d)

CFR Citation:

24 CFR 203

Legal Deadline:

None

Abstract:

This rule addresses property "flipping," the practice whereby a property recently acquired is resold for a considerable profit with an artificially inflated value, often abetted by a lender's collusion with the appraiser. Specifically, the proposed rule would establish certain new requirements regarding the eligibility of properties for FHA mortgage insurance. The regulatory amendments made by this rule will protect FHA borrowers from becoming unwitting victims of property flipping. Further, the proposed changes comply with congressional mandates to maintain the FHA Insurance Fund in a sound actuarial manner.

Statement of Need:

Predatory lending — whether undertaken by creditors, brokers or even home improvement contractors — involves engaging in deception or fraud, manipulating the borrower through aggressive sales tactics, or taking unfair advantage of a borrower's lack of understanding about loan terms. These practices are combined with loan terms that, alone or in combination, are abusive or make the borrower more vulnerable to abusive practices. A major example of predatory lending is property "flipping," the practice whereby a recently acquired property is resold for a considerable profit with an artificially inflated value, often abetted by a lender's collusion with the appraiser. Most property flipping occurs within a matter of days after acquisition, and usually with only minor cosmetic improvements, if any.

Summary of Legal Basis:

The National Housing Act and HUD's authority under the Department of Housing and Urban Development Act authorize HUD to provide a home financing system through the insurance of mortgages that would maintain and expand homeownership opportunities, particularly to first-time homebuyers and low-income families.

Alternatives:

Nonregulatory initiatives to date have not proven to be sufficiently successful in curbing predatory lending practices.

Anticipated Cost and Benefits:

This rulemaking will help to reduce excessive fees and costs of home mortgages. The anticipated benefit is that the rule will help to reduce foreclosure arising from high-cost mortgages.

Risks:

This rule poses no threat to public safety, health, or the environment.

Timetable:

HUD—OH

64. APPRAISER QUALIFICATIONS FOR PLACEMENT ON FHA SINGLE FAMILY APPRAISER ROSTER (FR-4620)

Priority:

Other Significant

Legal Authority:

12 USC 1701 to 1715z-18; 42 USC 3535(d)

CFR Citation:

24 CFR 200

Legal Deadline:

None

Abstract:

This rule makes several regulatory changes designed to strengthen the licensing and certification requirements for placement on the Federal Housing Administration (FHA) Appraiser Roster. First, the rule requires that appraisers on the Appraiser Roster must have professional credentials that are based on the minimum licensing/certification standards issued by the Appraiser Qualifications Board of the Appraisal Foundation. The rule also clarifies that an appraiser may be removed from the Appraiser Roster if the appraiser loses his or her license or certification in any State due to disciplinary action, even if the appraiser continues to be licensed or certified in another State. Finally, the rule provides that an appraiser who is licensed or certified in a single State and whose license or certification has expired, or has been revoked, suspended or surrendered as a result of a State disciplinary action, will be automatically suspended from the Appraiser Roster until HUD receives evidence demonstrating renewal or that the State-imposed sanction has been lifted.

Statement of Need:

HUD's Appraiser Roster lists those appraisers who are eligible to perform FHA single family appraisals. HUD maintains the Appraiser Roster to provide a means by which HUD can monitor the quality of appraisals performed on single family homes financed through the FHA single family programs and to ensure that appraisers performing FHA appraisals meet high competency standards. The Appraiser Roster is an important part of the FHA Single Family Mortgage Insurance program because accurate appraisals are vital to the success of the program and HUD's ability to protect the FHA Insurance Fund. The changes made by this final rule are necessary to ensure that homebuyers seeking FHA-insured mortgages receive accurate and complete appraisals of the homes they seek to purchase.

Summary of Legal Basis:

The National Housing Act and HUD's authority under the Department of Housing and Urban Development Act authorize HUD to provide a home financing system through the insurance of mortgages that would maintain and expand homeownership opportunities, particularly to first-time homebuyers and low-income families. This authority includes the regulation of appraisers participating in the FHA single family mortgage insurance programs.

Alternatives:

HUD has established codified placement and removal procedures for the FHA Appraiser Roster. The changes made by this final rule would modify these requirements and, therefore, must also be promulgated through regulation. Furthermore, nonregulatory alternatives (such as promulgation through mortgagee letter) would not be binding upon appraisers.

Anticipated Cost and Benefits:

This rulemaking will strengthen the FHA Appraiser Roster licensing and certification requirements. The anticipated benefit is that the rule will enhance the accuracy and integrity of FHA appraisals, thereby reducing opportunities for fraud and predatory lending abuses conducted with the collusion of unscrupulous appraisers, such as property flipping.

Risks:

This rule poses no risk to public health, safety or the environment.

65. • LIMIT ON FHA SINGLE FAMILY LOAN FEES (FR-4700)

Priority:

Other Significant

Legal Authority:

12 USC 1709; 12 USC 1710; 12 USC 1715b; 12 USC 1715u; 12 USC 1715z to 1720; 42 USC 3535(d); ...

CFR Citation:

24 CFR 203; 24 CFR 206

Legal Deadline:

None

Abstract:

This proposed rule would implement one of several new HUD initiatives to combat predatory lending in the Federal Housing Administration (FHA) single family mortgage insurance programs. The proposed rule would cap the total amount of charges and fees that may be charged on FHA-insured single family mortgages. This maximum amount would vary depending on the original principal amount of the mortgage. If the original principal amount of the mortgage is $20,000 or less, the total allowable charges and fees may not exceed 6 percent of the original principal amount or $1,000, whichever is the greater. If the original principal amount of the mortgage is greater than $20,000, the total allowable charges and fees may not exceed 5 percent of the original principal amount. The cap would not include legitimate fees paid to service providers (such as settlement attorneys, property inspectors, appraisers, credit reporting agencies and title insurers), reasonable and customary discount points, and prepaid expenses (including escrows for taxes and insurance).

Statement of Need:

Predatory lending — whether undertaken by creditors, brokers or even home improvement contractors — involves engaging in deception or fraud, manipulating the borrower through aggressive sales tactics, or taking unfair advantage of a borrower's lack of understanding about loan terms. These practices are combined with loan terms that, alone or in combination, are abusive or make the borrower more vulnerable to abusive practices. While no one set of abusive lending practices or terms characterizes a predatory mortgage loan, a loan can be predatory when lenders or brokers charge borrowers excessive, often hidden fees or make loans without regard to a borrower's ability to repay.

Summary of Legal Basis:

The National Housing Act and HUD's authority under the Department of Housing and Urban Development Act authorize HUD to provide a home financing system through the insurance of mortgages that would maintain and expand homeownership opportunities, particularly to first-time homebuyers and low-income families.

Alternatives:

Nonregulatory initiatives to date have not proven to be sufficiently successful in curbing predatory lending practices.

Anticipated Cost and Benefits:

This rulemaking will help to reduce excessive fees and costs of home mortgages. The anticipated benefit is that the rule will help to reduce foreclosure arising from high-cost mortgages.

Risks:

This rule poses no risk to public health, safety or the environment.

PROPOSED RULE STAGE

66. • CDBG BROWNFIELDS/SLUM/BLIGHT (FR-4699)

Priority:

Other Significant

Legal Authority:

42 USC 3535(d); 42 USC 5301 et seq

CFR Citation:

24 CFR 570

Legal Deadline:

None

Abstract:

This rule will improve the ability of entitlement communities and States' grant recipients to use Community Development Block Grant (CDBG) funds for brownfields activities. The rule will clarify the eligibility of activities involving the cleanup and development of environmentally contaminated properties under section 105(a) of the Housing and Community Development Act of 1974, as amended. The rule also will increase CDBG recipients' flexibility to undertake activities meeting the national objective of preventing or eliminating slums or blighting conditions. The criteria for meeting the slum/blight national objective will be revised to specifically recognize economic obsolescence of buildings and the presence of environmental contaminants as blighting influences on an area or property. This rule will further clarify the list of activities that may be undertaken to address the slum/blight national objective criteria on a spot basis. Finally, this rule makes corresponding changes in the eligibility regulations governing the Section 108 Loan Guarantee component of the CDBG program.

Statement of Need:

Current CDBG regulations concerning the slum/blight national objective only recognize the presence of physically deteriorated buildings or public improvements as blighting influences on an area or property. Professional practice and thinking in the community development field is evolving toward a more encompassing view of the factors that influence urban decay. Failure to update and streamline CDBG program rules would hinder grantees' efforts to redevelop underutilized properties and improve physical conditions in neighborhoods. In the FY 1999 HUD Appropriations Act (Public Law 105-276), Congress included language clarifying the eligibility of activities to clean up and develop environmentally contaminated properties; this rule will revise the eligible activities discussion in the CDBG regulations to reflect this statutory language. In addition, the rule will respond to a HUD OIG audit recommendation by adding clarifying language regarding activities that may be undertaken to address the slum/blight national objective on a spot basis.

Summary of Legal Basis:

Under 42 U.S.C. 3535(d), the Department may make such rules and regulations as may be necessary to carry out its functions, powers, and duties. The Department's regulations governing the Community Development Block Grant program are found at 24 CFR part 570, and are promulgated pursuant to the statutory authority to administer the program vested by the Housing and Community Development Act of 1974, as amended (42 U.S.C. 5301 et seq.).

Alternatives:

The Department has considered a number of options regarding the regulatory approach to take in issuing this rule; the Department has commissioned a number of independent studies on the use of CDBG funds to remediate and develop brownfields, and has consulted with practitioners in the community development and brownfields professional fields. In 1994, the Department sought comment from the public on how to proceed with such a rule. The Department plans to pursue a rule that provides as much flexibility as possible to grantees in determining what types of remediation/development activities may be undertaken. The Department has also considered the "no rule" option; however, grantees and other interested parties continue to voice support for issuance of such a rule.

Anticipated Cost and Benefits:

Costs: None. The rule simply adds flexibility to grantees in their choice of activities with which to assist with CDBG funding; no additional cost or burden is imposed on grantees that choose to take advantage of this flexibility.

Benefits: Grantees will gain the flexibility to use CDBG funds to assist in redeveloping a larger universe of properties whose conditions negatively influence the condition of the surrounding area.

Risks:

This rule poses no threat to public safety, health or the environment. Any cleanup of contaminated sites will be governed by existing Federal and State standards for environmental remediation.

PROPOSED RULE STAGE

---

67. PUBLIC HOUSING CAPITAL FUND PROGRAM (FR-4507)

Priority:

Other Significant

Legal Authority:

42 USC 1437g; 42 USC 3535(d)

CFR Citation:

24 CFR 905

Legal Deadline:

None

Abstract:

This rule will implement the new Capital Fund Program for the capital and management improvement needs of public housing agencies. The rule will complement the rule for the Public Housing Capital Fund Program formula allocation funding system published on March 16, 2000 (65 FR 14422). This rule will implement the regulatory framework for the Capital Fund Program that will govern the use of the assistance made available through the Capital Fund formula. The new rule at part 905 will replace and remove several other rules that currently govern a PHA's use of HUD assistance including part 941 - Public Housing Development and part 968 - Public Housing Modernization. This rule will continue and expand the streamlining of procedures and requirements initiated under the Comprehensive Grant and Comprehensive Improvement programs at part 968.

Statement of Need:

Assistance under the Capital Fund Program is the primary, regular source of funding made available by HUD to a PHA for its capital activities, including modernization and development of public housing. This final rule will implement the requirements for the use of assistance made available under the Capital Fund program. The regulations will provide the appropriate notice of the legal framework for the program, and clear and uniform guidance for program operation.

Summary of Legal Basis:

Sections 518, 519, and 539 of the Quality Housing and Work Responsibility Act of 1998 (Pub. L. 105-276, referred to as the Public Housing Act) amended sections 9 and 5, and added section 35(g) of the U.S. Housing Act of 1937 (42 U.S.C. 1437g).

Alternatives:

The QHWRA required a formula system to be established through negotiated rulemaking to govern funding of PHAs' public housing capital needs. Guidance for administration of these funds necessitates a permanent legal framework rather than informal and sporadic HUD notices.

Anticipated Cost and Benefits:

The costs of the program as administered with one fund from which a PHA will fund all of its capital needs is the same as under existing provisions. The benefits of having one funding mechanism for all such needs, and the provision of additional flexibility to PHAs to manage their physical assets provides increased benefits to the PHAs. Likewise, uniform program administration of these funds will provide increased benefits to the PHAs.

Risks:

This rule poses no threat to public safety, health, or the environment.

68. PROJECT-BASED VOUCHER PROGRAM (FR-4636)

Priority:

Other Significant

Legal Authority:

42 USC 1437f; 42 USC 3535(d)

CFR Citation:

24 CFR 983

Legal Deadline:

None

Abstract:

The rule will implement the new Section 8 project-based voucher program. It is based on comprehensive legislation that Congress passed along with HUD's FY 2001 appropriation. Among the many changes made by the law, the rule will cover requirements on: competition, consistency of the PHA plan and deconcentration efforts, definition of supportive services, and HQS inspections.

Statement of Need:

This rule proposes an extensive revision of the Section 8 project-based assistance program to eliminate the differences between the current project-based assistance regulations and the new law (Pub.L. 106-377) which implements the new Section 8 project-based assistance voucher program. Additionally, this rule will implement Congress' intent to make Section 8 project-basing of voucher assistance more flexible and further the Department's efforts to provide affordable housing for very-low-income families.

Summary of Legal Basis:

Section 232 of the FY 2001 Departments of Veterans Affairs and Housing and Urban Development and Independent Agencies Appropriations Act (Pub.L. 106-377) substantially revised the provisions of the U.S. Housing Act of 1937 that govern the authority of a public housing agency to designate a portion of its available tenant-based voucher funds for project-based assistance.

Alternatives:

None.

Anticipated Cost and Benefits:

This rule will have the benefit of increasing the number of affordable housing units for very low-income families. Increasing the flexibility of the project-based requirements will make the project-based voucher program more flexible and more workable. Because the revised regulation would be a refinement or improvement of existing procedures, and should result in no additional, or a decrease in, monitoring or reporting burdens, additional costs to PHAs and to HUD are negligible.

Risks:

The rule poses no risk to public health, safety or the environment.

69. RESIDENT PARTICIPATION IN PUBLIC AND SECTION 8 HOUSING (FR-4657)

Priority:

Other Significant

Legal Authority:

42 USC 1437c-1; 42 USC 1437r; 42 USC 1437t; 42 USC 1437z-6; 42 USC 3535(d); 42 USC 1437d; 42 USC 1437g; 42 USC 1437l;; 12 USC 1715z-1b(a)

CFR Citation:

24 CFR 964

Legal Deadline:

None

Abstract:

This rule would update existing provisions of 24 CFR 964 and incorporate new provisions of the Quality Housing and Work Responsibility Act of 1998 related to resident/tenant participation. In particular, the rule would establish policies, procedures, and requirements for participating in the Resident Opportunities and Self-Sufficiency (ROSS) Program. Additionally, the proposed rule contains expanded definitions and other general information sections as part of HUD's long-standing efforts to support resident organizations and resident self-sufficiency.

Statement of Need:

Various sections of QHWRA provide statutory authority for permanent programs. These regulations will provide appropriate notice of the legal framework for these programs, and clear and uniform instructions and procedures for implementation.

Summary of Legal Basis:

Various sections of QHWRA provide statutory authority for permanent programs. These regulations will provide appropriate notice of the legal

framework for these programs, and clear and uniform instructions and procedures for implementation.

Alternatives:

The programs authorized under QHWRA need a long-term legal framework. Therefore regulations are required as an alternative to short-term program notices or notices of funding availability (NOFAs).

Anticipated Cost and Benefits:

The establishment of regulations will bring certainty to the resident related programs authorized by QHWRA, to confirm their permanency. The regulations when issued will provide the legal basis for these resident related programs. The certainty to be provided through issuance of regulations should reduce costs by providing longer-term participation and planning on the part of program participants.

Risks:

The rule poses no threat to public safety, health, or the environment.

70. • AMENDED PUBLIC HOUSING ASSESSMENT SYSTEM (PHAS) RULE (FR-4707)

Priority:

Other Significant

Legal Authority:

42 USC 1437d(j); 42 USC 3535(d)

CFR Citation:

24 CFR 902

Legal Deadline:

None

Abstract:

Through this rule, the Department will be revising the regulations that govern the Public Housing Assessment System (PHAS). This rule will incorporate the input of public housing stakeholders groups in the public housing assessment process.

Statement of Need:

Per the directive of the Secretary of HUD, the Department has agreed to consider changes to the current PHAS rule based on consultation with public housing stakeholders including industry representatives, resident groups and other interested Federal and congressionally chartered agencies. As most PHAS Indicators have been in an advisory status since its inception, the Department believes that the entire PHAS system needs to be reevaluated and modified.

Summary of Legal Basis:

The Secretary of HUD is directed under section 6(j) of the United States Housing Act of 1937 (42 U.S.C. 1437 et seq.) to develop and publish in the Federal Register indicators to assess the management performance of public housing agencies and resident management corporations. Such indicators shall enable the Secretary to evaluate the performance of public housing agencies and resident management corporations in all major areas of management operations.

Alternatives:

An interim rule is an alternative currently under consideration. However, the intent of the interim rule is to provide the Department with a fully implemented assessment system while the amended PHAS rule is being rewritten. Other alternatives that have been considered, such as utilizing the Management Indicator (MASS) only, fails to meet the Department's strategic goal of ensuring that public housing agencies provide decent, safe and sanitary housing.

Anticipated Cost and Benefits:

This rule will have the benefit of promoting the success of PHAS by ensuring the buy-in of public housing stakeholder groups in the public housing assessment process. The new rule will soon be in the development phase; therefore, accurate cost estimates cannot be provided at this time.

Risks:

This rule poses no risk to public health, safety or the environment.

FINAL RULE STAGE

71. OPERATING FUND ALLOCATION FORMULA (FR-4425)

Priority:

Other Significant

Legal Authority:

42 USC 1437g; 42 USC 3535(d)

CFR Citation:

24 CFR 990

Legal Deadline:

None

Abstract:

This final rule will follow publication of a March 29, 2001 interim rule that governs the determination of funding distribution to public housing agencies under the Operating Fund and will reflect the results of a Congressionally mandated cost study. The Conference Report to HUD's FY 2000 Appropriations Act (Pub.L. 106-74, approved October 20, 1999) directs HUD to contract with the Harvard University Graduate School of Design to conduct a study of the cost incurred

in operating well-fund public housing and provides the results to the negotiated rulemaking committee and the appropriate congressional committees). As portions of the study are completed, HUD is meeting with representatives of the negotiated rulemaking committee that helped HUD develop the Operating Fund proposed rule, as well as other interested parties. These meetings have also been open to the public. HUD will develop the final rule based on the results of the cost study, the comments on the interim rule and further input from the members of the Operating Fund proposed rule negotiating committee and other interested members of the public.

Statement of Need:

Section 519 of the Quality Housing and Work Responsibility Act requires HUD to develop this rule to govern funding of PHAs' operating and management needs.

Summary of Legal Basis:

Section 519 of the Quality Housing and Work Responsibility Act amending section 9 of the U.S. Housing Act of 1937, codified at 42 USC 1437g.

Alternatives:

The Quality Housing and Work Responsibility Act of 1998 requires that this new formula system be developed through negotiated rulemaking.

Anticipated Cost and Benefits:

The costs of the program as administered with one fund from which a PHA will fund all of its operating and management needs will be the same as under existing provisions. The benefits of having this new formula system developed through negotiated rulemaking is that it allows those entities and individuals directly affected — public housing agencies and their residents — to have a say in how the formula will operate, and consequently to help foster constructive, creative and acceptable solutions to difficult problems.

Risks:

This rule poses no threat to public safety, health, or the environment.

72. PUBLIC HOUSING HOMEOWNERSHIP PROGRAMS (FR-4504)

Priority:

Other Significant

Legal Authority:

42 USC 1437z-4; 42 USC 3535(d)

CFR Citation:

24 CFR 906

Legal Deadline:

None

Abstract:

This rule will set forth the requirements and procedures governing a new statutory homeownership program to be administered by public housing agencies. Under this rule, a PHA makes public housing dwelling units available for purchase by low-income families as their principal residences.

Statement of Need:

This rulemaking is needed to implement the public housing homeownership program authorized by section 32 of the U.S. Housing Act of 1937.

Summary of Legal Basis:

Section 536 of the Quality Housing and Work Responsibility Act of 1998 (QHWRA) amended title I of the U.S. Housing Act of 1937 (42 U.S.C. 1437 et seq.) by adding a new section 32, which authorized a new public housing homeownership program to replace the program formerly authorized under section 5(h) of the 1937 Act.

Alternatives:

There are no alternatives to rulemaking in order to implement the program.

Anticipated Cost and Benefits:

The rule provides the parameters for the use of public housing properties to create homeownership opportunities for low-income residents of public housing and other low-income families should a public housing agency choose to do so. The rule's major effect is on individuals; any incidental effect on other entities would be limited to their cooperative efforts in promoting homeownership among public housing residents and other low-income families.

Risks:

This rule poses no threat to the to public health, safety or the environment.

73. • SECTION 8 DOWNPAYMENT INITIATIVE (FR-4670)

Priority:

Other Significant

Legal Authority:

42 USC 1437f; 42 USC 3535(d)

CFR Citation:

24 CFR 982

Legal Deadline:

None

Abstract:

Section 301 of the American Homeownership and Economic Assistance Act of 2000 authorizes an alternative form of assistance under the Section 8 homeownership option by providing for assistance in the form of a single downpayment assistance grant. Under section 301, a public housing agency (PHA) may, in lieu of paying a monthly homeownership assistance payment on behalf of a family, provide homeownership assistance for the family in the form of a single grant to be used toward the downpayment required in connection with the purchase of the home.

Statement of Need:

This rulemaking is needed to implement section 301 and complete the Section 8 Homeownership Program regulation at 24 CFR part 982, which currently only provides for monthly homeownership assistance payments.

Summary of Legal Basis:

Under 42 U.S.C. 3535(d), the Department may make such rules and regulations as may be necessary to carry out its functions, powers, and duties. Section 301 of the American Homeownership and Economic Assistance Act of 2000 (Public Law 106-569, 114 Stat. 2944, 2952, approved December 27, 2000) amends the "homeownership option" under section 8(y) of the United States Housing Act of 1937 (42 U.S.C. 1437f(y)) to permit downpayment assistance and provides specific authority for this rule.

Alternatives:

This additional statutory authority expands the use of Section 8 assistance for homeownership and compliments an existing rule which must be amended to address the new form of assistance made available.

Anticipated Cost and Benefits:

This rule adds a new eligible use of Housing Choice Vouchers as authorized by statute. A PHA may choose whether or not to make assistance available for this new use, and local conditions on the relative benefits of eligible uses will influence its determination to make such assistance available, thereby maximizing the benefit.

Risks:

This rule poses no threat to public safety, health or the environment.

BILLING CODE 4210-01-S

DEPARTMENT OF THE INTERIOR (DOI)

Statement of Regulatory Priorities

The Department of the Interior (DOI) is the principal Federal steward of our Nation's public lands and resources, including many of our cultural treasures. We serve as trustee to Native Americans and Alaska natives and also are responsible for relations with the island territories under United States jurisdiction. We manage more than 450 million acres of Federal lands, including 384 park units, 537 wildlife refuges, and 24,000 miles of trails, and approximately 1.7 billion acres in submerged waters in offshore waters. The Department recovers endangered species, manages water projects, fights wildland fires, leases coal, oil and gas to meet the Nation's energy needs, educates children in Indian schools and provides recreational opportunities for almost 300 million visitors annually in our national parks.

In carrying out these responsibilities, the Department:

- Manages natural resources on public lands, including energy and mineral resources, water and grazing lands;
- Provides recreation opportunities;
- Protects the environment and preserves our Nation's natural and cultural resources;
- Meets our trust responsibilities to Indian tribes and our commitments to the people of the U.S. territories; and
- Provides science relating to land and resource management.

The Department is committed to achieving its stewardship objectives in partnership with States, communities, and others through consultation, cooperation, and communication.

We will review and update the Department's regulations and policies to ensure that they are effective, efficient, and promote accountability. Special emphasis will be given to regulations and policies that:

- Adopt performance-based approaches focusing on achieving results in the most cost-effective and timely manner;
- Incorporate the best available science, including peer review wherever appropriate;
- Promote partnerships with States and other groups and individuals;
- Provide incentives for private landowners to achieve conservation goals; and
- Minimize regulatory and procedural burdens, promoting fairness and accountability by agency regulators while maintaining performance goals.

Major Regulatory Areas

Among the Department's bureaus and offices, the Office of Surface Mining Reclamation and Enforcement (OSM) has the highest concentration of regulatory responsibilities. OSM, in partnership with the States and Indian tribes, has the responsibility for setting and enforcing environmental standards during coal mining and reclamation operations. Other DOI bureaus rely on regulations to implement legislatively mandated programs by focusing on the management of natural resources and public or trust lands. Some of these regulatory activities include:

- Management of migratory birds and preservation of certain marine mammals and endangered species;
- Management of dedicated lands, such as national parks, wildlife refuges, and American Indian trust lands;
- Management of public lands open to multiple use;
- Leasing and oversight of development of Federal energy, minerals, and renewable resources;
- Management of revenues from American Indian and Federal minerals;
- Fulfillment of trust and other responsibilities pertaining to American Indian tribes;
- Natural resource damage assessments; and
- Management of financial and nonfinancial assistance programs.

Regulatory Policy

How DOI Regulatory Procedures Relate to the Administration's Regulatory Policies

Within the requirements and guidance in Executive Orders 12866, 12630, and 13132, DOI's regulatory program seeks to:

- Fulfill all legal requirements as specified by statutes or court orders;
- Perform essential functions that cannot be handled by non-Federal entities;
- Minimize regulatory costs to society while maximizing societal benefits; and
- Operate programs openly, efficiently and in cooperation with Federal and non-Federal entities.

DOI bureaus have taken the initiative in working with other Federal agencies, non-Federal government agencies, and public entities to make our regulations easier to comply with and understand. Because regulatory improvement is a continuing process that requires the participation of all affected parties, we strive continually to include all affected entities in the decisionmaking process and to issue rules more efficiently. To better manage and review the regulatory process, we have revised our internal rulemaking guidance. Results have included:

- Increased bureau awareness of and responsiveness to the needs of small businesses and better compliance with the Small Business Regulatory Enforcement Fairness Act (SBREFA);
- A departmentwide effort to evaluate the economic effects of rules and regulations that are planned; and
- Issuance of new guidance in the Departmental Manual to ensure the use of plain language in Government writing.

We are committed to improving the regulatory process through the use of plain language. Simplifying regulations has resulted in a major rewrite of the regulations for onshore oil and gas leasing and operations in an easily understandable form that: (a) Puts previously published rules into one location in a logical sequence; (b) eliminates duplication by consolidating existing regulations and onshore orders and national notices to lessees; (c) incorporates industry standards by reference; and (d) implements performance standards in some of the operating regulations. Our regulatory process ensures that bureaus share ideas on how to reduce regulatory burden while meeting the requirements of the laws they enforce and improving their stewardship of the environment and resources under their purview.

Encouraging Responsible Management of the Nation's Resources

The Department's mission includes protecting and providing access to our Nation's natural and cultural heritage and honoring our trust responsibilities to tribes. We are committed to this mission and to applying laws and regulations fairly and effectively. The Department's priorities include protecting public health and safety, restoring and maintaining public lands, solving land and resource-management problems on public lands, and ensuring accountability and compliance with Federal laws and regulations.

An example of this is the "no surprises" policy of the U.S. Fish and Wildlife Service (FWS). This policy gives property owners an incentive to implement voluntary conservation measures for a proposed or candidate endangered or threatened species, or a species likely to become a candidate or proposed in the near future. These property owners will receive assurances from FWS that additional conservation measures will not be required and additional land, water, or resource use restrictions will not be imposed should the species become listed in the future. This policy results in more involvement by landowners in species protection, fewer fines, no "surprises" (in the form of unexpected fines) for conforming landowners, better overall protection of species, and better compliance with the Endangered Species Act.

Minimizing Regulatory Burdens

We are using the regulatory process to ease the burdens on various entities throughout the country while improving results. For instance, the Endangered Species Act (ESA) allows for the delisting of threatened and endangered species if they no longer need the protection of the ESA. We have identified approximately 40 species for which delisting or downlisting (reclassification from endangered to threatened) may be appropriate.

We use performance standards in a variety of regulations to improve compliance and achievement of regulatory goals. These allow the affected entity to choose the most economical method to accomplish a goal provided it meets the requirements of the regulations. An example of this is Minerals Management Service's (MMS) training rule, which will allow companies with operations in the Outer Continental Shelf (OCS) to select their own training courses or programs for employees. The new rule will allow lessees and contractors to properly train the employees by any method they choose as long as the employees are competent. We anticipate that this will result in new and innovative training techniques and allow companies added flexibility in tailoring their training to employees' specific duties.

Encouraging Public Participation and Involvement in the Regulatory Procedure Process

Encouraging increased public participation in the regulatory process to improve results by ensuring that regulatory policies take into account the knowledge and ideas of our customers, regulated community, and other interested participants. The Department is reaching out to communities to seek public input on a variety of regulatory issues. For example, every year FWS establishes migratory bird hunting seasons in partnership with "flyway councils," which are made up of State fish and wildlife agencies. As the process evolves each year, FWS holds a series of public meetings to give other interested parties, including hunters and other groups, opportunities to participate in establishing the upcoming season's regulations.

Similarly, the Bureau of Land Management (BLM) uses Resource Advisory Councils (RACs) made up of affected parties to help prepare land management plans regulations that it issues under the Rangeland Reform Act.

We encourage public consultation during the regulatory process. For example:

- OSM is continuing its outreach to interested groups to improve the substance and quality of rules and, to the greatest extent possible, achieve consensus on regulatory issues;
- The Bureau of Indian Affairs is developing its roads program rule using the negotiated rulemaking process. Because of the importance of the roads program to the individual tribes and because of the varying needs of the tribal governments, the negotiated rulemaking process will result in a rule that better serves the diverse needs of the Native American community.

The Future of DOI

Interior plans to develop a single Departmentwide strategic plan during FY 2002 in response to congressional, OMB, and other appraisals indicating that Interior's ten separate strategic planning documents are too long and lack the appropriate agency-level focus. Interior also intends to use the single Strategic Plan as the basis for preparing a single Departmentwide Annual Performance Plan beginning with the plan for FY 2004. The Interior bureaus will continue to prepare internal plans to support their budget initiatives and to meet management excellence and accountability needs. However, in the future we plan to submit only Departmentwide strategic and annual plans to the Congress. Finally, the process of developing a single strategic plan also will provide the Secretary with an opportunity to:

- Set an agenda for Interior that reflects the Administration's and the Secretary's priorities,
- Consult with key interested constituents on the future direction of the Department, and
- Make Interior programs more "results-oriented" and accountable to citizens.

Bureaus and Offices Within DOI

The following brief descriptions summarize the regulatory functions of DOI's major regulatory bureaus and offices.

Office of the Secretary, Natural Resource Damage Assessment and Restoration Program

The regulatory functions of the Natural Resource Damage Assessment and Restoration Program (Restoration Program) stem from requirements under section 301(c) of the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended (CERCLA). Section 301(c) requires the development of natural resource damage assessment rules and the biennial review and revision, as appropriate, of these rules. Rules have been promulgated for the optional use of natural resource trustees to assess compensation for damages to natural resources caused by hazardous substances. The Restoration Program is overseeing the study and possible promulgation of additional rules pursuant to section 301(c)(2) and the review and possible revision of the existing rule in compliance with section 301(c)(3).

In undertaking DOI's responsibilities under section 301(c), the Restoration Program is striving to meet three regulatory objectives: (a) make the regulation user friendly through the use of plain language so that the assessment and restoration process can be followed by all interested parties; (b) move towards a restoration bases approach for determining compensation rather than monetizing economic damages, and (c) follow a process that is based on facilitating negotiated settlements rather than litigation over natural resource damages.

Bureau of Indian Affairs

The Bureau of Indian Affairs (BIA) is responsible for managing trust responsibilities to the Indian tribes and encouraging tribal governments to assume responsibility for BIA programs.

The Bureau's rulemaking and policy development processes are designed to foster public and tribal awareness of the standards and procedures that directly affect them. The processes also encourage the public and the tribes to participate in developing these

standards and procedures. The goals of BIA regulatory policies are to: (a) ensure consistent policies within BIA that result in uniform interactions with the tribal governments; (b) facilitate tribal involvement in managing, planning, and evaluating BIA programs and services; and (c) ensure continued protection of tribal treaties and statutory rights.

Bureau of Land Management

The Bureau of Land Management manages about 264 million acres of land surface and about 570 million acres of Federal mineral estate. These lands consist of extensive grasslands, forests, mountains, arctic tundra, and deserts. Resources on the lands include energy and minerals, timber, forage, wild horse and burro populations, habitat for fish and wildlife, wilderness areas, and archeological and cultural sites. BLM manages these lands and resources for multiple purposes and the sustained yield of renewable resources. Primary statutes under which the Agency must operate include: The Federal Land Policy and Management Act of 1976; the General Mining Law of 1872; the Mineral Leasing Act of 1920, as amended; the Recreation and Public Purposes Act; the Taylor Grazing Act; and the Wild, Free-Roaming Horses and Burros Act.

The regulatory program mirrors statutory responsibilities and Agency objectives. Agency objectives include:

- Providing for a wide variety of public uses while maintaining the long-term health and diversity of the land and while preserving significant natural, cultural, and historical resource values;
- Understanding the arid, semi-arid, arctic, and other ecosystems we manage and committing to using the best scientific and technical information to make resource management decisions;
- Understanding the needs of the public that use BLM-managed lands and providing them with quality service;
- Committing to recovering a fair return for using publicly owned resources and avoiding the creation of long-term liabilities for American taxpayers; and
- Resolving problems and implementing decisions in cooperation with other agencies, States, tribal governments, and the public.

The regulatory program contains its own objectives. These include preparing regulations that:

- Are the product of coordination and consultation with all affected members of the public;
- Are understandable to the general public, especially those to whom they are directly applicable; and
- Are reviewed periodically to determine whether or not BLM still needs them, whether or not they need to be updated to reflect statutory and policy changes, and whether they are achieving desired results.

Minerals Management Service

The Minerals Management Service (MMS) has two major responsibilities: (1) timely and accurate collection, distribution, accounting for, and auditing of revenues owed by holders of Federal onshore, offshore, and tribal land mineral leases in a manner that meets or exceeds Federal financial integrity requirements and recipient expectations; and (2) management of the resources of the Outer Continental Shelf in a manner that provides for safety, protection of the environment, and conservation of natural resources. These responsibilities are carried out under the provisions of the Federal Oil and Gas Royalty Management Act, the Minerals Leasing Act, the Outer Continental Shelf Lands Act, the Indian Mineral Leasing Act, and other related statutes.

Our regulatory philosophy is to develop clear, enforceable rules that support the missions of each program. For the Offshore Minerals Management program, as authorized by the Deep Water Royalty Relief Act (DWRRA) (P.L. 104-58), we plan to issue a final regulation to revise current regulations at 30 CFR 203. The revised rule would provide detailed instructions on how deep water leases issued before the DWRRA may apply and qualify for royalty-suspension on a case-by-case basis. We plan to revise and extend these instructions to certain additional categories of OCS leases, especially those issued after 2000. We will also continue to review rules and issue amendments in response to new technology and new industry practices.

We also plan to continue our review of existing regulations and to issue rules to refine the Minerals Revenue Management (MRM) regulations in chapter II of 30 CFR. MRM is in the process of issuing regulations to: (1) revise its oil valuation regulations for Indian leases; and (2) codify provisions in the Federal Oil and Gas Royalty Simplification and Fairness Act of 1996; and (3) implement new financial and compliance procedures resulting from a major reengineering initiative.

Office of Surface Mining Reclamation and Enforcement

The Office of Surface Mining Reclamation and Enforcement (OSM) was created by the Surface Mining Control and Reclamation Act of 1977 (SMCRA) to "strike a balance between protection of the environment and agricultural productivity and the Nation's need for coal as an essential source of energy."

The principal regulatory provisions contained in title V of SMCRA set minimum requirements for obtaining a permit for surface coal mining operations, set standards for those operations, require land reclamation once mining ends, and require rules and enforcement procedures to ensure that the standards are met. Under SMCRA, OSM is the primary enforcer of SMCRA's provisions until the States achieve "primacy"; that is, until they demonstrate that their regulatory programs meet all the specifications in SMCRA and have regulations consistent with those issued by OSM.

When a primacy State takes over the permitting, inspection, and enforcement activities of the Federal Government, OSM then changes its role from regulating mining activities directly to overseeing and evaluating State programs. Today, 24 of the 27 key coal-producing States have primacy. In return for assuming primacy, States are entitled to regulatory grants and to grants for reclaiming abandoned mine lands. In addition, under cooperative agreements, some primacy States have agreed to regulate mining on Federal lands within their borders. Thus, OSM regulates mining directly only in nonprimacy States, on Federal lands in States where no cooperative agreements are in effect, and on Indian lands.

SMCRA charges OSM with the responsibility of publishing rules as necessary to carry out the purposes of the Act. The fundamental mechanism for ensuring that the purposes of SMCRA are achieved is the basic policy and guidance established through OSM's permanent regulatory program and related rulemakings. This regulatory framework is developed, reviewed, and applied according to policy directives and legal requirements.

Litigation by the coal industry and environmental groups is responsible for some of the rules now being considered by OSM. Others are the result of efforts by OSM to address areas of concern that have arisen during the course of

implementing OSM's regulatory program, and one is the result of legislation.

OSM has sought to develop an economical, safe, and environmentally sound program for the surface mining of coal by providing a stable, consistent regulatory, results-focused framework. At the same time, however, OSM has recognized the need (a) to respond to local conditions, (b) to provide flexibility to react to technological change, (c) to be sensitive to geographic diversity, and (d) to eliminate burdensome recordkeeping and reporting requirements that over time have proved unnecessary to ensure an effective regulatory program.

Major regulatory objectives regarding the mining of surface coal include:

- Continuing outreach activities with interested groups during the rulemaking process to increase the quality of the rulemaking process, improve the substance of the rules, and, to the greatest extent possible, reflect consensus on regulatory issues;
- Minimizing the recordkeeping and regulatory compliance burden during rulemaking; and
- Publishing final rules to implement the Energy Policy Act of 1992, Public Law 102-486 and section 510(c) of SMCRA.

U.S. Fish and Wildlife Service

The mission of the U.S. Fish and Wildlife Service is working with others to conserve, protect, and enhance fish, wildlife, and plants and their habitats for the continuing benefit of the American people. Four principal mission goals include:

- The sustainability of fish and wildlife populations. We conserve, protect, restore, and enhance fish, wildlife, and plant populations entrusted to our care. We carry out this mission goal through migratory bird conservation at home and abroad; native fisheries restoration; recovery and protection of threatened and endangered species; prevention and control of invasive species; and work with our international partners.
- Habitat conservation — a network of lands and waters. Cooperating with others, we strive to conserve an ecologically diverse network of lands and waters — of various ownerships — providing habitats for fish, wildlife, and plant resources. This mission goal emphasizes two kinds of strategic actions: (1) the development of formal agreements and plans with our partners who provide habitat for multiple species, and (2) the actual conservation work necessary to protect, restore, and enhance those habitats vital to fish and wildlife populations. Our habitat conservation strategy uses an ecosystem approach to focus on the interaction and balance of people, lands, and waters, and fish and wildlife.
- Public use and enjoyment. We provide opportunities to the public to enjoy, understand, and participate in the use and conservation of fish and wildlife resources. The Service directs activities on national wildlife refuges and national fish hatcheries that increase opportunities for public involvement with fish and wildlife resources. Such opportunities include hunting, fishing, wildlife observation and photography, and environmental education and interpretation, as well as affording the public hands-on experiences through volunteer conservation activities on Service lands.
- Partnerships in natural resources. We support and strengthen partnerships with tribal, State, and local governments and others in their efforts to conserve and enjoy fish, wildlife, and plants and habitats. We administer Federal grants to States and territories for restoration of fish and wildlife resources and have a continuing commitment to work with tribal governments. We also promote partnerships with other Federal agencies where common goals can be developed.

The Service carries out these mission goals through several types of regulations and programs. The Service works continually with foreign and State governments, affected industries and individuals, and other interested parties to minimize any burdens associated with Service-related activities. We attempt to ensure a balance between any possible public burdens and adequate protection for the natural resource.

We implement and enforce regulations that govern public access, use and recreation on more than 500 national wildlife refuges and in national fish hatcheries. We authorize those uses that are compatible with the purpose for which each area was established, are consistent with State and local laws where practical, and afford the public appropriate economic, recreational, and conservation opportunities.

We administer regulations to manage migratory bird resources. Annually, the Service issues a regulation on migratory bird hunting seasons and bag limits that is developed in partnership with the States, tribal governments, and the Canadian Wildlife Service. These regulations are necessary to permit migratory bird hunting that would otherwise be prohibited by various international treaties.

The Service enforces regulations to fulfill our statutory obligation to identify and conserve species faced with extinction. The Endangered Species Act (ESA) dictates that the basis for determining endangered species is limited to biological considerations. Regulations enhance the conservation of listed species and certain marine mammals. Regulations also help other Federal agencies comply with the ESA, which prohibits them from conducting activities that would jeopardize the existence of endangered species or adversely modify critical habitat of listed species. In designating critical habitat, the Service considers biological information and economic and other impacts of the designation. Areas may be excluded if the benefits of exclusion outweigh the benefits of inclusion, provided that such exclusion will not result in the extinction of the species.

Some Service regulations permit activities otherwise prohibited by law. These regulations allow possession, sale or trade, scientific research, and educational activities involving fish and wildlife and their parts or products. In general, these regulations supplement State regulations and cover activities that involve interstate or foreign commerce. In carrying out our assistance programs, we administer regulations to help interested parties obtain Federal assistance and also to help assistance recipients comply with applicable laws and Federal requirements.

National Park Service

The National Park Service is dedicated to conserving the natural and cultural resources and values of the National Park System for the enjoyment, education, and inspiration of this and future generations. The Service is also responsible for managing a great variety of national and international programs designed to help extend the benefits of natural and cultural resource conservation and outdoor recreation throughout this country and the world.

There are 384 units in the National Park System, including national parks and monuments; scenic parkways, preserves, trails, riverways, seashores, lakeshores, and recreation areas; and historic sites associated with important

movements, events, and personalities of the American past.

The National Park Service develops and implements park management plans and staffs the areas under its administration. It relates the natural values and historical significance of these areas to the public through talks, tours, films, exhibits, and other interpretive media. It operates campgrounds and other visitor facilities and provides, usually through concessions, lodging, food, and transportation services in many areas. The National Park Service also administers the following programs: The State portion of the Land and Water Conservation Fund, Nationwide Outdoor Recreation coordination and information and State comprehensive outdoor recreation planning, planning and technical assistance for the National Wild and Scenic Rivers System, and the National Trails System, natural area programs, the National Register of Historic Places, national historic landmarks, historic preservation, technical preservation services, Historic American Buildings survey, Historic American Engineering Record, and interagency archeological services.

The National Park Service maintains regulations that help manage public use, access, and recreation in units of the National Park System. The Service provides visitor and resource protection to ensure public safety and prevent degradation of resources. The regulatory program develops and reviews regulations, maintaining consistency with State and local laws, to allow these uses only if they are compatible with the purpose for which each area was established.

Bureau of Reclamation

The Bureau of Reclamation's mission is to manage, develop, and protect water and related resources in an environmentally and economically sound manner in the interest of the American public. To accomplish this mission, Reclamation applies management, engineering, and scientific skills that result in effective and environmentally sensitive solutions.

Reclamation projects provide for some or all of the following concurrent purposes: Irrigation water service, municipal and industrial water supply, hydroelectric power generation, water quality improvement, groundwater management, fish and wildlife enhancement, outdoor recreation, flood control, navigation, river regulation and control, system optimization, and related uses.

Reclamation's regulatory program is designed to ensure that its mission is carried out expeditiously, efficiently, and with an emphasis on cooperative problem-solving.

FINAL RULE STAGE

74. VALUATION OF OIL FROM INDIAN LEASES

Priority:

Other Significant

Legal Authority:

25 USC 2101 et seq; 25 USC 396 et seq; 25 USC 396a et seq; 30 USC 1001 et seq; 30 USC 1701 et seq; 30 USC 181 et seq; 30 USC 351 et seq

CFR Citation:

30 CFR 206

Legal Deadline:

None

Abstract:

This rule would modify the regulations that establish royalty value for oil produced from Indian leases and create a new form for collecting value and value differential data. These changes would decrease reliance on oil posted prices and make Indian oil royalty valuation more consistent with the terms of Indian leases.

Statement of Need:

Current oil valuation regulations rely primarily on posted prices and prices under arm's-length sales to value oil that is not sold at arm's-length. Over time, posted prices have become increasingly suspect as a fair measure of market value. This rulemaking would modify valuation regulations to place substantial reliance on the higher of crude oil spot prices major portion prices, or gross proceeds, and eliminate any direct reliance on posted prices. This rulemaking would also add more certainty to valuation of oil produced from Indian leases.

Summary of Legal Basis:

The primary legal basis for this rulemaking is the Federal Oil and Gas Royalty Management Act of 1982, as amended, which defines the Secretary of the Interior's (1) authority to implement and maintain a royalty management system for oil and gas leases on Indian lands, and (2) trust responsibility to administer Indian oil and gas resources.

Alternatives:

We considered a range of valuation alternatives such as making minor adjustments to the current gross proceeds valuation method, using futures prices, using index-based prices with fixed adjustments for production from specific geographic zones, relying on some type of field pricing other than posted prices, and taking oil in-kind. We chose the higher of the average of the high daily applicable spot prices for the month major portion prices in the field or area, or gross proceeds received by the lessee or its affiliate. We chose spot prices as one of the three value measures because (1) they represent actual trading activity in the market, (2) they mirror New York Mercantile Exchange futures prices, and (3) they permit use of an index price in proximity to the actual production whose value is being measured.

Anticipated Cost and Benefits:

We estimate compliance with this rulemaking would cost the oil and gas industry approximately $46,000 annually. Additional costs to industry and MMS would be up-front computer programming and other administrative costs associated with processing the new form. The benefits of this rulemaking would be an estimated $3.6 million increase in annual royalties collected on oil produced from Indian leases. Additional benefits would include simplification and increased certainty of oil pricing, reduced audit efforts, and reduced valuation determinations and associated litigation.

Risks:

The risk of not modifying current oil valuation regulations is that Indian recipients may not receive royalties based on the highest price paid or offered for the major portion of oil produced—a common requirement in most Indian leases. These modifications ensure that the Department fulfills its trust responsibilities for administering Indian oil and gas leases under governing mineral leasing laws, treaties, and lease terms.

75. DEEP WATER ROYALTY RELIEF FOR OUTER CONTINENTAL SHELF OIL AND GAS LEASES ISSUED AFTER 2000

Priority:

Other Significant

Legal Authority:

30 USC 1001 et seq; 30 USC 1701 et seq; 30 USC 181 et seq; 30 USC 351 et seq; 31 USC 9701; 43 USC 1301 et seq; 43 USC 1331 et seq; 43 USC 1801 et seq

CFR Citation:

30 CFR 203

Legal Deadline:

None

Abstract:

The rule explains who is eligible for relief, how they apply for relief, and the criteria they must meet to receive relief. The proposed rule makes a new class of leases, those sold after 2000 in the central and western Gulf of Mexico (GOM), eligible to apply for royalty suspensions to supplement any that may have been included in their original lease terms. Also, it updates certain requirements and authorizes royalty relief in special situations.

Statement of Need:

Because of the variation of geologic and economic circumstance standard leasing terms do not encourage development of all potential reserves in the deep water GOM. The Deep Water Royalty Relief Act (DWRRA)(Pub. L. 104-58) authorized the Minerals Management Service (MMS) to promote development of marginal reserves. The existing regulations at 30 CFR 203 give detailed instructions on how deep water leases issued before the DWRRA may apply and qualify for royalty suspension on a case-by-case basis. This proposed rule revises and extends these instructions to certain additional categories of OCS leases, especially those issued after 2000. Revisions to the existing instructions reflect experience with cases over the last 5 years. Also the proposed rule identifies circumstances when MMS may consider special royalty relief outside our established end-of-life and DWRR programs.

Summary of Legal Basis:

The OCS Lands Act is the basis for our regulations on suspending or lowering royalties on producing OCS leases. The DWRRA is the basis for regulations to reduce or eliminate royalty on non-producing leases in the GOM west of 87 degrees, 30 minutes West longitude. It gives the Secretary of the Interior this authority to (1) promote development or increased production on producing and non-producing leases or (2) encourage production of marginal resources on producing and non-producing leases.

Alternatives:

The specificity with which the current regulations were written was driven by the DWRRA to facilitate planning by potential applicants. Those regulations do not leave room for anything but a rulemaking fix. Otherwise, those new leases that legitimately need development assistance would be relegated to seeking relief under ad hoc special relief rules. Alternatively an extension of the DWRRA terms to fill a perceived gap may give future deep water lessees royalty-suspension terms that are not sufficiently responsive to current market conditions. Moreover, it is fairer to both applicants and taxpayers to establish clear and coherent rules by which individual leases can obtain the amount of royalty relief actually needed to induce development.

Anticipated Cost and Benefits:

This rule extends the benefit of discretionary royalty relief to certain OCS leases after November 2000 that qualify as marginally uneconomic. Lessees who choose to seek this discretionary royalty relief pay user fees that range from $12,000 to $49,000 per application, in addition to their internal costs of assembling the necessary data. Benefits from this rule come from production that otherwise would not occur or be déferred indefinitely. To date, one field qualifying for relief has gone into production and added 15 million barrels of oil equivalent to reserves in the GOM. Another on the verge of starting development would add 400 billion cubic feet of natural gas to reserves that otherwise would not be produced in the GOM.

Risks:

The risk of not modifying the discretionary royalty relief rule is that some marginal resources will be bypassed. Alternatively, royalty receipts could fall because overly generous relief will be given to many leases to avoid the loss in production by a few.

RIN: 1010–AC71

DOI—Bureau of Land Management (BLM)

FINAL RULE STAGE

76. OIL AND GAS LEASING AND OPERATIONS

Priority:

Other Significant

Legal Authority:

30 USC 181 et seq

CFR Citation:

43 CFR 3100 to 3180

Legal Deadline:

None

Abstract:

This rule will revise BLM's current Federal oil and gas leasing and operations regulations, except those concerning drainage (section 3100.2-2), combined hydrocarbon leasing (part 3140) and oil and gas leasing in the National Petroleum Reserve—Alaska (part 3130). The rule will: (1) Cite industry standards and incorporate them by reference rather than repeat those standards in the rule; (2) incorporate the requirements of the Onshore Oil and Gas Orders and national notices to lessees into the regulations to eliminate overlap with current regulations; (3) use performance standards in certain places instead of prescriptive requirements to allow more flexibility for operators and to protect the environment and Federal royalty interests; (4) increase certain bonding requirements and (5) eliminate redundancies, clarify procedures and regulatory requirements and streamline procedures.

Statement of Need:

This rulemaking complies with the requirements of the Government Performance and Results Act, the recommendations of the National Performance Review, and other initiatives. It will be presented in a user-friendly format, presented by process rather than by subject matter.

Summary of Legal Basis:

The Mineral Leasing Act gives BLM the authority to issue and administer the terms of oil and gas leases on Federal lands, to conduct inspections of drilling operations and to promulgate and enforce regulations pertaining to oil and gas leasing and operations. BLM is the only Federal agency with authority to issue leases for publicly owned oil and gas resources.

Alternatives:

The only alternative to the proposed regulations would be to continue to operate under the existing regulations. These regulations are not performance-based and are at times ambiguous and hard to understand. Further, the important information found in Onshore Operating Orders is published separately from the regulations and at irregular intervals.

Anticipated Cost and Benefits:

BLM anticipates the following benefits: (1) More clearly written rules will be better understood by both oil and gas lessees and operators and members of the general public; (2) performance standards, rather than prescriptive requirements, will allow lessees and operators and BLM greater flexibility to deal with unique geological or engineering circumstances within the standards set by the rule; and (3) streamlining and clarifying procedures will result in better customer service and decreased time and money for both BLM and the user public.

Risks:

The public may misunderstand one or more performance standards. BLM will publish user guides that explain in detail the standards and will provide examples of how operators might meet specific standards.

BILLING CODE 4310–RK–S

DEPARTMENT OF JUSTICE (DOJ)

Statement of Regulatory Priorities

The Department of Justice is not a major regulatory agency, and it carries out its vital investigative, prosecutorial, and other law enforcement activities principally through means other than the regulatory process. Even so, the Department does have significant responsibilities for implementing the Americans with Disabilities Act (ADA), as well as the immigration laws, including the Immigration Reform and Control Act of 1986 and the Immigration Act of 1990. In addition, the Department is currently engaged in a comprehensive effort to focus its resources on the prevention of future terrorist acts and the prosecution of terrorists responsible for past attacks. The Department's key regulatory goals and initiatives are set forth in detail below.

The Department has worked actively to implement the general regulatory principles of Executive Order 12866. Relatively few of the Department's rules are significant regulatory actions requiring review by the Office of Management and Budget (OMB) under the Executive order. Accordingly, the orientation of the OMB review process to focus on significant rules has required the Department to increase its own review efforts to ensure that all of its regulations are consistent with the Administration's regulatory principles.

Pursuant to section 4(c) of Executive Order 12866, the Department of Justice provides the following statement of regulatory priorities, focusing in particular on four regulatory initiatives in the areas of civil rights and immigration.

In addition to the specific initiatives set forth below, several other components of the Department carry out important responsibilities through the regulatory process. Although their regulatory efforts are not singled out for specific attention in this regulatory plan, those components carry out key roles in implementing the Department's law enforcement priorities. The Drug Enforcement Administration (DEA) is responsible for controlling abuse of narcotics and dangerous drugs, while ensuring adequate supplies for legitimate medical purposes, by regulating the aggregate supply of those drugs. DEA accomplishes its objectives through coordination with State, local, and other Federal officials in drug enforcement activities, development and maintenance of drug intelligence systems, regulation of legitimate controlled substances, and enforcement coordination and intelligence-gathering activities with foreign government agencies. DEA continues to develop and enhance regulatory controls relating to the diversion control requirements and to the requirements of the Comprehensive Methamphetamine Control Act of 1996, which regulates certain drug products that are being diverted for the production of methamphetamine. In addition, DEA has initiated a project to propose regulations to provide an electronic alternative to the present paper-based system of distributing and dispensing Schedule II, III, IV, and V controlled substances. These rulemakings will permit DEA registrants to transmit controlled substances orders and prescriptions electronically using digital signature technology. These rulemakings will permit many DEA registrants to conduct business electronically, while maintaining appropriate security within the closed system of distribution of controlled substances mandated by the Controlled Substances Act of 1970.

On March 20, 1997, the Federal Bureau of Investigation promulgated final cost recovery regulations under the Communications Assistance for Law Enforcement Act of 1994 (CALEA). Congress enacted CALEA to address the recent and continuing advances in telecommunications technology, which have impaired and, in some instances, precluded law enforcement agencies from fully conducting various types of court-authorized electronic surveillance. The Attorney General is authorized to reimburse carriers for all of the reasonable costs directly associated with the modifications they perform on equipment, facilities, and services deployed on or before January 1, 1995. These regulations provide the cost accounting standards for the reimbursements.

In response to public comments during the cost recovery rulemaking, the FBI published on April 20, 1998, a proposed rule defining the terms "significant upgrade" and "major modification." The FBI plans to publish a supplemental notice of proposed rulemaking, which will define the terms "replaced" and "significantly upgraded or otherwise undergone major modification."

On March 12, 1998, the FBI, on behalf of law enforcement, published a Final Notice of Capacity (following two previously published notices on the same subject) informing telecommunications carriers offering local exchange services and certain commercial mobile radio services (specifically cellular service and broadband PCS) of the estimated actual and maximum number of simultaneous interceptions that law enforcement might conduct on or after specified dates.

On December 18, 1998, the FBI published a Notice of Inquiry (NOI) soliciting information and suggestions from interested parties for developing reasonable capacity methodologies for characterizing the capacity requirements for telecommunications services other than those covered by the March 12, 1998, Final Notice of Capacity. The FBI issued a Further Notice of Inquiry (FNOI) on June 30, 2000. Information gathered in response to the FNOI will be used in the publication of an Initial Notice of Capacity for developing reasonable capacity methodologies for the paging, mobile satellite, specialized mobile radio, and enhanced specialized radio services.

Several proposed changes in the National Instant Criminal Background Check System regulations are being considered by the Department. The changes include: (1) requiring the FBI to destroy information about approved firearm transfers before the beginning of the next business day following the approval; (2) allowing the FBI to retain for up to 90 days by individual gun dealer information about dates of NICS checks and the NICS transaction numbers on approved firearm transfers for the purpose of sharing such information with the ATF for use in inspections of gun dealers; (3) creating a new definition of "unresolved" transaction, i.e., transactions in which the NICS is unable to resolve within 3 business days whether a record identified by a NICS check demonstrates that a prospective gun purchaser is disqualified, and allowing the FBI to retain for up to 90 days information about unresolved transactions so that steps can be taken to retrieve a firearm from a prohibited person if information demonstrating that a person is prohibited is received within the 90-day time period; (4) requiring state Points of Contact (POCs) that conduct NICS checks for the system to provide to the FBI information about whether the POC determined that the gun transfer may proceed, is denied, or that the check is unresolved; and (5) allow a lawful firearm purchaser to consent to the FBI retaining personal information in a voluntary appeals file to avoid confusion or delay in future purchases.

Civil Rights

The Department and its Civil Rights Division are deeply committed to the rigorous enforcement of this Nation's civil rights laws. In keeping with that commitment, the Division will review and update its regulations implementing the Americans with Disabilities Act of 1990 (ADA), as well as issue a rule pertaining to the Department's authority to review police departments for a pattern or practice of unlawful conduct under the Violent Crime Control and Law Enforcement Act of 1994.

The Department is planning to make revisions in its regulations implementing titles II and III of the ADA to amend the ADA Standards for Accessible Design (28 CFR part 36, appendix A) to be consistent with the revised ADA accessibility guidelines proposed by the U.S. Architectural and Transportation Barriers Compliance Board (Access Board) in November 1999. Title II of the ADA prohibits discrimination on the basis of disability by public entities, and title III prohibits such discrimination by places of public accommodation and requires accessible design and construction of places of public accommodation and commercial facilities. In implementing these provisions, the Department of Justice is required by statute to publish regulations that include design standards that are consistent with the guidelines developed by the Access Board.

The Access Board has been engaged in a multi-year effort to revise and amend its accessibility guidelines. The goals of this project have been: 1) to address issues such as unique State and local facilities (e.g., prisons, courthouses), recreation, play areas, and building elements specifically designed for children's use that were not addressed in the initial guidelines; 2) to promote greater consistency between the Federal accessibility requirements and the model codes; and 3) to provide greater consistency between the ADA guidelines and the guidelines that implement the Architectural Barriers Act. The Access Board has proposed and/or adopted guidelines that address all of these issues. Therefore, to comply with the ADA requirement that the ADA standards remain consistent with the Access Board's guidelines, the Department will propose to adopt the changes previously proposed by the Access Board.

The Department also plans to review its regulations implementing title II and title III (28 CFR parts 35 and 36) to ensure that the requirements applicable to new construction and alterations under title II are consistent with those applicable under title III, to review and update the regulations to reflect the current state of law, and to ensure the Department's compliance with applicable provisions of the Small Business Regulatory Enforcement Fairness Act (SBREFA).

Pursuant to the Violent Crime Control and Law Enforcement Act of 1994, 42 U.S.C. section 14141 ("section 14141"), the Attorney General is authorized to file lawsuits seeking court orders to reform police departments engaging in a pattern or practice of conduct that deprives persons of rights, privileges, or immunities secured by the Constitution or laws of the United States. To date, the Department of Justice has conducted reviews of police departments pursuant to section 14141 using informal procedures. The Department plans to issue a rule to formalize the procedures by which the Department reviews police departments for a pattern or practice of unlawful conduct.

Immigration

The Immigration and Naturalization Service (INS) will advance the President's objectives with regulatory initiatives that minimize regulatory burdens on the public and increase the efficiency of Agency operations. INS administers regulations governing the admission of legal immigrants and temporary visitors, apprehension and deportation of illegal aliens, alien employment authorization and verification, and asylum and naturalization.

During the next 12 months, under new direction by Commissioner James W. Ziglar, INS will implement rulemaking for:

- Implementing the new Public Law 107-56, Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act, which amends provisions of the Immigration and Nationality Act concerning the detention and removal of aliens who engage in terrorist activities.
- Strengthening INS law enforcement authority by extending the time period for which aliens who are arrested for immigration violations can be held in detention facilities.
- Restructuring of the INS to modernize existing systems, to streamline procedures to provide for more efficiency in service delivery, and to provide better customer service to the public.
- Eliminating the immigration benefit application backlog and obtaining a 6-month processing standard for all applications.
- Building and maintaining an immigration services system that provides immigration information and benefits in a timely, accurate, consistent, courteous, and professional manner.
- Reviewing policies related to detention of children and asylum seekers to ensure that INS only detains individuals who absolutely require detention and determining alternatives to detention where alternatives would be more appropriate.
- The Victims of Trafficking and Violence Protection Act of 2000 and the LIFE Act.
- Streamlining the immigration process faced by foreign health care workers especially to relieve the significant nursing shortage in many rural parts of the United States and examining whether current INS regulations prevent much needed physicians from settling in medically under-served areas.

INS has recently issued regulations to carry out recent legislation such as the Legal Immigration Family Equity Act of 2000 (LIFE Act). To implement the Victims of Trafficking and Violence Protection Act of 2000, INS will issue an interim final rulemaking to implement the new "T" nonimmigrant visa for victims of severe forms of trafficking. This final rule also provides both immigrant and nonimmigrant visa categories, the new grounds of inadmissibility and corresponding waiver requirements, and is one of two key regulatory priorities of the INS.

The INS will soon publish a proposed rule to implement the provisions of the American Competitiveness and Workforce Improvement Act of 1998 (ACWIA) and the American Competitiveness in the Twenty-first Century Act of 2000 (AC21) to reflect changes made to the H-1B nonimmigrant classification. These changes include an increase in the number of visas available annually, an increase in the fee for certain petitions, a new portability provision allowing H-1B non-immigrants to commence employment with a new H-1B employer prior to approval of a subsequent petition by the Service, and improvements which will help the Service deter fraud in the H-1B nonimmigrant classification.

In addition, over the past year, INS has promulgated critical interim final rulemakings to implement the LIFE Act, which are included in the fall 2001 Unified Agenda of Federal Regulatory and Deregulatory Actions. For instance, INS prepared rulemaking for LIFE Act benefits that provide:

- For adjustment of status under section 245(i) of the Immigration and Nationality Act that allows certain persons who have an immigrant visa available but entered without inspection or otherwise violated their status (and thus are ineligible to apply for adjustment of status in the U.S.) to apply if they pay a $1,000 penalty (Interim rule, 66 FR 16383, March 26, 2001).
- A new status, temporary "V" non-immigrant classification, pending rule publication, which will be available to the spouses and minor children of lawful permanent residents waiting more than 3 years for an immigrant visa based upon an immigrant petition filed on or before the enactment date of the LIFE Act. Persons granted "V" status would receive employment authorization and are protected from removal.
- The expansion of a new temporary "K" visa non-immigrant classification available to include spouses of U.S. citizens (and their children) living abroad. Previously the K visa was only available to fiancées of U.S. citizens who were coming to the United States to get married within 90 days of arrival. (Interim rule, 66 FR 42587, August 14, 2001).
- Adjustment of status for class membership in one of three "late amnesty" lawsuits (CSS v. Meese, LULAC v. INS, and Zambrano v. INS). They are eligible to apply for adjustment of status during a 12-month period that began on July 1, 2001. The family unity provision allows spouses and unmarried children of the class action claimants will be protected from certain categories of removal and will be eligible for work authorization if they entered the United States before December 1, 1988, and resided in the United States on that date. (Interim rule, 66 FR 29661, June 1, 2001).
- Technical amendments to section 202 of the Nicaragua Adjustment and Central American Relief Act (NACARA) and section 902 of the Haitian Refugee Immigration Fairness Act of 1998 (HRFIA). Previously, certain aliens were barred from seeking adjustment of status under these provisions if they illegally reentered the United States after an order of removal or a grant of voluntary departure. The technical amendments found in section of 1505 of the LIFE Amendments exempt otherwise eligible aliens from this bar to adjustment and provided aliens already denied NACARA or HRIFA benefits for this reason with the ability to file motions to reopen. (Interim rule, 66 FR 29449, May 31, 2001).

The Bush Administration and Commissioner Ziglar will be steering the INS to ensure that obligations under immigrations laws will be met with good judgment, compassion and common sense.

DOJ—Civil Rights Division (CRT)

PROPOSED RULE STAGE

77. NONDISCRIMINATION ON THE BASIS OF DISABILITY IN PUBLIC ACCOMMODATIONS AND COMMERCIAL FACILITIES (SECTION 610 REVIEW)

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

5 USC 301; 28 USC 509; 28 USC 510; 42 USC 12186(b)

CFR Citation:

28 CFR 36

Legal Deadline:

None

Abstract:

In 1991, the Department of Justice published regulations to implement title III of the Americans with Disabilities Act of 1990 (ADA). Those regulations include the ADA Standards for Accessible Design, which establish requirements for the design and construction of accessible facilities that are consistent with the ADA Accessibility Guidelines (ADAAG) published by the U.S. Architectural and Transportation Barriers Compliance Board (Access Board). In the time since the regulations became effective, the Department of Justice and the Access Board have each gathered a great deal of information regarding the implementation of the Standards. The Access Board is currently in the process of revising ADAAG, and it published a Notice of Proposed Rulemaking (NPRM) on November 16, 1999. In order to maintain consistency between ADAAG and the ADA Standards, the Department is reviewing its title III regulation and expects to propose, in one or more stages, to adopt the revisions proposed by the Access Board and to make related revisions to the Department's title III regulation. In addition to maintaining consistency between ADAAG and the Standards, the purpose of this review and these revisions will be to more closely coordinate with voluntary standards, to clarify areas which, through inquiries and comments to the Department's technical assistance phone lines, have been shown to cause confusion, to reflect evolving technologies in areas affected by the Standards, and to comply with section 610 of the Regulatory Flexibility Act, which requires agencies once every 10 years to review rules that have a significant economic impact upon a substantial number of small entities.

The adoption of revised ADAAG will also serve to address changes to the ADA Standards previously proposed in RIN 1190-AA26 and RIN 1190-AA38, which have been withdrawn. These changes will include technical specifications for facilities designed for use by children and accessibility standards for State and local government facilities that have previously been published by the Architectural and Transportation Barriers Compliance Board.

The timetable set forth below refers to the notice of proposed rulemaking that the Department will issue as the first stage of the above-described title III rulemaking. This notice of proposed rulemaking will be issued under both title II and title III. For purposes of the title III regulation, this notice will propose to adopt revised ADAAG as the ADA Standards for Accessible Design and will initiate the review of the regulation in accordance with the requirements of section 610 of the Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA).

Statement of Need:

Section 504 of the ADA requires the Access Board to issue supplemental minimum guidelines and requirements for accessible design of buildings and facilities subject to the ADA, including title III. Section 306(c) of the ADA requires the Attorney General to promulgate regulations implementing

title III that are consistent with the Access Board's ADA guidelines. Because this rule will adopt standards that are consistent with the minimum guidelines issued by the Access Board, this rule is required by statute. Similarly, the Department's review of its title III regulation is being undertaken to comply with the requirements of the Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996.

Summary of Legal Basis:

The summary of the legal basis of authority for this regulation is set forth above under Legal Authority and Statement of Need.

Alternatives:

The Department is required by the ADA to issue this regulation. Pursuant to SBREFA, the Department's title III regulation will consider whether alternatives to the currently published requirements are appropriate.

Anticipated Cost and Benefits:

The Access Board has analyzed the effect of applying its proposed amendments to ADAAG to entities covered by titles II and III of the ADA and has determined that they constitute a significant regulatory action for purposes of Executive Order 12866. The Access Board's determination will apply as well to the revised ADA standards published by the Department. The Department's proposed procedural amendments will not have a significant impact on small entities.

The Access Board has prepared a regulatory assessment, which includes a cost impact analysis for certain accessibility elements and a discussion of the regulatory alternatives considered. A summary of the Board's regulatory assessment is published at 64 FR 62282 (November 16, 1999). That assessment will also apply to the Department's proposed rule.

Risks:

Without the proposed changes to the Department's title III regulation, the ADA Standards will fail to be consistent with the ADAAG.

78. NONDISCRIMINATION ON THE BASIS OF DISABILITY IN STATE AND LOCAL GOVERNMENT SERVICES (SECTION 610 REVIEW)

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

5 USC 301; 28 USC 509 to 510; 42 USC 12134; PL 101-336

CFR Citation:

28 CFR 35

Legal Deadline:

None

Abstract:

On July 26, 1991, the Department published its final rule implementing title II of the Americans with Disabilities Act (ADA). On November 16, 1999, the U.S. Architectural and Transportation Barriers Compliance Board (Access Board) issued its first comprehensive review of the ADA Accessibility Guidelines, which form the basis of the Department's ADA Standards for Accessible Design. The ADA (section 204(c)) requires the Department's standards to be consistent with the Access Board's guidelines. Therefore, the Department will publish a Notice of Proposed Rulemaking (NPRM) proposing to adopt the revisions proposed by the Access Board. The Department will also, in one or more stages, review its title II regulation for purposes of section 610 of the Regulatory Flexibility Act and make related changes to its title II regulation.

In addition to the statutory requirement for the rule, the social and economic realities faced by Americans with disabilities dictate the need for the rule. Individuals with disabilities cannot participate in the social and economic activities of the Nation without being able to access the programs and services of State and local governments. Further, amending the Department's ADA regulations will improve the format and usability of the ADA Standards for Accessible Design; harmonize the differences between the ADA Standards and national consensus standards and model codes; update the ADA Standards to reflect technological developments that meet the needs of persons with disabilities; and coordinate future ADA Standards revisions with national standards and model code organizations. As a result, the overarching goal of improving access for persons with disabilities so that they can benefit from the goods, services, and activities provided to the public by covered entities will be met.

The timetable set forth below refers to the notice of proposed rulemaking that the Department will issue as the first stage of the above-described title II rulemaking. This notice of proposed rulemaking will be issued under both title II and title III. For purposes of the title II regulation, this notice will propose to eliminate the Uniform Federal Accessibility Standards (UFAS) as an alternative to the ADA Standards for Accessible Design and to adopt revised ADAAG as the ADA Standards.

Statement of Need:

Section 504 of the ADA requires the Access Board to issue supplemental minimum guidelines and requirements for accessible design of buildings and facilities subject to the ADA, including title II. Section 204(c) of the ADA

requires the Attorney General to promulgate regulations implementing title II that are consistent with the Access Board's ADA guidelines. Because this rule will adopt standards that are consistent with the minimum guidelines issued by the Access Board, this rule is required by statute. Similarly, the Department's review of its title II regulation is being undertaken to comply with the requirements of the Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA).

Summary of Legal Basis:

The summary of the legal basis of authority for this regulation is set forth above under Legal Authority and Statement of Need.

Alternatives:

The Department is required by the ADA to issue this regulation as described in the Statement of Need above. Pursuant to SBREFA, the Department's title II regulation will consider whether alternatives to the currently published requirements are appropriate.

Anticipated Cost and Benefits:

The Administration is deeply committed to ensuring that the goals of the ADA are met. Promulgating this amendment to the Department's ADA regulations will ensure that entities subject to the ADA will have one comprehensive regulation to follow. Currently, entities subject to title II of the ADA (State and local governments) have a choice between following the Department's ADA Standards for title III, which were adopted for places of public accommodation and commercial facilities and which do not contain standards for common State and local government buildings (such as courthouses and prisons), or the Uniform Federal Accessibility Standards (UFAS). By developing one comprehensive standard, the Department will eliminate the confusion that arises when governments try to mesh two different standards. As a result, the overarching goal of improving access to the built environment to persons with disabilities will be better served.

The Access Board has analyzed the effect of applying its proposed amendments to ADAAG to entities covered by titles II and III of the ADA and has determined that they constitute a significant regulatory action for purposes of Executive Order 12866. The Access Board's determination will apply as well to the revised ADA Standards published by the Department. The Department's proposed procedural amendments will not have a significant impact on small entities.

The Access Board has prepared a regulatory assessment, which includes a cost impact analysis for certain accessibility elements and a discussion of the regulatory alternatives considered. A summary of the Board's regulatory assessment is published at 64 FR 62282 (November 16, 1999). That assessment will also apply to the Department's proposed rule.

The Access Board has made every effort to lessen the impact of its proposed guidelines on State and local governments but recognizes that the guidelines will have some federalism effects. These affects are discussed in the Access Board's regulatory assessment, which also applies to the Department's proposed rule.

Risks:

Without this amendment to the Department's ADA regulations, regulated entities will be subject to confusion and delay as they attempt to sort out the requirements of conflicting design standards. This amendment should eliminate the costs and risks associated with that process.

RIN: 1190–AA46

DOJ—Immigration and Naturalization Service (INS)

PROPOSED RULE STAGE

79. AMERICAN COMPETITIVENESS IN THE TWENTY-FIRST CENTURY ACT OF 2000 AND OTHER RELATED BILLS

Priority:

Other Significant

Legal Authority:

8 USC 1101; 8 USC 1103; 8 USC 1182; 8 USC 1186a; 8 USC 1187; 8 USC 1221; 8 USC 1281; 8 USC 1282

CFR Citation:

8 CFR 103; 8 CFR 202; 8 CFR 212; 8 CFR 274a

Legal Deadline:

None

Abstract:

The American Competitiveness in the 21st Century Act, Public Law 106-313, was enacted on October 17, 2000, along with two bills, the Visa Waiver Permanent Program Act, Public Law 106-311, and a bill to increase the fee for certain H-1B petitions. Together, these bills make significant changes to

the H-1B classification. Public Law 106-313 increases the numerical H-1B cap to 195,000 for FYs 2000-2002 and the percentage of the fees that INS receives to 4 percent. It exempts certain aliens from the numerical cap, provides for the "portability" of employment authorization, in certain circumstances, 1-year extensions of stay for certain aliens who have permanent residence applications pending. It also authorizes the creation of an Immigration Services and Infrastructure Improvements Account for appropriation of funds to eliminate the immigration benefit application processing backlog. This regulation clarifies several interpretive questions raised by the bills and ensures INS practice is consistent with these laws.

Statement of Need:

This regulation is necessary to implement the AC21 and VWPPA. Failure to fully implement will result in adverse consequences for the public. For example, the scope of the "portability" benefit is unclear. This lack of clarity combined with the self executing nature of the portability benefit means that aliens who incorrectly interpret the provisions may incur adverse immigration consequences. A clear regulatory interpretation will prevent this situation.

Summary of Legal Basis:

See Statement of Need. This action is not required by the statute or by a court order but as explained in the statement of need.

Alternatives:

None.

Anticipated Cost and Benefits:

The INS anticipates a moderate cost associated with the staff time and resources necessary to conduct training and disseminate new guidelines and standard operating procedures to the field. There is little or no additional workload for adjudications officers involved with this regulation.

Risks:

This regulatory action is critical for complete and clear implementation of the provisions of this legislation. The regulation will clarify the confusion that exists in the immigration community as to the scope and applicability of many of these provisions and will thus prevent the public from taking actions which may unintentionally trigger adverse immigration consequences. Delay in this rulemaking or failure to promulgate will perpetuate confusion among the public and lead to members of the public unwittingly incurring adverse immigration consequences.

FINAL RULE STAGE

80. NEW CLASSIFICATION FOR VICTIMS OF SEVERE FORMS OF TRAFFICKING IN PERSONS ELIGIBLE FOR THE T NONIMMIGRANT STATUS

Priority:

Other Significant

Legal Authority:

5 USC 552; 5 USC 552a; 8 USC 1101; 8 USC 1102; 8 USC 1103; 8 USC 1104; 8 USC 1182; 8 USC 1184; 8 USC 1187; 8 USC 1201; 8 USC 1224; 8 USC 1225; 8 USC 1226; 8 USC 1227; 8 USC 1252; 8 USC 1252a; 22 USC 7101; 22 USC 7105; ...

CFR Citation:

8 CFR 204; 8 CFR 212; 8 CFR 214; 8 CFR 299

Legal Deadline:

None

Abstract:

This rule sets forth application requirements for a new nonimmigrant visa classification. The T classification was created by 107(e) of the Victims of Trafficking and Violence Protection Act of 2000 (VTVPA), Public Law 106-386. The T visa was designed for eligible victims of severe forms of trafficking in persons who aid the Government with their case against the traffickers and who can establish that they would suffer extreme hardship involving unusual and severe harm if they were removed from the United States after having completed their assistance to law enforcement. The rule establishes application procedures and responsibilities for the Immigration and Naturalization Service (Service) and provides guidance to the public on how to meet certain requirements to obtain T nonimmigrant status.

There is a statutory cap for victims of severe form of trafficking (principals), which is set at 5,000 T visas per annum. The law also provides that certain family members can derive a T status through the principal's application. It is estimated that there may be four derivative visas issued for each principal.

Statement of Need:

This rule is necessary to establish how an eligible alien can obtain temporary immigration benefits as a victim of a severe form of trafficking in persons while providing a means of assistance for law enforcement officials at the Federal level to investigate and prosecute trafficking in persons.

Summary of Legal Basis:

Public Law 106-386, The Victims of Trafficking and Violence Protection Act of 2000.

Alternatives:

None

Anticipated Cost and Benefits:

No money has been authorized or appropriated for the anticipated administrative or operational costs for this program. While there is no precise formula for determining anticipated costs, there will be additional costs for adjudicating benefits and investigating claims, particularly those deemed fraudulent. There will be training costs for INS staff. The T visa regulation builds on protections and assistance for victims of severe forms of trafficking

in persons outlined in section 107(c) of the VTVPA and implemented in amendments to 28 CFR part 1100 in the recent rulemaking 66 FR 38514 (July 24, 2001) (See RIN 1115-AG20). Part 1100 outlined procedures for Federal officials to identify and protect victims of severe forms of trafficking in persons; provided for access to information and translation services for victims; and outlined legal mechanisms to grant "continued presence" to victims of severe forms of trafficking in persons to allow them to remain in the U.S. during the pendency of law enforcement investigations and prosecutions. The T visa classification allows victims of severe forms of trafficking in persons to remain in the U.S. past the time of their assistance to law enforcement, if they can demonstrate that they will face extreme hardship involving unusual and severe harm if they were removed from the United States.

There may be thousands of applications that will not be approved for a variety of reasons, including failure to meet the basic T nonimmigrant requirements. All applications will be reviewed and some will require extensive investigation both here and abroad to determine if they are bona fide.

The anticipated benefit of these expenditures includes the assistance to trafficked victims and their families and the prosecution of traffickers in persons and the elimination of the abuses caused by their trafficking activities.

Benefits which may be attributed to the implementation of this rule are expected to be:

—an increase in the number of cases brought forward for investigation and/or prosecution;

—heightened awareness by the law enforcement community of trafficking in persons;

—enhanced ability to develop and work cases in trafficking in persons cross-organizationally and multi-jurisdictionally which may begin to influence changes in trafficking patterns.

Risks:

This rule is not an initiative of the INS but rather promulgated as a result of congressional action to develop a new nonimmigrant category. Risks associated with the implementation of the congressionally mandated new nonimmigrant classification include:

—increased workload on adjudicators and investigators which may impact overall efficiency and productivity;

—increases in fraudulent applications/claims of such victimization in order to obtain T nonimmigrant status; and

—changes in human trafficking patterns to elude law enforcement.

BILLING CODE 4410–BP–S

DEPARTMENT OF LABOR (DOL)

2001 Regulatory Plan

Executive Summary: Goals and Priorities

In its Strategic Plan for 1999-2004, the Department of Labor (DOL) set three overall goals: first, to enhance opportunities for America's workforce; second, to promote the economic security of workers and their families; and third, to foster quality workplaces that are safe, healthy, and fair.

To help achieve these goals, Secretary of Labor Elaine L. Chao has set a new course for the Department. DOL will emphasize prevention and compliance assistance, relying on the use of common-sense standards of safety and fairness to protect workers before they are harmed physically or economically. Education and encouragement of employers will help workers far more than enforcement alone, since no enforcement process can possibly identify every violation of the law, and fines and penalties can never fully redress losses of life, health, and economic well-being. As part of this effort, DOL will seek new strategies for advising employers and workers of their rights and responsibilities. In addition, the Department will work towards humanizing and rationalizing the immigrant worker programs. We must deal promptly and efficiently with immigrant worker applications and ensure the integrity of guestworker programs if we are to provide safe, predictable and appropriate working conditions for immigrant workers.

DOL also recognizes that the emerging 21st century economy presents challenges to workers at all skill levels and in all walks of life. Those who have been laid off from jobs because their companies could not adapt to technological changes or foreign competition, or who did not get a full education, or who made a wrong turn at some point in their lives, cannot be left behind. Some of these workers, especially young workers, need training in basic skills and help in becoming acclimated to working life. Other workers may need assistance in learning new skills or in obtaining advanced schooling. We must also take advantage of advances in technology to open the doors of the workplaces to the disabled.

At the same time, high-technology industries are creating job opportunities unheard of even a decade ago, and DOL must help employers and workers bridge the gap between the requirements of those jobs and the skills of the workers who would fill them. Workers who can keep their skills up to date throughout their careers have more productive and more rewarding economic futures.

The tools the Department will use to reach its goals revolve around five Secretarial priorities:

- Ensure the safety of every workplace;
- Guarantee an honest day's pay for an honest day's work;
- Stop discrimination;
- Protect workers from coercion and intimidation;
- Safeguard the pension and health benefits of every American worker.

The Secretary of Labor's Plan for Accomplishing These Objectives

The balance between labor and management that underlies the country's labor laws is a crucial source of stability in our economy, and the need for labor and management to work together has become increasingly evident in recent years. For these reasons, any change in the regulations that implement the country's labor and employment laws must be carefully considered, and the views of all parties affected must be taken into account.

In general, DOL will try to help employees and employers meet their needs in a cooperative fashion, with a minimum of rulemaking. However, to reflect changes in technology and business practices, and to clarify existing rules in light of new laws and legal interpretations, DOL will need to promulgate new regulations periodically.

In doing so, DOL will craft proposals that are responsive to workers' needs. Those needs span an entire range of work environments, from traditional settings that have well-defined conditions and locations of work, to newly emerging settings that are more flexibly structured in terms of schedules and workplaces.

Similarly, the skills needed by today's workforce are more varied than at any time in our country's history, and they continue to change at a rapid rate. Changes in the financial marketplace, as well as in compensation and benefit arrangements, present both challenges and opportunities for today's workers.

The following proposals represent what DOL believes to be a balanced plan for protecting workers in their current jobs and preparing them for future employment. DOL considers these proposals to be proactive, common-sense approaches to the issues most clearly needing regulatory attention.

DOL will continue to use plain language to explain the need for the rules proposed, to describe the methods for obtaining compliance, and to outline the effects of noncompliance. DOL will also explore new ways to help its various constituencies comply with existing rules and with new rules once they are adopted.

The Department's Regulatory Priorities

DOL has identified 17 high-priority items for regulatory action. Eight of them address health and safety issues, which are central to DOL's mission and which represent a major focus of the Secretary. Two agencies, the Mine Safety and Health Administration (MSHA) and the Occupational Safety and Health Administration (OSHA), are responsible for these initiatives.

MSHA administers the Federal Mine Safety and Health Act of 1977 (Mine Act). The agency demonstrates its commitment to ensuring safer and healthier workplaces for our nation's miners in a number of ways, but government intervention alone cannot eliminate occupational deaths, injuries and illnesses in mining. The commitment of miners and mine operators is also needed. MSHA will continue to concentrate on improving existing health and safety standards and addressing emerging health hazards in mining.

While levels of respirable coal dust have been significantly reduced over the years, some miners continue to develop coal workers' pneumoconiosis. MSHA intends to issue final rules that will provide a means to verify operators' coal dust control plans, allow MSHA to assume responsibility for the operator coal dust sampling program, and prevent overexposure to respirable coal dust during every working shift (RIN 1219-AB14, RIN 1219-AB18). MSHA also proposes to lower the permissible exposure limit (PEL) for asbestos in surface and underground metal and non-metal mines (RIN 1219-AB24). This rule, which reflects current scientific data, is intended to reduce miners' risk of developing asbestos-related occupational diseases.

The Occupational Safety and Health Administration administers a wide range of measures throughout the public and private sectors. OSHA is committed to establishing clear and sensible priorities, reducing occupational deaths, injuries, and illnesses, and simplifying its recordkeeping requirements.

Two of OSHA's initiatives address health standards. The first, "Standards Improvement," will streamline a number of such standards by removing language that is outdated, duplicative, unnecessary or inconsistent (RIN 1218-AB81). These changes will reduce the amount of time and effort needed to understand and comply with these standards.

The second proposes improvements in respiratory protection against airborne contaminants, which include a variety of particulates, gases, vapors and biological agents, for employees who routinely wear respirators on the job (RIN 1218-AA05).

A third proposal concerns fires in shipyards, which claim the lives of several workers each year (RIN 1218-AB51). Using the negotiated rulemaking process, OSHA proposes to update requirements set in 1971 for fire extinguishers, sprinkler systems, detection systems, alarm systems and fire brigades to reduce fire-related injuries and fatalities.

Finally, OSHA proposes two changes in response to concerns raised by stakeholders. One of these relates to highway signs, signals and barricades (RIN 1218-AB88). OSHA will revise this rule to bring it into conformity with rules set forth by the Department of Transportation and to reflect new technology and offer more flexibility for compliance. The other addresses emergency exit routes used by employees (RIN 1218-AB82). Updating the standard and using clearer language should lead to better compliance and fewer disputes about violations.

Another of the Secretary's priorities, protection of pension and health benefits, is exemplified in three initiatives by the Pension and Welfare Benefits Administration (PWBA), which administers the Employee Retirement Income Security Act (ERISA). This law establishes reporting, disclosure, fiduciary and other standards that apply to an estimated 700,000 private sector employee pension benefit plans (covering approximately 92 million participants); an estimated 2.5 million group health benefit plans (covering 131 million participants and dependents); and 3.4 million other welfare benefits plans (covering approximately 190 million participants).

PWBA's initiatives focus on encouraging voluntary compliance with the laws and regulations that apply to employee benefit plans. The first provides for adoption of a Voluntary Fiduciary Correction Program, which will promote compliance with ERISA's fiduciary responsibility requirements (RIN 1210-AA76). The second addresses revisions to PWBA's Delinquent Filer Voluntary Compliance program, which will facilitate compliance with ERISA's annual reporting requirements (RIN 1210-AA86). The third advocates development of model COBRA notices, which will promote compliance with the provisions of ERISA and the Internal Revenue Code that govern continuation of health benefits coverage (RIN 1210-AA60).

The Secretary's emphasis on meeting the needs of the 21st century workforce is reflected in a regulatory initiative developed by the Employment and Training Administration (ETA). This rule will improve the quality of employment services provided to low-income senior citizens under the Older Americans Act (RIN 1205-AB28). These individuals often need assistance in developing skills and obtaining work experience so that they can obtain unsubsidized work. This rule will also improve the performance accountability system for providers of such services and enhance the ability of the States to coordinate services.

The Department is working on certain rules in the immigration area that will enhance the security of the employment-related immigration system. One such rule is an ETA rule that will allow employers to submit H-1B labor condition applications via the Internet (RIN 1205-AB29). Another is a related Employment Standards Administration (ESA) rule that implements amendments to the H-1B program contained in the American Competitiveness and Workforce Improvement Act of 1998 (RIN 1215-AB09). The Department is evaluating comments received on an interim final rule published in December 2000.

Finally, ESA has set forth three regulatory initiatives. The Office of Labor-Management Standards (OLMS) has proposed a rule that will implement the requirements of Executive Order 13201 (RIN 1215-AB33). This Order requires Federal contractors to notify their employees that they are not required to join a union, and to inform employees of their rights with respect to use of union dues and fees.

The Secretary's priority of ensuring that appropriate wages are paid at legal levels is the subject of two proposals set forth by ESA's Wage and Hour Division. Among the statutes enforced by the Wage and Hour Division is the Fair Labor Standards Act (FLSA), which sets requirements for payment of minimum wages and overtime pay to more than 100 million employees. It also defines conditions for the employment of minors.

The Wage and Hour Division's first initiative updates the child labor rules issued under the FLSA to address changes in the nature of the workplace and situations in which minors may operate certain kinds of machinery (RIN 1215-AA09). While young workers need employment experiences that will help them gain the skills needed to find and hold good jobs later in life, they also need to focus on obtaining high-quality educations. It is our responsibility to ensure that they work in jobs that are not hazardous, and that younger workers (14 and 15 years old) work hours that will not interfere with their education, and under conditions that will not interfere with their health and well being.

The Wage and Hour Division's second initiative revises and clarifies the criteria that define the minimum wage and overtime exemptions for "executive", "administrative", "professional", and "outside sales" employees under the FLSA (RIN 1215-AA14). Changes to these rules will help employers meet their obligations voluntarily and enhance workers' understanding of their rights and benefits.

DOL—Employment Standards Administration (ESA)

PROPOSED RULE STAGE

81. DEFINING AND DELIMITING THE TERM "ANY EMPLOYEE EMPLOYED IN A BONA FIDE EXECUTIVE, ADMINISTRATIVE, OR PROFESSIONAL CAPACITY" (ESA/W-H)

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect State, local or tribal goverments and the private sector.

Legal Authority:

29 USC 213(a)(1)

CFR Citation:

29 CFR 541

Legal Deadline:

None

Abstract:

These regulations set forth the criteria for exemption from the Fair Labor Standards Act's minimum wage and overtime requirements for "executive," "administrative," "professional" and "outside sales employees." To be exempt, employees must meet certain tests relating to duties and responsibilities and be paid on a salary basis at specified levels. A final rule increasing the salary test levels was published on January 13, 1981 (46 FR 3010), to become effective on February 13, 1981, but was indefinitely stayed on February 12, 1981 (46 FR 11972). On March 27, 1981, a proposal to suspend the final rule indefinitely was published (46 FR 18998), with comments due by April 28, 1981. As a result of numerous comments and petitions from industry groups on the duties and responsibilities tests, and as a result of case law developments, the Department concluded that a more comprehensive review of these regulations was needed. An ANPRM reopening the comment period and broadening the scope of review to include all aspects of the regulations was published on November 19, 1985, with the comment period subsequently extended to March 22, 1986.

The Department has revised these regulations since the ANPRM to address specific issues. In 1991, as the result of an amendment to the Fair Labor Standards Act (FLSA), the regulations were revised to permit certain computer systems analysts, computer programmers, software engineers, and other similarly skilled professional employees to qualify for the exemption, including those paid on an hourly basis if their rates of pay exceed 6 1/2 times the applicable minimum wage. Also, in 1992 the Department issued a final rule which modified the exemption's requirement for payment on a "salary basis" for otherwise exempt public sector employees.

Statement of Need:

These regulations contain the criteria used to determine if an employee is exempt from the FLSA as an "executive," "administrative," "professional," or "outside sales" employee. The existing salary test levels used in determining which employees qualify as exempt were adopted in 1975 on an interim basis. These salary level tests are outdated and offer little practical guidance in applying the exemption. In addition, numerous comments and petitions have been received from industry groups regarding the duties and responsibilities tests in the regulations, requesting a review of these regulations.

These regulations have been revised to deal with specific issues. In 1991, as the result of an amendment to the FLSA, the regulations were revised to permit certain computer systems analysts, computer programmers, software engineers, and other similarly skilled professional employees to qualify for the exemption, including those paid on an hourly basis if their rates of pay exceed 6 1/2 times the applicable minimum wage. Also in 1991, the Department undertook separate rulemaking on another aspect of the regulations, the definition of "salary basis" for public-sector employees. Because of the limited nature of these revisions, the regulations are still in need of updating and clarification.

Summary of Legal Basis:

These regulations are issued under the statutory exemption from minimum wage and overtime pay provided by section 13(a)(1) of the Fair Labor Standards Act, 29 USC 213(a)(1), which requires the Secretary of Labor to issue regulations that define and delimit the terms "any employee employed in a bona fide, executive, administrative, or professional capacity..., or in the capacity of outside salesman...," for purposes of applying the exemption to employees who meet the specified criteria.

Alternatives:

The Department will involve affected interest groups in developing regulatory alternatives. Following completion of these outreach and consultation activities, full regulatory alternatives will be developed.

Although legislative proposals have been introduced in Congress to address certain aspects of these regulations, the Department continues to believe revisions to the regulations are the appropriate response to the concerns raised. Alternatives likely to be considered range from particular changes to address "salary basis" and salary level issues to a comprehensive overhaul of the regulations that also addresses the duties and responsibilities tests.

Anticipated Cost and Benefits:

Some 32 million employees are estimated to be within the scope of these regulations. Legal developments in court cases are changing the guiding interpretations under this exemption and creating law without considering a comprehensive analytical approach to current compensation concepts and workplace practices. Clear, comprehensive, and up-to-date regulations would provide for central, uniform control over the application of these regulations and ameliorate many concerns. In the public sector, State and local government employers contend that the rules are based on production workplace environments from the 1940s and 1950s that do not readily adapt to contemporary government functions. The Federal Government also has concerns regarding the manner in which the courts and arbitration decisions are applying the exemption to the Federal workforce. Resolution of confusion over how the regulations are to be applied in the public sector will ensure that employees are protected, that employers are able to comply with their responsibilities under the law, and that the regulations are enforceable. Preliminary estimates of the specific costs and benefits of this regulatory action will be developed once the various regulatory alternatives are identified.

Risks:

This action does not affect public health, safety, or the environment.

DOL—ESA

82. OBLIGATION OF FEDERAL CONTRACTORS AND SUBCONTRACTORS, NOTICE OF EMPLOYEE RIGHTS CONCERNING PAYMENT OF UNION DUES OR FEES

Priority:

Other Significant

Legal Authority:

EO 13201

CFR Citation:

29 CFR 470

Legal Deadline:

None

Abstract:

This regulation will implement E.O. 13201 which requires Government contractors and subcontractors to post notices informing their employees that (1) under Federal law they cannot be required to join a union or maintain membership in a union to retain their jobs, and (2) employees who choose not to be union members may object to the use of their compulsory union dues and fees for activities other than collective bargaining, contract administration, and grievance adjustment, and may be entitled to a refund and an appropriate reduction in their future payments. The proposed regulation, in accordance with E.O. 13201, will also require that, where applicable, each Government contracting agency include certain provisions of the Order in its Government contracts, and that Government contractors and subcontractors include these provisions in their nonexempt subcontracts and purchase orders.

Statement of Need:

The regulation is necessary in order to implement Executive Order 13201.

Summary of Legal Basis:

The legal basis for this regulation is section 1(b) of Executive Order 13201. The legal basis for the Executive Order is the Constitution and laws of the United States, including the Federal Property and Administrative Services Act, 40 U.S.C. 471 et seq.

Alternatives:

There is no feasible alternative to issuing regulations. Regulations are needed in order to implement Executive Order 13201 by (1) clarifying the obligations of Federal contractors and subcontractors, (2) providing exemptions as authorized by the Executive order, and (3) establishing enforcement mechanisms as authorized by the Executive order. Alternatives to the specific provisions of the proposed rule suggested in comments by the public will be considered in developing the final rule.

Anticipated Cost and Benefits:

The only costs that Federal contractors will incur are for (1) posting the notice and (2) applying for waivers from the posting requirement. These will be minimal since (1) under the proposed regulation, the Department will supply the posters, and (2) the Department's experience under similar posting requirements is that few contractors request waivers. The benefits of the Executive order and the implementing regulation are the promotion of economy and efficiency in Government procurement by having workers who are informed of their rights regarding union membership and the use of union dues and fees.

Risks:

This action does not affect public health, safety, or the environment.

DOL—ESA

FINAL RULE STAGE

83. CHILD LABOR REGULATIONS, ORDERS, AND STATEMENTS OF INTERPRETATION (ESA/W-H)

Priority:

Other Significant

Legal Authority:

29 USC 203(e)

CFR Citation:

29 CFR 570

Legal Deadline:

None

Abstract:

Section 3(l) of the Fair Labor Standards Act requires the Secretary of Labor to issue regulations with respect to minors between 14 and 16 years of age ensuring that the periods and conditions of their employment do not interfere with their schooling, health, or well-being. The Secretary is also directed to designate occupations that are particularly hazardous for minors 16 and 17 years of age. Child Labor Regulation No. 3 sets forth the permissible industries and occupations in which 14- and 15-year-olds may be employed, and specifies the number of hours in a day and in a week, and time periods within a day, that such minors may be employed. The Department has invited public comment in considering whether changes in technology in the workplace and job content over the years require new hazardous occupation orders, and whether changes are needed in some of the applicable hazardous occupation orders. Comment has also been solicited on whether revisions should be considered in the permissible hours and time-of-day standards for 14- and 15-year-olds. Comment has been sought on appropriate changes required to implement school-to-work transition

programs. Additionally, Congress enacted Public Law 104-174 (August 6, 1996), which amended FLSA section 13(c) and requires changes in the regulations under Hazardous Occupation Order No. 12 regarding power-driven paper balers and compactors, to allow 16- and 17-year-olds to load, but not operate or unload, machines meeting applicable American National Standards Institute (ANSI) safety standards and certain other conditions. Congress also passed the Drive for Teen Employment Act, Public Law 105-334 (October 31, 1998), which prohibits minors under age 17 from driving automobiles and trucks on public roads on the job and sets criteria for 17-year-olds to drive such vehicles on public roads on the job.

Statement of Need:

Because of changes in the workplace and the introduction of new processes and technologies, the Department is undertaking a comprehensive review of the regulatory criteria applicable to child labor. Other factors necessitating a review of the child labor regulations are changes in places where young workers find employment opportunities, the existence of differing Federal and State standards, and the divergent views on how best to correlate school and work experiences.

Under the Fair Labor Standards Act, the Secretary of Labor is directed to provide by regulation or by order for the employment of youth between 14 and 16 years of age under periods and conditions which will not interfere with their schooling, health and well-being. The Secretary is also directed to designate occupations that are particularly hazardous for youth between the ages of 16 and 18 years or detrimental to their health or well-being. The Secretary has done so by specifying, in regulations, the permissible industries and occupations in which 14- and 15-year-olds may be employed, and the number of hours per day and week and the time periods within a day in which they may be employed. In addition, these regulations designate the occupations declared particularly hazardous for minors between 16 and 18 years of age or detrimental to their health or well-being.

Public comment has been invited in considering whether changes in technology in the workplace and job content over the years require new hazardous occupation orders or necessitate revision to some of the existing hazardous orders. Comment has also been invited on whether revisions should be considered in the permissible hours and time-of-day standards for the employment of 14- and 15-year-olds, and whether revisions should be considered to facilitate school-to-work transition programs. When issuing the regulatory proposals (after review of public comments on the advance notice of proposed rulemaking), the Department's focus was on assuring healthy, safe and fair workplaces for young workers, and at the same time promoting job opportunities for young people and making regulatory standards less burdensome to the regulated community.

Summary of Legal Basis:

These regulations are issued under sections 3(1), 11, 12, and 13 of the Fair Labor Standards Act, 29 USC sections 203(1), 211, 212, and 213 which require the Secretary of Labor to issue regulations prescribing permissible time periods and conditions of employment for minors between 14 and 16 years old so as not to interfere with their schooling, health, or well-being, and to designate occupations that are particularly hazardous or detrimental to the health or well-being of minors under 18 years old.

Alternatives:

Regulatory alternatives developed based on recent legislation and the public comments responding to the advance notice of proposed rulemaking included specific proposed additions or modifications to the paper baler, teen driving, explosive materials, and roofing hazardous occupation orders, and proposed changes to the permissible cooking activities that 14- and 15-year-olds may perform in retail establishments.

Anticipated Cost and Benefits:

Preliminary estimates of the anticipated costs and benefits of this regulatory action indicated that the rule was not economically significant. Benefits will include safer working environments and the avoidance of injuries with respect to young workers.

Risks:

The child labor regulations, by ensuring that permissible job opportunities for working youth are safe and healthy and not detrimental to their education as required by the statute, produce positive benefits by reducing health and productivity costs employers may otherwise incur from higher accident and injury rates to young and inexperienced workers. Given the limited nature of the changes in the proposed rule, a detailed assessment of the magnitude of risk was not prepared.

DOL—ESA

84. LABOR CONDITION APPLICATIONS AND REQUIREMENTS FOR EMPLOYERS USING NONIMMIGRANTS ON H-1B VISAS IN SPECIALTY OCCUPATIONS AND AS FASHION MODELS

Priority:

Other Significant

Legal Authority:

8 USC 1101(a)(15)(H)(i)(b); 8 USC 1182(n); 8 USC 1184; 29 USC 49 et seq; PL 102-232; PL 105-277

CFR Citation:

20 CFR 655, subparts H and I

Legal Deadline:

None

Abstract:

The H-1B visa program of the Immigration and Nationality Act allows employers to temporarily employ nonimmigrants admitted into the United States under the H-1B visa category in specialty occupations and

as fashion models, under specified labor conditions. An employer must file a labor condition application with the Department of Labor before the Immigration and Naturalization Service may approve a petition to employ a foreign worker on an H-1B visa. The Department's Employment and Training Administration administers the labor condition application process; the Wage and Hour Division of the Department's Employment Standards Administration handles complaints and investigations regarding labor condition applications. The Department published a proposed rule on January 5, 1999, in response to statutory changes in the H-1B program made by the American Competitiveness and Workforce Improvement Act of 1998 (Title IV, Pub. L. 105-277; Oct. 21, 1998). Those changes placed additional obligations on "H-1B-dependent" employers (generally, those with work forces comprised of more than 15 percent H-1B workers) and on willful violators. These employers must recruit for U.S. workers, hire U.S. workers who are at least as qualified as H-1B workers, and not displace U.S. workers by hiring H-1B workers or placing them at another employer's job site. The 1998 amendments also imposed additional obligations on all H-1B employers, such as offering benefits to H-1B workers on the same basis and according to the same criteria as offered to U.S. workers, and payment to H-1B workers during periods they are not working for an employment-related reason. The 1999 proposed rule also requested further public comment on earlier proposed provisions published in October 1995, and on particular interpretations of the statute and of the existing regulations which the Department proposed to incorporate into the regulations. Since publishing the proposed rule, Congress enacted further amendments to the H-1B provisions under the American Competitiveness in the Twenty-First Century Act of 2000 (Pub. L. 106-313; Oct. 17, 2000), the Immigration and Nationality Act - Amendments (Pub. L. 106-311; Oct. 17, 2000), and section 401 of the Visa Waiver Permanent Program Act (Pub. L. 106-396; Oct. 30, 2000). On December 20, 2000, the Department published an Interim Final Rule to implement the recent amendments and clarify the existing rules, and requested further public comment on those provisions.

Statement of Need:

Statutory amendments to the Immigration and Nationality Act relating to the H-1B visa program were enacted in 1998 and again in 2000. Under the H-1B visa program, employers may temporarily employ nonimmigrants admitted into the U.S. under H-1B visas in specialty occupations and as fashion models, provided certain conditions are met. Section 412(d) of the American Competitiveness and Workforce Improvement Act of 1998 (Title IV of the Omnibus Consolidated and Emergency Supplemental Appropriations Act, 1999, Public Law 105-277), provides that some of the amendments made by the 1998 legislation (those relating to "H-1B-dependent" employers and willful violators) do not take effect until the Department of Labor issues implementing regulations, which are the subject of this rulemaking.

Summary of Legal Basis:

This rule is issued pursuant to provisions of the Immigration and Nationality Act, as amended, and the American Competitiveness and Workforce Improvement Act of 1998, 8 U.S.C. 1101(a)(15)(H)(i)(b), 1182(n), and 1184; sec. 303(a)(8), Pub. L. 102-232 (8 U.S.C. 1182 note); and secs. 412(d) and (e), Pub. L. 105-277. The objectives of the rule are to enable employers to understand and comply with applicable requirements of the amended H-1B visa program, and to advise employees and applicants for employment of the protections afforded by the amendments to U.S. and H-1B workers.

Alternatives:

Various regulatory alternatives were considered during the notice-and-comment period for implementing the statutory provisions, as discussed in the preamble to the December 2000 interim final rule. Alternatives considered included, among others, various approaches to the manner and timing for determining H-1B dependency status (and the meaning of "full-time equivalent employees" (FTEs) in the employer's work force), documentation of the dependency determination and designation of such status on the Labor Condition Application, and implementing the requirements for no "displacement" and recruitment of U.S. workers, payment of required wages and benefits to H-1B and U.S. workers, and determining short-term placement options.

Anticipated Cost and Benefits:

The Department concluded that the anticipated costs and benefits of this rule were not economically significant. This conclusion was based on the analysis that the direct, incremental costs that employers would incur because of the rule that were above customary business expenses associated with recruiting qualified job applicants and retaining qualified employees in specialized jobs would not exceed $100 million per year or otherwise trigger "economic significance" under Executive Order 12866. However, because of the importance of the rule to the public, it was treated as a significant regulatory action and was, therefore, reviewed by the Office of Management and Budget under Executive Order 12866.

Risks:

This action does not directly affect public health, safety, or the environment.

DOL—Employment and Training Administration (ETA)

PROPOSED RULE STAGE

85. LABOR CERTIFICATION PROCESS FOR THE PERMANENT EMPLOYMENT OF ALIENS IN THE UNITED STATES

Priority:

Other Significant

Legal Authority:

8 USC 1182(a)(5)(A), 1189(p)(1); 29 USC 49 et seq

CFR Citation:

20 CFR 656

Legal Deadline:

None

Abstract:

The Employment and Training Administration (ETA) is in the process of reengineering the permanent labor certification process. ETA's goals are to make fundamental changes and refinements that will: streamline the process, save resources, improve the effectiveness of the program and better serve the Department of Labor's (DOL) customer.

Statement of Need:

The labor certification process has been described as being complicated, costly and time consuming. Due to the increases in the volume of applications received and a lack of adequate resources, it can take up to 2 years or more to complete processing an application. The process also requires substantial State and Federal resources to administer and is reportedly costly and burdensome to employers as well. Cuts in Federal funding for both the permanent labor certification program and the U.S. Employment Service have made it difficult for State and Federal administrators to keep up with the process. ETA, therefore, is taking steps to improve effectiveness of the various regulatory requirements and the application processing procedures, with a view to achieving savings in resources both for the government and employers, without diminishing protections now afforded U.S. workers by the current regulatory and administrative requirements.

Summary of Legal Basis:

Promulgation of these regulations is authorized by section 212(a)(5)(A) of the Immigration and Nationality Act.

Alternatives:

Regulatory alternatives are now being developed by the Department. The public will be afforded an opportunity to comment on the Department's plans for streamlining the permanent labor certification process in a notice of proposed rulemaking which will be published in the Federal Register.

Anticipated Cost and Benefits:

Preliminary estimates of the anticipated costs and benefits have not been determined at this time. Preliminary estimates will be developed after a decision is made as to what regulatory amendments are necessary and after the implementing forms and automated systems to support a streamlined permanent labor certification process have been developed.

Risks:

Possible alternative: This action does not affect public health, safety, or the environment.

RIN: 1205–AA66

DOL—ETA

86. SENIOR COMMUNITY SERVICE EMPLOYMENT PROGRAM

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

42 USC 3056(b)(2)

CFR Citation:

20 CFR 641

Legal Deadline:

None

Abstract:

The Employment and Training Administration will implement new regulations to govern the Senior Community Service Employment Program (SCSEP) under title V of the Older Americans Act Amendments of 2000. SCSEP is the only Federally sponsored job creation program targeted to low-income older Americans. The program subsidizes part-time community service jobs for low-income persons age 55 years and older who have poor employment prospects. Approximately 100,000 program enrollees annually work in a wide variety of community service jobs, including nurse's aides, teacher aides, librarians, clerical workers and day care assistants. The Department of Labor allocates funds to operate the program to State agencies on aging and to national organizations.

Proposed regulations will:

—improve integration of SCSEP with the broader workforce investment system;

—establish an enhanced performance accountability system to hold each grantee accountable for attaining quality levels of performance with respect to core measures, such as customer satisfaction and placement in unsubsidized employment;

—improve the ability of States to coordinate services, by providing for the broad participation of stakeholders in the development of an annual plan to ensure an equitable distribution of projects within the State;

—strengthen administrative procedures by incorporating fiscal accountability provisions similar to the Workforce Investment Act, including definitions of administrative and programmatic costs and the application of uniform cost principles; and

—revise the distribution of funding.

Statement of Need:

As the baby boom generation ages, the demand for employment and training services and income support for low-income older persons will increase. Low-income seniors generally must continue working and many may not be able to find employment without work experience and additional training. The basic goals of the SCSEP are to provide community service employment for older workers with few skills and little work experience, and

to move many of those seniors into unsubsidized employment. The Employment and Training Administration will issue regulations and other guidance, provide technical assistance, and establish performance standards that will drive State and national grantees' efforts towards the program's goals.

Summary of Legal Basis:

Promulgation of these regulations is authorized by section 502(b)(2) of Pub. L. 106-501 of the Older Americans Act Amendments of 2000.

Alternatives:

The public provided comments on changes to the statute due to the Older Americans Act Amendments of 2000 during Town Hall meetings held throughout the country in spring 2001. The public also will be afforded an opportunity to comment on the Department's plans for implementing the Amendments in a notice of proposed rulemaking that will be published in the Federal Register.

Anticipated Cost and Benefits:

Preliminary estimates of the anticipated costs of this regulatory action have not been determined at this time and will be determined at a later date.

Risks:

This action does not affect public health, safety, or the environment.

RIN: 1205–AB28

DOL—Pension and Welfare Benefits Administration (PWBA)

PROPOSED RULE STAGE

87. RULEMAKING RELATING TO NOTICE REQUIREMENTS FOR CONTINUATION OF HEALTH CARE COVERAGE

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 1135; 29 USC 1136

CFR Citation:

29 CFR 2520

Legal Deadline:

None

Abstract:

This rulemaking will provide guidance concerning the notification requirements pertaining to continuation coverage under the Employee Retirement Income Security Act of 1974 (ERISA). Section 606 of ERISA requires that group health plans provide employees notification of the continuation coverage provisions of the plan and imposes notification obligations upon plan administrators, employers, employees, and qualified beneficiaries relating to certain qualifying events.

Statement of Need:

Part 6 of title I of ERISA requires that group health plans provide employees with notice of the continuation of health care coverage provisions of the plan; it imposes notification requirements upon employers, employees, plan administrators, and qualified beneficiaries in connection with certain qualifying events. The public needs guidance from the Department with regard to how they can fulfill their respective obligations under these statutory provisions.

Summary of Legal Basis:

Section 606 ERISA specifies the respective notification requirements for employers, employees, plan administrators, and qualified beneficiaries in connection with group health plan provisions relating to continuation of health care coverage. Section 606(a) of ERISA specifically refers to regulations to be issued by the Secretary of Labor clarifying these requirements. Section 505 of ERISA authorizes the Secretary to issue regulations clarifying the provisions of title I of ERISA.

Alternatives:

Regulatory alternatives will be developed once determinations have been made with regard to the scope and nature of the regulatory guidance which is needed by the public.

Anticipated Cost and Benefits:

Preliminary estimates of the anticipated costs and benefits will be developed once decisions are reached regarding the alternatives to be considered.

Risks:

Failure to provide guidance to the public concerning their notification obligations under section 606 of ERISA may complicate compliance by the public with the law and may reduce the availability of continued health care coverage in certain commonly encountered situations.

FINAL RULE STAGE

88. VOLUNTARY FIDUCIARY CORRECTION PROGRAM (VFC PROGRAM)

Priority:

Other Significant

Legal Authority:

29 USC 1132; 29 USC 1134

CFR Citation:

29 CFR 2560

Legal Deadline:

None

Abstract:

Section 409 of ERISA provides that an employee benefit plan fiduciary who breaches any of the responsibilities, obligations, or duties imposed upon him or her by part 4 of title I of ERISA shall be personally liable to make good to such plan any losses to the plan resulting from each such breach, and to restore to such plan any profits that such fiduciary may have made through use of assets of the plan. The Department has the authority under section 504 of ERISA to conduct investigations to deter and correct violations of title I of ERISA and under section 502(a)(2) and 502(a)(5) to bring civil actions to enforce the provisions thereof. Section 502(l) of ERISA requires the assessment of a civil penalty in an amount equal to 20 percent of the applicable recovery amount with respect to any breach of fiduciary responsibility under (or other violation of) part 4 by a fiduciary.

To encourage and facilitate voluntary correction of certain breaches of fiduciary responsibility, PWBA is adopting a Voluntary Fiduciary Correction Program (VFC Program). Under the VFC Program, plan officials will be relieved of the possibility of investigation and civil action by the Department and imposition of civil penalties, to the extent that plan officials satisfy the conditions for correcting breaches described in the program.

Statement of Need:

The VFC Program is a key element in PWBA's effort to encourage and facilitate fiduciary voluntary correction of certain breaches of fiduciary responsibility. Under the Program, plan officials will be relieved of the possibility of investigation and civil action by the Department and imposition of civil penalties, to the extent that they satisfy the conditions for correcting breaches described in the Program.

Summary of Legal Basis:

Section 409 of ERISA provides that an employee benefit plan fiduciary who breaches any of the responsibilities, obligations, or duties imposed upon him or her by part 4 of title I of ERISA shall be personally liable to make good to such plan any losses to the plan resulting from each such breach, and to restore to such plan any profits that such fiduciary may have made through use of the assets of the plan. The Department has the authority under section 504 of ERISA to conduct investigations to deter and correct violations of title I of ERISA and under sections 502(a)(2) and 502(a)(5) of ERISA to bring civil actions to enforce the provisions thereof. Section 502(1) of ERISA requires the assessment of a civil penalty in the amount equal to 20 percent of the applicable recovery amount with respect to any breach of fiduciary responsibility under (or other violation of) part 4 by a fiduciary.

Alternatives:

The VFC Program is essentially a deregulatory initiative, and participation in the Program is entirely voluntary. PWBA has determined that this approach is more flexible, efficient and protective of plans than regulatory alternatives which do not serve to encourage voluntary correction of fiduciary breaches.

Anticipated Cost and Benefits:

Participation in the VFC Program is entirely voluntary and, as such, it is assumed that plan officials will elect to participate only when the potential benefits to them are expected to exceed the costs of participation. Benefits may include the reduction of exposure to the risk of investigation and subsequent litigation, the potential cost of which cannot be specifically quantified, and the savings of penalties under section 502(1) of ERISA which would otherwise be payable on amounts required to be restored to plans by fiduciaries pursuant to a settlement agreement with the Department or court order.

Risks:

Failure to adopt the VFC Program would deprive plan officials of significant opportunities to voluntarily correct fiduciary breaches and to avoid costly litigation and civil penalties. Because the VFC Program encourages and facilitates compliance with the law, failure to implement the VFC Program may serve as a disincentive to the proper management of employee benefit plans.

89. • DELINQUENT FILER VOLUNTARY COMPLIANCE PROGRAM (DFVC PROGRAM)

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 1132

CFR Citation:

Not Yet Determined

Legal Deadline:

None

Abstract:

Under ERISA section 502(c)(2) the Secretary of Labor is authorized to assess civil penalties of up to $1100 per day against plan administrators who fail or refuse to file complete and timely Form 5500 Series Annual Returns/Reports. The Secretary may waive all or part of the civil penalty upon showing by the plan

administrator of reasonable cause for failure to file a timely annual report. The Department determined that the possible assessment of these civil penalties may deter certain delinquent filers from voluntarily complying with the annual reporting requirements under title I of ERISA and adopted, on April 27, 1995, the Delinquent Filer Voluntary Compliance (DFVC) Program which was published as a Federal Register rule-related notice [60 FR 20874). The DFVC Program permits delinquent plan administrators, who are otherwise subject to the assessment of higher civil penalties under ERISA section 502(c)(2), to pay reduced civil penalties for voluntarily complying with their annual reporting obligations under title I of ERISA.

PWBA is adopting modifications to the DFVC Program to further encourage and facilitate voluntary compliance by plan administrators who are delinquent in filing annual reports under title I of ERISA. The modifications will also simplify the procedures governing participation in the DFVC Program and conform the program's provisions to the ERISA Filing Acceptance System (EFAST).

Statement of Need:

Title I of ERISA authorizes the Secretary of Labor to assess civil penalties of up to $1100 per day against plan administrators who fail or refuse to file complete and timely Form 5500 Annual Returns/Reports for employee benefit plans. ERISA also authorizes the Secretary to waive all or part of the civil penalty upon a showing of reasonable cause for failure to file a timely report. The DFVC Program, adopted in 1995, permits delinquent plan administrators, who are otherwise subject to the assessment of higher civil penalties to pay reduced civil penalties for voluntarily complying with their annual reporting obligations under Title I of ERISA. The modifications to the DFVC Program provided by this rulemaking will further encourage and facilitate voluntary compliance by plan administrators, simplify the procedures governing participation in the Program, and conform the Program to the ERISA Filing Acceptance System (EFAST).

Summary of Legal Basis:

Section 502(c)(2) authorizes the Secretary of Labor to assess the civil penalties described above upon plan administrators who are delinquent in fulfilling their annual reporting requirements with respect to employee benefit plans. A notice adopting the DFVC Program was published by the Department in the Federal Register on April 27, 1995, at 60 FR 20874. This notice will modify that Program.

Alternatives:

The DFVC Program is essentially a deregulatory initiative, and participation in the program is entirely voluntary. PWBA has determined that this approach is more flexible, efficient and protective of plans than regulatory alternatives which do not serve to encourage voluntary compliance with the statutory annual reporting requirements for employee benefit plans.

Anticipated Cost and Benefits:

Adoption of the DFVC Program modifications incorporated in this initiative will not impose increased costs upon participants, but will instead simplify the procedures for participation in the Program and facilitate compliance. Since participation in the Program is entirely voluntary, plan administrators would not be likely to participate if the costs in doing so were to exceed the benefits.

Risks:

Failure to adopt the modifications to the DFVC Program represented by this rulemaking would complicate compliance with ERISA's reporting requirements by plan administrators and may serve to discourage timely and complete reporting with regard to the operation of employee benefit plans.

DOL—Mine Safety and Health Administration (MSHA)

PRERULE STAGE

90. ASBESTOS EXPOSURE LIMIT

Priority:

Other Significant

Legal Authority:

30 USC 811; 30 USC 813

CFR Citation:

30 CFR 56; 30 CFR 57; 30 CFR 71

Legal Deadline:

None

Abstract:

MSHA's permissible exposure limit (PEL) for asbestos applies to surface (30 CFR part 56) and underground (30 CFR part 57) metal and nonmetal mines and to surface coal mines and surface areas of underground coal mines (30 CFR part 71) and is over 20 years old. Current scientific data indicate that this existing PEL is not adequate to protect miners' health. MSHA is considering rulemaking to lower the PEL in order to reduce the risk of miners developing asbestos-induced occupational disease. A recent report by the Office of the Inspector General (OIG) recommended that MSHA lower its existing permissible exposure limit for asbestos to a more protective level, and address take-home contamination from asbestos. It also recommended that MSHA use Transmission Electron Microscopy to analyze fiber samples that may contain asbestos.

Statement of Need:

Current scientific data indicate that the existing asbestos PEL is not protective of miners' health. MSHA's asbestos regulations date to 1967 and are based on the Bureau of Mines (MSHA's predecessor) standard of 5 mppcf (million particles per cubic foot of air). In 1969, the Bureau proposed a 2 mppcf and 12 fibers/ml standard. This standard was promulgated in 1969. In 1970, the Bureau proposed to lower the standard to 5 fibers/ml, which was promulgated in 1974. MSHA issued its current standard of 2 fibers/ml at the end of 1978 for metal and nonmetal mining [43 FR 54064]. Since enactment of the Mine Act, MSHA has conducted regular inspections at both surface and underground operations at metal and nonmetal mines. During these inspections, MSHA routinely takes

samples, which are analyzed for compliance with its standard.

Other Federal agencies have addressed this issue by lowering their PEL for asbestos. For example, the Occupational Safety and Health Administration, working in conjunction with the Environmental Protection Agency, enacted a revised asbestos standard in 1994 that lowered the permissible exposure limit and the excursion limit to an eight (8) hour time-weighted average limit of 0.1 fiber per cubic centimeter of air and to 1.0 fiber per cubic centimeter of air (1 f/cc) as averaged over a sampling period of thirty (30) minutes. These lowered limits reflected increased asbestos-related disease risk to asbestos-exposed workers.

Alternatives:

The Agency has increased sampling efforts in an attempt to determine current miners' exposure levels to asbestos, including taking samples at all existing vermiculite, taconite, talc, and other mines to determine whether asbestos is present and at what levels. Since the spring of 2000, MSHA has taken almost 900 samples at more than 40 operations employing more than 4,000 miners. During those sampling events, the MSHA staff also discussed with the miners and mine operators the potential hazards of asbestos and the types of preventive measures that could be implemented to reduce exposures. The course of action MSHA takes in addressing asbestos hazards to miners will, in part, be based on these sampling results.

Anticipated Cost and Benefits:

MSHA will develop a preliminary economic analysis to accompany any proposed rule that may be developed.

Risks:

There is concern that miners could be exposed to the hazards of asbestos during mine operations where the ore body contains asbestos. There is also potential for exposure at facilities in which installed asbestos-containing material is present. Overexposure to asbestos causes mesothelioma and other forms of cancers, such as cancers of the digestive system, as well as asbestosis.

DOL—MSHA

FINAL RULE STAGE

---

91. VERIFICATION OF UNDERGROUND COAL MINE OPERATORS' DUST CONTROL PLANS AND COMPLIANCE SAMPLING FOR RESPIRABLE DUST

Priority:

Other Significant

Legal Authority:

30 USC 811

CFR Citation:

30 CFR 70; 30 CFR 75; 30 CFR 90

Legal Deadline:

None

Abstract:

Our current regulations require that all underground coal mine operators develop and follow a mine ventilation plan for each mechanized mining unit that we approve. However, we do not have a requirement that provides for verification of each plan's effectiveness under typical mining conditions. Consequently, plans may be implemented by mine operators that could be inadequate to control respirable dust. The proposed rule provides for MSHA to verify the effectiveness of mine ventilation plans to control respirable dust under typical mining conditions. For longwall mine operators, we proposed to permit the limited use of either approved loose-fitting powered air purifying respirators (PAPRs) or verifiable administrative controls as a supplemental means of compliance if we have determined that further reduction in respirable dust levels cannot be achieved using all feasible engineering controls. Furthermore, MSHA proposed to assume responsibility for all compliance sampling for respirable dust in underground coal mines as required under 30 CFR parts 70 and 90.

Statement of Need:

Respirable coal mine dust levels in this country are significantly lower than they were two decades ago. Despite this progress, there continues to be concern about the respirable coal mine dust sampling program and its effectiveness in maintaining exposure levels in mines at or below the applicable standard. Our regulations require that all underground coal mine operators develop and follow a mine ventilation plan approved by us. The dust control portion of the mine ventilation plan is the key element of an operator's strategy to control respirable dust in the work environment. Although such plans are required to be designed to control respirable dust, there is no current requirement that provides for verification of each proposed plan's effectiveness under typical mining conditions. Consequently, plans may be implemented that may be inadequate to control respirable dust.

Therefore, we proposed to revoke existing operator respirable dust sampling and to implement new regulations that would require each underground coal mine operator to have a verified ventilation plan. MSHA would verify the effectiveness of the mine ventilation plan for each mechanized mining unit in controlling respirable dust under typical mining conditions.

Summary of Legal Basis:

Promulgation of these regulations is authorized by section 101 of the Federal Mine Safety and Health Act of 1977.

Alternatives:

In developing the proposed rule, we considered alternatives related to typical production levels, the use of appropriate dust control strategies, use of supplemental controls for mining entities other than longwalls, and the level of protection of loose-fitting

powered air purifying respirators (PAPRS) in underground coal mines.

Anticipated Cost and Benefits:

Benefits sought are reduced dust levels over a miner's working lifetime by the elimination of over-exposures to respirable coal dust on each and every production shift. Additional benefits include reduced health care costs and disability and black lung benefit payments. There would be a cost savings for mine operators when MSHA completely takes over compliance and abatement sampling for respirable dust. We developed cost estimates and made them available for public review.

Risks:

Respirable coal mine dust is one of the most serious occupational hazards in the mining industry. Occupational exposure to excessive levels of respirable coal mine dust can cause black lung and silicosis, which are potentially disabling and can cause death. We are pursuing both regulatory and non-regulatory actions to eliminate these diseases through the control of coal mine respirable dust levels in mines and the reduction of miners' exposure.

DOL—MSHA

92. DETERMINATION OF CONCENTRATION OF RESPIRABLE COAL MINE DUST

Priority:

Other Significant

Legal Authority:

30 USC 811

CFR Citation:

30 CFR 72

Legal Deadline:

None

Abstract:

The National Institute for Occupational Safety and Health and the Mine Safety and Health Administration jointly proposed that a single, full-shift measurement ("single, full-shift sample") will accurately represent the atmospheric condition to which a miner is exposed. The proposed rule addresses the U.S. Court of Appeals' concerns raised in National Mining Association v. Secretary of Labor, 153 F3d 1264 (11th Cir. 1998).

Statement of Need:

Respirable coal mine dust levels in this country are significantly lower than they were over two decades ago. Despite this progress, there continues to be concern about our current sampling programs' ability to accurately measure and maintain respirable coal mine dust exposure at or below the applicable standard on each shift. For as long as miners have taken coal from the ground, many have suffered respiratory problems due to their occupational exposures to respirable coal mine dust. These respiratory problems affect the current workforce and range from mild impairment of respiratory function to more severe diseases, such as silicosis and pulmonary massive fibrosis. For some miners, the impairment of their respiratory systems is so severe, they die prematurely. Since there is a clear relationship between a miner's cumulative exposure to respirable coal mine dust and the severity of the resulting respiratory conditions, it is imperative that each miner's exposure not exceed the applicable standard on each and every shift.

Summary of Legal Basis:

Promulgation of this regulation is authorized by section 101 of the Federal Mine Safety and Health Act of 1977.

Alternatives:

The requirements of this rule ("single full-shift sample rule") will work in tandem with those of the proposed rule (RIN 1219-AB14) in which MSHA would verify the effectiveness of ventilation plans as well as conduct all compliance sampling in underground coal mines.

Anticipated Cost and Benefits:

Benefits sought are reduced dust levels over a miner's working lifetime by the elimination of over-exposures to respirable coal dust on each and every production shift. Additional benefits include reduced health care costs and disability and black lung benefit payments. There would be a cost savings for mine operators when MSHA completely takes over compliance and abatement sampling for respirable dust. We developed cost estimates and made them available for public review.

Risks:

Respirable coal mine dust is one of the most serious occupational hazards in the mining industry. Occupational exposure to excessive levels of respirable coal mine dust can cause workers' pneumoconiosis and silicosis, which are potentially disabling and can cause death. We are pursuing both regulatory and nonregulatory actions to eliminate these diseases through the control of coal mine respirable dust levels in mines and reduction of miners' exposure.

RIN: 1219–AB18

DOL—Occupational Safety and Health Administration (OSHA)

PROPOSED RULE STAGE

93. ASSIGNED PROTECTION FACTORS: AMENDMENTS TO THE FINAL RULE ON RESPIRATORY PROTECTION

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

29 USC 655(b); 29 USC 657

CFR Citation:

29 CFR 1910.134

Legal Deadline:

None

Abstract:

In January 1998, OSHA published the final Respiratory Protection standard (29 CFR 1910.134), except for reserved provisions on assigned protection factors (APFs) and maximum use concentrations (MUCs). APFs are numbers that describe the effectiveness of the various classes of respirators in reducing employee exposure to airborne contaminants (including particulates, gases, vapors, biological agents, etc.). Employers, employees, and safety and health professionals use APFs to determine the type of respirator to protect the health of employees in various hazardous environments. Maximum use concentrations establish the maximum airborne concentration of a contaminant in which a respirator with a given APF may be used.

Currently, OSHA relies on the APFs developed by NIOSH in the 1980s unless OSHA has assigned a different APF in a substance-specific health standard. However, many employers follow the more recent APFs published in the industry consensus standard, ANSI Z88.2-1992. For some classes of respirators, the NIOSH and ANSI APFs vary greatly.

When OSHA published the final Respiratory Protection standard in 1998, it reserved for later rulemaking those provisions of the standard dealing with APFs and MUCs. This rulemaking action will complete the 1998 standard, reduce compliance confusion among employers, and provide employees with consistent and appropriate respiratory protection.

Statement of Need:

About 5 million employees wear respirators as part of their regular job duties. Due to inconsistencies between the APFs found in the current industry consensus standard (ANSI Z88.2-1992) and in the NIOSH Respirator Decision Logic, employers, employees, and safety and health professionals are often uncertain about what respirator to select to provide protection against hazardous air contaminants. Several industry and professional groups have asked OSHA to proceed with this rulemaking to resolve these inconsistencies and provide reliable protection of employees' health in cases where respirators must be worn.

Summary of Legal Basis:

The legal basis for this proposed rule is the determination that assigned protection factors and maximum use concentrations are necessary to complete the final Respiratory Protection standard and provide the full protection of that standard.

Alternatives:

OSHA has considered allowing the current situation to continue, in which OSHA generally enforces NIOSH APFs but many employers follow the more recent consensus standard APFs. However, allowing the continuation of this situation results in inconsistent enforcement, lack of guidance for employers, and the potential for inadequate employee protection.

Anticipated Cost and Benefits:

The scope of the proposed APF table is still under development, and estimates of the costs and benefits have not yet been developed.

Risks:

The preamble to the final Respiratory Protection rule (63 FR 1270, Jan. 8, 1998) discusses the significance of the risks potentially associated with the use of respiratory protection. No independent finding of significant risk will be made for the APF rulemaking, since it only addresses a single provision of the larger rule.

94. FIRE PROTECTION IN SHIPYARD EMPLOYMENT (PART 1915, SUBPART P) (SHIPYARDS: FIRE SAFETY)

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 655

CFR Citation:

29 CFR 1915, subpart P

Legal Deadline:

None

Abstract:

This proposal is being developed through the negotiated rulemaking process. The rule will update and revise an important but outdated part of OSHA's shipyard rules. The original rule was adopted by OSHA in 1971 and has remained unchanged since then. The negotiated rulemaking committee was convened on October 15, 1996; members of the committee include: OSHA, state government, Federal agency, small and large shipyard employers, and maritime and firefighter union representatives.

Statement of Need:

Fires in the shipyard environment claim the lives of several workers every year and thus account for a substantial number of deaths and more than 50 serious burns occurring in this 75,000-employee workforce. Updating OSHA's outdated shipyard requirements for fire extinguishers, sprinkler systems, detection systems, alarm systems, and fire brigades will facilitate compliance by employers and employees and reduce these fire-related injuries and fatalities.

Summary of Legal Basis:

The legal basis for this proposed rule is a preliminary determination that an unacceptable risk of fire-related injuries and fatalities exists in the shipyard industry.

Alternatives:

OSHA has considered but rejected the alternative of allowing the existing rule to remain in place, because the Agency believes that doing so would contribute to the unacceptable number of fire-related accidents occurring in shipyards every year.

Anticipated Cost and Benefits:

Detailed cost and benefits estimates have not yet been made for the rule, because it is still in draft form.

Risks:

A detailed risk analysis has not yet been completed for this rule.

95. STANDARDS IMPROVEMENT (MISCELLANEOUS CHANGES) FOR GENERAL INDUSTRY, MARINE TERMINALS, AND CONSTRUCTION STANDARDS (PHASE II)

Priority:

Other Significant

Legal Authority:

29 USC 655(b)

CFR Citation:

29 CFR 1910.142; 29 CFR 1910.178; 29 CFR 1910.219; 29 CFR 1910.261; 29 CFR 1910.265; 29 CFR 1910.410; 29 CFR 1910.1001 to 1910.1052; 29 CFR 1926.60; 29 CFR 1926.62; 29 CFR 1926.1101; 29 CFR 1926.1127; 29 CFR 1926.1129; 29 CFR 1917.92; 29 CFR 1910, subpart Z

Legal Deadline:

None

Abstract:

The Occupational Safety and Health Administration's (OSHA's) process of removing or revising provisions in its health standards are out of date, duplicative, unnecessary, or inconsistent. The Agency is proposing these changes to reduce the burden imposed on the regulated community by these requirements. In this document, substantive changes are proposed for standards that will revise or eliminate duplicative, inconsistent, or unnecessary regulatory requirements without diminishing employee protections. Phase I of this Standards Improvement process was completed in June 1998 (63 FR 33450). OSHA plans to initiate Phase III of this project at a future date to address problems in various safety standards.

Statement of Need:

Some of OSHA's standards are out of date, duplicative, unnecessary, or inconsistent. The Agency needs to periodically review its standards and make needed corrections. This effort results in standards that are easier for employers and employees to follow and comply with, and thus enhances compliance and worker protection.

Summary of Legal Basis:

The legal basis for the proposed rule is a preliminary finding that the OSHA standards need to be updated to bring them up to date, reduce inconsistency, and remove unneeded provisions.

Alternatives:

OSHA has considered updating each standard as problems are discovered, but has determined that it is better to make such changes to groups of standards so it is easier for the public to comment on like standards. OSHA has also considered the inclusion of safety standards that need to be updated. However, the Agency has decided to pursue a separate rulemaking for safety issues because the standards to be updated are of interest to different stakeholders.

Anticipated Cost and Benefits:

This revision of OSHA's standards is a deregulatory action. It will reduce employers' compliance obligations.

Risks:

The project does not address specific risks, but is intended to improve OSHA's standards by bringing them up do date and deleting unneeded provisions. The anticipated changes will have no negative effects on worker safety and health.

FINAL RULE STAGE

---

96. UPDATE AND REVISION OF THE EXIT ROUTES STANDARD

Priority:

Other Significant

Legal Authority:

29 USC 655(b); 5 USC 353

CFR Citation:

29 CFR 1910.35; 29 CFR 1910.36; 29 CFR 1910.37; 29 CFR 1910.38

Legal Deadline:

None

Abstract:

Many Occupational Safety and Health Administration (OSHA) standards were adopted under section 6(a) of the Occupational Safety and Health Act (OSH Act; 29 U.S.C. 655(a)). This section of the OSH Act authorized the Agency, in its first 2 years of existence, to adopt national consensus standards without prior notice and comment. The versions of the consensus standards OSHA adopted are now typically well over 30 years old and have been superseded by newer ones. In addition, many of these old standards were written in technical jargon and were hard for many employers and employees to understand.

To address these problems, OSHA is undertaking a consensus standards initiative to revise OSHA's exit routes (also known as means of egress) standard. The revisions will rewrite the standard in simple, easy-to-understand language that will be easier for employers and employees to follow.

Statement of Need:

The standard being revised in this initiative is one of OSHA's oldest and most difficult to understand. The Agency has identified the exit routes standard as a standard in need of revision because it is out of date and unnecessarily complex, and stakeholders have recommended that the standard be updated quickly. OSHA also believes that revising the standard will lead to better voluntary compliance and fewer disputes about violations. With OSHA's limited resources, any effort that can substantially increase opportunities for compliance without sacrificing employee safety and health protection will have long-term benefits.

Summary of Legal Basis:

The legal basis for the final rule will be a finding that, by making these OSHA standards easier to understand and comply with, the Agency will increase compliance and reduce work-related injuries and deaths.

Alternatives:

The alternative considered - leaving the outdated standard on the books - has been rejected because doing so would not encourage compliance or enhance safety.

Anticipated Cost and Benefits:

The final standard for exit routes will have no economic impacts because this revision will not increase employers' obligations or reduce employee protections.

Risks:

Employees can be injured or killed if they are not able to exit an area safely when a fire or other emergency occurs.

97. SIGNS, SIGNALS, AND BARRICADES

Priority:

Other Significant

Unfunded Mandates:

Undetermined

Legal Authority:

29 USC 651(b); 29 USC 655(b); 40 USC 333

CFR Citation:

29 CFR 1926

Legal Deadline:

None

Abstract:

Subpart G of 29 CFR part 1926 addresses the types of signs, signals and barricades that must be used in situations such as work areas on highways. OSHA's rule incorporates a 1971 ANSI standard, known as the MUTCD (Manual on Uniform Traffic Control Devices). Since the early 1970's, the U.S. Department of Transportation has drafted updates to the MUTCD. DOT requires all States to comply with its updates.

Several years ago, industry stakeholders asked OSHA to update its standard to reflect new technology and provide more flexibility for compliance.

OSHA has decided to use a Direct Final Rule to update its standard since it anticipates widespread support for and few objections to the change. The Agency's Advisory Committee on Construction Safety and Health endorsed using a Direct Final Rule to make this change in its Winter 2000 meeting.

With the current emphasis on rebuilding the Nation's highways and improving safety in work zone areas, OSHA's update is particularly appropriate.

3
2
DE
3
2001
UMI

Statement of Need:

The safe and efficient flow of traffic through construction work zones is a major concern to transportation officials, the highway industry and the traveling public. Today the majority of highway funds are being used on system preservation-type projects (resurfacing, restoration, rehabilitation, and reconstruction) on the existing highway system; highway construction of this type is at an all time high and will continue for several years to come.

The fatality rate for highway construction workers is twice the rate for other types of construction trades (DOT FHWA Office of Program Quality Coordination, Sept. 1998).

Summary of Legal Basis:

The legal basis for this direct final rule is a finding by the Secretary of Labor that the number of highway work zone injuries and fatalities is high and that the outdated OSHA standard may be contributing to this result.

Alternatives:

The Directorate of Construction has formed a task group to formulate a plan for reducing the number of highway work zone fatalities. In order for this group to accomplish its mission the standards must reflect new technology and best practices. Other alternatives, such as compliance assistance and partnership programs, will not achieve these goals.

Anticipated Cost and Benefits:

The overwhelming majority of public roads are currently covered by DOT regulations and their related State traffic control manuals. Moreover, private roads constitute the minority of total roads, and some local governments extend coverage to these roads. Accordingly, OSHA will be solely responsible for regulating only a fraction of all highway work. The costs of compliance for those solely regulated by OSHA will, therefore, be much lower than those estimated for compliance with DOT regulations. Because DOT has found no significant costs of compliance for revisions of the MUTCD over the years, the costs of compliance for OSHA's direct final rule likewise will not be significant under Executive Order 12866.

Risks:

OSHA believes that the adoption of the direct final rule will have a direct impact on the safety of workers engaged in work zone activities, although the extent of this risk reduction has not been quantified at this point.

BILLING CODE 4510–23–S

DEPARTMENT OF TRANSPORTATION (DOT)

Statement of Regulatory Priorities

The Department of Transportation (DOT) consists of ten operating administrations, the Bureau of Transportation Statistics and the Office of the Secretary, each of which has statutory responsibility for a wide range of regulations. For example, DOT regulates safety in the aviation, motor carrier, railroad, mass transit, motor vehicle, maritime, commercial space, and pipeline transportation areas. DOT regulates aviation consumer and economic issues and provides financial assistance and writes the necessary implementing rules for programs involving highways, airports, mass transit, the maritime industry, railroads, and motor vehicle safety. It writes regulations carrying out such disparate statutes as the Americans with Disabilities Act and the Uniform Time Act. It regulates the construction and operation of bridges over navigable waters, the prevention of oil pollution, and the security of commercial aviation and passenger vessels. Finally, DOT has responsibility for developing policies that implement a wide range of regulations that govern internal programs such as acquisition and grants, access for the disabled, environmental protection, energy conservation, information technology, occupational safety and health, property asset management, seismic safety, security, and the use of aircraft and vehicles.

The Department has adopted a regulatory philosophy that applies to all its rulemaking activities. This philosophy is articulated as follows: DOT regulations must be clear, simple, timely, fair, reasonable, and necessary. They will be issued only after an appropriate opportunity for public comment, which must provide an equal chance for all affected interests to participate, and after appropriate consultation with other governmental entities. The Department will fully consider the comments received. It will assess the risks addressed by the rules and their costs and benefits, including the cumulative effects. The Department will consider appropriate alternatives, including nonregulatory approaches. It will also make every effort to ensure that legislation does not impose unreasonable mandates.

The Department's regulatory policies and procedures provide a comprehensive internal management and review process for new and existing regulations and ensure that the Secretary and other appropriate appointed officials review and concur in all significant DOT rules. DOT continually seeks to improve its regulatory process. The Department's creation of an electronic, Internet-accessible docket that can also be used to submit comments electronically; the use of direct final rulemaking; and the use of regulatory negotiation are three examples of this. During the next year, the Department will be taking steps to further improve our regulations by ensuring timely completion of quality rulemaking actions. We will be creating an Internet site where the public can access up-to-date information about the status of our significant rulemakings. We will also be developing a "list serve" for our Internet-accessible rulemaking dockets to permit the public to sign up for email notification when the Department issues a rulemaking document.

In addition, the Department continues to engage in a wide variety of activities to help cement the partnerships between its agencies and its customers that will produce good results for transportation programs and safety. These have included summits with front-line regulators and representatives of regulated industries. In addition, the Department's agencies have established a number of continuing partnership mechanisms in the form of rulemaking advisory committees.

Throughout the Department, we are also actively engaged in the review of existing rules to determine whether they need to be revised or revoked. These reviews are in accordance with section 610 of the Regulatory Flexibility Act, the Department's regulatory policies and procedures, and Executive Order 12866. This also includes determining if the rules would be more understandable if they are written using the plain language approach. Appendix D to our Regulatory Agenda highlights our efforts in this area.

Office of the Secretary of Transportation (OST)

The Office of the Secretary (OST) oversees the regulatory process for the Department. OST implements the Department's regulatory policies and procedures and is responsible for ensuring the involvement of top management in regulatory decisionmaking. Through the General Counsel's office, OST is also responsible for ensuring that the Department complies with Executive Order 12866 and other legal and policy requirements affecting rulemaking, including new statutes and Executive orders. Although OST's principal role concerns the review of the Department's significant rulemakings, this office has the lead role in the substance of projects concerning aviation economic rules and those affecting the various elements of the Department.

OST provides guidance and training regarding compliance with regulatory requirements and process for use by personnel throughout the Department. OST also plays an instrumental part in the Department's efforts to improve our economic analyses, risk assessment, and regulatory flexibility analyses.

OST also leads and coordinates the Department's response to Administration and congressional proposals that concern the regulatory process. The General Counsel's Office works closely with representatives of other agencies, the Office of Management and Budget, the White House, and congressional staff to provide information on how various proposals would affect the ability of the Department to perform its safety, infrastructure, and other missions.

During fiscal year 2002, OST expects to publish a notice of proposed rulemaking (NPRM) on whether it should readopt its rules governing airline computer reservation systems (CRS) and, if so, whether they should be strengthened, and if they should be applied to the sale of airline services over the Internet. OST expects to substantially complete work on a CRS final rule during the fiscal year. OST also expects to publish two NPRMs to implement provisions of the Aviation Investment and Reform Act for the 21st Century, signed into law in April 2000. One NPRM will seek to amend 14 CFR part 382, DOT's Air Carrier Access Act (ACAA) implementing rule, to cover foreign carriers operating to and from the United States or code sharing with the U.S. carriers. Another NPRM will propose to require air carriers to file with DOT detailed information on the disability-related complaints they receive to be used for enforcement, educational and other relevant purposes by DOT, disabled air travelers and Congress. OST also expects to substantially complete work on a final rule on the reporting requirements during FY 2002.

OST is continually incorporating new technology into its rulemaking process through the docket management system (DMS). The DMS stores electronic images in unalterable form. It includes all rulemaking and support documents, public comments, and other documents

included in the public docket. This electronic docket is accessible via the Internet, and now accepts electronic filing of comments. OST and the General Counsel's Office include hyperlinks to other useful DOT regulatory Web sites, including the public rulemaking dockets, and contacts for many issues of special interest to the public (http://regs.dot.gov/).

United States Coast Guard (USCG)

The United States Coast Guard's statutory responsibilities include protecting the marine environment; enforcing U.S. laws and international treaties; performing search and rescue; and ensuring marine safety and security.

The majority of the regulatory actions issued by the Coast Guard are classified as routine and frequent because they take effect for a limited time and at specific locations. These temporary actions allow local Coast Guard units to ensure safety during marine events. The Coast Guard issues approximately 20 regulations annually that set national standards or respond to specific statutory mandates. The Marine Safety Council, a board of senior Coast Guard Leaders, approves each of these rulemaking projects, monitors the Coast Guard's regulatory program, and advises the Commandant on regulatory matters. The following are significant aspects of the Coast Guard's regulatory program:

- The Coast Guard continues using plain language format for its notices and regulations. Plain language updates will be an important part of the Coast Guard's review of all regulations under the Regulatory Flexibility Act. The Coast Guard recognizes that this format facilitates better understanding of regulations and promotes more public participation.
- The Coast Guard encourages early public involvement in rulemaking through a variety of public meetings and the ongoing work of ten advisory committees. In addition, public comments are requested on existing rules identified for analysis each year and identified in Appendix D of the fall agenda.
- Recognizing that it should issue only necessary regulations tailored to impose the least burden on society, the Coast Guard has developed a broad Prevention Through People Program, which develops and encourages a wide variety of voluntary actions by industry and individuals to improve marine safety. To support this effort, the Coast Guard has several Quality Partnerships.
- Finally, to ensure that all regulations are necessary, each agenda item specifies how it supports at least one of the goals of the Coast Guard's Strategic Plan. Strategic goals include maritime safety, protection of natural resources, maritime security, maritime mobility, and national defense.

Federal Aviation Administration (FAA)

The FAA issues regulations to provide a safe, secure, and efficient global aviation system for civil aircraft. In an effort to make sure their rules are concise and easy to understand, the FAA re-examined the use of plain language in their regulations. The result of this review was revisions to 14 CFR part 11, which delineates the process for rulemaking changes. This rulemaking effort is only the first of several planned revisions to the regulations. Other actions include:

- Supporting the FAA's Safety Agenda on Safer Skies. This agenda is based on a comprehensive review of the causes of aviation accidents and is designed to bring about a five-fold (80 percent) reduction in fatal accidents. The reformed rulemaking process supports this agenda by ensuring that appropriate resources are available to support those rulemaking projects identified as the agency's highest priority. Projects related to controlled flight into terrain, loss of control of an aircraft, uncontained engine failures, runway incursions, weather, pilot decisionmaking, and cabin safety are some of the focus areas identified that may result in rulemaking, advisory and guidance materials.
- Continuing to involve the aviation community early in the regulatory process. The Aviation Rulemaking Advisory Committee completed numerous reports and recommendations, leading to the publication of seven regulatory actions and issuance of several advisory circulars and other guidance materials. The FAA Aging Transport Nonstructural Systems Plan addresses concerns with potential safety issues associated with problems that may develop in transport category airplanes systems as a result of wear and degradation in service. One important component of the plan is use of the Aging Transport Nonstructural Systems Rulemaking Advisory Committee to provide a mechanism for public input to FAA activities. The FAA will receive recommendation from the Committee in the form of regulations, guidance materials and training requirements supporting enhanced airworthiness for airplane systems.
- Continuing to harmonize the U.S. aviation regulations with those of other countries. The harmonization of the U.S. regulations with the European Joint Aviation Regulations (JAR) is the FAA's most comprehensive long-term rulemaking effort. The differences worldwide in certification standards, practices and procedures, and operating rules must be identified and minimized to reduce the regulatory burden on the international aviation system. The differences between the FAA regulations and the requirements of other nations impose a heavy burden on U.S. aircraft manufacturers and operators. Harmonization and standardization should help the U.S. aerospace industry remain internationally competitive. While the overall effort to achieve this is global, it will be accomplished by many small, individual, nonsignificant rulemaking projects. The FAA has published 30 regulations based on recommendations of ARAC that will lead to harmonizing FAA regulations and Joint Aviation Requirements.
- Continuing to recognize the needs of small entities by complying with the Small Business Regulatory Enforcement Fairness Act and addressing small entity concerns whenever appropriate in rulemaking documents. In response to the Act, the FAA has established a Small Entity Contact, a Web site on FAA's home page, a toll free number, and an e-mail address for receipt of inquiries.
- Ensuring that the congressional mandates for rulemaking deadlines established by the FAA Reauthorization Act of 1996 are met. One mandate is the issuance of a final rule 16 months after the close of the comment period on the proposed rule.

Top regulatory priorities for 2001-2002 include a duty limitations and rest requirements proposal to ensure that pilots are sufficiently rested for duty, and final rules concerning certification of airports and thermal acoustic insulation flammability and fractional ownership.

Federal Highway Administration (FHWA)

The FHWA anticipates that its priority for fiscal year 2002 will be continuing implementation of the

Transportation Equity Act for the 21st Century (TEA-21), which reauthorizes the surface transportation programs administered by the FHWA. The FHWA will continue to implement this legislation in the least burdensome and restrictive way possible consistent with the FHWA's mission. The FHWA will continue to pursue regulatory reform in areas where project development can be streamlined or accelerated, duplicative requirements can be consolidated, recordkeeping requirements can be reduced or simplified, and the decisionmaking authority of our State and local partners can be increased.

Federal Motor Carrier Safety Administration (FMCSA)

The FMCSA is the newest agency in the Department of Transportation. It was established on January 1, 2000, by the Motor Carrier Safety Improvement Act of 1999 (MCSIA) (Pub. L. 106-159). As required by MCSIA, FMCSA has developed a strong Safety Action Plan to guide it toward the goal of reducing the number of fatalities resulting from crashes involving large trucks. Setting new performance standards for vehicles, drivers, and motor carriers through regulation will raise the bar for safety in commercial operations. The FMCSA now is responsible for most of the functions of the former Office of Motor Carriers in the Federal Highway Administration. Several new regulatory initiatives are required by MCSIA. Over the next year, the new FMCSA is committed to developing an effective and efficient regulatory program that meets the expectations of Congress, its stakeholders and partners, and the general public. This will assist the new agency in meeting one of the stated goals of MCSIA to reduce the number and severity of large-truck involved crashes through expedited completion of rulemaking proceedings.

National Highway Traffic Safety Administration (NHTSA)

The statutory responsibilities of the National Highway Traffic Safety Administration (NHTSA) relating to motor vehicles include reducing the number of and mitigating the effects of motor vehicle crashes and related fatalities and injuries, providing motor vehicle information to consumers, and improving automotive fuel efficiency. NHTSA pursues policies that encourage the development of nonregulatory approaches when feasible in meeting its statutory mandates. It issues new standards and regulations or amendments to existing standards and regulations when appropriate. It ensures that regulatory alternatives reflect a careful assessment of the problem and a comprehensive analysis of the benefits, costs, and other impacts associated with the proposed regulatory action. Finally, it considers alternatives consistent with the Administration's regulatory principles.

In addition to numerous programs that focus on the safety and performance of the motor vehicle, the Agency is engaged in a variety of programs to improve driver behavior. These programs emphasize the human aspects of motor vehicle safety and recognize the important role of the States in this common pursuit. This goal is accomplished through a number of means, including encouraging initiatives in such areas as safety belt use, child safety-seat use, activities aimed at combating impaired driving and aggressive driving, and consumer information activities.

NHTSA is conducting several program evaluations that are designed to review and evaluate the actual benefits, costs, and overall effectiveness of existing standards and regulations. For example, it will continue evaluating Standard 208's new measures to improve the safety performance of air bags, Standard 214's dynamic side-impact requirements, the use/misuse of air bag on-off switches, and odometer fraud. It is also evaluating the efficacy of child safety seat registration for increasing consumer response to recalls of defective seats. NHTSA is starting two evaluations of safety equipment for heavy trucks and tractor trailers: antilock brake systems (Standard 121) and rear impact guards (Standards 223 and 224).

NHTSA's regulatory program includes additional proposals that will be undertaken in order to allow design flexibility, promote new technology, and encourage market competition and consumer choice.

Federal Railroad Administration (FRA)

The Federal Railroad Administration (FRA) exercises regulatory authority over all areas of railroad safety.

Fashioning regulations that have favorable benefit-to-cost ratios and that, where feasible, incorporate flexible performance standards, requires cooperative action by all affected parties. In order to foster an environment of collaborative rulemaking, FRA established the Railroad Safety Advisory Committee (RSAC). The purpose of RSAC is to develop consensus recommendations for regulatory action on issues referred to it by FRA. Where consensus is achieved, and FRA believes it serves the public interest, the resulting rule is very likely to be better understood, more widely accepted, more cost-beneficial, and more correctly applied. Where consensus cannot be achieved, however, FRA will fulfill its regulatory role without the benefit of RSAC's recommendations.

The RSAC has met on a quarterly basis so far and currently has working groups addressing the following tasks: (1) The development of regulations governing track and railroad maintenance equipment; (2) the review of FRA regulations for their applicability to historic railroads; (3) the development of safety standards for locomotive crashworthiness; (4) the development of safety standards for locomotive working conditions; (5) the development of locomotive event recorder accident survivability standards; (6) the development of regulations governing the use of processor-based signal and train control systems; (7) the development of a new accident reporting threshold; (8) the revision of FRA's accident/incident reporting regulations to ensure conformity with OSHA's revised occupational injury and illness reporting regulations; and (9) the revision of regulations governing the use of utility employees.

In addition to RSAC, FRA continues to use collaborative rulemaking to address passenger safety issues. FRA established a working group to address Passenger Equipment Safety Standards and published a final rule in the first phase of this rulemaking initiative in May 1999 based on its recommendations. FRA also employed a working group to develop Passenger Train Emergency Preparedness regulations. FRA continues to conduct research related to the second phase of the rule, and expects to convene a reconstituted working group on Passenger Safety Standards in late 2001. FRA also engaged in extensive public outreach to develop regulations regarding the use of train whistles, and published an NPRM in January 2000.

Federal Transit Administration (FTA)

The Federal Transit Administration (FTA) provides financial assistance to State and local governments for mass transportation purposes. The regulatory activity of FTA focuses on establishing the terms and conditions of Federal financial assistance available under the Federal transit laws.

FTA's policy regarding regulations is to:

- Implement statutory authorities in ways that provide the maximum net benefits to society;
- Keep paperwork requirements to a minimum;
- Allow for as much local flexibility and discretion as is possible within the law;
- Ensure the most productive use of limited Federal resources;
- Protect the Federal interest in local investments; and
- Incorporate good management principles into the grant management process.

As mass transportation needs have changed over the years, so have the requirements for Federal financial assistance under the Federal transit laws and related statutes. FTA's regulatory priorities for 2001-2002 are to continue to issue rulemakings required under the Transportation Equity Act for the 21st Century (TEA-21), to amend existing regulations as needed, and to update existing regulations for plain language.

FTA will publish a rule implementing the Clean Fuels Formula Grant Program authorized by TEA-21. The program will assist eligible applicants in meeting the objectives of reducing transit bus emissions and supporting emerging markets for clean fuel technologies.

TEA-21 also requires that FTA and FHWA amend the joint Environmental and Statewide and Metropolitan Transportation Planning rules which will be of significant interest to States, transit agencies, local governmental bodies, and environmental groups.

Maritime Administration (MARAD)

MARAD administers Federal laws and programs designed to promote and maintain a U.S. merchant marine capable of meeting the Nation's shipping needs for both national security and domestic and foreign commerce.

MARAD's regulatory objectives and priorities reflect the Agency's responsibility of ensuring the availability of adequate and efficient water transportation services for American shippers and consumers. To advance these objectives, MARAD issues regulations, which are principally administrative and interpretive in nature, when appropriate, in order to provide a net benefit to the U.S. maritime industry.

MARAD's regulatory priorities are to update existing regulations and to reduce unnecessary burden on the public.

Research and Special Programs Administration (RSPA)

The Research and Special Programs Administration (RSPA) has responsibility for rulemaking under two programs. Through the Associate Administrator for Hazardous Materials Safety, RSPA administers regulatory programs under Federal hazardous materials transportation law and the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990. Through the Associate Administrator for Pipeline Safety, RSPA administers regulatory programs under the Federal pipeline safety laws and the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of 1990.

In the area of hazardous materials transportation, the regulatory priority is to clarify through rulemaking the applicability of regulations to the loading, unloading, and storage of hazardous materials incidental to their movement in commerce. Clarifying the applicability of the regulations will facilitate compliance with them and also clarify when other requirements of Federal, State, local, and tribal governments apply.

Bureau of Transportation Statistics (BTS)

The Bureau of Transportation Statistics (BTS) is responsible for collecting, compiling, analyzing, and making accessible information on the Nation's transportation systems; identifying needs for new information and analysis and implementing programs to meet those needs; and enhancing the quality and effectiveness of the Department's statistical programs through research, the development of guidelines, coordination with related information-gathering activities conducted by other Federal agencies, and the promotion of improvements in data acquisition, archiving, dissemination, and use.

BTS's Office of Airline Information (OAI) collects airline financial and operating statistical data, covering both passenger and cargo traffic. This information gives the Government consistent and comprehensive economic and market data on individual airline operations and is used, for instance, in supporting policy initiatives, negotiating international bilateral aviation agreements, awarding international route authorities, and meeting international treaty obligations. The aviation, travel, and tourism communities value this information for a variety of purposes, such as conducting analyses of on-time performance, denied boardings, market trends, and economic analyses.

During FY 2002, BTS expects to publish a notice of proposed rulemaking (NPRM) and final rule concerning airline delays and cancellations. BTS is exploring the feasibility of collecting information as to the causes of flight delays and cancellations. As part of a pilot project examining the feasibility of developing a uniform collection methodology, four volunteer air carriers have been providing to BTS, on a confidential basis, flight delay and cancellation causal data. BTS hopes to develop a reporting system that would allow relevant causal information to be disseminated to the traveling public. In addition, a reporting system would enable the Department to better identify the causes of delays and evaluate its efforts to mitigate such causes.

BTS' long-range regulatory priority in the aviation area is to conduct a complete review and modernization of the Passenger Origin and Destination Survey. BTS can make significant improvements by providing data to meet the needs of DOT and other users in a way that takes advantage of the information revolution and matches the dramatically changing airline industry.

BTS, in conjunction with the Office of the Secretary, is in the process of performing a zero-base review of the financial and traffic data to determine what, if any, revisions can be made to the current data collections to ensure that these collections fully support the Department's mandated aviation responsibilities. Moreover, the review will seek to identify potential savings to the affected air carriers and the Government that can be accomplished through the application of advanced information technologies to the collection, processing, validation, and dissemination of aviation data. BTS's review and modernization of the Passenger Origin and Destination Survey will be incorporated as part of this zero-base review.

Saint Lawrence Seaway Development Corporation (SLSDC)

The Saint Lawrence Seaway Development Corporation (SLSDC) is a wholly owned Government corporation created by Congress in 1954. The primary operating service of the SLSDC is to ensure the safe transit of

commercial and noncommercial vessels through the two U.S. locks and navigation channels of the Saint Lawrence Seaway System. The SLSDC works jointly with its Canadian counterpart to operate and maintain this deep draft waterway between the Great Lakes and the Atlantic Ocean. The SLSDC also works jointly with its Canadian counterpart on all matters related to rules and regulations, overall operations, vessel inspection, traffic control, navigation aids, safety, operating dates, and trade development programs.

The regulatory priority of the SLSDC is to provide its customers with the safest, most reliable, and most efficient Seaway System possible.

DOT—U.S. Coast Guard (USCG)

PROPOSED RULE STAGE

---

98. +SALVAGE AND MARINE FIREFIGHTING REQUIREMENTS; VESSEL RESPONSE PLANS FOR OIL (USCG-1998-3417)

Priority:

Other Significant

Legal Authority:

33 USC 1321

CFR Citation:

33 CFR 155

Legal Deadline:

None

Abstract:

Current vessel response plan regulations require that the owners or operators of vessels carrying groups I through V petroleum oil as a primary cargo identify in their response plans a salvage company with expertise and equipment, and a company with firefighting capability that can be deployed to a port nearest to the vessel's operating area within 24 hours of notification (groups I-IV) or a discovery of a discharge (group V). Numerous requests for clarification revealed widespread misunderstanding and confusion regarding the regulatory language, which will make the implementation of this requirement difficult. Based on comments received after the Vessel Response Plan final rule publication (61 FR 1052; January 12, 1996) and during a Coast Guard hosted workshop, the Coast Guard intends to better define the terms "salvage expertise and equipment" and "vessel firefighting capability" requirements and will reconsider the 24-hour deployment requirement which was scheduled to go into effect on February 18, 1998. Therefore, the Coast Guard suspended the effective dates of the 24-hour deployment requirements as published in the final rule. The Coast Guard will continue with this project to better define the requirements. This rulemaking supports the Coast Guard's strategic goals of maritime safety and protection of the natural resources. This rulemaking is DOT-significant because it concerns a matter of substantial public interest or controversy.

Statement of Need:

This rulemaking is intended to reduce the impact of oil spills from vessels.

Summary of Legal Basis:

The statutory authority for this rulemaking is 33 U.S.C. 1321.

Alternatives:

The Coast Guard hosted a workshop to solicit comments from the public on potential alternatives to the salvage and marine firefighting requirements contained in the vessel response plan rule.

Anticipated Cost and Benefits:

Undetermined

Risks:

The purpose of this rulemaking is to better define the terms "salvage expertise and equipment" and "vessel firefighting capability" requirements and to reconsider the 24-hour deployment requirement. The objective is to improve response and reduce environmental damage from oil spills.

99. +TANK LEVEL OR PRESSURE MONITORING DEVICES (USCG-2001-9046)

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

46 USC 3703

CFR Citation:

46 CFR 32; 33 CFR 157

Legal Deadline:

Final, Statutory, August 1991, Section 4110 of the Oil Pollution Act of 1990 (OPA 90).

Final, Judicial, May 2002.

Abstract:

The U.S. Court of Appeals for the District of Columbia issued a Writ of Mandamus requiring the Coast Guard to promulgate regulations for tank level or pressure monitoring (TLPM) devices as mandated by OPA 90. This regulatory project will establish performance standards for TLPM devices and require tank vessels to install such devices. This project is considered economically significant because of substantial public and industry interest and possible significant economic impact of the rulemaking. This rulemaking falls under the Coast Guard's strategic goal of protection of natural resources.

Statement of Need:

This rulemaking is required by section 4110 of the Oil Pollution Act of 1990, P.L. 101-380.

UMI
VOL
66
ISS
2
3
2
DE
3
2001
UMI

Summary of Legal Basis:

This rule is required by section 4110 of the Oil Pollution Act of 1990 as determined by the U.S. Court of Appeals for the D.C. circuit in May 2001. The Coast Guard is under a Writ of Mandamus to publish a rule requiring the use of Tank Vessel Pressure Monitoring devices.

Alternatives:

Alternatives considered for analysis include two performance standards, however, the same cost will be achieved using either standard. We also considered the applicability of the rule to different types of vessels. Variations of these alternatives are presented as eight options in the NPRM.

Anticipated Cost and Benefits:

The present value cost of the proposed rule over the 13-year period of analysis (2002-2014) would range from approximately $64 million to $211 million depending on the option selected. Virtually all of the costs will be incurred during the 3-year or 5-year phase-in period. Under the most expensive option, the cost in nominal terms is estimated to be $80 million. Over the 13-year period of analysis, this analysis estimates that TLPM devices will reduce the amount of oil spilled in the United States by an estimated range of 211 barrels to 1,425 barrels, depending on the option selected.

Risks:

This rule addresses the risk of slow leakage from tank vessels that might otherwise go undetected. It is one of the many statutory requirements mandated by the Oil Pollution Act of 1990, which eliminates a number of oil pollution risks.

FINAL RULE STAGE

---

100. +MARINE TRANSPORTATION-RELATED FACILITY RESPONSE PLANS FOR HAZARDOUS SUBSTANCES (USCG-1999-5705)

Priority:

Other Significant

Legal Authority:

33 USC 1321(j); PL 101-380

CFR Citation:

33 CFR 154

Legal Deadline:

None

Abstract:

This project would implement provisions of the Oil Pollution Act of 1990 that require an owner or operator of a marine transportation-related facility transferring bulk hazardous substances to develop and operate in accordance with an approved response plan. The regulations would apply to marine transportation-related facilities that, because of their location, could cause harm to the environment by discharging a hazardous substance into or on the navigable waters or adjoining shoreline. A separate rulemaking, under RIN 2115-AE88, was developed in tandem with this rulemaking and addresses hazardous substances response plan requirements for tank vessels. This project supports the Coast Guard's strategic goals of maritime safety and protection of natural resources by reducing the amount of chemicals entering the environment, as well as reducing the consequence of pollution incidents. This action is considered significant because of substantial public and industry interest.

Statement of Need:

This rulemaking is intended to reduce the impact from hazardous substance spills from marine transportation-related facilities.

Summary of Legal Basis:

Section 4202(a) of the Oil Pollution Act of 1990 (OPA 90), codified at 33 U.S.C. 1321(j)(5), mandates that the President issue regulations requiring the preparation of oil and hazardous substance discharge response plans. Although section 4202(b)(4) of OPA 90 established an implementation schedule for these response plans for oil, it did not establish a deadline for submission or approval of hazardous substances response plans. The Coast Guard has issued separate final rules governing response plan requirements for vessels carrying oil in bulk as cargo and facilities that handle, store, or transport oil in bulk. Under 33 U.S.C. 1321, "hazardous substances" are designated by the Administrator of the Environmental Protection Agency. The Administrator has designated 297 chemicals as hazardous substances under this section. The Coast Guard has identified 82 hazardous substances currently carried in bulk by vessels, and transferred to or from marine transportation-related facilities.

Alternatives:

The Coast Guard intends to determine what types of response strategies would be required to address spills of different types of hazardous substances. For some substances, containment and recovery may be the appropriate response. However, some of the spilled substances may not be recoverable from the water and other actions may be necessary. Plans are required, by statute, to address responses to a "worst case discharge." For facilities, a "worst case discharge" is "the largest foreseeable discharge in adverse weather conditions."

Anticipated Cost and Benefits:

The potential costs of this rulemaking may include the costs of developing and implementing a hazardous substance response plan, maintaining contracts for response resources, reviewing and updating hazardous substance response plans, maintaining any required equipment, and training and exercising response personnel. Potential benefits include reduced risk of human exposure and enhanced environmental quality from improved

ability to respond to, contain, and recover spilled hazardous substances, The analysis indicates that this project will not be economically significant. A regulatory assessment addressing costs and benefits of this rule is available in the public docket.

Risks:

Response plans are required by statute. A response plan will not prevent a discharge of a hazardous substance, but it may improve the response and help to minimize personal injury and damage to the environment. This rule should not affect the economic viability of facilities involved in transferring hazardous substances in bulk or have a significant impact on the volume of hazardous substances shipped by marine transportation-related facilities. Most facilities involved in transferring hazardous substances in bulk have developed plans, but there have not been requirements for standardization.

101. +TANK VESSEL RESPONSE PLANS FOR HAZARDOUS SUBSTANCES (USCG-1998-4354)

Priority:

Other Significant

Legal Authority:

33 USC 1231; 33 USC 1321(j); PL 101-380

CFR Citation:

33 CFR 155

Legal Deadline:

None

Abstract:

This project would implement provisions of the Oil Pollution Act of 1990 that require an owner or operator of a tank vessel carrying bulk hazardous substances to develop and operate in accordance with an approved response plan. The regulations would apply to vessels operating on the navigable waters or within the Exclusive Economic Zone (EEZ) of the United States that carry bulk hazardous substances. A separate rulemaking under RIN 2115-AE87 would address hazardous substances response plan requirements for marine transportation-related facilities. This project supports the Coast Guard's strategic goals of maritime safety and protection of natural resources by reducing the amount of chemicals entering the environment, as well as reducing the consequences of pollution incidents. This project is considered significant because of substantial public and industry interest.

Statement of Need:

This rulemaking is intended to reduce the impact from hazardous substance spills from vessels.

Summary of Legal Basis:

Section 4202(a) of the Oil Pollution Act of 1990 (OPA 90), codified at 33 U.S.C. 1321(j)(5), mandates that the President issue regulations requiring the preparation of oil and hazardous substance discharge response plans. Although 4202(b)(4) of OPA 90 established an implementation schedule for these response plans for oil, it did not establish a deadline for submission or approval of hazardous substances response plans. The Coast Guard has issued separate final rules governing response plan requirements for vessels carrying oil in bulk as cargo and facilities that handle, store, or transport oil in bulk. Under section 1321, "hazardous substances" are designated by the Administrator of the Environmental Protection Agency. The Administrator has designated 297 chemicals as hazardous substances under this section. The Coast Guard has identified 82 hazardous substances currently carried in bulk by vessels.

Alternatives:

The Coast Guard intends to determine what types of response strategies would be required to address spills of different types of hazardous substances. For some substances, containment and recovery may be the appropriate response. However, some spilled substances may not be recoverable from the water and other actions may be necessary. Plans are required, by statute, to address responses to a "worst case discharge." For vessels, a "worst case discharge" is "a discharge in adverse weather conditions of its entire cargo."

Anticipated Cost and Benefits:

The potential costs of this rulemaking may include the costs of developing and implementing a hazardous substance response plan, maintaining contracts for spill-response resources, reviewing and updating hazardous substance response plans, maintaining any required equipment, and training and exercising response personnel. Potential benefits include reduced risk to human health, enhanced environmental quality from improved ability to respond to, contain, and recover spilled hazardous substances and a reduction in the severity of the impact of accidental hazardous substance discharges. A regulatory assessment addressing costs and benefits of this rule is available in the public docket.

Risks:

Response plans are required by statute. A response plan will not prevent a discharge of a hazardous substance, but it may improve the response and help to minimize personal injury and damage to the environment. This rule should not affect the economic viability of vessels involved in transferring hazardous substances in bulk, or have a significant impact on the volume of hazardous substances shipped by vessel. Most vessels carrying hazardous substances in bulk have developed response plans, but there have not been requirements for standardization.

DOT—Federal Aviation Administration (FAA)

PROPOSED RULE STAGE

---

102. +FLIGHT CREWMEMBER DUTY PERIOD LIMITATIONS, FLIGHT TIME LIMITATIONS, AND REST REQUIREMENTS

Priority:

Other Significant

Legal Authority:

49 USC 106(g); 49 USC 40113; 49 USC 40119; 49 USC 44101; 49 USC 44701 to 44701; 49 USC 44705; 49 USC 44709 to 44711; 49 USC 44712; 49 USC 44713; 49 USC 44715; 49 USC 44716 to 44717; 49 USC 44722; 49 USC 44901; 49 USC 44903 to 44904; 49 USC 44912

CFR Citation:

14 CFR 121; 14 CFR 135

Legal Deadline:

None

Abstract:

This rulemaking would amend the regulations on duty period limitations, flight time limitations, and rest requirements for flight crewmembers engaged in air transportation. The FAA proposes additional changes in response to comments received on the NPRM. The changes are necessary to ensure that the rules will continue to provide the minimum level of safety. This rulemaking responds to public and congressional interest in regulating flight crewmember rest requirements, NTSB Safety Recommendations, petitions for rulemaking, and scientific data. This action is considered significant because of substantial public interest.

Statement of Need:

The aviation community requires 24-hour activities to meet operational demands. Growths in long-haul, regional, overnight cargo, and short-haul domestic operations are increasing. Therefore, shift work, night work, irregular work schedules, and time zone changes will continue to be commonplace.

With this growth, the scientific knowledge about sleep, sleep disorders, circadian physiology, fatigue, and performance decrements has also grown. Some of the scientific knowledge has indicated that aviators experience performance-impairing fatigue from sleep loss resulting from current flight and duty practices.

In addition, industry and individuals have told the FAA that the current regulations are confusing and difficult to enforce. Therefore, a second purpose of the rulemaking is to establish consistent and clear duty period limitations and rest requirements for all types of operations.

Summary of Legal Basis:

Section 44701, title 49 of the United States Code states that the Administrator shall promote safety of flight of civil aircraft in air commerce by prescribing minimum standards required in the interest of safety.

Alternatives:

One obvious alternative would be to continue with the current rules, however, these regulations are rapidly becoming obsolete. As a second alternative, one commenter asked that the FAA develop a standard and then allow each carrier to design a rest/duty program that would meet that standard while accommodating differences in operations. While this works for certain rules, such as training regulations where the standard is training to proficiency, there is no way to apply this application to individual pilots on a daily basis.

Anticipated Cost and Benefits:

Undetermined.

Risks:

Although there has been only one identifiable accident due to pilot fatigue, fatigue is increasingly becoming the focus of possible causes following all accidents. Pilot reports of being fatigued to the point of incapacity are not uncommon, and intuitively, it is reasonable, given the sheer volume of air traffic, to expect fatigue to be a factor in future accidents if the regulations are not corrected.

DOT—FAA

FINAL RULE STAGE

103. +IMPROVED FLAMMABILITY STANDARDS FOR THERMAL/ACOUSTIC INSULATION MATERIALS USED IN TRANSPORT CATEGORY AIRPLANES

Priority:

Other Significant

Legal Authority:

49 USC 106(g); 49 USC 44701; 49 USC 44702; 49 USC 44704

CFR Citation:

14 CFR 25

Legal Deadline:

None

Abstract:

This document proposes upgraded flammability standards that specifically address flame propagation and entry of an external fire into the airplane (burnthrough) under realistic fire scenarios. The proposed standards are intended to reduce the incidence and severity of cabin fires, particularly those ignited in inaccessible areas where thermal/acoustic insulation materials are typically installed. Also the proposed standards would provide an increased level of safety with respect to post-crash fires by delaying the entry of such a fire into the cabin, thereby providing additional time for evacuation and enhancing survivability. The new standards would apply to new type designs, and newly manufactured airplanes entering parts 91, 121, 125, and 135 service. This action is significant because of substantial public interest.

Statement of Need:

Service history and laboratory testing demonstrate that the current flammability requirements applicable to thermal/acoustic insulation materials may not be providing the intended protection against the spread of fires. Additionally, the FAA considers that increased protection against external fire penetrating the fuselage can be provided by proper selection of the same material. These new test methods would not only provide for increased in-flight fire safety, by reducing the flammability of thermal/acoustic insulation blankets, but would provide increased time for evacuation during externally fed, post crash fires by increasing fuselage burnthrough resistance.

Summary of Legal Basis:

49 USC 4401 empowers the Administrator to prescribe regulations and minimum standards in the interest of safety for aircraft and equipment.

Alternatives:

The FAA considered several options to identify the least intrusive and most cost effective alternative to increase the level of safety for insulation materials. The alternatives considered were as follows: (1) Utilize the industry test instead of the requirements proposed; this would not screen out certain types of materials shown to propagate a fire under more realistic conditions, but would screen out the worst performers. (2) Limit replacement of insulation materials to only certain parts of the airplane; it is not feasible to specify areas of the airplane that are more crucial than others. This would be an economic consideration that would not address safety issues. (3) Change the effectivity or compliance times to reduce the number of airplanes affected; the proposal will be designed to optimize costs versus benefits in this regard. Changes to either would be less than optimal. (4) Propose some combination of the above. Other combinations would either reduce the level of safety or be less cost-effective.

Anticipated Cost and Benefits:

The total costs of this rule is $68.0 million, or $36.5 million discounted to present value if only blanket material changes are made to the aircraft. If manufacturers need to make configuration changes to the aircraft as well as material changes to their drawings, the FAA estimates that total costs would be $103.1 million or $68.2 million discounted to present value. The FAA is unable to quantify the benefits for this rule. However, preventing the loss of one airplane and its passengers over the 20-year period is not likely. Assuming such a loss would occur at the midpoint of the analysis, or in 2009, with 169 passengers, the nondiscounted loss would be $455.5 million, or $231.5 million discounted to present value (again, assuming society's willingness to pay $2.7 million to avoid a fatality). This loss does not include the value of the airplane. Even without loss of life, as several of the incidents show, a hull loss could exceed tens of millions of dollars. The FAA therefore has determined that this proposed rule would be cost beneficial.

Risks:

The FAA is aware of several events in which the flammability characteristics of thermal/acoustic insulation material may have been a contributing factor of airplane fires. The FAA initiated investigations and research to determine the appropriateness of applying existing Bunsen burner flammability criteria to thermal/acoustic insulation, as typically installed in concealed and inaccessible areas. This rule is necessary to decrease the risk of fires on airplanes and to improve airplane fire safety.

104. +CERTIFICATION OF AIRPORTS

Priority:

Other Significant

Legal Authority:

49 USC 106(g); 49 USC 40113; 49 USC 40119; 49 USC 44101; 49 USC 44701 to 44706; 49 USC 44709 to 40711; 49 USC 44713; 49 USC 44716 to 44717; 49 USC 44719; 49 USC 44722; 49 USC 44901; 49 USC 44903 to 44904; 49 USC 44912; 49 46105

CFR Citation:

14 CFR 121; 14 CFR 139

Legal Deadline:

None

Abstract:

This action proposes to revise the current airport certification regulation and to establish certification requirements for airports serving scheduled air carrier operations in aircraft with 10 to 30 seats. In addition, changes are proposed to address National Transportation Safety Board recommendations and petitions for exemptions and rulemaking. A section of an air carrier operation regulation also would be amended to conform with proposed changes to airport certification requirements. The FAA believes that these proposed revisions are necessary to ensure safety in air transportation and to provide a comparable level of safety at all certificated airports. This action is significant because of substantial public interest.

Statement of Need:

The last major revision to the airport certification regulation occurred in 1987, and since then, industry practices, and technology have changed. To respond to such changes, the FAA is proposing to revise the regulation to clarify and update several requirements. Additionally, with the passage of the 1996 FAA Reauthorization Act, Congress provided the FAA the necessary authority to certificate airports serving scheduled air carrier operations with 10 to 30 seat aircraft, except in the State of Alaska (in addition to existing authority to regulate airports serving air carrier operations using aircraft with more than 30 seats). To achieve a comparable level of safety at all covered airports, FAA now proposes to exercise this authority and amend the regulation to incorporate airports serving smaller air carrier aircraft into the FAA's airport certification program. Also, the 2000 FAA Reauthorization Act (P.L. 106-181) mandates publication of the NPRM within 60 days of the Act's enactment; and publication of the final rule within one year of the close of comment period for airports serving smaller air carrier aircraft.

Summary of Legal Basis:

FAA has general and specific authority to regulate airports as set out in 49 USC 106(g) and 44701.

Alternatives:

The FAA has considered several alternative approaches to this proposed rulemaking and has attempted to minimize the potential economic impact of the proposal, especially the impact on small entities. In addition, this action fulfills the FAA's responsiblilty to meet deadlines established by Congress to certificate airports serving scheduled air carrier operations with 10 to 30 seat aircraft, except for the State of Alaska. The FAA considered alternatives based on two issues. Issue 1 was the revision of 14 CFR 139, and Issue 2 was the certification of airports serving scheduled operations of small air carrier aircraft with 10-30 passenger seats. The FAA determined that it was necessary to revise 14 CFR 139 and that the revised part 139 should include the certification of airports serving scheduled air carrier operations with 10 to 30 passenger seat aircraft.

Anticipated Cost and Benefits:

Most of the costs of this proposed rule are associated with the proposed improvements to safety and operational requirements. Most of these costs result from the expansion of ARFF services. The present value of the total cost of the rule over a 10-year period is approximately $46 million, which includes training, additional emergency response protection, wildlife management, and an updated airport certification manual that better reflects current best practices. With the tremendous cost of aviation accidents, the proposed rule provides the potential for enhanced safety for a reasonable cost. The expected benefit of this proposed rule is an enhanced level of safety resulting in reduced fatalities, injuries, and property damage at airports with scheduled air carrier operations, particularly operations in aircraft configured with 10 to 30 passenger seats. The cost of a single accident of a 30-seat scheduled passenger aircraft is greater than the total cost of the proposal. Other benefits of this proposal include provisions for snow and ice control, wildlife management, and training.

Risks:

The purpose of this rulemaking is to expand and enhance the safety benefits of the current regulation by providing, to the extent possible, a comparable level of safety at all airports used by air carriers.

Final, Statutory, November 5, 1999, PL 104-88, sec 408(b).

Abstract:

This action would revise the regulations for commercial motor vehicle driver rest requirements and duty period limitations for safe highway transportation. A broad rulemaking is required by the ICC Termination Act of 1995 (ICCTA). Other congressional actions prior to the ICCTA require modifications to the current rules.

This rulemaking responds to public and congressional interest in regulating commercial motor vehicle driver rest requirements, the NTSB's safety recommendations, petitions for rulemaking, and scientific data. There is substantial public and congressional interest in the regulation of medium- and heavy-duty truck and bus drivers' sleep, off-duty, and working periods of time. The FMCSA has proposed new rules based upon comments and scientific data submitted to the advance notice of proposed rulemaking docket. The proposal includes an initial regulatory flexibility analysis, a cost-benefit analysis, an unfunded mandates analysis, and a paperwork reduction analysis. This action is considered significant because of substantial public and congressional interest.

Statement of Need:

The motor carrier industry requires 24-hour activities to meet the operational demands of a healthy U.S. economy. Growth in long-haul, regional, overnight, local, for-hire and private carriage operations is increasing with the unprecedented growth of the U.S. economy. Therefore, night work, shift work, and irregular work schedules continue to be commonplace.

The scientific knowledge about sleep, sleep disorders, circadian physiology, fatigue, and performance decrements has also grown. One of the purposes of this rulemaking is to incorporate as much of the scientific knowledge as possible into the applicable regulations.

Summary of Legal Basis:

Section 31136 of title 49, United States Code, authorizes the Secretary of Transportation to prescribe minimum safety standards for commercial motor vehicles (Motor Carrier Safety Act of 1984, Pub. L. 98-554, Title II, October 30, 1984). Regulations prescribed under this section must ensure that: (1) commercial motor vehicles are operated safely; (2) the responsibilities imposed on operators of commercial motor vehicles do not impair their ability to operate the vehicle safely (3) the physical condition of operators of commercial motor vehicles is adequate to enable them to operate the vehicles safely; and (4) the operation of commercial motor vehicles does not have a deleterious effect on the physical condition of the operators.

Section 31502 of Title 49, United States Code, authorizes the Secretary of Transportation to prescribe maximum hours-of-service and qualifications requirements for operators of motor carriers when needed to promote the safety of operations (Motor Carrier Act of 1935, Pub. L. 74-255, August 9, 1935; and Migrant Farm Workers-Regulation of Interstate Transportation Act, Public Law 84-939, August 3, 1956).

Section 113 of the Hazardous Materials Transportation Authorization Act of 1994 (Pub. L. 103-311, August 26, 1994) requires the Secretary of Transportation to prescribe regulations amending part 395 to improve the compliance by commercial motor vehicle drivers and motor carriers with HOS requirements and the effectiveness and efficiency of Federal and State enforcement officers reviewing such compliance.

Section 345 of the National Highway System Designation Act of 1995 (Pub. L. 104-159, November 28, 1995) created four specific exemptions from the hours-of-service-of-drivers requirements of part 395. A fifth exemption applied only to commercial driver licensing-related requirements requiring testing of operators for alcohol and controlled substances. The Secretary of Transportation was authorized to conduct rulemaking, except for the water well drilling hours-of-service exemption, to negate or modify the exemptions upon a determination, after a rulemaking proceeding, that the exemption is not in the public interest and would have a significant adverse impact on the safety of commercial motor vehicles.

Section 408 of the ICC Termination Act of 1995 (Pub. L. 104-88, December 29, 1995) requires the Federal Highway Administration (functions transferred to the Federal Motor Carrier Safety Administration under Pub. L. 106-159) to issue a final rule dealing with a variety of fatigue-related issues pertaining to commercial motor vehicle safety (including 8 hours of continuous sleep after 10 hours of driving, loading and unloading operations, automated and tamper-proof recording devices, rest and recovery cycles, fatigue and stress in longer combination vehicles, fitness for duty, and other appropriate regulatory and enforcement countermeasures for reducing fatigue-related incidents and increasing driver-alertness).

Alternatives:

The FMCSA proposes replacing the current rules with an alternative set of rules based upon scientific knowledge and submitted comments. The FMCSA is considering different regulations for different types of drivers and operations.

The FMCSA will also consider modifying the information collection burdens that have been placed upon the motor carrier industry, including the following types of recordkeeping methods: (1) Reducing the required items on the record of duty status (log book); (2) adding electronic on-board recording devices to commercial motor vehicles; (3) eliminating all FMCSA hours-of-service record keeping requirements while relying exclusively on the duplicative hours-of-work record keeping system required by the U.S. Department of Labor under the Fair Labor Standards Act of 1938, as amended.

The FMCSA is proposing a revision to the hours-of-service regulations to require motor carriers to provide their drivers with better opportunities to obtain sleep than the current rules, and thereby reduce the number of fatigue-related crashes involving these drivers. We estimate that 755 fatalities and 19,705 injuries occur each year on the Nation's roads because of drowsy, tired or fatigued CMV drivers.

The proposed rules would make three major changes. First, and most importantly, the new rules would be science-based (related to sleep cycles) and put all drivers in a 24-hour daily cycle. Second, they would reduce the total number of hours behind the wheel in a given 24-hour cycle to no more

than 12 hours. Under current rules, a driver can reach the 60-hour on-duty limit in 4 days and 4 hours, and the 70-hour limit in less than 5 days. Third, long-haul and regional drivers (who spend one or more nights away from their normal work reporting locations) would be required, eventually, to use electronic on-board recording devices (EOBRs). These proposed changes would abandon a one-size-fits-all approach to work-rest cycles and adopt different rest periods for different types of operations.

The FMCSA has received more than 51,000 comments to date. As we are committed to fully exploring all issues and concerns of stakeholders, we held eight public hearings in may, June and July 2000, and followed up three public roundtable discussions in September and October 2000 on issues that attracted significant comment in the hearings.

The roundtables drew broad public participation and elicited in-depth discussion and exchange of supporting data on critical issues, including issues surrounding the economic analyses and assumptions used by the agency. The discussions provided the agency with information requiring careful analysis. This will help the FMCSA identify any necessary changes to the proposal that would address stakeholders' divergent concerns and support the development of a successful rule.

The FY 2001 Department of Transportation Appropriations Act, Pub. L. 106-346, includes language that prohibits the Department from adopting a final rule before October 1, 2001. This is consistent with the Department's pledge to carefully review and consider the extensive record that has been established on the rulemaking before deciding on the next appropriate step in the rulemaking process.

Anticipated Cost and Benefits:

The FMCSA has placed a Preliminary Regulatory Evaluation (PRE) in the docket. The PRE evaluates five options, based on identified key parameters. The selected option, which divides the industry into different types of motor carrier operations, is projected to save 115 lives and 2,995 injuries per year with a total net benefit of almost $3.359 billion, assuming that 15 percent of CMV-involved crashes are fatigue-related. Readers are directed to the PRE and the preamble of the NPRM for additional information.

Risks:

Fatigue is increasingly becoming the focus of possible causes following many crashes. Driver reports of being fatigued to the point of incapacity are not uncommon, and intuitively, it is reasonable, given the sheer volume of traffic, to expect fatigue to be a factor in future crashes if the regulations are not corrected. Fatigue was identified by the industry, public, and government as the highest priority safety issue at a 1995 Truck and Bus Safety Summit in Kansas City, MO.

The FMCSA has established a goal to reduce by 50 percent over ten years the number of fatalities from crashes involving any commercial motor vehicle. The FMCSA anticipates its proposal will reduce fatigue-related crashes by at least 15 percent each year to assist in its efforts to meet its overall goal of 50 percent reduction in deaths.

Federalism:

This action may have federalism implications as defined in EO 13132.

Additional Information:

Transferred from RIN 2125-AD93.

During the agency's broad section 610 review of the 65-year history of the rule and all its amendments and revisions, the agency identified that RINs 2125-AD52, 2125-AD81, 2126-AA16, and 2126-AA29 also contain pertinent actions that must be incorporated into this action. Therefore, the agency incorporated them and has published a combined proposal addressing the entire topic of hours-of-service of drivers and related recordkeeping issues.

The DOT Docket Management System now identifies this rulemaking as number FMCSA-1997-2350.

More Information on ALTERNATIVES:

The FMCSA is proposing a revision to the hours-of-service regulations to require motor carriers to provide their drivers with better opportunities to obtain sleep than the current rules, and thereby reduce the number of fatigue-related crashes involving these drivers. We estimate that 755 fatalities and 19,705 injuries occur each year on the Nation's roads because of drowsy, tired or fatigued CMV drivers.

The proposed rules would make three major changes. First, and most importantly, the new rules would be science-based (related to sleep cycles) and put all drivers in a 24-hour daily cycle. Second, they would reduce the total number of hours behind the wheel in a given 24-hour cycle to no more than 12 hours. Under current rules, a driver can reach the 60-hour on-duty limit in 4 days and 4 hours, and the 70-hour limit in less than 5 days. Third, long-haul and regional drivers (who spend one or more nights away from their normal work reporting locations) would be required, eventually, to use electronic on-board recording devices (EOBRs). These proposed changes would abandon a one-size-fits-all approach to work-rest cycles and adopt different rest periods for different types of operations.

The NPRM is a proposal. The FMCSA has extensively solicited public comments at 8 public hearings and 3 public roundtable discussions. The agency has received more than 51,000 comments in docket no. FMCSA-97-2350. The agency is reviewing these comments to ensure that it can make appropriate decisions about the next steps in the rulemaking process.

RIN: 2126–AA23

DOT—National Highway Traffic Safety Administration (NHTSA)

PROPOSED RULE STAGE

106. +FRONTAL OFFSET PROTECTION

Priority:

Other Significant

Legal Authority:

49 USC 322; 49 USC 30111; 49 USC 30115; 49 USC 30117; 49 USC 30166

CFR Citation:

49 CFR 571.208

Legal Deadline:

None

Abstract:

The agency is considering establishing a Federal motor vehicle safety standard for high speed frontal offset crash testing. The frontal offset test is a crash test for automobiles and light trucks in which the subject vehicles are run into a deformable honeycomb barrier. The barrier contacts only 40 percent of the front of the vehicle simulating an off-center frontal collision. The agency is considering adding the offset test to the frontal occupant protection standard to measure vehicle structural integrity and reduce the number and severity of lower-body injuries.

Statement of Need:

While the Federal motor vehicle safety standards already contain a frontal crash test, injuries and fatalities still occur in various types of frontal crashes. The European Union determined that the best test for frontal occupant protection would be an offset test with belted test dummies. As part of the House of Representatives Conference Report 104-785, to accompany H.R. 3675, the National Highway Traffic Safety Administration was directed on September 16, 1996, to conduct research "...toward establishing a Federal motor vehicle safety standard for frontal offset crash testing." Such a standard would harmonize with the European Union frontal crash standard. Subsequent research results with the 50th percentile male and the 5th percentile female Hybrid III dummies suggest that additional safety benefits would be provided for the neck and the upper and lower tibia under the offset test conditions.

Summary of Legal Basis:

Section 30111,Title 49 of the United States Code, states the Secretary shall prescribe motor vehicle safety standards. As part of the House of Representatives Conference Report 104-785, to accompany H.R. 3675, the National Highway Traffic Safety Administration was directed on September 16, 1996, to conduct research "...toward establishing a Federal motor vehicle safety standard for frontal offset crash testing."

Alternatives:

Since this program is oriented primarily toward adopting an existing European standard, the agency will focus on existing test procedures. However, the agency is working through the national and international biomechanical engineering community to develop better test devices such as improved dummy legs. Comments will be sought on the best dummy designs in the agency's proposal.

Anticipated Cost and Benefits:

A report prepared for the Australian Government estimates that adding an offset test may result in a 15 percent reduction in "Harm." Harm is a calculation of the cost of trauma and is the product of the frequency of injury and cost to the community. Most of these benefits would be seen in reduction in lower body and leg injuries. The agency has not determined the specific benefits of this test procedure.

The agency estimates that for vehicles that cannot currently pass this test, vehicle modifications would cost $14 per vehicle. Based on an estimate that 25 percent of the fleet would need to be modified, the total annual cost to the consumers would be $60 million dollars.

Risks:

Current motor vehicles provide numerous occupant protection systems, such as safety belts and strategically-placed energy absorption materials such as foam padding. However, an estimated 3,300 people per year are killed and 400,000 people per year are injured in frontal offset crashes.

The agency knows of no disadvantages to implementing this requirement.

RIN: 2127–AH73

DOT—Federal Railroad Administration (FRA)

PROPOSED RULE STAGE

107. +STANDARDS FOR DEVELOPMENT AND USE OF PROCESSOR-BASED SIGNAL AND TRAIN CONTROL SYSTEMS

Priority:

Other Significant

Legal Authority:

49 USC 20103

CFR Citation:

49 CFR 234; 49 CFR 236; 49 CFR 209

Legal Deadline:

None

Abstract:

Consistent with congressional mandate, FRA has continued its commitment to supporting Positive Train Control (PTC) technology development, testing and compatibility; and promoting deployment of PTC technology in the

near future. In September 1997, FRA initiated joint fact finding efforts through the Railroad Safety Advisory Committee (RSAC) Working Group on PTC. The advice and recommendations of RSAC formed the basis for proceeding to an NPRM that can facilitate introduction of advanced technology, including systems that support PTC functions. The rulemaking will address technical standards for all processor-based signal and train control products, amending 49 CFR part 236.

Statement of Need:

Current FRA regulations do not adequately address the use of signal and train control technology that is processor-based. In fact, application of current regulations to processor-based systems can create unnecessarily burdensome requirements. Recently, use of this technology has begun to increase on the general system of North American railroads, placing new demands on agency resources to ensure the safety objectives contemplated by the current regulations are achieved. The existence of federal regulations addressing this subject matter would further encourage safe use of the technology, which would reduce the risk of train-to-train collisions, better enforce speed restrictions, and increase the level of protection to roadway workers and their equipment. These improvements will likely result in fewer fatalities, injuries, and economic damage associated with such risks. Given the potential for substantial safety benefits that this program represents, this initiative is extremely important to the agency.

Summary of Legal Basis:

FRA is issuing this proposal pursuant to its general rulemaking authority. 49 U.S.C. 20103(a). Currently, railroads may discontinue or materially alter a signal system initially required by the Secretary of Transportation only with approval from the Secretary. 49 U.S.C. 20502. Exercise of both of these powers has been delegated to the FRA Administrator. 49 C.F.R. 1.49.

Alternatives:

Currently, FRA accepts waiver applications from railroads that seek relief from FRA safety regulations in order to test new signal and train control equipment. Since FRA must consider the safety ramifications of each application on a case-by-case basis, this procedure can take years.

Prior to this action, FRA has considered:(1) leaving the existing regulatory requirement as is, and (2) adopting a single standard for the design of processor-based signal and train control systems. However, agency inaction would hinder introduction of new, safer technology into railroad signal and train control; elimination of all railroad signal and train control system regulation would be a total abdication of the agency's statutory duties; and a single design standard would inhibit innovative signal and train control system designs.

Anticipated Cost and Benefits:

The proposed rule would provide flexible performance standards for the design of processor-based signal and train control systems, but would not mandate their usage. FRA believes that a railroad would adopt such a system under one or more of the following conditions: (1) the new system is safer; (2) the new system is less expensive; and (3) continued maintenance of the existing system is no longer feasible. The proposed rule would ensure that any replacement system is at least as safe as the current system. Concerning existing processor-based systems, the proposed rule would require railroads to adopt a software management plan, which will ensure proper software configuration, resulting in decreased risk of train accidents due to signal malfunction. FRA has not quantified these benefits because of the difficulties in estimating how many systems are likely to be affected by this rule, what the incremental cost would be, and when the benefits would accrue.

Most of the costs of this proposed rule are associated with safety documentation required to demonstrate compliance with the performance standard. As with many performance standards, this rule would require substantial safety documentation from the railroad to demonstrate compliance, both up front and during the life cycle of the system. It appears that the primary cost involved in this proposed rule will be the product risk assessment, a one-time expense presently incurred by product suppliers. For current processor-based systems, railroads face the cost of implementing a software management control plan, which is less expensive than attempting to satisfy current requirements, which did not contemplate the use of processor-based technology.

Overall, it appears that the benefits of the proposed rule outweigh the costs.

Risks:

The risk category addressed by the proposed rule is that of accidents that occur due to improper train operations and certain types of vandalism. Types of accidents that may be prevented include train-to-train collisions, derailments due to excessive train speed, and trains penetrating the work limits of roadway workers.

PROPOSED RULE STAGE

108. +CLEAN FUELS FORMULA GRANT PROGRAM

Priority:

Other Significant

Legal Authority:

PL 105-178, sec 3008; 49 USC 5308

CFR Citation:

49 CFR 624

Legal Deadline:

None

Abstract:

Section 3008 of the Transportation Equity Act for the 21st Century establishes the Clean Fuels Formula

Grant Program. This grant program will assist transit systems in purchasing or leasing clean fuel vehicles; constructing clean fuel or electrical re-charging facilities; modifying existing garage facilities to accommodate clean fuel vehicles; repowering pre-1993 engines with clean fuel technology which meets the current bus emission standards; and retrofitting or rebuilding pre-1993 engines before their half-life for rebuilding. This provision requires the Secretary to issue an implementing regulation that sets forth eligibility requirements and an apportionment formula for eligible projects. In FY 1999, all funds were apportioned to earmarked projects. This action is considered significant because of considerable congressional and public interest.

Statement of Need:

This rulemaking is intended to assist nonattainment and maintenance areas in achieving or maintaining air quality attainment status. The program also seeks to support emerging clean fuel and advanced propulsion technologies for transit buses and to create markets for these technologies.

DOT—Research and Special Programs Administration (RSPA)

PROPOSED RULE STAGE

109. +APPLICABILITY OF THE HAZARDOUS MATERIALS REGULATIONS TO LOADING, UNLOADING, AND STORAGE

Priority:

Other Significant

Legal Authority:

49 USC 5101 to 5127

CFR Citation:

49 CFR 106 to 107; 49 CFR 171 to 180

Legal Deadline:

None

Abstract:

This rulemaking proposes to better define the applicability of the Federal Hazardous Materials Regulations (HMR) in order to clarify the relationship among Federal, State, local, and tribal agencies in the regulation of hazardous materials. Under circumstances specified in Federal statutes, the regulations of other Federal agencies (EPA and OSHA) and non-Federal governments (States, localities, and Indian tribes) must be consistent with or defer to RSPA's regulation of the transportation of hazardous materials in commerce. However, other Federal and non-Federal requirements are generally not limited where hazardous materials are not in transportation. Activities relating to loading, unloading, and storage of hazardous materials have become areas of particular uncertainty and concern to both industry and non-Federal governments. This action is significant because of the substantial public interest in reducing uncertainty and avoiding conflicting regulations.

Statement of Need:

In recent years, RSPA has issued interpretations and administrative decisions on a case-by-case basis about whether particular activities are in "transportation" and therefore subject to regulation under the HMR. Because of increasing State and local regulation of hazardous materials, RSPA concluded that an overall rulemaking is appropriate, rather than just case-by-case decisions. RSPA believes that better overall definitions of the applicability of the HMR will reduce uncertainty by the regulated community and other regulatory agencies (both Federal and non-Federal) as to which agency has regulatory authority. Greater certainty in this regard should promote improved compliance with the HMR and also with the requirements of other regulatory agencies.

Summary of Legal Basis:

Section 5103 of title 49 U.S.C. specifies that the Secretary shall prescribe regulations for the safe transportation of hazardous materials in intrastate, interstate, and foreign commerce applicable to, among others, any person who offers hazardous materials for transportation or who transport hazardous materials in commerce. In addition, section 5125 of title 49 U.S.C. sets forth the circumstances under which differing non-Federal requirements are preempted.

Alternatives:

Commenters to the ANPRM and SANPRM suggested alternative ways to describe the applicability of the HMR. One suggestion is to describe the applicability of the HMR in relationship to specific transportation functions. Another is to describe the applicability of the HMR over specific regulated entities, such as those who offer hazardous materials for transportation or those who transport hazardous materials. RSPA is considering each of the alternatives proposed.

Anticipated Cost and Benefits:

RSPA made a preliminary determination that there is neither an increase nor decrease in the costs of compliance with the HMR for persons who offer hazardous materials for transportation or transport hazardous materials in commerce. The preliminary regulatory evaluation was entered into the docket and is available for review.

Risks:

Clarifying the applicability of the HMR should reduce uncertainty as to which regulatory agency's requirements apply to any particular activity involving hazardous materials and improve compliance with the HMR, the requirements of EPA and OSHA, and non-Federal requirements. This should result in improved compliance with the applicable regulatory requirements, and improve hazardous materials transportation safety, reduce risks to the environment from hazardous materials, and promote workplace safety at facilities that manufacture or handle hazardous materials.

Regulatory Flexibility Analysis Required:

Yes

Small Entities Affected:

Businesses

Government Levels Affected:

State, Local, Tribal, Federal

Federalism:

This action may have federalism implications as defined in EO 13132.

Additional Information:

Docket No. HM-223. As a result of comments received to the ANPRM, we have upgraded this rulemaking to significant.

BILLING CODE 4910-62-S

DEPARTMENT OF THE TREASURY (TREAS)

Statement of Regulatory Priorities

The primary missions of the Department of the Treasury are:

To promote prosperous and stable American and world economics, including promoting domestic economic growth and maintaining our Nation's leadership in global economic issues, supervising national banks and thrift institutions, and helping to bring residents of distressed communities into the economic mainstream;

To manage the Government's finances by protecting and collecting the correct amount of revenue under the Internal Revenue Code and customs laws, financing the Federal Government and managing its fiscal operations, and producing our Nation's coins and currency; and

To safeguard our financial systems, protect our Nation's leaders, and secure a safe and drug-free America by enforcing laws relating to counterfeiting, Federal Government securities, firearms and explosives, money laundering, foreign commerce in goods and financial instruments, and smuggling and trafficking in contraband; protecting the President, Vice President, certain foreign diplomatic personnel, and others; and training Federal, State, and local law enforcement officers.

Consistent with these missions, most regulations of the Department and its constituent bureaus are promulgated to interpret and implement the laws as enacted by the Congress and signed by the President. Unless circumstances require otherwise, it is the policy of the Department to issue a notice of proposed rulemaking (NPRM) and carefully consider public comments before adopting final regulations. Also, in particular cases, the Department invites interested parties to submit views on rulemaking projects while the NPRM is being developed, and holds public hearings to discuss proposed rules.

To the extent permitted by law, it is the policy of the Department to adhere to the regulatory philosophy and principles set forth in Executive Order 12866, and to develop regulations that maximize aggregate net benefits to society, while minimizing the economic and paperwork burdens imposed on persons and businesses subject to those regulations.

On October 26, 2001, the President signed into law the USA PARTRIOT Act of 2001. In the coming months the Department of the Treasury will accord the highest priority to developing and issuing regulations that are within its jurisdiction that are necessary to implement this historic anti-terrorism legislation.

Internal Revenue Service

The Internal Revenue Service (IRS), working with the Office of the Assistant Secretary (Tax Policy), promulgates regulations that interpret and implement the Internal Revenue Code and related tax statutes. The purpose of these regulations is to carry out the tax policy determined by Congress in a fair, impartial and reasonable manner, taking into account the intent of Congress, the realities of relevant transactions, the need for the Government to administer the rules and monitor compliance, and the overall integrity of the Federal tax system. The goal is to make the regulations practical and as clear and simple as possible.

Most IRS regulations interpret tax statutes to resolve ambiguities or fill gaps in the tax statutes. This includes interpreting particular words, applying rules to broad classes of circumstances, and resolving apparent and potential conflicts between various statutory provisions.

During fiscal year 2002, the IRS will accord priority to the following regulatory projects:

- *Qualified Tuition Programs.* Section 529 of the Internal Revenue Code provides tax-deferred growth on college savings that are contributed to a section 529 program. Congress made significant amendments to section 529 in the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA). Earnings on college savings in a section 529 program are excluded from the gross income of a student if used to pay qualified higher education expenses. The Service expects to issue regulations that will clarify various rules and definitions. Regulations are necessary because many taxpayers will use a Qualified Tuition Program to save for college.
- *Research Credit.* Section 41 of the Internal Revenue Code, enacted in 1981 and modified in 1986, provides a credit for increasing research expenditures as an incentive to spur increased research spending and thereby encourage economic growth. Regulations dealing with the definition of credit-eligible research expenses (and with the computation of the credit) were proposed in January, 1997 and December, 1998. The proposed regulations were adopted as final rules in December, 2000. In Notice 2001-19, Treasury and the IRS announced a review of the policies embodied in the final research credit regulations. Treasury and the IRS intend to issue another set of proposed regulations with a definition of qualified research that is both more concordant with congressional intent and more administrable than the approach taken in the final rules adopted in December 2000.
- *Deduction and Capitalization of Expenditures.* Section 162 of the Internal Revenue Code allows a deduction for ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business. Under section 263, however, no deduction is allowed for any amount paid out for new buildings, or for permanent improvements or betterments, made to increase the value of any property or estate, such as the cost of acquisition, construction, or erection of buildings, machinery and equipment, and similar property having a useful life substantially beyond the taxable year. Case law interpreting section 263 establishes that an expenditure generally must be capitalized if it creates or enhances a separate and distinct asset or produces a significant future benefit. The IRS intends to publish proposed regulations to clarify the circumstances in which taxpayers must capitalize expenditures that are expected to create future benefits for the taxpayer, but do not result in a separate and distinct tangible asset ("self-created intangibles"). The proposed are expected to address three primary issues: (1) whether costs incurred in connection with self-created intangibles are subject to capitalization under section 263; (2) if such costs are subject to capitalization, the circumstances for which capitalization is warranted (e.g., can recurring, day-to-day expenditures of the taxpayer's business create significant future benefits); and (3) if capitalization is warranted, the types of costs that must be capitalized (e.g., external costs, internal costs, direct costs, indirect/overhead costs).
- *Required Notice Regarding Certain Pension Plan Amendments.* Section 204(h) of the Employee Retiremont Income Security Act (ERISA) requires the administrator of certain qualified retirement plans to provide notices to

plan participants and others of certain reductions in the rate of future benefit accruals under the plan. Section 659 of EGTRRA substantially amended section 204(h) of ERISA, added section 4980F to the Internal Revenue Code, and required notices to be given on the elimination or reduction of early retirement benefits or retirement-type subsidies. Section 4980F generally parallels section 204(h) of ERISA, but also provides for an excise tax for failure to comply with the notice requirements. The IRS expects to issue a notice of proposed rulemaking that will provide guidance on complying with the notice requirements of both section 204(h) of ERISA, as amended by EGTRRA, and section 4980F. This guidance is needed in order to assist plan administrators in complying with their obligations and to ensure that participants receive the timely, understandable and accurate notices required by the statute.

- *Relief from Joint and Several Liability.* Section 3201 of the IRS Restructuring and Reform Act of 1998 repealed section 6013(e) and added section 6015 to the Internal Revenue Code, effective for liabilities unpaid as of July 22, 1998, and for liabilities that arose after July 22, 1998. Prior to July 22, 1998, section 6013(e) provided the only relief from joint and several liability for married taxpayers who elected to file a joint return ("innocent spouse" relief). Section 6015 provides three types of relief from joint and several liability: traditional "innocent spouse" relief; allocation of liability for spouses no longer married, legally separated, or not members of the same household for 12 months; and equitable relief for spouses who do not qualify for innocent spouse relief and allocation of liability, if it is inequitable to hold them liable for the joint liability. Proposed regulations under section 6015 were issued in January 2001. The IRS intends to issue final regulations regarding the three types of relief from joint and several liability under section 6015, as well as rules regarding the allocation of items, the procedures for filing a claim for relief, and the rights of the nonrequesting spouse.
- *Offers in Compromise.* Temporary regulations were issued in July 1999, which permit compromise of liabilities when there is doubt as to the amount of the liability owed, when there is doubt whether the full amount of the tax can be collected, and when, in light of all the facts and circumstances, compromise would promote effective tax administration. A compromise may be entered into to promote effective tax administration when collection of the full liability would create economic hardship or where, regardless of the taxpayer's financial circumstances, exceptional circumstances exist such that collection of the full liability would be detrimental to voluntary compliance. In determining a taxpayer's ability to pay, the temporary regulations require the IRS to evaluate the taxpayer's individual facts and circumstances. Guidelines published by the Secretary on national and local living expenses are to be taken into account in making this determination. A taxpayer may appeal the rejection of an offer to compromise to the IRS Office of Appeals.
- *Collection Due Process.* Section 3401 of the IRS Restructuring and Reform Act of 1998 added to the Internal Revenue Code sections 6320 and 6330 (Collection Due Process (CDP) procedures), which provide taxpayers an opportunity for a hearing before the Office of Appeals when a notice of tax lien has been filed or a levy is proposed to be made against them. These sections also provide for judicial review of Appeals' determination. The CDP procedures afforded new rights to taxpayers resulting in a significant change in the Service's administrative collection process. Temporary regulations were issued in January 1999, which provide detailed guidance to taxpayers, practitioners and Service employees for navigating the new procedural landscape. In FY 2002, the IRS intends to issue final regulations implementing the CDP procedures.
- *Recognition of Gain on Certain Distributions of Stock or Securities under Section 355(e).* Congress enacted section 355(e) of the Internal Revenue Code as part of the Taxpayer Relief Act of 1997 and made technical corrections to that section in the Internal Revenue Service Restructuring and Reform Act of 1998. Section 355(e) provides that the distributing corporation will recognize gain on certain distributions that are part of a "plan (or series of related transactions)" pursuant to which one or more persons acquires directly or indirectly stock representing a 50-percent or greater interest in the distributing or controlled corporation. Regulations were proposed in January of 2001 interpreting the phrase "plan (or series of related transactions)." The IRS and Treasury intend to revise those regulations and also intend to propose regulations that will address the definition of an acquisition.
- *Division and Geographical Source of Income in Global Dealing Operations.* In today's global capital markets, financial institutions are trading in securities, currencies, and sophisticated financial instruments in multiple jurisdictions. Because of the cross-border nature of their operations, these businesses face the risk of international double taxation. That risk is exacerbated by various regulatory provisions that are ill-suited for these types of businesses. Proposed regulations were issued in 1998 for public comment on the appropriate division and geographical source of income in such global dealing operations. Treasury and the IRS anticipate issuing a final rule during fiscal year 2002 that reflects changes in response to the comments that have been received.
- *Allocation of Losses on the Disposition of Stock and Other Personal Property.* The allocation of losses and expenses to U.S. and foreign source income is relevant in computing the amount of foreign taxes that may be claimed as a credit against the U.S. tax on foreign source taxable income. In general, a U.S. taxpayer's credit for foreign income taxes on foreign source taxable income is limited to an amount equal to what otherwise would have been the U.S. income tax on such income. This limitation is separately computed with respect to different categories of foreign source income. Proposed regulations were issued for public comment in 1996 on how losses with respect to stock and other personal property should be allocated to and among U.S. source income and the various categories of foreign source income in determining foreign source taxable income for these purposes. In January 1999, portions of these regulations were finalized and other portions were issued as temporary rules with a request for further public comment. Because the temporary regulations will sunset by operation of law in January 2002, Treasury and the IRS anticipate issuing final regulations prior to the sunset date with certain changes in response to public comments.

Office of the Comptroller of the Currency

The Office of the Comptroller of the Currency (OCC) charters, regulates, and supervises national banks to ensure a safe, sound, and competitive national banking system that supports the citizens, communities, and economy of the United States. The substantive content of the OCC's regulations reflects four organizing principles that support this mission:

- The OCC's regulations help ensure safety and soundness by establishing standards that set the limits of acceptable conduct for national banks.
- The OCC's regulations promote competitiveness by facilitating a national bank's ability to develop new lines of business, subject to any safeguards that are necessary to ensure that the bank has the expertise to manage risk effectively and adapt its business practices to deal responsibly with its customers.
- Regulations can also affect national banks' ability to compete by contributing significantly to their costs. The OCC's goal is to improve efficiency and reduce burden by updating and streamlining its regulations and eliminating those that no longer contribute significantly to the fulfillment of its mission.
- The OCC's regulations help assure fair access to financial services for all Americans by removing unnecessary impediments to the flow of credit to consumers and small businesses, by encouraging national banks' involvement in community development activities, and by implementing Federal laws designed to protect consumers of financial services.

The OCC's regulatory workload and plans are affected directly by new statutes. Possible statutory changes are not addressed in this Regulatory Plan, but may affect some of the planned rules directly, and likely would affect how the OCC prioritizes its regulatory workload.

Important final rules issued during fiscal year 2001 (or expected to be issued before publication of this Regulatory Plan) include:

- *Safety and Soundness Standards for Safeguarding Customer Information* (12 CFR part 30). This rule, issued jointly with the other Federal banking agencies, established standards governing the administrative, technical, and physical safeguards of bank and customer records.
- *Consumer Protections for Depository Institution Sales of Insurance* (12 CFR part 14). This rule, issued jointly with the other Federal banking agencies, prescribed consumer protection regulations that apply to retail sales practices, solicitations, advertising, or offers of any insurance product by a depository institution or any person that is engaged in such activities at an office of the institution or on behalf of the institution.
- *Fiduciary Activities of National Banks* (12 CFR part 9). The OCC amended its regulations regarding the authority and standards for national banks to conduct multi-state trust operations. The rule provides enhanced guidance to national banks engaging in fiduciary activities.
- *Investment Securities; Bank Activities and Operations; Leasing* (12 CFR parts 1, 7, and 23). This rule amended its rules governing investment securities, bank activities and operations, and leasing. These changes updated and revised the OCC regulations to keep pace with developments in the law and in the national banking system.
- *Debt Cancellation Contracts* (12 CFR part 37). The OCC published a notice of proposed rulemaking that addresses debt cancellation contracts and debt suspension agreements. The purposes of the customer protections are to facilitate customers' informed choice about whether to purchase debt cancellation contracts and debt suspension agreements, based on an understanding of the costs, benefits, and limitations of the products and to discourage inappropriate or abusive sales practices. The proposed rule also promotes safety and soundness by requiring national banks that provide these products to maintain adequate loss reserves.
- *Operating Subsidiaries of Federal Branches and Agencies* (12 CFR part 5). The rule will amend its regulations to enable a Federal branch or agency to establish, acquire, or maintain an operating subsidiary in generally the same manner that a national bank may acquire or establish an operating subsidiary.

The OCC's regulatory priorities for fiscal year 2002 include projects in the following areas:

- *Risk-Based Capital Standards* (12 CFR part 3). The OCC will continue to work with the other Federal banking agencies to update the risk-based capital standards to maintain, and, where necessary, improve consistency in the agencies' rules. Regulatory projects in this area may include the following:

Collateralized Transactions. The rule would conform the banking agencies' regarding the risk-based capital treatment of loans collateralized in cash or government securities issued by members of the Organization for Economic Cooperation and Development (OECD). The rule would assign a zero risk weight for the portion of claims collateralized by cash on deposit in a bank or securities issued or guaranteed by the U.S. Government or its agencies or the central government of an OECD country, provided that certain conditions are met.

Risk-Based Capital Treatment of Recourse Transactions and Direct Credit Substitutes. The OCC intends to finalize the rulemaking on recourse and direct credit substitutes in which the OCC and other federal banking agencies have sought comment on changes that would result in more consistent treatment of recourse obligations and similar transactions among the agencies, more consistent risk-based capital treatment for certain types of transactions involving similar risk, and capital requirements that more closely reflect a banking organization's relative exposure to credit risk. This rule also would impose a dollar-for-dollar capital charge on all subordinated positions, either retained or purchased by a bank, that serve as credit enhancement on a securitization.

Managed Assets. This rulemaking will seek information on approaches to amend the risk-based capital guidelines to address the treatment of assets under management in asset securitizations. Specifically, the rulemaking will focus on the risks associated with management of assets within a securitization structure, both for the originator as well as servicer of such assets, as well as the appropriate framework within which to assess capital charges, if appropriate, to address the risks.

Domestic Capital Framework (formerly referred to as Simplified Capital Framework for Noncomplex Institutions). This rule would propose a revised capital framework to be applied to domestic banks that would not subject to the new Basel Capital Accord.

Claims on Securities Firms. This final rule would amend the risk-based capital guidelines to lower the risk weight applied to certain claims on, and claims guaranteed by, certain securities firms incorporated in countries that are members of the Organization for

Economic Cooperation and Development (OECD) from 100 percent to 20 percent, subject to certain prudential requirements. This reduced risk weighting applies to those securities firms that are subject to supervision and regulation comparable to that imposed on banks, including risk-based capital requirements that are no less stringent than those imposed on banks under the Basel Accord and its market risk amendment. This rule would implement a change made to the Basel Accord.

Merchant Banking Capital. This rule would amend the risk-based capital guidelines to establish special minimum regulatory capital requirements for equity investments in nonfinancial companies. The capital requirement would apply symmetrically to equity investments of banks and bank holding companies and would impose a series of marginal capital charges on covered equity investments that increase with the level of a banking organization's overall exposure to equity investments relative to the organization's Tier 1 capital.

Securities Borrowing Transactions. This final rule generally would lower the capital requirements for certain qualifying securities borrowing transactions by permitting the collateralized portion of the securities borrowing transactions to be subject to the market risk capital requirements at 12 C.F.R. part 3, appendix B, as opposed to the risk-based capital requirements at 12 C.F.R. part 3, appendix A. Among other things, in order to qualify for the lower market risk capital requirement under this joint interim rule, a bank must be subject to the market risk capital requirements, and the securities borrowing transaction must result in a receivable that arises from the posting of the cash collateral. Only the portion of the receivable collateralized by the market value of the securities borrowed qualifies for the lower market risk capital requirement; noncollateralized portions must continue to be risk weighted under the risk-based capital guidelines.

- *Electronic Banking* (12 CFR part 7). The OCC published a notice of proposed rulemaking that addressed ways to facilitate national banks in their efforts to engage in various forms of electronic banking. The proposal addresses national banks' exercise of their federally authorized powers through electronic means; the location of a national bank that engages in electronic activities; and the disclosures required when a national bank provides its customers with access to other service providers through hyperlinks in the bank's web site or other shared electronic space. The OCC will be evaluating the comments received and considering what changes, if any, should be made to the OCC's rules affecting electronic banking.
- *Community Reinvestment Act Regulations* (12 CFR part 25). The OCC, along with the other Federal banking agencies, published an advance notice of proposed rulemaking soliciting comments on ways to improve the CRA regulation. Based on the comments received, the OCC and other agencies will consider the need for changes to the CRA rules and will propose such changes as are deemed appropriate.
- *Real Estate Lending and Appraisals* (12 CFR part 34). The OCC intends to evaluate its rules governing adjustable rate mortgage loans to determine whether the rule continues to implement the Alternative Mortgage Transaction Parity Act of 1982 effectively and whether consumer protection safeguards are needed.
- *Implementation of Sections 1204-1206 of the Financial Regulatory Relief and Economic Efficiency Act of 2000 (the Act)* (12 CFR part 5). The OCC intends to initiate a rulemaking to implement the authority vested in national banks by the Act to reorganize into a holding company through a share exchange and to merge with a subsidiary or affiliate.

Office of Thrift Supervision

As the primary Federal regulator of the thrift industry, the Office of Thrift Supervision (OTS) has established regulatory objectives and priorities to supervise thrift institutions effectively and efficiently. These objectives include maintaining and enhancing the safety and soundness of the thrift industry; a flexible, responsive regulatory structure that enables savings associations to provide credit and other financial services to their communities, particularly housing mortgage credit; and a risk-focused, proactive approach to supervision.

OTS continues to work with the other federal banking agencies on regulations where the agencies share the responsibility to implement statutory requirements. The agencies are working to update capital standards to maintain, and, where necessary, improve consistency in the agencies' rules. Regulatory projects in this area include the following:

- *Risk-Based Capital Treatment of Recourse and Direct Credit Substitutes; and Residuals in Securitizations.* OTS expects to issue a final rule jointly with the other federal banking agencies that would treat recourse obligations and direct credit substitutes comparably. The final rule would use credit ratings and certain other alternative mechanisms to match risk-based capital requirements more closely to a depository institution's risk of loss in asset securitizations. This rule would be published in tandem with a final rule on residual interests that would better align regulatory capital requirements with the risk exposure of residual interests in asset securitizations and other transfers of assets.
- *Managed Assets.* This initiative, possibly in the form of an advance notice of proposed rulemaking, would seek information on approaches to amend the risk-based capital guidelines to address the treatment of assets under management in asset securitizations. Specifically, this rulemaking would focus on the risks associated with management of assets within a securitization structure, both for the originator as well as servicer of such assets, as well as the appropriate framework within which to assess capital charges, if appropriate, to address the risks.
- *Capital Adequacy.* The four Federal banking agencies expect to issue a joint notice of proposed rulemaking seeking comment on ways to modify the capital adequacy framework for those domestic institutions that would not be subject to the Basel Capital Accord.
- *Claims on Securities Firms.* The four Federal banking agencies expect to issue a final rule that would reduce the risk weight assigned to claims on, and claims guaranteed by, certain qualifying securities firms, subject to certain prudential requirements.
- *Miscellaneous Capital Revisions.* OTS also plans to issue a final rule to make miscellaneous amendments to update its capital rules.

OTS and the other Federal banking agencies anticipate reproposing a rule implementing provisions of the Fair Credit Reporting Act (FCRA) concerning information sharing with affiliates. The agencies informed those institutions potentially affected by the rulemaking that any final rule would not apply to

privacy notices sent before January 1, 2002 or before the effective date of the final FCRA rule, whichever is later.

The four Federal banking agencies published a joint advance notice of proposed rulemaking seeking comments on how to improve the Community Reinvestment Act (CRA) regulations. The OTS, as well as the other banking agencies, will consider changes to the CRA rules based upon the comments received, and will propose such changes as are deemed appropriate.

OTS also is reviewing its lending and subordinate organization regulations to give thrifts additional flexibility, enabling them to better serve their communities and compete with other lenders. OTS also plans to issue a final rule revising its regulations governing conversion from mutual to stock or mutual holding company form. OTS is also reviewing its current holding company regulations to determine whether and how they should be modified to reflect statutory changes made by the Gramm-Leach-Bliley Act. Additionally, OTS is considering possible amendments to its regulations governing directors and officers of savings associations and the fiduciary activities of savings associations.

Finally, OTS may revise its lending regulations, including the rules implementing the Alternative Mortgage Transactions Parity Act, to encourage responsible lending and limit the potential for predatory lending practices.

United States Customs Service

The United States Customs Service (Customs) is responsible, among other things, for administering laws concerning the importation of goods into the United States. This includes inspecting imports, collecting applicable duties, overseeing the activities of persons and businesses engaged in importing, and enforcing the laws concerning smuggling and trafficking in contraband. The regulatory priorities of Customs for fiscal year 2002 are to continue to facilitate procedures for legitimate commercial transactions and to provide further obstacles to the flow of narcotics and other contraband into the United States.

During fiscal year 2001, one of Customs' priorities was to develop and publish regulations to implement provisions of the Trade and Development Act of 2000. To that end, Customs published the following documents during the past fiscal year:

- *United States-Caribbean Basin Trade Partnership Act and Caribbean Basin Initiative.* This interim rule implements the trade provisions for Caribbean Basin countries contained in title II of the Trade and Development Act.
- *African Growth and Opportunity Act and Generalized System of Preferences.* This interim rule implements the trade provisions for sub-Saharan Africa contained in title I of the Trade and Development Act.
- *Refunds of Duties Paid on Imports of Certain Wool Products.* This rulemaking implements the provisions of section 505 of title V of the Trade and Development Act. This rule set forth the eligibility, documentation and procedural requirements necessary to substantiate a refund claim for duties paid on imports of certain wool products.
- *Duty-free Treatment for Certain Beverages Made with Caribbean Rum.* This interim rule implemented a change made by the Trade and Development Act that enables certain spirituous beverages to obtain duty-free treatment under specified conditions when the beverages are processed in the territory of Canada from rum that is the growth, product or manufacture either of a CBI beneficiary country or of the U.S. Virgin Islands.
- *Rules of Origin for Textile and Apparel Products.* This interim rule aligned the existing country of origin rules for textile and apparel products with the statutory amendments to section 334 of the Uruguay Round Agreements Act as set forth in section 405 within title IV of the Trade and Development Act.

During fiscal year 2001, one of Customs' priorities was to continue moving forward with amendments reinventing its regulatory procedures began under the authority granted by the Customs Modernization provisions of the North American Free Trade Implementation Act ("Customs Mod Act"). Customs' reinvention efforts, in accordance with the principles of E.O. 12886, have involved and will continue to involve significant input from the importing public. Of particular note regarding Customs' progress implementing the Customs Mod Act, Customs, during the last fiscal year, issued a proposal to revise the procedures by which Customs will issue administrative rulings responding to requests from prospective importers concerning how Customs will treat their transactions.

During fiscal year 2002, Customs plans to continue its progress with the Customs Mod Act. Customs plans during fiscal year 2002 to issue a final rule regarding its administrative ruling procedures and to propose revisions to its procedures regarding protests. In addition, Customs' reinvention efforts continue to involve the testing of programs to see if they work before proceeding with proposed rulemaking to permanently establish the programs.

During fiscal year 2002, Customs also plans to undertake several other regulatory actions that will affect the traveling and importing public, customs brokers, carriers and commercial importers. Consistent with the Customs Mod Act, Customs will accord priority to several projects to foster the development of a more automated environment to expedite the entry and release of imported commercial merchandise, and the processing of merchandise for export. These regulations will benefit the importing and exporting public by streamlining the work of Customs officers and the trade community through improved efficiency and reduced paperwork and administrative costs. Among these projects are:

- *Liquidations.* Customs will propose regulations allowing paperless procedures for extension and suspension of liquidation notices, improving and clarifying the administrative process and simplifying the regulations pertaining to liquidations and extensions and suspensions of liquidation.
- *Entry Reconciliation.* Customs will continue to develop through testing a "reconciliation" process that will allow the delayed submission to Customs of information that is undetermined at the time an entry summary or an import activity summary statement is required to be submitted. After Customs is satisfied with the testing, regulations will be proposed to allow reconciliation on a permanent basis.
- *Remote Location Filing.* Customs will propose regulations allowing electronic filing of entries from locations in the United States other than the port of arrival of the merchandise or the place at which the merchandise is examined. Remote location filing will provide entry filers (such as brokers and couriers) with greater flexibility and will allow

Customs to make more efficient use of its resources.

Bureau of Alcohol, Tobacco and Firearms

The Bureau of Alcohol, Tobacco and Firearms (ATF) issues regulations to enforce the Federal laws relating to the manufacture and commerce of alcohol products, tobacco products, firearms and explosives. ATF's regulations carry out these missions and are designed to:

- Curb illegal traffic in, and criminal use of, firearms; and to assist State, local and other Federal law enforcement agencies in reducing crime and violence;
- Facilitate investigations of violations of Federal explosives laws and arson-for-profit schemes;
- Regulate the alcohol, tobacco, firearms and explosives industries, including the issuance of licenses and permits;
- Assure the collection of all alcohol, tobacco, firearms and ammunition taxes, and obtain a high level of voluntary compliance with all laws governing those industries;
- Suppress commercial bribery, consumer deception and other prohibited practices in the alcoholic beverage industry; and
- Assist the States in their efforts to eliminate interstate trafficking in, and the sale and distribution of, cigarettes in avoidance of State taxes.

ATF intends to streamline its regulations applying to the brewing industry by simplifying its brewery reports and operations and eliminating obsolete regulatory provisions. Also, ATF will propose minimum production standards for beer, thereby reducing formula filings and a revised statement of net contents requirement for certain container sizes.

ATF will continue, as a priority during Fiscal Year 2002, modifications to its regulations governing commerce in explosives. ATF is further analyzing its regulations governing storage requirements for explosives, including fireworks explosive materials, and plans to issue the notice of proposed rulemaking described in detail in part II of this Regulatory Plan.

Financial Crimes Enforcement Network

The regulations of the Financial Crimes Enforcement Network (FinCEN) constitute the core of Treasury's anti-money laundering initiatives and are an essential component of Treasury's anti-narcotics effort. The Bank Secrecy Act (BSA) authorizes the Secretary of the Treasury to issue regulations requiring financial institutions to keep records and file reports that are determined to have a high degree of usefulness in criminal, tax or regulatory proceedings, and to implement counter-money laundering programs and compliance procedures.

Since mid-1994, FinCEN has been engaged in a thorough review of its regulatory policies and has been building a partnership between Government and the financial sector to fight money laundering. The cornerstone of that partnership is the recognition that only a cooperative relationship between Government and industry can provide a way to implement a three-pronged strategy of prevention, detection, and enforcement against those who seek to use the financial system to promote or further illegal activity. FinCEN recognizes that BSA compliance imposes costs on the financial community and that recordkeeping and reporting should be required only when the benefits to law enforcement efforts are clear.

During fiscal year 2002, FinCEN will continue to review and revise its existing regulations. FinCEN has issued two rules concerning the application of the BSA to certain non-bank financial institutions called money services businesses or "MSBs." MSBs include currency exchangers, check cashers, money order and traveler's check businesses, and money transmitters. Under the first rule, MSBs would be required to register with the Department of the Treasury by December 31, 2001. Under the second rule, three categories of MSBs—money order and traveler's check businesses and money transmitters—would be required to report suspicious transactions beginning January 1, 2002. To ensure the rules are implemented effectively and efficiently, FinCEN intends to publish by early fiscal 2002 a rule extending the effective date of the registration and suspicious activity reporting requirements. As a result, MSBs will not be required to register until June 30, 2002, and money order and traveler's check businesses and money transmitters will not be required to report suspicious transactions until October 1, 2002. FinCEN also intends to publish a notice re-opening the comment period for a prior notice of proposed rulemaking that would extend the requirement to report suspicious transactions to casinos and card clubs. Finally, FinCEN will publish for public comment a proposal to require brokers and dealers in securities to report suspicious transactions.

Bureau of the Public Debt

The Bureau of the Public Debt (BPD) administers regulations:

- Governing transactions in government securities by government securities brokers and dealers.
- Implementing Treasury's borrowing authority, including rules governing the sale and issue of marketable Treasury securities.
- Setting out the terms and conditions by which Treasury may redeem (buy back) outstanding, unmatured marketable Treasury securities through debt buyback operations.
- Governing the acceptability and valuation of all collateral pledged to secure deposits of public monies and other financial interests of the federal government.

The Government Securities Act of 1986 (GSA) authorizes the Secretary of the Treasury to prescribe rules governing financial responsibility, the protection of customer funds and securities, recordkeeping, reporting, audit, and large position reporting for all government securities brokers and dealers, including financial institutions. These rules fulfill the Treasury's statutory responsibility to safeguard the efficient functioning of the government securities market and are designed to prevent fraudulent and manipulative acts and practices and to protect the integrity, efficiency and liquidity of the market. The Department and BPD are committed to implementing rules that make sense from both a regulatory and market efficiency perspective. Accordingly, the Department and BPD seek to balance the benefits of regulation with the compliance costs imposed on the government securities market and its participants.

The rules setting out the terms and conditions for the sale and issue of marketable book-entry Treasury bills, notes, and bonds are known as the Uniform Offering Circular. These rules apply to securities held in accounts in the book-entry system established by the Department and operated by the Federal Reserve Banks, known as the commercial book-entry system, as well as to securities held in accounts directly with Treasury in the *TreasuryDirect* system. The Uniform Offering Circular describes the types of securities offered for sale, the auction method by which they are sold, the process for submitting bids, the process for awarding securities

to successful bidders, and the authorized payment methods.

During fiscal year 2002, BPD will accord priority to rewriting the Uniform Offering Circular in plain language. This will communicate the auction rules in a more direct and effective manner. BPD will also give priority to any further regulatory action the Department deems appropriate regarding the net long position calculation and the 35 percent award limit in marketable Treasury securities auctions. An advance notice of proposed rulemaking was published for comment on this matter in July 2001.

Financial Management Service

The Financial Management Service (FMS) issues regulations to improve the quality of Government financial management and to administer its payments, collections, debt collection, and Governmentwide accounting programs. During fiscal year 2002, FMS will continue to update its regulations that implement the Cash Management Improvement Act of 1990 (CMIA). The CMIA requires the head of each executive agency, under regulations prescribed by the Secretary of the Treasury, to provide for the timely disbursement of Federal funds. FMS issued an implementing regulation in December 1992. FMS issued a notice of proposed rulemaking to update the CMIA in fiscal year 2001. FMS will issue a final rule governing the CMIA in fiscal year 2002.

Also, FMS will revise its rule concerning the payment of Federal taxes and the Treasury Tax and Loan Program (TT&L). This revision will support operational changes to the system used for the collection of corporate withholding taxes. In addition, FMS will streamline the TT&L rule and write it in plain language.

During fiscal year 2002, FMS will propose revisions to its rule governing the indorsement and payment of checks drawn on the United States Treasury. The proposed revisions will relate to, among other things, finality of payment, liability for checks bearing material defects or alterations, and the use of powers of attorney.

Finally, FMS will continue to implement provisions of the Debt Collection Improvement Act of 1996.

Community Development Financial Institutions Fund

The Community Development Financial Institutions Fund (Fund) was established by the Community Development Banking and Financial Institutions Act of 1994 (12 U.S.C. 4701 *et seq.*). The primary purpose of the Fund is to promote economic revitalization and community development through investments in, and assistance to, community development financial institutions (CDFIs), principally through the CDFI Program. The CDFI Program has four components: the Core Component, the Intermediary Component, the Small and Emerging CDFI Assistance Component, and the newly developed Native American CDFI Technical Assistance Component. The Fund also administers the Bank Enterprise Award (BEA) Program, which encourages insured depository institutions to engage in eligible development activities and to make equity investments in CDFIs.

In addition, the Fund is developing a new program, the New Markets Tax Credit (NMTC) Program, which the Fund will administer, in coordination with Treasury's Office of Tax Policy and the Internal Revenue Service. The NMTC Program is intended to spur investments in businesses located in low-income communities. Under the NMTC Program, taxpayers will be provided a credit against Federal income taxes for qualified investments made to acquire stock or other equity interests in designated Community Development Entities (CDEs). Substantially all of the proceeds of qualified investments must in turn be used by the CDE to make qualified investments in low-income communities.

The Fund's fiscal year 2002 regulatory priority will focus on the NMTC Program, by developing guidance regarding the submission of applications for CDE certification and guidance regarding the submission of applications for NMTC allocations.

TREAS

PROPOSED RULE STAGE

---

110. REVISION OF BREWERY REGULATIONS AND ISSUANCE OF REGULATIONS FOR TAVERNS ON BREWERY PREMISES (BREWPUBS)

Priority:

Other Significant

Legal Authority:

26 USC 5051 to 5056; 26 USC 5401 to 5417; 27 USC 205

CFR Citation:

27 CFR 7; 27 CFR 25

Legal Deadline:

None

Abstract:

ATF intends to streamline regulations applying to breweries. ATF will eliminate obsolete regulatory provisions. A formula system for manufactured beer products will replace statements of process attached to the brewers notice. The annual notice for small brewers to pay the reduced rate of tax will be eliminated. Separate regulations for brewpubs will be added to part 25. A section will be added to part 25 to authorize and regulate the alternating use of brewery premises by different brewers. Regulations authorizing the operation of brew-on-premises facilities will be added to part 25.

Statement of Need:

ATF intends to streamline its regulations applying to the brewing industry. These changes will simplify brewery reports and operations and eliminate obsolete regulatory provisions. Specific changes would include the implementation of a formula system for the breweries to replace the statement of process; the establishment of a separate subpart containing simplified regulations for brewpubs; authorizing alternating brewery premises among different proprietors; eliminating the annual notice to pay the reduced rate of tax for most breweries; authorizing brewers to file the Brewer's Report of Operations on a quarterly basis; and authorizing many brewers to take inventories quarterly rather than monthly. The rule will also propose minimum production standards for beer thereby reducing formula filings and a revised statement of net contents requirement for certain container sizes.

Summary of Legal Basis:

ATF has undertaken this review of brewery regulations as part of the President's Regulatory Initiative. These regulations are issued under the general authority of the Secretary of the Treasury to promulgate regulations to implement the Internal Revenue Code and the Federal Alcohol Administration Act.

Alternatives:

Not applicable. ATF believes that industry will support these regulatory changes because they will streamline regulatory requirements applying to the brewing industry.

Anticipated Cost and Benefits:

The proposed regulations will benefit the brewing industry by reducing required inventories, notices, and other submissions to ATF.

Risks:

Not applicable.

TREAS

111. COMMERCE IN EXPLOSIVES (INCLUDING EXPLOSIVES IN THE FIREWORKS INDUSTRY)

Priority:

Other Significant

Legal Authority:

5 USC 552(a); 31 USC 9303; 31 USC 9304; 40 USC 304(k); 18 USC 847; 18 USC 921 to 930; 18 USC 1261; 19 USC 1612; 19 USC 1613; 19 USC 1618; 26 USC 7101; 26 USC 7322 to 7326; 31 USC 9301

CFR Citation:

27 CFR 55

Legal Deadline:

None

Abstract:

Pursuant to section 610 of the Regulatory Flexibility Act, ATF published a notice on January 10, 1997, seeking public comments on whether it should revise its regulations, codified at 27 CFR part 55, governing Commerce in Explosives (Including Explosives in the Fireworks Industry). Based on comments received, ATF plans to initiate a rulemaking to revise these regulations in 2001.

Statement of Need:

This notice of proposed rulemaking will address many of the issues in part 55, Commerce in Explosives, especially the issues in requirements for explosives, including fireworks explosive materials. Pursuant to the periodic review requirements of the Regulatory Flexibility Act (5 U.S.C. 610), ATF published on January 10, 1997 a General Notice initiating the review of a final rule published in 1990 concerning the storage of fireworks explosives materials. The 1990 rule, which was issued as a result of the number and severity of explosions occurring on the premises of special fireworks plants, amended certain regulations codified at 27 CFR part 55, generally concerning the recordkeeping and storage of fireworks explosive materials. The regulations also codified two fireworks related rulings issued in 1979 and 1985, and the provisions of Public Law 99-308 relating to black powder. As a result of the public comments received in response to the General Notice and further study of this issue, ATF will issue a notice of proposed rulemaking covering this and related commerce and storage of explosives issues.

Summary of Legal Basis:

18 U.S.C. 847 grants the Secretary of the Treasury broad discretion to promulgate regulations necessary for the importation, manufacture, distribution, and safe storage of explosives materials. 18 U.S.C. 846 authorizes the Secretary to prescribe precautionary measures to prevent the recurrence of accidental explosions in which explosive materials were involved. The General Notice and upcoming notice of proposed rulemaking are also being issued pursuant to section 610 of the Regulatory Flexibility Act (5 U.S.C. 610), which requires an agency to review within 10 years of publication rules for which an agency prepared a final regulatory flexibility analysis addressing the impact of the rule on small businesses or other small entities.

Alternatives:

Alternatives will be examined in the context of public comments to the notice of proposed rulemaking.

Anticipated Cost and Benefits:

Unknown at this time.

Risks:

Not applicable.

BILLING CODE 4810-25-S

DEPARTMENT OF VETERANS AFFAIRS (VA)

Statement of Regulatory Priorities

The Department of Veterans Affairs (VA) administers benefit programs that recognize the important public obligations to those who served this Nation. VA's regulatory responsibility is almost solely confined to carrying out mandates of the laws enacted by Congress relating to programs for veterans and their beneficiaries. VA's major regulatory objective is to implement these laws with fairness, justice, and efficiency.

Most of the regulations issued by VA involve at least one of three VA components: The Veterans Benefits Administration, the Veterans Health Administration, and the National Cemetery Administration. The primary mission of the Veterans Benefits Administration is to provide high-quality and timely nonmedical benefits to eligible veterans and their beneficiaries. The primary mission of the Veterans Health Administration is to provide high-quality health care on a timely basis to eligible veterans through its system of medical centers, nursing homes, domiciliaries, and outpatient medical and dental facilities. The primary mission of the National Cemetery Administration is to bury eligible veterans, members of the Reserve components, and their dependents in VA National Cemeteries and to maintain those cemeteries as national shrines in perpetuity as a final tribute of a grateful Nation to honor the memory and service of those who served in the Armed Forces.

The Department of Veterans Affairs' 2001 regulatory plan contains one rulemaking action from the Veterans Benefits Administration and two rulemaking actions from the Veterans Health Administration. The Veterans Benefits Administration rulemaking is RIN 2900-AK64 "Diseases Specific to Radiation-Exposed Veterans." This proposes to amend the Department's adjudication regulations concerning presumptive service connection for certain diseases for veterans who participated in radiation-risk activities during active service or while members of reserve components during active duty for training or inactive duty training. One of the Veterans Health Administration (VHA) rulemakings is RIN 2900-AK08 "Payment or Reimbursement for Emergency Treatment Furnished at Non-VA Facilities," which amends the Department's medical regulations by establishing a mechanism for payment or reimbursement for certain non-VA emergency services furnished to veterans for nonservice-connected conditions. The other VHA rulemaking is RIN 2900-AK85 "Copayments for Medications," which proposes to amend VA's medical regulations to set forth copayment requirements for medications provided to veterans by VA.

VA

PROPOSED RULE STAGE

112. DISEASES SPECIFIC TO RADIATION-EXPOSED VETERANS

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

38 USC 1112(c); PL 100-321

CFR Citation:

38 CFR 3.309(d)

Legal Deadline:

None

Abstract:

The Department of Veterans Affairs (VA) is proposing to amend its adjudication regulations concerning presumptive service connection for certain diseases for veterans who participated in radiation-risk activities during active service or while members of reserve components during active duty for training or inactive duty training. This proposed amendment would add cancers of the bone, brain, colon, lung, and ovary to the list of diseases which may be presumptively service-connected and amend the definition of the term "radiation-risk activity." The intended effect of this amendment is to ensure that veterans who may have been exposed to radiation during military service have the same burden of proof as civilians exposed to ionizing radiation who may be entitled to compensation for these cancers under comparable Federal statutes.

Statement of Need:

This proposed amendment would add cancers of the bone, brain, colon, lung, and ovary to the list of diseases that may be presumptively service-connected and amend the definition of the term "radiation-risk activity." This proposed amendment would also ensure that veterans who may have been exposed to radiation during military service have the same burden of proof as civilians exposed to ionizing radiation who may be entitled to compensation for these cancers under comparable Federal statutes.

Summary of Legal Basis:

Section 501(a)(1) of title 38, United States Code, provides that the Secretary of Veterans Affairs has the authority to promulgate regulations regarding the nature and extent of proof and evidence in order to establish entitlement to veterans' benefits. Pursuant to this authority, VA proposes to amend 38 CFR 3.309(d)(2) to add bone, brain, colon, lung, and ovarian cancers, which are covered under the Energy Employees Occupational Illness Compensation Program Act or are covered under the RECA Amendments but are currently not included in the list of diseases in 38 U.S.C. 1112(c)(2) that are presumed to be service-connected for radiation-exposed veterans. This regulation is not required by statute or court order.

Alternatives:

Veterans may establish service connection for these five cancers under 38 U.S.C. 1110 or 1131 or the Veterans' Dioxin and Radiation Exposure Compensation Standards Act, Public Law No. 98-542, 98 Stat. 2725 (1984). Doing so is difficult because, among other things, it requires sound scientific and medical evidence establishing that it is at least as likely as not the veteran's disease resulted from exposure to radiation in service, based in part on an assessment of the amount of radiation to which a veteran was exposed.

Anticipated Cost and Benefits:

This regulatory amendment will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act (RFA), 5 U.S.C. 601-612. These amendments would not directly affect any small entities. Only VA beneficiaries could be directly affected. Therefore, pursuant to 5 U.S.C. 605(b), these amendments are exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

Risks:

This regulation will not increase or reduce risks to public health, safety, or the environment.

VA

FINAL RULE STAGE

113. PAYMENT OR REIMBURSEMENT FOR EMERGENCY TREATMENT FURNISHED AT NON-VA FACILITIES

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

38 USC 501; 38 USC 1725; PL 106-117

CFR Citation:

38 CFR 17

Legal Deadline:

NPRM, Statutory, May 22, 2000, 180 days after effective date of PL 106-117.

Abstract:

This document amends the Department of Veterans Affairs medical regulations by establishing a mechanism for payment or reimbursement for certain non-VA emergency services furnished to veterans for nonservice-connected conditions. This amendment is necessary to implement provisions of "The Veterans Millennium Health Care and Benefits Act."

Statement of Need:

Public Law No. 106-117 "The Veterans Millennium Health Care and Benefits Act" requires this amendment to implement its provisions.

Summary of Legal Basis:

38 U.S.C. 1725 authorizes VA to establish provisions for payment or reimbursement for certain non-VA emergency services furnished to Veterans for nonservice-connected conditions.

Alternatives:

The alternatives that the Department had to consider are the amount of reimbursement and the location where claimants can file a claim.

Anticipated Cost and Benefits:

Cost projection for FY 2001 is $66 to $75 million. The FY 2003 budget, in accordance with section 1725 of title 38, will provide an updated estimate of the full year impact of this legislation expected to be incurred in FY 2003.

Risks:

None.

114. • COPAYMENTS FOR MEDICATIONS

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

PL 106-117; 38 USC 1722A

CFR Citation:

38 CFR 17

Legal Deadline:

None

Abstract:

This rule proposes to amend VA's medical regulations to set forth copayment requirements for medications provided to veterans by VA.

Statement of Need:

This rule is intended to make the copayments for medications more in line with industry standards.

Summary of Legal Basis:

Public Law 106-117 amended 38 U.S.C. 1722A to allow the copayment amount to be increased.

Alternatives:

Although the amount could be set at a number of different levels, we attempted to establish a rate in line with industry standards.

Anticipated Cost and Benefits:

We anticipate that this will increase collections $250 million annually.

Risks:

None.

ENVIRONMENTAL PROTECTION AGENCY (EPA)

Statement of Priorities

The President has made it clear that he expects the American people to get full value for every taxpayer dollar government spends, and they will from the EPA. The environmental challenges we face in the 21st century are too important to allow us to do anything but use our resources wisely, efficiently, and effectively.

The President has called for Governmentwide management reforms that will, when implemented, make the Federal Government more accountable while improving the government services we provide to the American people. In order to improve the regulatory process within EPA, we established a task force to examine the Agency's rulemaking process, and to recommend ways to improve the internal process and strengthen the supporting science and analysis. The task force concluded that the regulatory process is essentially sound but improvements should be made in several areas to more effectively carry out our mission.

Better Science and Economic Analyses

Today's environmental problems are far more complex than they were in the past, and there has been a dramatic expansion in the universe of scientific, economic and social issues that we must consider. Our decisions must reflect the latest findings in relevant, high quality research, both in science and economics. To strengthen the analyses that support EPA decisions, we will involve scientists and economists in more prominent ways throughout our decisionmaking process — in identifying needed information and research, developing a range of alternative approaches, and selecting from available options. Administrator Whitman is also designating senior experts in both science and economics to advise her on the strengths and weaknesses of EPA analyses and provide Agency leadership in improving analytical consistency and quality.

Broader Consideration of Policy Options

To produce the best environmental outcomes at an acceptable cost, EPA decisionmakers must consider a broader array of policy options, including innovative alternatives and market-based approaches. We will strengthen analysis of policy issues by more systematically identifying relevant issues and providing regulatory workgroups with better training and support. We will engage EPA's senior managers more actively in selecting options and consult more effectively with internal policy advisors, co-regulators, and stakeholders. As we develop and consider available options, we will pay more attention to implementation — how EPA regions and states will be affected, what kinds of compliance assistance will be needed, and how we can tell if we're achieving desired results.

Greater Accountability

The task force found that the policymaking process in place at EPA is well designed and can function effectively, but greater accountability is needed to ensure that managers and staff properly follow the process. Senior managers will take greater responsibility for setting strategic direction, assuring high quality analysis of relevant issues, and selecting the best available options. We are creating a better management system to ensure thorough analyses and timely decision points, and that process requirements are met. We will also evaluate the effectiveness of the regulatory development process and of the regulations themselves.

Better Management of Significant Nonregulatory Decisions

Finally, we are developing a system to better manage significant nonregulatory actions that will provide the cross-agency attention that these decisions deserve. We have included three of these nonregulatory actions in this year's Plan (Persistent, Bioaccumulative, and Toxic (PBT) Pollutants Strategy (RIN 2070-AD45), TSCA Policy Statement on Oversight of Transgenic Organisms (RIN 2070-AD13), and the Acceptability of Using Human Subjects (RIN 2070-AD57).

Better Environmental Results

All of these reforms are designed to help us reach the goal of making our air cleaner, our water purer, and our land better protected. This will be the ultimate measure of our success. Everything we do should be looked at through that prism. Will this make the air cleaner? Will this make the water purer? To that end we continue to apply new methods to protect the environment by building flexibility into regulations up front, through nonregulatory approaches where effective, by creating strong partnerships with States and conducting extensive public outreach.

EPA's Regulatory Plan will address 34 of the most important actions currently under development or review. These actions will have a significant effect on public health and the environment. The accompanying regulatory agenda identifies more than 350 additional rules, policies and voluntary programs that are also underway.

The following are specific EPA priorities that will help us achieve cleaner air, purer water and better protected lands.

Cleaner air

- Enact the President's multi-emission bill
- Focus on reducing indoor air pollution, especially as it relates to children
- Promote energy conservation

Purer water

- Take a broader watershed approach to address water quality issues
- Begin to bring America's water infrastructure up to date

Land better protected

- Expand our efforts to reclaim the thousands of brownfields that continue to scar too many neighborhoods.

Highlights of the Regulatory Plan Rules and Policies

Office of Air and Radiation

EPA remains committed to taking advantage of the flexibility granted by the Clean Air Act that enables companies, States, and communities to meet clean air goals with cost-effective approaches. The following are the most significant of our air activities.

In 1997, we established new, more stringent air quality standards for ozone and particulate matter based on new scientific and technical information indicating that new standards were needed to protect public health and the environment. In 1999, the D.C. Circuit Court found that the Clean Air Act provision authorizing the new standards is unconstitutional as EPA applied it. We successfully appealed this decision to the United States Supreme Court, and we are now working on an implementation program to respond to the Court's decision.

To date, our air toxics program has focused primarily on getting broad emission reductions from large industrial sources through technology-based standards. Since 1990, EPA has issued standards affecting 77 different industries, such as petroleum refineries and chemical manufacturing plants.

When fully implemented, these standards will reduce more than one million tons of toxic air emissions per year. Through other efforts such as phasing-out of lead in gasoline, we have also significantly reduced air toxics from cars and trucks.

We are continuing to set technology-based standards for large industries. The rules listed in this year's Regulatory Plan — covering industrial boilers, institutional/commercial boilers, wood manufacturing, reciprocating engines, combustion turbines, and automobile painting operations — are among the most significant remaining categories to be regulated under this program. While working on these standards, we are beginning to evaluate those sources with standards already in place to determine if the remaining risk from these sources warrants additional regulation. We are also implementing our Urban Air Toxics Strategy, which focuses on 33 air toxics that pose the greatest risk in the largest number of urban areas and presents our plan, both nationally and more locally, to reduce those toxics. Finally, to better understand and measure risks from air toxics, we are also conducting important health research and improving our emissions inventories, modeling capability, and monitoring network.

Office of Water

Congress has directed the EPA to work with States, tribes and other Federal agencies to help finance water infrastructure, to set national drinking water standards, to protect wetlands, to control discharges from industries and sewage treatment plants, and to reduce nonpoint pollution. To fulfill these goals, the Office of Water is undertaking, among others, the following actions:

Under the Safe Drinking Water Act (SDWA) Amendments of 1996:

We will finalize a rule that will allow States and/or systems to adopt multimedia programs which reduce radon risks from indoor air and drinking water in combination.

The SWDA requires EPA to revise the existing 50 parts per billion (ppb) standard for arsenic in drinking water. In January 2001, we published a new standard for arsenic in drinking water that would require public water supplies to reduce arsenic to 10 ppb by 2006. We have delayed the effective date of this rule until February 22, 2002 to allow time for expert review of key issues, review of this standard, and requested further public comment. This is to assure that communities that need to reduce arsenic in drinking water can proceed with confidence that the final standard is based on sound science and accurate cost and benefit estimates.

The SDWA also requires EPA to review and revise, if appropriate, all National Primary Drinking Water Regulations no less frequently than once every six years (6-Year Review). According to SDWA, any revisions of drinking water regulations must maintain, or increase, the level of public health protection provided; however, EPA may identify regulatory changes that will streamline or reduce existing requirements without lessening the level of public health protection. The purpose of the review is to determine whether new data, technology, or other factors exist that justify revisions to existing NPDWRs. The outcome of the review will be a **Federal Register** preliminary notice for comment making available the results of our review. Following a review of public comments, we will issue a second notice with our final regulatory review determination together with a rulemaking schedule for any regulation the Agency determines warrants revision.

We are also taking a number of important steps under the Clean Water Act:

To control the discharge of pollutants from point sources, we are developing effluent limitations guidelines for the construction and development industry. Water quality improvements will result from a reduction in storm water and sediment discharged from construction sites and from sediment generated from stream bank erosion. Other expected benefits include protection of fishery and wildlife habitat and downstream urban flood control.

We will issue a rule to minimize the adverse impacts associated with cooling water intakes. Most costs would be borne by entities that own or operate steam electric power plants. The expected benefits will be significant reductions in aquatic organisms killed or injured by impingement (being pinned against screens or other parts of a cooling water intake structure) or entrainment (being drawn into cooling water systems and subjected to thermal, physical or chemical stresses).

In July 2000 we published a final rule amending the Agency's existing regulations implementing Total Maximum Daily Load (TMDL) program. The rule sought to provide for a more complete accounting of impaired waters, track progress towards restoration, clarify and provide more specificity regarding the scope and content of TMDLs, require implementation plans, and reasonable assurance that these plans would be implemented, and speed up the pace of TMDL establishment.

On October 18, 2001 we delayed the effective date of the July 2000 rule by 18 months to April 30, 2003. The delay in effective date would allow the Agency time to reconsider specific aspects of the rule and to develop an effective national program that involves the active participation and support of all levels of government and local communities. Over the next several months, we will conduct a stakeholder process, propose necessary changes by spring 2002, and hope to adopt such changes by April 30, 2003.

Office of Prevention, Pesticides, and Toxic Substances

Because of the potentially serious consequences of human exposure to endocrine disrupting chemicals, Congress included specific provisions on endocrine disruption in the Food Quality Protection Act. It also amended the Safe Drinking Water Act in 1996 to require EPA to develop an endocrine disruptor screening program and to screen for endocrine disruptors found in drinking water sources. The Agency has established an Endocrine Disruptor Screening and Testing Program based on the recommendations of the advisory committee we established to consider human health and ecological effects, and hormonal effects of pesticides, industrial chemicals and drinking water contaminants. In 2002-2003 we will standardize and validate assays in the screening battery and complete the priority setting system. We will issue a proposed procedural rule in 2002.

EPA is evaluating how our current policy on the protection of human subjects in testing should apply to testing that is not conducted or supported by the Agency. Current policy does not address non-EPA research. EPA will also be seeking public comment on a series of issues related to Agency use of human research data in pesticide decisionmaking. We believe this will serve two important Agency goals: ensuring the availability of sound and appropriate scientific data in its decisions, and protection of the interests, rights and safety of human research subjects. We may issue one or more documents, which may include policy statements, rulemaking or requests for public comment.

Almost a million children under 5 years of age have blood-lead levels exceeding the Center for Disease

Control's level of concern (10 ug/dl), and reducing childhood exposure to lead-based paint activities continues to be a priority. Elevated blood-lead levels can damage intelligence and create neuro-behavioral problems in young children, and can cause other health problems in children and adults. We are considering proposed approaches to address lead risks associated with renovation and remodeling activities, and investigating the lead risks associated with bridges and structures.

In FY 2002, EPA will issue final amendments to the current Toxic Substances Control Act (TSCA) Inventory Update Rule (IUR). The proposed rule requires chemical manufacturers to report to EPA data on exposure-related information and the industrial and consumer end uses of chemicals they produce or import. EPA will also consider other amendments to the existing IUR. These include removing the inorganic chemicals exemption; providing information to better assess and manage risks of inorganic chemicals; improving the linkages of IUR data to other data sources to enhance the data's usefulness; and altering the confidential business information (CBI) claim procedures to reduce the frequency of CBI claims, allowing the public greater access to relevant information on toxic chemicals. EPA has held meetings with representatives of the chemical industry, environmental groups, environmental justice leaders, labor groups, State governments and other Federal agencies to ensure public involvement in the TSCA Inventory Update Rule Amendments Project.

EPA has developed National Action Plans under a national strategy to address priority Persistent Bioaccumulative Toxic (PBT) pollutants. These pollutants pose risks because they are toxic, persist in ecosystems, and accumulate in fish and up the food chain. The PBT challenges remaining stem from the pollutants' ability to travel long distances, to transfer rather easily among air, water, and land, and to linger for generations. Through this strategy, we will create an enduring cross-office system that will address the cross-media issues associated with priority PBT pollutants. In FY 2002, we expect to issue the draft action plan for benzo(a)pyrene, and to issue the final action plans for alkyl-lead and mercury. We will also continue developing other action plans as outlined in the PBT Strategy.

Office of Solid Waste and Emergency Response

The Office of Solid Waste and Emergency Response (OSWER) is planning actions to reduce burden on the regulated community and provide regulatory innovations under the Resource Conservation and Recovery Act (RCRA), the Federal law governing hazardous waste management. Several actions of significance are listed below.

We are planning to reduce the burden imposed by RCRA reporting and recordkeeping requirements.

We will revise current Federal hazardous waste regulations to encourage recycling and better management of cathode ray tubes, the display components of televisions and computer monitors. The goal is to minimize the disposal of lead, increase resource recovery, and enhance protection of human health and the environment.

OSWER will revise current RCRA regulations that apply to recycling of hazardous wastes in the manufacturing of zinc fertilizers. We are considering establishing a more consistent application of recycling requirements to zinc fertilizer products and establishing a set of standards for contaminants in RCRA-regulated zinc fertilizers that are more appropriate to fertilizers. We are also considering specifying more appropriate, protective requirements for management of zinc-bearing hazardous secondary materials prior to recycling.

Office of Policy, Economics, and Innovation

OPEI has taken the lead in EPA's re-examination of its regulatory process to assure that all regulatory actions are scientifically sound, cost-effective, and reflect decisions based on a broad consideration of policy options. OPEI will continue its work to assure that our procedural and policy reforms are implemented throughout the Agency.

We have also designed a variety of incentives to encourage high performing facilities to participate in the National Environmental Performance Track. These include actions which recognize and highlight the achievements of the facilities that successfully fulfill the requirements for entry, but also include other incentives.

We are offering some of those incentives through administrative actions, but others will require changes in existing Federal regulations. We are now changing regulations that set reporting requirements for facilities covered by the MACT provisions of the Clean Air Act. Facilities meeting the criteria for membership in Performance Track would be eligible for reduced reporting and some other provisions, and facilities that more than meet goals for emissions reductions under MACT via pollution prevention means would qualify for some additional reduced reporting. We are also reducing reporting requirements for participating publicly owned treatment works (POTWs), under the Clean Water Act. A third change would allow POTWs to notify the public of any violations of permits by the indirect dischargers using the POTWs' services by placing notices on the Internet (rather than using paid newspaper advertisements). The last change would be a pilot test of consolidated reporting (an idea explored extensively in the past several years). This is likely to begin with one or two industry sectors, and to be modeled on pilot efforts explored in EPA's Common Sense Initiative. We will consolidate various periodic reports required under CAA, CWA, RCRA, and other statutes into one report, eliminating duplicate reporting and other difficulties. If this test is successful, EPA will consider widening the applicability to Performance Track facilities in other industry sectors.

Summary

In developing all of these actions, EPA is committed to flexible, cost-effective programs that offer increased protections for public health and the environment and get full value for our investments.

EPA

PRERULE STAGE

---

115. • ACCEPTABILITY OF RESEARCH USING HUMAN SUBJECTS

Priority:

Other Significant

Legal Authority:

7 USC 136a; 21 USC 346a

CFR Citation:

40 CFR 26 (Revision)

Legal Deadline:

None

Abstract:

EPA is evaluating how its current policy with respect to the protection of

human subjects in testing should be applied to testing not conducted or supported by the Agency. Current EPA regulations apply to research conducted or supported by the Agency or "otherwise subject to regulation." The action needed to give effect to the "otherwise subject to regulation" phrase has not been taken. In addition, EPA will seek public comment on issues related to Agency use of human research data in pesticide decisionmaking. EPA believes the process being initiated will serve two important Agency goals: ensuring the availability of sound and appropriate scientific data in its decisions, and protection of the interests, rights and safety of human research subjects. EPA may issue one or more documents, which may include policy statements, rulemaking or requests for public comment.

Statement of Need:

In July 1998, the Agency committed that EPA would not consider human research on pesticides in support of decisions under the Food Quality Protection Act revisions to FIFRA and FFDCA unless a policy were in place that could assure any such studies met the highest scientific and ethical standards. The Agency convened a special joint subcommittee of the FIFRA Scientific Advisory Panel and the EPA Science Advisory Board to advise on this policy. The subcommittee has completed its work. If deemed acceptable for consideration, some human research already performed could significantly affect the Agency's risk assessments of some pesticides. Clarification of Agency policy with respect to use of human data is thus needed.

Summary of Legal Basis:

FIFRA sec. 3 authorizes EPA to define data requirements supporting pesticide decisions and to establish guidelines for conducting research to support pesticide decisions. FFDCA sec. 408 authorizes EPA to consider available and reliable data in support of pesticide tolerance decisions.

EPA

116. 6-YEAR REVIEW OF EXISTING NATIONAL PRIMARY DRINKING WATER REGULATIONS

Priority:

Other Significant

Legal Authority:

42 USC 300f et seq

CFR Citation:

Not Yet Determined

Legal Deadline:

Other, Statutory, August 6, 2002, Complete review for contaminants with NPDWRs promulgated prior to August 1996.

Abstract:

The Safe Drinking Water Act (SDWA) requires EPA to review and revise, if appropriate, all National Primary Drinking Water Regulations (NPDWRs) no less frequently than once every six years. According to SDWA, any revisions of drinking water regulations must maintain, or increase, the level of public health protection provided; however, EPA may identify regulatory changes that will streamline or reduce existing requirements without lessening the level of public health protection. As a part of this action, EPA will do two things: (1) develop an overall protocol for conducting each six year review; and (2) review the chemical contaminants (with the exception of arsenic which is being revised and atrazine which is being reviewed on an accelerated schedule for which NPDWRS were promulgated prior to 1996). No new requirements will be imposed by this action. The purpose of the review is to determine whether new data, technology, or other factors exist that justify revisions to existing NPDWRs. The outcome of each review will be a Federal Register notice making available the results of the Agency's review and a rulemaking schedule for the regulations the Agency believes are appropriate candidates for revision at this time. EPA may decide that any of the following need to be revised: maximum contaminant level goals, maximum contaminant levels, analytical methods, monitoring, treatment, recordkeeping and reporting requirements. EPA plans extensive stakeholder outreach and consultation in the development of the protocol and throughout the review process.

Statement of Need:

The review of each existing NPDWR is necessary to determine whether there are more current data, since the NPDWR was promulgated, that suggest a regulatory revision may be appropriate to maintain, or improve, the level of public health protection. Data considered as a part of the review include changes in risk assessment, changes in analytical feasibility (where appropriate), changes in treatment feasibility, other issues that may be relevant to the specific NPDWR, and occurrence and exposure. NPDWRs identified as candidates for revision will be those where the review suggests a regulatory revision will significantly improve public health protection or significantly reduce costs while at least maintaining the current level of public health protection.

Summary of Legal Basis:

Section 1412(b)(9) of the SDWA, as amended in 1996, requires that the Administrator shall, not less often than every 6 years, review and revise, as

appropriate, each primary drinking water regulation. SDWA also mandates that any revision maintain, or provide for greater, protection of the health of persons.

Alternatives:

The review ends with a decision by EPA that the NPDWR is, or is not, a candidate for regulatory revision at this time. NPDWRs may be eliminated from further consideration for regulatory revision at this time for one or more of the following reasons: (1) no data were identified that suggest the need for regulatory revision; (2) some potential changes were identified but are likely to result in little or no improvement in public health protection or cost savings; (3) an update of the risk assessment is in process or planned for the near future; or (4) the review identified significant data gaps or research needs that need to be addressed to determine the appropriateness of any regulatory revision. EPA will determine, on a case-by-case basis, whether to initiate activity to address these data gaps/research needs. Otherwise, EPA does not plan any further review/revision of these NPDWRs until the next review cycle. If EPA identifies the NPDWR as a candidate for revision, the Agency will begin the rulemaking process. The first part of this process will be to perform all of the analyses required to consider alternative regulatory options and to develop a Notice of Proposed Rulemaking (NPRM) for public comment. If the results of these analyses continue to suggest a regulatory revision is appropriate, and after taking the public comments received into consideration, EPA will promulgate regulatory revisions to the NPDWR.

Anticipated Cost and Benefits:

EPA is not performing detailed cost and benefit analyses during the review phase because such analyses are premature until the Agency has identified specific regulatory options. EPA will conduct the cost and benefit analyses as a part of the rulemaking phase for those NPDWRs identified as potential candidates for revision.

Risks:

As a part of the review, EPA is identifying any relative source contribution assumptions that may need further evaluation and factoring this consideration into the decision whether or not to designate the NDPWR as a candidate for regulatory revision. For those NPDWRs that EPA identifies as candidates for revision, the Agency will evaluate relative source contribution assumptions in more detail as a part of the rulemaking phase. Therefore, no statement of the magnitude of the risk, relative to other risks within EPA's jurisdiction, can be made during the review phase.

EPA

PROPOSED RULE STAGE

---

117. REGULATORY INCENTIVES FOR THE NATIONAL ENVIRONMENTAL ACHIEVEMENT TRACK PROGRAM

Priority:

Other Significant

Legal Authority:

Not Yet Determined

CFR Citation:

Not Yet Determined

Legal Deadline:

None

Abstract:

The National Environmental Achievement Track is designed to recognize facilities that consistently meet their legal requirements and have implemented high-quality environmental management systems, and to encourage them to achieve more by continuously improving their environmental performance and informing and involving the public. Facilities gain entrance to Achievement Track by submitting an application that documents that four specific criteria are met. To promote participation in the program and the environmental and other benefits that will come with it, EPA intends to offer several incentives. Among those incentives are the adjustments in current regulatory requirements that are the subjects of this rulemaking. These include reducing the frequency of reports required under the Maximum Achievable Control Technology (MACT) provisions of the Clean Air Act; streamlined by publically owned treatment works (POTWs) under the Clean Water Act; and opportunity for Achievement Track facilities to consolidate reporting under various environmental statutes into a single report.

Statement of Need:

The Administrator of EPA has announced the National Environmental Performance Track Program, of which the Achievement Track program is the first element to be implemented. By identifying facilities that have better environmental performance than others, and by requiring them to commit to goals for sustained improvements, EPA expects the environment to greatly benefit: Facilities that are able to qualify for the program will make a public commitment to reducing specific aspects of their impacts on the environment, and the program is likely to induce other facilities to make changes in their operations that will bring about analogous reductions in their environmental impacts. In order to attract significant numbers of facilities, Achievement Track will provide incentives for joining, in the form of substantial benefits to the facilities that qualify. EPA is considering alterations in reporting and other requirements (to be available only to Achievement Track facilities) that

would be made available as a result of this rulemaking. Extensive input (written comments and several public meetings) from stakeholders has convinced EPA that benefits such as these are crucial to achieving the intended environmental benefits of the Achievement Track program.

Summary of Legal Basis:

All of the modifications under consideration are modifications of existing regulations, promulgated over the past several years under statutes that include the CAA, CWA, EPCRA, SDWA, and others. Within these statutes, EPA has discretion to set reporting frequencies, the contents of reports, monitoring, and other specifics, based on an assessment of the need for information to implement the statutes.

Alternatives:

Deliberations within the Agency, and among stakeholders and EPA, have convinced EPA that a full and robust set of incentives is crucial to the successful implementation of Achievement Track. EPA developed a list of over forty different candidate incentives, and discussed many of these during a set of public meetings held during the design phase of the National Environmental Performance Track. Several incentives can be implemented through EPA administrative actions, but some potential incentives would require changes in existing regulations. The specific incentives being considered here resulted from intense analysis and debate within EPA and the Administrator's judgment that they contribute to achieving the program's aims. During the rulemaking process, EPA will consider various alternatives for these incentives, ranging from substantial changes in reporting frequency and content to no changes. EPA is also considering initiating rulemaking on other incentives beyond the ones discussed here.

Anticipated Cost and Benefits:

Overall, EPA expects there to be a net reduction in compliance costs for facilities that participate in Achievement Track. Facilities would have direct reductions in the efforts required to collect, summarize and report various data elements, and would potentially benefit from a streamlining of their environmental reporting information systems and from an integration of those data systems into company environmental management systems. EPA and some State regulatory authorities are likely to see modest increases in workload (and therefore in costs), mostly in the revising permits. This effect would be moderated by the fact that only a fraction of regulated facilities are expected to qualify for Achievement Track. Finally, because Achievement Track is designed to induce environmental improvements among those facilities that seek and obtain entrance to the program, EPA anticipates tangible environmental benefits to be realized.

Risks:

The risks of the intended rulemaking appear minimal. The criteria and the screening process for Achievement Track will identify and admit only facilities that operate significantly above the norm of other facilities. Because facilities must carry out their Achievement Track actions in the public spotlight, and because EPA expects that facilities will strive to stay qualified for the program, there is only a very small likelihood that mistakes would be made, and any such mistakes could easily be reversed. The actions being contemplated in this rulemaking entail mostly reporting changes, not substantive changes in permitted release rates or other actions that would directly impinge on the environment. All of these factors serve to limit the risks to the environment from the intended rulemaking.

EPA

118. NAAQS: SULFUR DIOXIDE (RESPONSE TO REMAND)

Priority:

Other Significant

Legal Authority:

42 USC 7409 CAA sec 109

CFR Citation:

40 CFR 50.4; 40 CFR 50.5

Legal Deadline:

None

Abstract:

On November 15, 1994, the Environmental Protection Agency (EPA) proposed not to revise the existing 24-hour and annual primary standards. The EPA sought public comment on the need to adopt additional regulatory measures to address the health risk to asthmatic individuals posed by short-term peak sulfur dioxide exposure. On March 7, 1995, EPA proposed implementation strategies for reducing short-term high concentrations of sulfur dioxide emissions in the ambient air. On May 22, 1996, EPA published its final decision not to revise the primary sulfur dioxide NAAQS. The notice stated that EPA would shortly propose a new implementation strategy to assist States in addressing short-term peaks of sulfur dioxide. The new implementation strategy - the Intervention Level Program - was proposed on January 2, 1997. In July 1996, the American Lung Association and the Environmental Defense Fund petitioned the U.S. Court of Appeals for the D.C. Circuit for a judicial review of EPA's decision not to establish a new 5-minute NAAQS. On January 30, 1998, the court found that EPA did not

adequately explain its decision and remanded the case so EPA could explain its rationale more fully. EPA published a schedule for responding to the remand in the May 5, 1998 Federal Register. Since that notice, EPA has continued to work on the proposed response to the remand by reviewing additional SO2 air quality information. EPA published an informational notice in the Federal Register on January 9, 2001 (66 FR 1665).

Statement of Need:

Brief exposures to elevated concentrations of sulfur dioxide, while at exercise, may cause bronchoconstriction, sometimes accompanied by symptoms (coughing, wheezing, and shortness of breath), in mild to moderate asthmatic individuals. The existing sulfur dioxide National Ambient Air Quality Standard (NAAQS) provides substantial protection against short-term peak sulfur dioxide levels. At issue is whether additional measures are needed to further reduce the health risk to asthmatic individuals.

Summary of Legal Basis:

Title I of the Clean Air Act.

Alternatives:

The March 7, 1995, proposal notice sought public comment on three alternatives to further reduce the public health risk to asthmatic individuals posed by short-term peak sulfur dioxide exposures. These included: (a) a new 5-minute NAAQS; (b) a new program under section 303 of the Act; and (c) a targeted monitoring program to ensure sources likely to cause or contribute to high 5-minute peaks are in attainment with the existing standard. The January 2, 1997, notice proposed an alternative program under section 303 of the Act that will assist States in addressing high 5-minute peaks.

Anticipated Cost and Benefits:

A draft regulatory impact analysis was completed and made available for public comment at the time of the January 2, 1997 proposal.

Risks:

Exposure analyses indicate from the national perspective that the likelihood of exposure to high 5-minute sulfur dioxide concentrations is very low. Asthmatic individuals in the vicinity of certain sources or source categories, however, may be at higher risk of exposure than the population as a whole.

RIN: 2060–AA61

EPA

119. IMPLEMENTATION OF OZONE AND PARTICULATE MATTER (PM) NATIONAL AMBIENT AIR QUALITY STANDARDS (NAAQS) AND REGIONAL HAZE REGULATIONS

Priority:

Other Significant

Legal Authority:

Clean Air Act, title I

CFR Citation:

40 CFR 50; 40 CFR 51; 40 CFR 52; 40 CFR 81

Legal Deadline:

None

Abstract:

On July 18, 1997, EPA issued new, updated air quality standards for ozone (62 FR 38856) and particulate matter (PM) (62 FR 38652). On November 17, 1998, EPA made available for comment proposed implementation guidance on implementing the revised ozone and PM NAAQS and regional haze program. On May 14, 1999, however, the U.S. Court of Appeals for the D.C. Circuit issued an opinion concerning the revised ozone and particulate matter NAAQS (American Trucking Assoc., Inc. et al. v. USEPA, No. 97-1440 (May 14, 1999)) in which the Court stated, among other things, that the revised 8-hour ozone standard cannot be enforced. The Court also vacated the revised PM10 NAAQS and remanded the PM2.5 NAAQS. On June 28, 1999, EPA requested a rehearing of the case before the Court, but the request was denied. The Department of Justice then filed a petition in January 2000 seeking U.S. Supreme Court review, and the Court subsequently agreed to review the case. Meanwhile, to assure that areas were not left without an air-quality standard, EPA took action on 7/6/00 to reinstate the previous 1-hour standard in approximately 3000 counties across the U.S. On February 27, 2001, the U.S. Supreme Court issued a ruling largely upholding EPA's positions on the issues in question, the most significant exception being the determination that EPA must reconsider its approach to implementing the revised ozone standard. EPA is now working to address this element of the Supreme Court decision, as well as another issue stemming from the earlier D.C. Circuit Court decision. EPA is also developing guidelines for determining Best Available Retrofit Technology (BART) under the Regional Haze Regulations, as well as moving forward on other revisions to the Regional Haze Regulations to incorporate the efforts of the Western Regional Air Partnership (WRAP).

Statement of Need:

Development of programs for ozone and PM are necessary to implement any revised NAAQS under title 1 of the Clean Air Act.

Summary of Legal Basis:

Title I of the Clean Air Act.

Alternatives:

This entry comprises the set of actions the Agency plans to take to implement the new ozone and fine particulate standards. The major alternative facing the Agency was whether to implement the standards strictly on a state-by-state basis, as has been the norm in the past, or to take Federal action to address the fact that emissions from one State affect the ability of other States to achieve the standards. The other major set of alternatives involved various possible strategies for infrastructure design, such as the designations of nonattainment areas and the requirements that will apply to them.

Anticipated Cost and Benefits:

EPA prepared a regulatory impact analysis (RIA) for the final ozone and PM NAAQS, as well as the regional haze reduction program.

Risks:

The risks addressed by this implementation plan are those of not attaining the National Ambient Air Quality Standards for Ozone and Particulate Matter.

RIN: 2060–AF34

EPA

120. OPERATING PERMITS: REVISIONS (PART 70)

Priority:

Other Significant

Legal Authority:

42 USC 7661 et seq

CFR Citation:

40 CFR 51; 40 CFR 52; 40 CFR 70

Legal Deadline:

None

Abstract:

In response to litigation on the operating permits rule regulations, 40 CFR part 70, to provide more effective implementation of part 70, and to address comments provided in response to notices of proposed rulemaking, parts 70, 51 and 52 are being revised. The changes streamline the procedures for revising stationary-source operating permits issued by State and local permitting authorities under title V of the Clean Air Act.

Statement of Need:

These revised rules will allow more streamlined procedures for revising operating permits. These revisions reflect the principles articulated in the President's and the Vice President's March 16, 1995 report Reinventing Environmental Regulation. That report established as goals for environmental regulation the building of partnerships between EPA and State and local agencies, minimizing costs, providing flexibility in implementing programs, tailoring solutions to the problem, and shifting responsibility to State and local programs.

Summary of Legal Basis:

Clean Air Act, Title V

Alternatives:

In response to concerns expressed in comments on the draft final rulemaking, the EPA discussed alternatives with representatives from State and local permitting authorities and industry and environmental groups, and desires public comment on some of the proposed alternatives. EPA will then consider public comments before promulgating a final rule.

Anticipated Cost and Benefits:

The administrative cost of implementing these proposed rules by permitting authorities, EPA, and permitted sources has not yet been estimated, but is expected to be lower than the cost of the current rule. Administrative costs include a range of costs which cover the source's preparing an application through EPA's and the permitting authority's effort to complete the process.

Risks:

All major sources of air pollution are required to have a permit to operate by the Clean Air Act. No adverse effect on the public health or ecosystems should result from this action, because the rule will require permit revisions with significant environmental impact to undergo public and EPA review.

EPA

121. NESHAP: PLYWOOD AND COMPOSITE WOOD PRODUCTS

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

42 USC 7412(d)

CFR Citation:

40 CFR 63

Legal Deadline:

Final, Statutory, November 15, 2000.

Abstract:

This project is to develop national emission standards for hazardous air pollutants (NESHAP) by establishing maximum achievable control technology (MACT) for facilities manufacturing wood panels and engineered wood products. MACT standards are under development to reduce the release of hazardous air pollutants (HAP) from all industries to protect the public health and environment. Emissions of HAP from this industry have been associated with, but are not limited to, the drying of wood and binders. This rule is anticipated to apply to the manufacture of products involving wood and some kind of binder or bonding agent. This project may include, but is not limited to, facilities that manufacture waferboard, hardboard fiber board (MDF), oriented strandboard (OSB), medium density fiberboard, particleboard, strawboard, hardwood and softwood plywood, glue-laminated lumber, laminated veneer lumber, and engineered wood products. The source category may also include lumber drying kilns at sawmills which are located on the same site as a facility that manufactures any of the wood products mentioned above. The project may also include some coatings operations. The name of the source category was formerly Plywood and Particleboard MACT.

Statement of Need:

Plywood and Composite Wood Products is a source category listed to be regulated under Section 112 of the Clean Air Act.

Summary of Legal Basis:

Clean Air Act Section 112

Alternatives:

The principal alternatives are to set standards at or beyond the "floor" level of stringency. The "floor" is the minimum stringency implied by the congressionally given formula in section 112 of the Clean Air Act.

Anticipated Cost and Benefits:

In Section 112 of the Clean Air Act, Congress found that there is sufficient evidence of risk to warrant a broad, technology-based MACT program to reduce toxic emissions nationwide. In addition, an Economic Impact Analysis and Regulatory Impact Analysis have been prepared.

Risks:

In Section 112 of the Clean Air Act, Congress found that there is sufficient evidence of risk to warrant a broad, technology-based MACT program to reduce toxic emissions nationwide. Therefore, separate risk analyses are not conducted for individual rulemakings within the MACT program.

EPA

122. NESHAP: RECIPROCATING INTERNAL COMBUSTION ENGINE

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 7412 CAA sec 112; PL 101-549

CFR Citation:

40 CFR 63

Legal Deadline:

Final, Statutory, November 15, 2000.

Abstract:

The stationary reciprocating internal combustion engine source category is listed as a major source of hazardous air pollutants (HAPs) under section 112 of the Clean Air Act (CAA). A major source is one which emits more than 10 tons/yr of one HAP or more than 25 tons/yr of a combination of 189 HAPs. The EPA will gather information on HAP emissions from internal combustion engines and determine the appropriate maximum achievable control technology (MACT) to reduce HAP emissions. The EPA will use information that has already been developed, if possible, by gathering information by working with State/local agencies, vendors, manufacturers of internal combustion engines, owners and operators of internal combustion engines, and environmentalists.

Statement of Need:

Reciprocating Internal Combustion Engines is a source category listed to be regulated under Section 112 of the Clean Air Act.

Summary of Legal Basis:

Section 112 of the Clean Air Act

Alternatives:

The principal alternatives are to set standards at or beyond the "floor" level of stringency. The "floor" is the minimum stringency implied by the congressionally given formula in section 112 of the Clean Air Act.

Anticipated Cost and Benefits:

In Section 112 of the Clean Air Act, Congress found that there is sufficient evidence of risk to warrant a broad, technology-based MACT program to reduce toxic emissions nationwide. Therefore, separate cost/benefit analyses are not conducted for individual rulemakings within the MACT program.

Risks:

In Section 112 of the Clean Air Act, Congress found that there is sufficient evidence of risk to warrant a broad, technology-based MACT program to reduce toxic emissions nationwide. Therefore, separate risk analyses are not conducted for individual rulemakings within the MACT program.

EPA

123. NESHAP: COMBUSTION TURBINE

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

42 USC 7412 CAA sec 112

CFR Citation:

44 CFR 63

Legal Deadline:

Final, Statutory, November 15, 2000.

Abstract:

The combustion turbine source category is listed as a major source of hazardous air pollutants (HAPs) under section 112 of the Clean Air Act (CAA). A major source is one which emits more than 10 tons/yr of one HAP or more than 25 tons/yr of a combination of 189 HAPs. Combustion turbines also emit NOx, SO2, CO, and PM. Combustion turbines are already regulated for NOx and SO2 emissions under section 111 of the CAA. The EPA will gather information on HAP emissions from combustion turbines and determine the appropriate maximum achievable control technology (MACT) to reduce HAP emissions. The EPA information that has already been developed will be used if possible and additional information will be gathered by working with State/local agencies, vendors, manufacturers of combustion turbines, owners and operators of combustion turbines, and environmentalists.

Statement of Need:

Combustion Turbines is a source category listed to be regulated under Section 112 of the Clean Air Act.

Summary of Legal Basis:

Section 112 of the Clean Air Act

Alternatives:

The principal alternatives are to set standards at or beyond the "floor" level of stringency. The "floor" is the minimum stringency implied by the congressionally given formula in section 112 of the Clean Air Act.

Anticipated Cost and Benefits:

In Section 112 of the Clean Air Act, Congress found that there is sufficient evidence of risk to warrant a broad, technology-based MACT program to reduce toxic emissions nationwide. Therefore, separate cost/benefit analyses are not conducted for individual rulemakings within the MACT program.

Risks:

In Section 112 of the Clean Air Act, Congress found that there is sufficient evidence of risk to warrant a broad, technology-based MACT program to reduce toxic emissions nationwide. Therefore, separate risk analyses are not conducted for individual rulemakings within the MACT program.

EPA

124. NESHAP: INDUSTRIAL, COMMERCIAL AND INSTITUTIONAL BOILERS AND PROCESS HEATERS

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect the private sector under PL 104-4.

Legal Authority:

42 USC 7412

CFR Citation:

40 CFR 63

Legal Deadline:

Final, Statutory, November 15, 2000.

Abstract:

The Clean Air Act, as amended in 1990, requires EPA to develop emission standards for sources of hazardous air pollutants (HAPs). Industrial boilers, institutional/commercial boilers and process heaters are among the potential source categories to be regulated under section 112 of the CAA. Emissions of HAPs will be addressed by this rulemaking for both new and existing sources. EPA promulgated an NSPS for these source categories in 1987 and 1990. The standards for the NESHAP are to be technology-based and are to require the maximum achievable control technology (MACT) as described in section 112 of the CAA.

Statement of Need:

Industrial boilers, institutional/commercial boilers, and process heaters are source categories listed to be regulated under Section 112 of the Clean Air Act.

Summary of Legal Basis:

Section 112 of the Clean Air Act.

Alternatives:

Alternatives will be explored as the proposal is developed. At this early stage, no alternatives have yet been identified.

Anticipated Cost and Benefits:

It is expected that this rule will result in significant costs to the affected industry, including costs for recordkeeping and reporting. These costs will be identified as the proposal is developed.

Risks:

In Section 112 of the Clean Air Act, Congress found that there is sufficient evidence of risk to warrant a broad, technology-based MACT program to reduce toxic emissions nationwide. Therefore, separate risk analyses are not conducted for individual rulemakings within the MACT program. The risks from this industry are those normally associated with combustion, such as exposure to particulate matter and sulfur oxides.

EPA

125. NESHAP: SURFACE COATING OF AUTOMOBILES AND LIGHT-DUTY TRUCKS

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

42 USC 7401 et seq

CFR Citation:

40 CFR 63

Legal Deadline:

None

Abstract:

The Clean Air Act, as amended in 1990, requires EPA to develop emission standards for sources of hazardous air pollutants (HAPs). The surface coating of new automobiles and light-duty trucks is among the source categories to be regulated under section 112 of the CAA. Emissions of HAPs will be addressed by this rulemaking for both new and existing sources. EPA promulgated an NSPS for this source category in 1980. The standards for the NESHAP are to be technology-based are are to require the maximum achievable control technology as described in section 112 of the CAA.

Statement of Need:

Surface coating of automobiles and ligh-duty trucks is a source category listed to be regulated under section 112 of the CAA.

Summary of Legal Basis:

Section 112 of the Clean Air Act

Alternatives:

Alternatives have been explored as the proposal has been developed. The alternatives include the minimum required "floor" level of control and other more stringent options.

Anticipated Cost and Benefits:

This rule will result in significant costs to the affected industry, including costs for recordkeeping and reporting. These costs are being identified as the proposal is being developed, and will be addressed in a Regulatory Impact Analysis accompanying the proposed rule.

Risks:

In Section 112 of the Clean Air Act, Congress found that there is sufficient evidence of risk to warrant a broad, technology-based MACT program to reduce toxic emissions nationwide.

Therefore, separate risk analyses are normally not conducted for individual rulemakings within the MACT program. The risks from this industry are those normally associated with surface coating operations, such as exposure to coating solvents which are hazardous air pollutants.

EPA

126. REVIEW OF THE NATIONAL AMBIENT AIR QUALITY STANDARDS FOR PARTICULATE MATTER

Priority:

Economically Significant

Legal Authority:

42 USC 7408; 42 USC 7409

CFR Citation:

40 CFR 50

Legal Deadline:

Final, Statutory, July 1, 2002, Under the Clean Air Act - the next standards review is to be completed July 2002.

Abstract:

On July 18, 1997, the EPA published a final rule revising the national ambient air quality standards (NAAQS) for particulate matter (PM) (62 FR 38652). While retaining the PM10 standard levels, new standards were added for fine particles (PM2.5) to provide increased protection against both health and environmental effects of PM. On the same day, a Presidential Memorandum (62 FR 38421, July 16, 1997) was published that, among other things, directed EPA to complete the next review of the PM NAAQS by July 2002. The EPA's plans and schedule for the next periodic review of the PM NAAQS were published on October 23, 1997 (62 FR 55201). Due to the unprecedented volume of new research, the completion of the Criteria Document has been extended and as a result the overall schedule for the review of the PM NAAQS is anticipated to extend beyond the original target of July 2002. As with other NAAQS reviews, a rigorous assessment of relevant scientific information will be presented in a Criteria Document (CD), and the preparation of this document is currently under way by the EPA's National Center for Environmental Assessment. The EPA's Office of Air Quality Planning and Standards will also prepare a Staff Paper (SP) for the Administrator which will evaluate the policy implications of the key studies and scientific information contained in the CD and additional technical analyses and identify critical elements that EPA staff believe should be considered in reviewing the standards. The SP and CD will be reviewed by the Clean Air Scientific Advisory Committee (CASAC) and the public both will reflect the input received through these reviews. As the PM NAAQS review is completed, the Administrator's proposal to revise or reaffirm the PM NAAQS will be published with a request for public comment. Input received during the public comment period will be reflected in the Administrator's final decision.

Statement of Need:

As established in the Clean Air Act, the national ambient air quality standards for particulate matter are to be reviewed every five years.

Summary of Legal Basis:

Section 109 of the Clean Air Act (42 USC 7409) directs the Administrator to propose and promulgate "primary" and "secondary" national ambient air quality standards for pollutants identified under section 108 (the "criteria" pollutants). The "primary" standards are established for the protection of public health, while "secondary" standards are to protect against public welfare or ecosystem effects.

Alternatives:

The main alternatives for the Administrator's decision on the review of the national ambient air quality standards for particulate matter are whether to reaffirm or revise the existing standards.

Anticipated Cost and Benefits:

Costs and benefits of revising or reaffirming the national ambient air quality standards for particulate matter cannot be determined at present; a regulatory impact analysis will be conducted along with the review of the standards.

Risks:

The current national ambient air quality standards for particulate matter are intended to protect against public health risks associated with morbidity or premature mortality from cardiopulmonary disease. During the course of this next review, a risk assessment will be conducted to evaluate health risks associated with retention or revision of the particulate matter standards.

RIN: 2060–AI44

EPA

127. TRANSPORTATION CONFORMITY AMENDMENTS: RESPONSE TO MARCH 2, 1999, COURT DECISION

Priority:

Other Significant

Legal Authority:

42 USC 7401 to 7671q

CFR Citation:

40 CFR 93

Legal Deadline:

None

Abstract:

The Clean Air Act requires EPA to promulgate rules that establish the criteria and procedures for determining whether highway and transit plans, programs, and projects conform to State air quality plans. Conformity means that the transportation actions will not cause or worsen violations of air quality standards or delay timely attainment of the standards. The original conformity rule was finalized on November 24, 1993, and most recently amended on August 15, 1997. On March 2, 1999, the U.S. Court of Appeals overturned certain provisions of the 1997 conformity amendments. This rulemaking will amend the conformity rule in compliance with the court decision. The rulemaking will formalize the May 14, 1999 EPA guidance and the June 18, 1999 DOT guidance that was issued to guide action on this issue until a rulemaking could be issued. Specifically, the rulemaking will clarify the types of projects that can be implemented in the absence of a conforming transportation plan. It will also explain EPA's process for reviewing newly submitted air quality plans and when those submissions can be used for conformity purposes.

Statement of Need:

The U.S. Court of Appeals remanded some provisions of EPA's conformity rule. The conformity rule must be amended in compliance with the court decision.

Summary of Legal Basis:

The Clean Air Act requires transportation plans, programs, and projects to conform to state air quality plans. The Clean Air Act also requires EPA to establish rules for how to determine the conformity of transportation actions.

Alternatives:

EPA's alternatives are constrained by the court decision.

Anticipated Cost and Benefits:

This amendment will not change the results of the economic analysis performed for the original transportation conformity rule, which was summarized in the preamble to that rule on 11/24/93 at 58 FR 62214.

Risks:

Transportation conformity is a process designed to help achieve attainment with the National Ambient Air Quality Standards. The risks addressed by the rule are therefore those risks associated with non-achievment of such standards.

EPA

128. RULEMAKINGS FOR THE PURPOSE OF REDUCING INTERSTATE OZONE TRANSPORT

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

Not Yet Determined

CFR Citation:

40 CFR 51

Legal Deadline:

None

Abstract:

The Clean Air Act (CAA) requires that a state implementation plan (SIP) contain provisions to prevent a State's facilities or sources from contributing significantly to air pollution that is transported downwind to other States, exacerbating their inability to meet the national ambient air quality standards for ozone. Through a 2-year effort known as the Ozone Transport Assessment Group (OTAG), EPA worked in partnership with the 37 easternmost States and the District of Columbia, industry representatives, and environmental groups to address ozone precursor and ozone transport. This multiyear collaboration resulted in the most comprehensive analysis of ozone transport ever conducted. The OTAG States voted in favor of a range of strategies to reduce nitrogen oxide emissions from utilities and other major sources. Building on the recommendations of OTAG, EPA issued a rule known as the NOx SIP Call (10/27/98, 63 FR 57355) requiring 22 States and the District of Columbia to submit revisions to their SIPs to address the regional transport of nitrogen oxides (a precursor to ozone formation known as NOx). By reducing emissions of NOx, the actions directed by these plans will decrease the formation and transport of ozone across State boundaries in the eastern half of the United States. On March 3, 2000, the Court of Appeals issued a decision largely upholding the NOx SIP Call, but remanded four narrow issues to EPA for further rulemaking action. In an August 30, 2000 Court Order, emission reduction measures are required to be in place by May 31, 2004. On June 8, 2001, the D.C. Circuit made a related decision concerning the NOx SIP Call Technical Amendment rulemakings which largely upheld Phase I of the NOx SIP Call, but remanded one issue to EPA. EPA is now addressing in a

separate rulemaking the remanded issues mentioned above — see SAN 4433 ~~in~~ today's Regulatory Agenda. Another issue remanded, or remanded and vacated, in the technical amendments and section 126 court decisions dealing with growth projections will be addressed separately. A notice of data availability was published on 8/3/01 which made new data publicly available for notice-and-comment. Final action is expected in November 2001. In addition to the SIP Call provisions, Federal Implementation Plans (FIPs) may also be needed to reduce regional transport if any affected State fails to adequately revise its SIP to comply with the NOx SIP call (see SAN 4096 in today's Regulatory Agenda). In addition to the SIP Call remedy, the Clean Air Act also gave States the right to petition EPA to take other Federal action to prevent ozone transport that affects downwind States. Accordingly, under section 126 of the CAA, eight northeastern States filed petitions requesting EPA to make findings and require decreases in NOx emissions from certain stationary sources in upwind.

Statement of Need:

It has long been recognized that ozone transport is a major factor in the difficulty many States are having in attaining the clean-air standards for ozone. This was made more clear by the OTAG analysis outlined above.

Summary of Legal Basis:

Clean Air Act Sections 110 and 126

Alternatives:

The Clean Air Act specifies the SIP Call process, the FIP process, and the Section 126 petition process as alternate approaches to remedying the problem of ozone transport. EPA intends to use these alternatives as appropriate in an integrated program.

Anticipated Cost and Benefits:

As outlined in the Regulatory Impact Analysis for the NOx SIP Call, the rule will result in significant improvements in premature mortality, chronic asthma, chronic and acute bronchitis, upper and lower respiratory symptoms, work days lost, decreased worker productivity, visibility in urban and suburban areas, increases in yields of commercial forests currently exposed to elevated ozone levels, and reductions in loadings of nitrogen to sensitivity estuaries, helping State and local government reach target reduction goals for estuaries such as Chesapeake Bay, Albermarle-Pamlico Sound and Long Island Sound. Due to practical analytical limitations, we cannot quantify and/or monetize all potential benefits of this action. Within these limitations, the quantified and monetized benefits were estimated in the Regulatory Impact Analysis to range from $1.1 Billion to $4.2 Billion annually. Annual costs were estimated at $1.7 Billion. All figures are in 1990 dollars.

Risks:

The risks addressed by this action are the likelihood of experiencing increased health and environmental effects associated with nonattainment of the National Ambient Air Quality Standard for ozone. These effects are briefly described above in the "costs and benefits" section, and they are outlined in detail in the Regulatory Impact Analysis for the NOx SIP Call.

EPA

129. • ELECTRIC UTILITY STEAM GENERATING UNIT MACT REGULATION

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect State, local or tribal goverments and the private sector.

Legal Authority:

42 USC 7412

CFR Citation:

40 CFR 63

Legal Deadline:

NPRM, Judicial, December 15, 2003.

Final, Judicial, December 15, 2004.

Abstract:

In December 2000, the EPA determined that regulation of hazardous air pollutant emissions (HAP) from oil- and coal-fired electric utility steam generating units was necessary and appropriate. This finding was based on the results of the study mandated by section 112(n)(1)(A) of the Clean Air Act, as amended. The regulation(s) will be developed under section 112 and will result in standards based on the use of maximum achievable control technology (MACT). The primary benefit will be the reduction of mercury emissions to the atmosphere from coal-fired units but other HAP will also be reduced. Small businesses and State/local/tribal governments could be impacted (particularly those governments owning or operating oil- or coal-fired electric generation facilities).

UMI

VOL 66 ISS 232 DEC 3 2001

Statement of Need:

Oil and coal-fired electric utility steam generating units were added (December 20, 2000) to the list of source categories to be regulated under section 112 of the Clean Air Act, as amended.

Summary of Legal Basis:

Section 112 of the Clean Air Act, as amended.

Alternatives:

Alternatives will be identified as the proposal is developed.

Anticipated Cost and Benefits:

It is anticipated that this rule will result in significant costs to the affected industry, including Federal, State, and local entities that own/operate electric utility steam generating units. These costs will be identified as the proposal is developed.

Risks:

Risk information will become available as the proposal is developed.

15 USC 2603 TSCA Title IV; PL 102-550 sec 402(c)(3)

CFR Citation:

40 CFR 745

Legal Deadline:

Final, Statutory, October 28, 1996.

Abstract:

Under section 402(c)(2) of the Toxic Substances Control Act (TSCA) Title IV, EPA conducted a study of the extent to which persons engaged in renovation and remodeling activities in target housing are exposed to lead in the conduct of such activities or disturb lead and create a lead-based paint hazard. EPA must use the results of this study and consult with interested parties to determine which categories of renovation and remodeling activities require training and certification. EPA must then revise the training and certification regulations originally developed for individuals performing lead-based paint abatement under section 402(c)(a) of TSCA Title IV to apply them to the renovation and remodeling categories. If EPA determines that any category does not require certification, EPA must publish an explanation of the basis for that determination.

Statement of Need:

Childhood lead poisoning is a pervasive problem in the United States, with almost a million young children having more than 10 ug/dl of lead in their blood, (Center for Disease Control's level of concern). Although there have been dramatic declines in blood-lead levels due to reductions of lead in paint, gasoline, and food sources, remaining paint in older houses continues to be a significant source of childhood lead poisoning. These rules will help insure that individuals and firms conducting lead-based paint activities will do so in a way that safeguards the environment and protects the health of building occupants, especially children under 6 years old.

Summary of Legal Basis:

This regulation is mandated by TSCA section 402(c). TSCA Section 402(c) directs EPA to address renovation and remodeling activities by first conducting a study of the extent to which persons engaged in various types of renovation and remodeling activities are exposed to lead in the conduct of such activities or disturb lead and create a lead-based paint hazard on a regular basis. Section 402(c) further directs the Agency to revise the lead-based paint activities regulations (40 CFR part 745 subpart L) to include renovation or remodeling activities that create lead-based paint hazards. In order to determine which contractors are engaged in such activities the Agency is directed to utilize the results of the study and consult with the representatives of labor organizations, lead-based paint activities contractors, persons engaged in remodeling and renovation, experts in health effects, and others.

Alternatives:

TSCA Section 402(c) states that should the Administrator determine that any category of contractors engaged in renovation or remodeling does not require certification; the Administrator may publish an explanation of the basis for that determination.

Anticipated Cost and Benefits:

EPA's quantitative cost estimates fall into four categories: Training Costs, Work Practice Costs, Clearance Testing Costs, and Administrative Costs. The estimates vary depending upon the option selected. In most cases we expect that requirements related to Clearance Testing and Work Practices will contribute the most to overall rule cost. The benefits analysis will not

provide direct quantitative measures of each (or any) option. EPA does not have a complete risk assessment (with dose-response functions) that would permit direct quantitative estimates. We do have other data, such as estimated loadings of Pb generated by renovation work, number and type of renovation events, demographics of the exposed population, and the costs of various health effects previously linked to Pb exposure. With the available information we are able utilize several qualitative approaches to frame the benefits associated with an effective renovation rule.

Risks:

These rules are aimed at reducing the prevalence and severity of lead poisoning, particularly in children. The Agency has concluded that many R&R work activities can produce or release large quantities of lead and may be associated with elevated blood lead levels. These activities include, but are not limited to: sanding, cutting, window replacement, and demolition. Lead exposure to R&R workers appears to by less of a problem than to building occupants (especially young children). Some workers (and homeowners) are occasionally exposed to high levels of lead. Any work activity that produces dust and debris may create a lead exposure problem.

RIN: 2070–AC83

EPA

131. ENDOCRINE DISRUPTOR SCREENING PROGRAM

Priority:

Other Significant

Legal Authority:

15 USC 2603 TSCA; 21 USC 346(a) FFDCA; 42 USC 300(a)(17) SDWA; 7 USC 136 FIFRA

CFR Citation:

Not Yet Determined

Legal Deadline:

Final, Statutory, August 3, 1999.

Abstract:

This final policy statement will set forth EPA's Endocrine Disruptor Screening Program and the procedures to be followed by regulated entities and the Agency. EPA published a proposed policy statement setting forth the Screening Program on December 28, 1998. In the final policy statement, EPA will describe the screens and tests that it will require as part of the Program. It also will address certain issues related to implementing the Program. The major actions in 2001-2003 will be the standardization and validation of assays in the screening battery and the completion of the priority setting system.

Statement of Need:

The Endocrine Disruptor Screening Program fulfills the statutory direction and authority to screen pesticide chemicals and drinking water contaminants for their potential to disrupt the endocrine system and adversely affect human health.

Summary of Legal Basis:

The mandate to screen pesticide chemicals for estrogenic effects that may affect human health is the Federal Food, Drug and Cosmetic Act (FFDCA) as amended in the Food Quality Protection Act (21 U.S.C. 346a(p)). FFDCA also provides EPA authority to require testing of substances that may have an effect that is cumulative to that of a pesticide chemical. Discretionary authority to test contaminants in sources of drinking water is in the Safe Drinking Water Act as amended in 1996 (42 U.S.C. 300j-17). General authority to test chemicals and pesticides is in TSCA (15 U.S.C. 2603) and FIFRA (7 U.S.C. 136) respectively.

Alternatives:

A Federal role is mandated under cited authority. There is no alternative to role of the Federal Government on this issue to ensure that pesticides, commercial chemicals and contaminants are screened and tested for endocrine disruption potential. A limited amount of testing may be conducted voluntarily but this will fall far short of the systematic screening which is necessary to protect public health and the environment and ensure the public that all important substances have been adequately evaluated.

Anticipated Cost and Benefits:

It is too early to project the costs and benefits of this program accurately. However, as a rough estimate, the screening battery is estimated to cost $200,000 per chemical. It is also too early to quantify the benefits of this program mathmetically. The goal of the program is to reduce the risks identified in Paragraph 22 below.

Risks:

Evidence is continuing to mount that wildlife and humans may be at risk from exposure to chemicals operating through a endocrine mediated pathway. Preliminary studies show decreases on IQ tests and increases in aggression in children. Severe malformations of the genitals of boys has increased steadily over the last two decades. Wildlife effects have been more thoroughly documented. Abnormalities in birds, marine mammals, fish and shellfish have been documented in the U.S., Europe, Japan, Canada, and Australia which have been linked to specific chemical exposures. Evidence is sufficient for the U.S. to proceed on a two track strategy: research on the basic science regarding endocrine disruption and screening to identify which chemicals are capable of

UMI
VOL
66
ISS
232
DEC
3
2001

interacting with the endocrine system. The combination of research and test data developed by this program will enable EPA to take action to reduce chemical risks.

RIN: 2070–AD26

EPA

132. PESTICIDE EMERGENCY EXEMPTION REGULATIONS

Priority:

Other Significant

Legal Authority:

7 USC 136(p)

CFR Citation:

40 CFR 166

Legal Deadline:

None

Abstract:

EPA will propose revisions to its regulations on emergency exemptions under section 18 of the Federal Insecticide, Fungicide and Rodenticide Act. Emergency exemptions allow temporary use of a pesticide not in accordance with registration requirements when emergency conditions exist. In the 1995 Presidential Reinvention Initiative, EPA identified a number of issues, which have been refined through informal discussions with States, user groups, and other stakeholders.

Statement of Need:

Stakeholders, including States and Federal agencies, have requested that EPA review its regulations for the FIFRA section 18 emergency exemption process. States and Federal agencies are the only applicants for emergency exemptions. Representatives of States have recommended modifications to the current process for application, review and approval of emergency exemptions. If adopted, the changes would reduce unnecessary burden to both applicants and EPA, expedite decisions on applications (which is critical in emergency situations) and potentially reduce risk to human health and the environment.

Summary of Legal Basis:

FIFRA sec. 18 authorizes EPA to temporarily exempt States from the requirements of registration to alleviate an emergency condition.

Alternatives:

Several measures for streamlining or improving the emergency exemption process are being considered by the Agency. EPA has analyzed these measures and has received considerable comment, both formally and informally, from stakeholders. Since this rule generally constitutes regulatory relief, and is not expected to cause any economic impact, options with varying cost do not apply.

Anticipated Cost and Benefits:

Because this regulation would provide regulatory relief, no costs are anticipated. Potential benefits include the reduced burden and cost to States and Federal agencies that apply for emergency exemptions, reduced burden to EPA, and, in some cases, reduced risk to human health and the environment. Indirect benefits may accrue to users of pesticides under emergency exemptions if changes result in faster review and approval, or greater availability of pesticides. No economic assessment of costs and benefits has yet been conducted.

Risks:

In general, the measures being considered are intended to achieve efficiencies and reduce burdens, not to reduce risks.

EPA

133. • PLANT INCORPORATED PROTECTANTS (PIPS); EXEMPTION FOR PIPS THAT ACT BY PRIMARILY AFFECTING THE PLANT

Priority:

Other Significant

Legal Authority:

7 USC 136 et seq; 21 USC 346a et seq

CFR Citation:

40 CFR 174

Legal Deadline:

None

Abstract:

EPA is considering the addition of plant-incorporated protectants that act by primarily affecting the plant to its plant-incorporated protectants exemptions at 40 CFR 174. Substances which plants produce for protection against pests, and the genetic material necessary to produce them, are pesticides under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), if humans intend these substances to "prevent, repel or mitigate any pest." These substances are also "chemical pesticide residues" under the Federal Food, Drug, and Cosmetic Act (FFDCA). EPA has determined that it will no longer issue split registrations for biotechnology products. Therefore, EPA is concurrently considering the exemption of plant-incorporated protectants derived through genetic engineering from sexually compatible plants from the requirement of a tolerance under section 408 of the FFDCA. Due to public interest and new scientific information, additional public comment on this proposal, originally published in 1994, was requested in a recent Supplemental Proposal (66 FR 37855).

Statement of Need:

Publication of the policy document "Coordinated Framework for the Regulation of Biotechnology" established a framework using existing statutes for inter-Agency regulation of biotechnology products. EPA began the process of establishing an internal framework for regulation of biotechnology under it's product-specific statutes through the finalization of the first set of plant-incorporated protectants rules. These rules are necessary to continue the development of and further define EPA's framework for regulation of products derived through biotechnology. The proposed exemption of plant incorporated protectants that act by primarily affecting the plant from requirements under FIFRA was originally published in 1994. At that time, it was not necessary to consider exemptions from the requirement of a tolerance under FFDCA simultaneously with FIFRA exemptions. Therefore, it will be neccessary to publish a NPRM proposing the FFDCA exemption before a Final Action on the FIFRA and FFDCA exemptions can be considered.

Summary of Legal Basis:

Under FIFRA (7 USC 136 et seq) and section 408 of the FFDCA (21 USC 346a), EPA has the authority to require the registration of pesticides and to establish tolerances, or exemptions from the requirement of a tolerance as appropriate, of pesticidal residues in food. As EPA will no longer issue split registrations for pesticides, these decisions must be considered simultaneously.

Alternatives:

The choice is either to provide an exemption or not to. There are no other alternatives to evaluate.

Anticipated Cost and Benefits:

The anticipated costs and benefits are based on those associated with the recently finalized exemption for PIPs derived through conventional breeding from sexually compatible plants. No costs are associated with this action. Benefits would include a reduction in regulatory oversight and the use of associated resources.

Risks:

This rule is an exemption, so potential risk will be examined to ensure implementation would not present a risk to public health or to the environment.

Legal Deadline:

None

Abstract:

EPA plans to reduce the burden imposed by the RCRA reporting and recordkeeping requirements to help meet the Federal Governmentwide goal established by the Paperwork Reduction Act (PRA).

In June 1999, EPA published a Notice of Data Availability (NODA) in the Federal Register (64 FR 32859) to seek comment on a number of burden reduction ideas. After reviewing the

comments received on the NODA, EPA is drafting a proposed rulemaking to implement many of these ideas. The proposals are designed to eliminate duplicative and nonessential paperwork.

The main ideas being considered for the proposed rulemaking are: (1) eliminating or modifying one-third of the 334 RCRA-required notices and reports that are sent by the regulated community to states and EPA; (2) eliminating the RCRA emergency response training requirements that overlap with the Occupational Safety and Health Administration requirements; (3) eliminating the need for facilities to record personnel descriptions; (4) decreasing the owner/operator self-inspection frequency of hazardous waste tanks to weekly; (5) providing states and EPA with the opportunity to lengthen owner/operator self-inspection frequencies on a case-by-case basis for containers, containment buildings, and tanks; (6) eliminating the Land Disposal Restrictions generator waste determinations, recycler notifications and certifications, hazardous debris notifications and characteristic waste determinations, and streamlining the characteristic waste notification procedures; and (7) modifying the groundwater monitoring requirements for hazardous waste facilities.

Statement of Need:

The Paperwork Reduction Act of 1995 establishes a Federal Governmentwide goal to reduce the paperwork and reporting burden it imposes. The RCRA Burden Reduction Initiative Proposed Rulemaking makes the regulatory changes necessary to meet this goal.

Summary of Legal Basis:

This action is not required by statute or court order.

Alternatives:

Reducing recordkeeping and reporting will require changes in our regulations. There was no alternative to a rulemaking. The Agency sought opinions from the regulated community on various burden reduction possibilities.

Anticipated Cost and Benefits:

Our cost-benefit analysis showed a savings of $120 million and 929,000 hours. The proposed rule will have minimal impact on the protectiveness of the RCRA regulations. The proposal will eliminate or streamline paperwork requirements that are unnecessary because they add little to the protectiveness of the RCRA regulations.

Risks:

The proposed rule will have no risk impacts.

RIN: 2050–AE50

EPA

135. RECYCLING OF CATHODE RAY TUBES (CRTS) AND MERCURY-CONTAINING EQUIPMENT: CHANGES TO HAZARDOUS WASTE REGULATIONS

Priority:

Other Significant

Legal Authority:

42 USC 6912(a); 42 USC 6921; 42 USC 6922; 42 USC 6923; 42 USC 6924; 42 USC 6925

CFR Citation:

40 CFR 261; 40 CFR 273

Legal Deadline:

None

Abstract:

This action will ultimately revise the existing Federal hazardous waste regulations to encourage recycling and better management of Cathode Ray Tubes (CRTs) by proposing a conditional exclusion from the definition of solid waste for CRTs being recycling. A CRT is display component of a television or computer monitor. A CRT is made largely of specialized glasses, some of which contain lead to protect the user from X-rays inside the CRT. Due to the lead, when they are disposed of or reclaimed, some CRTs are hazardous wastes under the Federal Resource Conservation and Recovery Act (RCRA) regulations. This rule will also propose to streamline RCRA requirements for managing mercury-containing equipment by adding such equipment to the universal waste rule. This rule is planned in response to a June 9, 1998 recommendation on CRT recycling from the Common Sense Initiative (CSI) Council to the Environmental Protection Agency (EPA), and in response to a petition from the Utilities Solid Waste Activities Group regarding mercury-containing equipment. CSI is a consensus-based process for developing cleaner, cheaper, smarter environmental improvements that includes representatives of: industry; environmental groups; community groups; environmental justice groups; labor and, Federal, State, local, and tribal governments. The goal of this proposal is to improve management and encourage recycling, thereby minimizing disposal of lead, increasing resource recovery, and enhancing protection of human health and the environment.

Statement of Need:

This proposal is needed to respond to recommendations of the Electronics Subcommittee of the CSI Council regarding CRT recycling, and also to respond to a petition from the Utilities Solid Waste Activities Group regarding management of mercury-containing equipment. It is also needed to streamline RCRA requirements for these materials to encourage better management and recycling.

Summary of Legal Basis:

This action is not required by statute or court order.

Alternatives:

EPA plans to solicit comments on alternative management requirements, including notification and tracking, accumulation requirements, requirements for CRT glass processors, export requirements, and disposal requirements.

Anticipated Cost and Benefits:

EPA estimates that this proposal, if finalized, would result in annual savings of up to 3 million dollars to reduce administrative, transportation, and management costs compared to current regulations.

Risks:

The risks are undetermined.

EPA

136. NPDES PERMIT REQUIREMENTS FOR MUNICIPAL SANITARY SEWER COLLECTION SYSTEMS, MUNICIPAL SATELLITE COLLECTION SYSTEMS, AND SANITARY SEWER OVERFLOWS

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect State, local or tribal goverments.

Legal Authority:

33 USC 1311 CWA sec 301; 33 USC 1314 CWA sec 304; 33 USC 1318 CWA sec 308; 33 USC 1342 CWA sec 402; 33 USC 1361 CWA sec 501(a)

CFR Citation:

40 CFR 122.38; 40 CFR 122.41; 40 CFR 122.42

Legal Deadline:

None

Abstract:

EPA is developing a notice of proposed rulemaking that would propose a broad-based reevaluation framework for sanitary sewer collection systems under the NPDES program. The Agency is proposing standard permit conditions for inclusion in permits for publicly owned treatment works (POTWs) and municipal sanitary sewer collection systems. The standard requirements address reporting, public notification, and recordkeeping requirements for sanitary sewer overflows (SSOs), capacity assurance, management, operation and maintenance requirements for municipal sanitary sewer collection systems; and a prohibition on SSOs.

Statement of Need:

The proposed regulation is intended to address three interrelated issues: (1) The risks to health and the environment caused by SSOs; (2) The need to protect and enhance local, State and Federal investments in sewer system infrastructure; and (3) The need to provide a clear and consistent regulatory program for collection systems.

Risks to health/environment: EPA estimates that about 40,000 SSO events occur each year, and perhaps ten times this many instances occur where sewage backs up into basements. These events lead to a variety of damages, including exposure of people to health risks; lowered water quality; and property damage and clean-up costs.

Protection of Investments in Sewer System Infrastructure : Sanitary sewer collection systems represent a major national investment in community infrastructure. EPA estimates that these systems have a replacement value of $1 to $2 trillion. Another source estimates that wastewater collection and treatment systems represent about 10 to 15 percent of the value of all publicly owned infrastructure in the United States. The substantial frequency of SSOs and other collection system failures indicates that operation, maintenance, repair and rehabilitation of sewer systems need to improve.

Providing Clear and Consistent Regulatory Program for Collection Systems - States are implementing the existing NPDES regulations for sanitary sewer collection systems in widely differing ways.

Summary of Legal Basis:

EPA is considering whether to publish a proposed rule that would require NPDES permits for municipal sanitary sewer collection systems to contain a standard provision for better operation and management of systems to avoid SSOs, increased attention to system planning, and better notification to the public in the event of an overflow. These proposed standard permit conditions would derive from Clean Water Act (CWA) sections 304(i), 308, and 402(a). Section 402(a) of the CWA authorizes EPA to prescribe permit conditions as necessary to carry out the provisions of the CWA, including permit conditions on data and information collection and reporting. Section 308 of the CWA authorizes EPA to require NPDES permittees to establish, maintain, and report records for determining whether there has been a violation of the CWA. The prohibition of SSO discharges is a technology-based limitation that is based, in part, on CWA section 301(a) which prohibits a discharge to waters of the United States except in compliance with an NPDES permit. The prohibition is also based on EPA's interpretation of the Act that discharges from a separate sanitary sewer system need to meet effluent limitations based on secondary treatment as defined by EPA and any more stringent limitation necessary to meet water quality standards.

Legal authority for the requirements for municipal satellite collection systems derives from the definition of "publicly owned treatment works." CWA section 212(2)(A) defines "treatment works" to include "any devices and systems used in the storage, treatment, recycling, and

reclamation of municipal sewage or industrial wastes of a liquid nature . . . including . . . intercepting sewers, outfall sewers, sewage collection systems . . . ." EPA regulations define the term "publicly owned treatment works" similarly at 40 CFR 122.2 and 403.1.

Alternatives:

NPDES requirements for municipal sanitary sewer collection systems currently under consideration include the five major alternatives discussed below. The first alternative would require NPDES permits for municipal sanitary sewer collection systems to contain a standard provision for better operation and management of systems to avoid SSOs, increased attention to system planning, and better notification to the public in the event of an overflow. The second alternative would involve extending the requirements of the proposed rule to privately owned satellite collection systems. The third alternative would be to change the technology-based standard for discharges from sanitary sewers from secondary treatment to best available technology economically achievable (BAT)/ best practicable control technology currently available (BCT). The fourth alternative would be a no action alternative. The fifth alternative would be a prescriptive capacity, management, operation, and maintenance provision. In addition to these alternatives, a number of municipalities have suggested additional alternatives which are being considered.

Anticipated Cost and Benefits:

EPA estimates that the total annual incremental cost for municipalities and Federal/State permitting authorities to comply could range from $93.5 million to $126.5 million. EPA estimates the total annual monetized benefits would range from $36 million to $97 million. The benefits are based on estimates of the benefits to water quality and the benefits associated with "smarter" management, operation and maintenance (MOM). The estimated range of benefits associated with water quality including benefits from: reduced human exposure to SSOs, leading to fewer cases of illness; increased opportunities for recreation, tourism, and fishing; and less property damage due to basement backups, ranged from $12 to $73 million annually. The range of benefits associated with improved water quality and better planning and MOM are estimated to result in a national cost savings of $24 million annually.

Risks:

EPA estimates that there are at least 40,000 SSO events per year and an additional 400,000 occurrences of sewage backing up into basements. The health and environmental risks attributed to SSOs vary depending on a number of factors including location and season (potential for public exposure), frequency, volume, the amount and type of pollutants present in the discharge, and the uses, conditions, and characteristics of the receiving waters. SSOs can release raw sewage to areas where they present high risks of human exposure, such as streets, private property, basements, and receiving waters used for drinking water, fishing and shellfishing, or contact recreation. The most immediate health risks associated with SSOs are potential exposure to bacteria, viruses, and other pathogens. EPA estimates that these overflow events cause an estimated 1.8 to 3.6 million illnesses per year. Major groups of disease-causing organisms or agents associated with untreated SSOs include: bacteria, viruses, protozoa, and helminths (intestinal worms). These pathogens can cause diseases range in severity from mild gastroenteritis (causing stomach cramps and diarrhea) to diseases that can be life-threatening, such as cholera, infectious hepatitis, dysentery, and severe gastroenteritis. Adverse health consequences can be more severe for children, the elderly, and those with weakened immune systems. In addition to pathogens, raw sewage may contain metals, synthetic chemicals (including endocrine system disruptors), nutrients, pesticides, and oils, which also can be detrimental to the health of humans and wildlife.

SSOs may affect the quality and uses of waters of the United States. Adverse water quality impacts from SSOs may include changes to the physical characteristics and viability of aquatic habitats, causing fish kills. Sewage spills and overflows (including sewage overflows from combined sewers and sanitary sewers, malfunctioning sewage treatment plants and pump stations, sewage spills and sewer-line breaks) are the leading identified cause of beach closures and swimming advisories in the United States.

EPA

137. EFFLUENT GUIDELINES AND STANDARDS FOR THE CONSTRUCTION AND DEVELOPMENT INDUSTRY

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

Undetermined

Legal Authority:

33 USC 1311 CWA 301; 33 USC 1314 CWA 304; 33 USC 1316 CWA 306; 33 USC 1317 CWA 307; 33 USC 1318 CWA 308; 33 USC 1342 CWA 402; 33 USC 1361 CWA 501

CFR Citation:

40 CFR 450

Legal Deadline:

NPRM, Judicial, March 31, 2002.

Final, Judicial, March 31, 2004.

Abstract:

The effluent guidelines will apply to construction activities associated with new development, as well as to those associated with re-development activities. The regulations will address storm water runoff from construction sites during the active phase of construction, as well as post-construction runoff. Construction activity is a major source of sediment and other pollutants discharged to the nation's waters. Industries potentially affected by this rulemaking include land developers, home builders, builders of commercial and industrial property, and other private and public sector construction site owners and operators. EPA will develop design criteria for erosion and sediment controls and storm water best management practices (BMPs). These requirements will be implemented in NPDES storm water permits issued to construction site owners and operators.

Statement of Need:

The 1998 National Water Quality Inventory Report to Congress indicates that 35 percent of assessed stream miles are not supporting their designated use. Siltation contributes to 38 percent of reported water quality problems in impaired rivers and streams. Construction and development projects contribute to stream impairment, because erosion and sediment controls (ESC) are not properly designed for active construction projects. The frequency of performance failure for ESCs is high due to inappropriate application, improper sizing, and lack of maintenance. For post construction projects, permanent hydromodification degrades 20 percent of the impaired river miles.

Summary of Legal Basis:

The Clean Water Act authorizes EPA to establish effluent limitations guidelines and standards to limit the pollutants discharged from point sources. In addition, EPA is bound by a provision in a consent decree entered in settlement of Natural Resources Defense Council et al. v. Reilly (D.D.C. No.89-2980) to propose regulations for this industry by March 31, 2002.

Alternatives:

The Clean Water Act directs EPA to establish a technology basis for the effluent guidelines. Limitations are based on the performance of specific technology levels, such as the best available technology economically achievable. EPA is considering a range of pollution control technologies and is also considering construction site size exemptions to reduce the impact on small dischargers.

Anticipated Cost and Benefits:

EPA expects effluent reduction benefits from more than 20,000 construction projects each year. The types of benefits associated with the effluent guidelines for construction and development involve improvements to surface water quality. The benefits from the guidelines will occur from improved control over stormwater and sediment discharged from construction sites. In addition, the guidelines will contribute to a reduction in stream bank erosion, the source of significant downstream sedimentation, flooding, and habitat destruction. The costs associated with this regulation will include capital costs to install best management practices (BMP) for active and post construction controls.

Risks:

EPA estimates that 2.2 million acres of agricultural and forest are developed each year for residential and nonresidential projects. The active construction processes require land clearing and grading that contribute to stormwater and sediment discharges. The impervious surfaces that are created within developed watersheds increase the stormwater volume and velocity and accelerate stream bank erosion and downstream sedimentation.

EPA

138. MINIMIZING ADVERSE ENVIRONMENTAL IMPACT FROM COOLING WATER INTAKE STRUCTURES AT EXISTING FACILITIES UNDER SECTION 316(B) OF THE CLEAN WATER ACT, PHASE 2

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Unfunded Mandates:

Undetermined

Legal Authority:

33 USC 1311 CWA sec 301; 33 USC 1316 CWA sec 306; 33 USC 1326 CWA sec 316; 33 USC 1361 CWA sec 501

CFR Citation:

40 CFR 9, 122, 123, 124 and 125

Legal Deadline:

NPRM, Judicial, February 28, 2002.

Final, Judicial, August 28, 2003.

Abstract:

This rulemaking affects, at a minimum, existing electricity generating facilities that employ cooling water intake structures and whose intake flow levels exceed a minimum threshold to be determined by EPA during the rulemaking. Section 316(b) of the Clean Water Act provides that any standard established pursuant to sections 301 or 306 of the Clean Water Act and applicable to a point source shall require that the location, design, construction, and capacity of cooling water intake structures reflect the best technology available for minimizing adverse environmental impact. A primary purpose of the rulemaking is to minimize any adverse environmental impact that may be associated with the impingement and entrainment of fish and other aquatic organisms by cooling water intake structures. Impingement refers to trapping fish and other aquatic life on intake screens or similar devices where they may be injured or killed. Entrainment occurs when smaller aquatic organisms, eggs, and larvae are drawn into a cooling system, and then pumped back out, often with significant injury or mortality due to heat, physical stress or exposure to chemicals.

Statement of Need:

In the absence of national regulations, Permit Directors have implemented cooling water intake limitations incompletely and inconsistently and, in some cases, permit issuance or reissuance has been significantly delayed. Tons of fish and other aquatic organisms may be cropped annually as a result of cooling water intake structures at a single large facility. By court order, EPA must propose and take final action on this regulation. This regulation may have substantial ecological benefits.

Summary of Legal Basis:

This action is required under an amended consent decree in settlement of Riverkeeper Inc. et al. v. Whitman, 93 Civ. 0314 (AGS) (U.S.D.C., Southern District of New York, November 21, 2000).

Alternatives:

The analysis will cover various sizes and types of potentially regulated facilities. EPA is considering whether to regulate site-by-site, nationally, or on the basis of broad categories of water body types.

Anticipated Cost and Benefits:

Costs are not yet determined. A qualitative assessment of benefits at several large facilities indicates the potential for significant benefits when large intakes are controlled. Costs and benefits are generally expected to be smaller at facilities that use smaller amounts of cooling water.

Risks:

Cooling water intake structures may pose significant risks for aquatic ecosystems.

RIN: 2040–AD62

EPA

FINAL RULE STAGE

139. NEW SOURCE REVIEW (NSR) IMPROVEMENT

Priority:

Other Significant

Legal Authority:

CAA as amended, title I

CFR Citation:

40 CFR 51.160 to 51.166; 40 CFR 52.21; 40 CFR 52.24

Legal Deadline:

None

Abstract:

This action is to revise the CAA new source review (NSR) regulations, which govern the preconstruction air quality review and permitting programs that are implemented by States and the Federal Government for new and modified major stationary sources of air pollution. This rulemaking will deregulate — that is, exclude from major NSR program requirements — those activities of sources that, with respect to air pollution, have little environmental impact. The rulemaking will encourage pollution control and pollution prevention projects at existing sources. Control technology requirements will be clarified with respect to when and how they apply to sources that are covered. The action seeks to more clearly define the appropriate roles and requirements of sources, permitting authorities and Federal land managers and EPA in the protection of air-quality-related values

in Federal Class I areas (i.e., certain national parks and wilderness areas) under the NSR regulations. State, local, and tribal permitting agencies will be given more flexibility to implement program requirements in a manner that meets their specific air quality management needs. Consequently, the rulemaking decreases the number of activities that are subject to NSR requirements and also expedites the permitting process for those sources that are subject to NSR. This action is designed to reduce the regulatory burden over all industries without respect to commercial size or capacity; therefore, it should have no detrimental impact on small businesses. This action also addresses several pending petitions for judicial review and administrative action pertaining to NSR applicability requirements and control technology review requirements. Regulations that will be affected are State implementation plan requirements for review of new sources and modifications to existing sources (40 CFR 51.160-166), the Federal prevention of significant deterioration program (40 CFR 52.21), and Federal restriction on new source construction (40 CFR 52.24). Finally, this NSR Improvement effort also includes a separate rulemaking (SAN 4390, Utility Sector New Source Review (NSR) Alternative Compliance Program), which will provide industries with the flexibility to focus more on existing pollution sources, with the goal of achieving as good or better environmental results than could be achieved by focusing strictly on new sources.

Statement of Need:

This effort was initiated to examine complaints from the regulated community that the current regulatory scheme is too complex, needlessly delays projects, and unduly restricts source flexibility. The goal of this effort is to address industry's concerns without sacrificing the environmental benefits embodied in the present approach; that is, protecting and improving local air quality, and stimulating pollution prevention and advances in control technologies. In 1996, this effort was considered far enough along to be proposed for public comment, and a proposed rule was issued. Thereafter, EPOA has conducted numerous meetings with interested stakeholders. More recently, the Agency has been conducting a review of the NSR program in response to a recommendation from the President's National Energy Policy Development Group. EPA is examning the impact of the NSR regulations, including administrative interpreataion and implementation, on investment in new utility and refinery generation capacity, energy efficiency and environmental protection. EPA plans to report to the President on the impact of NSR on the three areas mentioned above. At that time we will also make recommendations on whether improvements to the NSR program are needed to provide more flexibility and certainty, while ensuring protection of the environment. Many of the approaches proposed in 1996 to improve NSR are being considered as part of review recommended by the President's National Energy Policy Development Group.

Summary of Legal Basis:

There are no applicable statutory or judicial deadlines for the NSR reform rulemaking effort. However, the rule will address three outstanding settlement agreements: CMA Exhibit B, Top-down BACT, and the applicability test for modifications at utilities (WEPCO).

Alternatives:

In January 1996, EPA, as part of another regulatory streamling measure, merged portions of a separate rulemaking to implement the 1990 CAA Amendments with the Reform effort. The combined package was proposed in the Federal Register on July 23, 1996. On July 24. 1998, EPA issued another Federal Register notice seeking comment on two applicability provisions. On February 2-3, 1999, EPA convened a public meeting to listen to new stakeholder proposals for streamlining NSR applicability and control technology requirements. Stakeholder groups submitted written proposals during May and June 1999. Additionally, EPA conducted extensive stakeholder meetings as part of the NSR review recommended by the President's National Energy Policy Development Group. EPA continues to review the alternatives presented by interested stakeholders.

Anticipated Cost and Benefits:

From a cost perspective, the proposed rulemaking represents a decrease in applications and recordkeeping costs to industry of at least $13 million per year, as compared to the pre-existing program, based primarily on the fact that fewer sources will need to apply for major source permits. In addition, the cost to State and local agencies will be reduced by approximately $1.4 million per year. The Federal Government should realize a savings of approximately $116,000 per year. Additional cost reductions, which are difficult to quantify, will be realized due to the streamlining effect of the rulemaking on the permitting process, for example, the opportunity costs for shorter time periods between permit application and project completion and reduced uncertainty in planning for future source growth.

Risks:

This is a procedural rule applicable to a wide variety of source categories. Moreover, it applies to criteria pollutants for which NAAQS have been established. This action is considered environmentally neutral. However, any potential risks are considered in the NAAQS rulemaking from a national perspective.

RIN: 2060–AE11

EPA

140. GROUNDWATER AND PESTICIDE MANAGEMENT PLAN RULE

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

7 USC 136(a) FIFRA sec 3; 7 USC 136(w)

CFR Citation:

40 CFR 152.170

Legal Deadline:

None

Abstract:

This regulation would establish Pesticide Management Plans (PMPs) as a new regulatory requirement for certain pesticides. Unless a State or tribal authority has an EPA-approved Plan specifying risk-reduction measures, use of the chemical would be prohibited. The rule would also specify procedures and deadlines for development, approval and modification of plans by States and tribal authorities.

Statement of Need:

EPA proposed to make specific pesticides subject to the provisions of EPA-approved Pesticide Management Plans (PMPs) because of their strong ground-water contamination potential. The rule will establish PMPs as an other regulatory restriction and define the minimum requirements and procedures for developing, approving and managing PMPs. Upon promulgation of this rule, the labels of the designated pesticides will be changed to require use in conformance with EPA-approved PMPs, and to prohibit sale and use in States or Indian Country without such approved Plans (after a period allowed for development and EPA review of these Plans). A PMP is a State's or tribe's commitment to EPA and the public to manage the use of a certain pesticide in such a way as to avoid unreasonable risks to ground water that would otherwise warrant cancellation of the use. An approved plan will embody a combination of educational, scientific, and regulatory tools to fulfill the State's ground-water protection goals, developed through a process of public participation. A plan will include a process for disseminating this information to pesticide users and marketers, and for monitoring the effectiveness of the plan through the development of appropriate indicators of environmental improvement and/or protection.

Summary of Legal Basis:

The Federal Insecticide, Fungicide and Rodenticide Act (FIFRA) generally requires EPA to regulate pesticide use in such a manner as to prevent unreasonable risks to human health and the environment. Specifically, 7 USC 136a authorizes EPA to prescribe by regulation "other regulatory restrictions" for pesticides that may generally cause unreasonable risks to the environment (such as those that are associated with ground-water contamination potential) without those restrictions.

Alternatives:

This Rule is a direct outgrowth of the Pesticides and Ground Water Strategy, published in October 1991 (after extensive consultation with States, localities, and other affected stakeholders). In publishing the Strategy EPA conducted an analysis of three different alternatives to the regulation of pesticides' ground-water risks. One option was to rely exclusively on orthodox national-level pesticide regulatory tools (tantamount to a "baseline"), which would entail tolerating or remediating a certain level of ground-water contamination. At the other extreme, outright cancellation of candidate pesticides with significant ground-water contamination potential was considered to provide full assurance that no further ground water contamination would occur (taking into account the high economic losses due to the removal of the pesticide from the market). The analysis concluded that a "partnership" approach, providing a mechanism for more tailored management of pesticide use (i.e., taking into account the prevailing influence of highly variable hydrologic "sensitivity" factors), would be simultaneously a more effective and least costly alternative.

Anticipated Cost and Benefits:

EPA anticipates four categories of costs entailed in requiring PMPs. Federal Program Costs are those of administering ground-water protection activities, such as the review of State or tribal proposals. State Program Costs entail both capital and annual costs. Registrant and user impacts are the economic losses ascribed to the reduced use of the classified pesticides, as well as the costs (to the registrants) of complying with Federal, State and tribal provisions. Benefits accrue from the reduced levels of pesticide residues in ground water, and a corresponding reduction in: (1) human and ecological risk (see below); and (2) threats to the economic and intrinsic values of the ground-water resource. Significant uncertainties attend the quantification of these benefits, however. Under EO 12866, OMB designated this as an economically significant regulatory action under section 3(f) of the Executive order because of its potentially significant impact on a sector of the economy.

Risks:

The pesticides under consideration are those most frequently detected (sometimes at concentrations exceeding health-based reference points) of currently-registered Pesticides, and display physical and chemical characteristics associated with a ground-water contamination potential. The level of potential contamination (and related risk to both human health and the environment) represent a potential unreasonable risk to the environment in the absence of local management measures. State management measures are expected to avert these risks substantially. Because the Food Quality Protection Act (FQPA) requires that EPA consider drinking water as part of dietary exposure, the Agency is analyzing implications for this regulation.

RIN: 2070–AC46

EPA

141. TSCA INVENTORY UPDATE RULE AMENDMENTS

Priority:

Other Significant

Legal Authority:

15 USC 2607(a) TSCA 8(a)

CFR Citation:

40 CFR 710

Legal Deadline:

None

Abstract:

This action would amend the current Toxic Substances Control Act (TSCA) Inventory Update Rule (IUR) to require chemical manufacturers to report to EPA data on exposure-related information and the industrial and consumer end uses of chemicals they produce or import. Currently, EPA requires chemical manufacturers to report the names of the chemicals they produce, as well as the locations of manufacturing facilities and the quantities produced. About 3,000 facilities reported data on about 9,000 unique chemicals during the last reporting cycle under the IUR. Data obtained would be used by EPA and others to: better understand the potential for chemical exposures; screen the chemicals now in commerce and identify those of highest concern; establish priorities and goals for their chemical assessment, risk management and prevention programs, and monitor the programs' progress; encourage pollution prevention by identifying potentially safer substitute chemicals for uses of potential concern; and enhance the effectiveness of chemical risk communication efforts. Additionally, EPA will consider other amendments to the IUR. These include removing the inorganic chemicals exemption providing the information to better assess and manage risks of inorganic chemicals; improving the linkages of IUR data to other data sources to enhance the data's usefulness; and altering the confidential business information (CBI) claim procedures to reduce the frequency of CBI claims, allowing the public greater access to relevant information on toxic chemicals. EPA has held meetings with representatives of the chemical industry, environmental groups, environmental justice leaders, labor groups, State governments and other Federal agencies to ensure public involvement in the TSCA Inventory Update Rule Amendments Project.

Statement of Need:

There are more than 75,000 chemicals in commerce listed on the TSCA Inventory. EPA faces the challenge of sorting through these chemicals to identify the ones of most concern, then taking the appropriate steps to mitigate unreasonable risks of those chemicals. The current IUR collects some key data, such as production volume, used to identify the chemicals of most concern. However, other exposure-related information is essential to more accurately identify the chemicals with the greater risk potential. Information on how a chemical is manufactured, processed, and used is needed to determine possible exposure routes and scenarios of these chemicals. This action will propose to modify the inventory update process to collect the exposure-related data necessary for an effective TSCA Inventory Screening program; the information will be collected in a format that makes the information easy to use to screen thousands of chemicals. A national report will make data collected via the amended IUR publicly available. This report will not contain any information claimed to be confidential.

Summary of Legal Basis:

Toxic Substances Control Act (TSCA) Section 8.

Alternatives:

Although data on the use of specific chemicals can be found in varying sources, there is no national, comprehensive, current searchable database providing consistent information on a wide variety of chemicals. EPA has examined alternate sources of the information including state information, Federal databases and privately collected information. EPA can find no information comparable to the data anticipated to be collected through amendments to the IUR.

Anticipated Cost and Benefits:

EPA anticipates costs of this action to be well under $100 million for the first year of reporting. Total costs of this action depend on the amendments to IUR that are contained in a proposed rule. The amended IUR will assist EPA in screening chemicals in commerce and identifying those of highest concern; establishing priorities and goals for chemical assessment, risk management and prevention programs and to monitor their progress; identifying potentially safer substitute chemicals for uses of potential concern; and enhancing the effectiveness of chemical risk communication efforts.

Risks:

This action will secure data on describing how chemicals in commerce are used; this data is essential to determine possible exposure routes and scenarios. Using these exposure estimates, EPA's toxics program will be able to better focus on chemical risks of most concern.

RIN: 2070–AC61

EPA

142. CHEMICAL RIGHT-TO-KNOW INITIATIVE; HIGH PRODUCTION VOLUME (HPV) CHEMICALS

Priority:

Other Significant

Legal Authority:

15 USC 4 TSCA; 15 USC 8 TSCA; 42 USC 313 TRI; 7 USC 136 FIFRA

CFR Citation:

40 CFR 700 et seq

Legal Deadline:

None

Abstract:

The Chemical RTK Initiative was established in 1998 in response to the finding that most commercial chemicals have very little, if any, publicly available toxicity information on which to make sound judgments about potential risks. There are three key components to this initiative, each of which is being implemented by EPA. These are: collecting and making public screening level toxicity data for 2,800 widely used commercial chemicals; additional health effects assessment for chemicals to which children are substantially exposed; and the listing and lowering of thresholds for persistent, bioaccumulative, toxic chemicals reported to the Toxic Release Inventory (TRI). This Initiative will involve several separate activities, with any regulatory related actions included as separate entries in the Regulatory Agenda.

Statement of Need:

The Chemical Right to Know Initiative grew out of the finding of an EPA study that there is very little basic publicly available information on the health and environmental effects of even the most widely used commercial chemicals. Less than 7% of the 2,800 high production volume chemicals have a full set of baseline testing information readily available, while almost 50% have no public information whatsoever. The Chemical Right to Know Initiative is designed to close these information gaps, and to make both new and existing information available to the public.

Summary of Legal Basis:

To the extent that rule-making is required to implement the chemical Right-to-Know Initiative, EPA will utilize the testing authorities available under TSCA and the chemical reporting authorities of EPCRA Section 313 (the Toxics Release Inventory).

Alternatives:

The Chemical Right-to-Know Initiative will rely on a combination of partnership programs and rule-writing to accomplish its goals. For instance, the HPV Challenge Program has asked industry to voluntarily provide both new and existing data on high production volume chemicals, while a series of HPV test rules would require testing of specific HPV chemicals of concern.

Anticipated Cost and Benefits:

The benefits of the Chemical Right-to-Know Initiative are substantial, as no one in the environmental community — whether in industry, government or the public — can make reasoned risk management decisions in the absence of reliable health and environmental information. The cost of baseline testing is well-established, and runs about $200,000 per chemical for a full set of tests, for those chemicals on which data do not already exist.

Risks:

None.

RIN: 2070–AD25

EPA

143. • PLANT INCORPORATED PROTECTANTS (PIPS); EXEMPTION FOR THOSE BASED ON VIRAL COAT PROTEINS

Priority:

Other Significant

Legal Authority:

21 USC 346(a) et seq; 7 USC 136 et seq

CFR Citation:

40 CFR 174

Legal Deadline:

None

Abstract:

EPA is considering the addition of plant-incorporated protectants based on viral coat proteins to its plant-incorporated protectants exemptions at

UMI

40 CFR 174. Substances which plants produce for protection against pests, and the genetic material necessary to produce them, are pesticides under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), if humans intend these substances to "prevent, repel or mitigate any pest." These substances are also "chemical pesticide residues" under the Federal Food, Drug, and Cosmetic Act (FFDCA). EPA has determined that it will no longer issue split registrations for biotechnology products. Therefore, EPA is concurrently considering the exemption of plant-incorporated protectants derived through genetic engineering from sexually compatible plants from the requirement of a tolerance under section 408 of the FFDCA. Due to public interest and new scientific information, additional public comment on this proposal, originally published in 1994, was requested in a recent Supplemental Proposal (66 FR 37855).

Statement of Need:

Publication of the policy document "Coordinated Framework for the Regulation of Biotechnology" established a framework using existing statutes for inter-Agency regulation of biotechnology products. EPA began the process of establishing an internal framework for regulation of biotechnology under its product-specific statutes through the finalization of the first set of plant-incorporated protectants rules. This rule is necessary to continue the development of and further define EPA's framework for regulation of products derived through biotechnology.

Summary of Legal Basis:

Under FIFRA (7 USC 136 et seq) and section 408 of the FFDCA (21 USC 346a et seq), EPA has the authority to require the registration of pesticides and to establish tolerances, or exemptions from the requirement of a tolerance as appropriate, of pesticidal residues in food. As EPA will no longer issue split registrations for pesticides, these decisions must be considered simultaneously.

Alternatives:

The choice is either to provide an exemption or not to. There are no other alternatives to evaluate.

Anticipated Cost and Benefits:

The anticipated costs and benefits are based on those associated with the recently finalized exemption for PIPs derived through conventional breeding from sexually compatible plants. No costs are associated with this action. Benefits would include a reduction in regulatory oversight and the use of associated resources.

Risks:

This rule is an exemption, so potential risk will be examined to ensure implementation would not present a risk to public health or to the environment.

EPA

144. • PLANT-INCORPORATED PROTECTANTS (PIPS); EXEMPTION FOR THOSE DERIVED THROUGH GENETIC ENGINEERING FROM SEXUALLY COMPATIBLE PLANTS

Priority:

Other Significant

Legal Authority:

7 USC 136 et seq; 21 USC 346a et seq

CFR Citation:

40 CFR 174

Legal Deadline:

None

Abstract:

EPA is considering the addition of plant-incorporated protectants derived through genetic engineering from sexually compatible plants to its plant-incorporated protectants exemptions at 40 CFR 174. Substances which plants produce for protection against pests, and the genetic material necessary to produce them, are pesticides under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), if humans intend these substances to "prevent, repel or mitigate any pest." These substances are also "chemical pesticide residues" under the Federal Food, Drug, and Cosmetic Act (FFDCA). EPA has determined that it will no longer issue split registrations for biotechnology products. Therefore, EPA is concurrently considering the exemption of plant-incorporated protectants derived through genetic engineering from sexually compatible plants from the requirement of a

tolerance under section 408 of the FFDCA. Due to public interest and new scientific information, additional public comment on this proposal, originally published in 1994, was requested in a recent supplemental proposal (66 FR 37855).

Statement of Need:

Publication of the policy document "Coordinated Framework for the Regulation of Biotechnology" established a framework using existing statutes for interagency regulation of biotechnology products. EPA began the process of establishing an internal framework for regulation of biotechnology under it's product-specific statutes through the finalization of the first set of plant-incorporated protectants rules. This rule is necessary to continue the development of and further define EPA's framework for regulation of products derived through biotechnology.

Summary of Legal Basis:

Under FIFRA (7USC 136 et seq) and section 408 of the FFDCA (21 USC 346a), EPA has the authority to require the registration of pesticides and to establish tolerances, or exemptions from the requirement of a tolerance as appropriate, of pesticidal residues in food. As EPA will no longer issue split registrations for pesticides, these decisions must be considered simultaneously.

Alternatives:

The choice is either to provide an exemption or not to. There are no other alternatives to evaluate.

Anticipated Cost and Benefits:

The anticipated costs and benefits are based on those associated with the recently finalized exemption for PIPs derived through conventional breeding from sexually compatible plants. No costs are associated with this action. Benefits would include a reduction in regulatory oversight and the use of associated resources.

Risks:

This rule is an exemption, so potential risk will be examined to ensure implementation would not present a risk to public health or to the environment.

EPA

145. REQUIREMENTS FOR ZINC FERTILIZER MADE FROM RECYCLED HAZARDOUS SECONDARY MATERIALS

Priority:

Other Significant

Legal Authority:

42 USC 1006 et seq

CFR Citation:

40 CFR 261; 40 CFR 266; 40 CFR 268; 40 CFR 271

Legal Deadline:

NPRM, Judicial, November 15, 2000, Settlement agreement met deadline.

Final, Judicial, May 15, 2002, Settlement agreement.

Abstract:

This rulemaking is intended to revise the current RCRA regulations that apply to recycling of hazardous wastes in the manufacture of zinc fertilizers. Specifically, it is intended to establish a more consistent application of these recycling requirements to zinc fertilizer products, to establish a set of standards for contaminants in RCRA-regulated zinc fertilizers that are more appropriate to fertilizers and are protective of human health and the environment, and to specify more appropriate, protective conditions for management of zinc-bearing hazardous secondary materials prior to recycling. These regulatory revisions are expected to directly affect companies that manufacture zinc fertilizers from hazardous secondary materials, and is likely to benefit such manufacturers that are small businesses by removing certain regulatory disincentives to legitimate recycling activities.

Statement of Need:

This rulemaking responds to concerns expressed by industry, environmental groups and state agencies regarding the need to amend current RCRA regulations that apply to zinc fertilizers made from recycled hazardous wastes. The rule is expected to encourage legitimate recycling of zinc-bearing hazardous wastes, reduce costs, and establish more appropriate standards for these products.

Summary of Legal Basis:

This rulemaking is subject to a settlement agreement with the Sierra Club, The Washington Toxics Coalition, and the Environmental Technology Council. The agreement was signed on June 20, 2000.

Alternatives:

A number of regulatory alternatives are being examined in the context of reaching final Agency decisions for the final rule.

Anticipated Cost and Benefits:

The economic impact analysis prepared for the proposed rule estimated net cost savings to industry of several million dollars from the rule. The analysis is being refined based on comments received on the proposal and other information.

Risks:

The rulemaking will result in lower levels of contaminants, such as lead and cadmium, in zinc fertilizers made from hazardous wastes, with corresponding reductions in potential risks.

EPA

146. NATIONAL PRIMARY DRINKING WATER REGULATIONS: RADON

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect State, local or tribal goverments.

Legal Authority:

42 USC 300f et seq; SDWA 1412

CFR Citation:

40 CFR 141; 40 CFR 142

Legal Deadline:

NPRM, Statutory, August 6, 1999.

Final, Statutory, November 2, 2000.

Other, Statutory, February 6, 1999, Publish radon health risk reduction and cost analysis.

Abstract:

EPA proposed new regulations for radon in drinking water which will provide states flexibility in how to manage the health risks from radon, in both drinking water and in indoor air. States would be able to focus their efforts on the highest radon risks to the public - in indoor air - while reducing the highest risks from radon in drinking water. Breathing indoor radon in homes is the primary public health risk from radon, contributing to about 15,000-22,000 lung cancer deaths each year in the United States, according to a landmark report by the National Academy of Sciences. That makes radon in indoor air the second leading cause of lung cancer in the United States. Based on a NAS report, EPA estimates that radon in drinking water causes about 168 cancer deaths per year, of which about 89 percent are lung cancer from breathing radon released from water. The remaining 11 percent of the risk is for stomach cancer from drinking radon-containing water.

The proposal is based on the unique framework outlined in the 1996 Safe Drinking Water Act (SDWA). The proposed new regulation will provide two options to states and water systems for reducing public health risks from radon. Under the first option, states can choose to develop enhanced state programs to address the health risks from indoor radon while water systems reduce radon levels in drinking water to at or below the higher, alternative maximum contaminant level MCL proposed at 4,000 pCi/L (picoCuries per liter, a standard unit of radiation), ensuring protection from the highest risks from radon in drinking water. EPA is encouraging the states to adopt this approach as the most cost-effective way to achieve the greatest radon risk reduction. If a state does not elect this option, the second option would require water systems in that state to either reduce radon in drinking water levels to the MCL of 300 pCi/L, or to develop a local indoor radon program and reduce levels in drinking water to 4000 pCi/L. Those systems initially at the MCL or lower will not need to treat their water for radon.

Statement of Need:

Radon in drinking water increases risk to public health, both from inhalation of radon discharged through normal water use, such as showering, and from ingestion of water.

Summary of Legal Basis:

Pursuant to the Safe Drinking Water Act, as amended in 1996 [sec. 1412 (b)(13)], EPA is required to: (1) Withdraw the 1991 proposed radon in drinking water rule; (2) Work with the National Academy of Sciences to conduct a risk assessment for radon in drinking water, and an assessment of the health risk reduction benefits associated with various mitigation methods of reducing radon in indoor air; (3) Publish a radon health risk reduction and cost analysis for possible radon Maximum Contaminant Levels (MCLs) for public comment, by February, 1999; (4) Propose a Maximum Contaminant Level Goal (MCLG) and National Primary Drinking Water Regulation (NPDWR) for radon by August, 1999; and (5) Publish an MCLG and Final NPDWR one year after proposal. In addition, if EPA promulgates an MCL more stringent than necessary to reduce the contribution to radon in indoor air from drinking water to a concentration that is equivalent to the national average concentration of radon in outdoor air, the Agency must establish an alternative MCL (AMCL). The AMCL is to be set at a level which would result in a contribution of radon from drinking water to radon levels in indoor air equivalent to the national average concentration of radon in outdoor air. If an alternative MCL is established, EPA must publish criteria for States to develop multimedia radon mitigation programs. EPA shall approve State multimedia mitigation programs if they are expected to achieve equal or greater health risk reduction benefits than would be achieved through compliance with the MCL. If EPA approves a State multimedia mitigation program, public water supply systems within the State may comply with the AMCL. If a State does not have an approved multimedia mitigation program, any public water system may submit a program for approval by EPA

UMI
VOL
66
ISS
2
3
2
DE
3
2001

according to the same criteria, conditions, and approval process that would apply to a State program. EPA shall evaluate multimedia mitigation programs every 5 years.

Alternatives:

EPA considered a range of MCL options for radon in drinking water in the Health Risk Reduction and Cost Analysis (HRRCA) (published in February 1999). The primary alternative is for a State or public water system to develop a multimedia mitigation program in order for it to comply with the AMCL. The National Academy of Sciences provided information on key factors (the water to air transfer factor and the national average outdoor radon level) that EPA used in setting the proposed AMCL.

Anticipated Cost and Benefits:

The total annual costs of compliance with the MCL of 300 pCi/l for radon in drinking water and the associated information collection and reporting requirements is estimated at $341-408 million. In complying with 300 pCi/l, an estimated 62.0 fatal and 3 non-fatal cancer cases are avoided each year. Because EPA expects that most States and systems will choose to comply with the alternative maximum contaminant level (AMCL) of 4,000 pCi/l and implement a Multi-Media Mitigation (MMM) program, EPA expects the total annual costs of compliance with the radon rule to be significantly less than $408 million. If most States and systems comply with the AMCL and implement a MMM program, the total annual costs of compliance are estimated at approximately $86 million. The quantifiable benefits of the health risk reduction are estimated to be $360 million for either implementation scenario. EPA expects compliance with the AMCL and implementation of a MMM program to achieve equal or greater risk reduction than is expected with strict compliance with the MCL.

Risks:

Radon is a naturally occurring volatile gas formed from the normal radioactive decay of uranium. It is colorless, odorless, tasteless, chemically inert, and radioactive. Exposure to radon and its progeny is believed to be associated with increased risks of several kinds of cancer. When radon or its progeny are inhaled, lung cancer accounts for most of the total incremental cancer risk. Ingestion of radon in water is suspected of being associated with increased risk of tumors of several internal organs, primarily the stomach. As required by the SDWA, as amended, EPA arranged for the National Academy of Sciences (NAS) to assess the health risks of radon in drinking water. The NAS Report represents a comprehensive assessment of scientific data gathered to date on radon in drinking water. The report, in general, confirms earlier EPA scientific conclusions and analyses of radon in drinking water.

The NAS Report is one of the most important inputs used by EPA in its regulatory impact analysis. EPA has used the NAS's assessment of the cancer risks from radon in drinking water to estimate both the health risks posed by existing levels of radon in drinking water and also the cancer deaths prevented by reducing radon levels.

EPA

147. NATIONAL PRIMARY DRINKING WATER REGULATIONS: ARSENIC AND CLARIFICATIONS TO COMPLIANCE AND NEW SOURCE CONTAMINANT MONITORING

Priority:

Economically Significant. Major under 5 USC 801.

Unfunded Mandates:

This action may affect State, local or tribal goverments and the private sector.

Legal Authority:

42 USC 300f SDWA 1412

CFR Citation:

40 CFR 141(Revision); 40 CFR 142 (Revision)

Legal Deadline:

NPRM, Statutory, January 1, 2000.

Final, Statutory, June 22, 2001.

Abstract:

On January 22, 2001, EPA published a final Arsenic Rule (66 FR 6975). On March 23, 2001, EPA published a notice delaying the effective date of the final Arsenic Rule from March 23, 2001, to May 22, 2001 (66 FR 16134), in accordance with a January 20, 2001, memorandum from the Assistant to the President and Chief of Staff, entitled Regulatory Review Plan, (published in the Federal Register on January 24, 2001). The 60-day delay in effective date was necessary to give Agency officials the opportunity for further review and to consider the new rule. On May 22, 2001, EPA published a rule that further delayed the effective date of the final Arsenic Rule from May 22, 2001, to February 22, 2002 (66 FR

20579). As its next step in the process of reviewing the final Arsenic Rule, on July 19, 2001, EPA published a proposal for comment on a range of arsenic maximum contaminant level options from 3 ppb to 20 ppb to facilitate Agency review of the January 22, 2001 rule.

Statement of Need:

The 1996 amendments to the Safe Drinking Water Act require EPA to determine whether the costs of regulation would justify the benefits, including consideration of nonquantifiable benefits. In addition, EPA must determine the incremental costs and benefits of alternatives considered that do not include what would occur from compliance with other proposed or final regulations. If the costs do not justify the benefits, the Administrator may choose to raise the MCL to a level still protective of health at which costs do justify the benefits. The 1999 report issued by the National Academy of Sciences (NAS) definitely implicated inorganic arsenic's effects on bladder, lung, and skin cancer. Based on data that existed at that time, NAS urged EPA to lower the drinking water standard as soon as possible.

Summary of Legal Basis:

1412(b)(12) CERTAIN CONTAMINANTS.

(A) ARSENIC.: i) SCHEDULE AND STANDARD.— notwithstanding the deadlines set forth in paragraph (1), the Administrator shall promulgate a national primary drinking water regulation for arsenic pursuant to this subsection, in accordance with the schedule established by this paragraph.

(ii) STUDY PLAN.— Not later than 180 days after the date of enactment of this paragraph, the Administrator shall develop a comprehensive plan for study in support of drinking water rulemaking to reduce the uncertainty in assessing health risks associated with exposure to low levels of arsenic. In conducting such study, the Administrator shall consult with the National Academy of Sciences, other Federal agencies, and interested public and private entities.

(iii) COOPERATIVE AGREEMENTS.— In carrying out the study plan, the Administrator may enter into cooperative agreements with other Federal agencies, State and local governments, and other interested public and private entities.

(iv) PROPOSED REGULATIONS.— The Administrator shall propose a national primary drinking water regulation for arsenic not later than January 1, 2000.

(v) FINAL REGULATIONS.— Not later than January 1, 2001, after notice and opportunity for public comment, the Administrator shall promulgate a national primary drinking water regulation for arsenic.

(vi) AUTHORIZATION.— There are authorized to be appropriated $2,500,000 for each of fiscal years 1997 through 2000 for the studies required by this paragraph.

Also see: 1412(b)(4)(E)(ii) for listing small system technologies 1412(b)(4)(C) for requiring analysis of whether costs justify benefits 1412(b)(3)(C)(i) for other requirements for the cost-benefit analyses 1412(b)(15) for small system variance technologies, if, considering the source water, no treatment technology is listed.

Alternatives:

EPA proposed an MCL of 5 ug/L for arsenic and requested comment on MCL options of 3, 10, and 20 ug/L. EPA provided benefit analyses of each of these alternatives, measured as reducing drinking water arsenic from the current standard of 50 ug/L. This proposal lists affordable technologies for small systems, as required by the 1996 amendments to the statute. Because EPA identified affordable compliance technologies for all small system sizes, EPA did not list small system variance technologies.

Anticipated Cost and Benefits:

As discussed in the January 2001 Arsenic Rule, at a seven percent discount rate, the Arsenic Rule would be expected to have a total annualized cost of $792.1 million for a MCL of 3 ug/L, $471.7 million for a MCL 5 ug/L, $205.6 million for a MCL of 10 ug/L, and $76.5 million for a MCL of 20 ug/L. The Arsenic Rule would have total health benefits as a result of avoided bladder and lung cancer cases of approximately $213.8 to $490.9 million if the MCL were set at 3 ug/L, $191.1 to $355.6 million if the MCL were set at 5 ug/L, $139.6 to $197.7 million if the MCL were set at 10 ug/L, and $66.2 to $75.3 million if the MCL were set at 20 ug/L. These monetized health benefits of reducing arsenic exposures in drinking water are attributable to the reduced incidence of fatal and non-fatal bladder cancer and lung cancer. Under baseline assumptions (no control of arsenic exposure), there are annual fatal cancers and non-fatal cancers associated with arsenic exposures through CWSs. At an arsenic MCL level of 3 ug/L, an estimated 33 to 74 fatal cancers and 25 to 64 non-fatal cancers per year are prevented; at a arsenic level of 5 ug/L, an estimated 29 to 54 fatal cancers and 22 to 47 non-fatal cancers per year are prevented; at 10 ug/L, 21 to 30 fatal and 16 to 26 non-fatal cancers per year are prevented; and at 20 ug/L, 10 to 11 fatal and approximately 9 non-fatal cancers per year are prevented. In addition to quantifiable benefits, many potential non-quantifiable benefits associated with reducing arsenic exposures in drinking water have been identified. These potential benefits were not able to be quantified for the January 2001 Rule, but may include reduced risk of skin cancer and numerous non-cancerous health effects. In addition, certain non-health related benefits may exists, such as ecological improvements and an increase in consumers' perception of drinking water. The cost/benefit analysis for the Arsenic Rule is being revised.

Risks:

According to the 1999 report issued by the National Academy of Sciences, the risk of male bladder cancer at the current standard is 1 to 1.5 additional cancers per thousand people, or 1-1.5x10-3, based on a linear approach.

EPA

148. CROSS-MEDIA ELECTRONIC REPORTING (ER) AND RECORDKEEPING RULE

Priority:

Economically Significant

Legal Authority:

PL 104-13; PL 105-277

CFR Citation:

40 CFR 3 (New); 40 CFR 9 (Revision)

Legal Deadline:

None

Abstract:

The Cross-Media Electronic Reporting (ER) and Recordkeeping Rule will provide a uniform legal framework for paperless electronic reporting and recordkeeping, including electronic signature/ certification, across EPA's environmental compliance programs. The rule will remove current legal requirements for paper and provide for mechanisms to assure the validity and authenticity of electronic documents and associated electronic signatures, whether transmitted as reports or maintained as records. This rule is important because of the Government Paperwork Elimination Act of 1998 requirements and the Administrator's Reinventing Environmental Information (REI) Action Plan goal of universal ER availability by 2003.

Statement of Need:

EPA is required by the Government Paperwork Elimination Act (GPEA) of 1998 to provide electronic reporting and recordkeeping as an option to its regulated community by 2003. To meet this deadline and comply with GPEA, the framework for electronic reporting must be in place by that time. The CROMERR rule would establish a framework to remove obstacles to electronic reporting and recordkeeping under most EPA regulations. Electronic government is also a capstone of the President's Management Agenda.

Summary of Legal Basis:

(1) Government Paperwork Elimination Act (GPEA) of 1998. GPEA requires Federal agencies to provide electronic reporting and recordkeeping to its regulated community by 2003.

(2) Electronic Signature National and Global Commerce Act (ESIGN), June 30, 2000. This law eliminates legal barriers to the use of electronic technology to form and sign contracts, collect and store documents, and send and receive notices and disclosures. ESIGN applies broadly to Federal statutes and regulations governing private sector (including business-to-business and business-to-consumer) activities. In general, it does not cover activities that are primarily governmental, which are governed by GPEA. ESIGN begins to take effect on October 1, 2000.

Alternatives:

Two alternatives to an EPA cross-media rule that applies to most compliance reports under 40 CFR, would include: (1) a business-as-usual approach to electronic recordkeeping with additional rulemaking to cover electronic reporting; or (2) individual rulemakings by each of the program offices. EPA's past experience with such rulemakings has demonstrated that such a course of action may be less effective in bringing EPA into compliance with GPEA by the 2003 deadline.

Risks:

The risks are undetermined.

BILLING CODE 6560–50–S

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION (EEOC)

Statement of Regulatory and Deregulatory Priorities

The Equal Employment Opportunity Commission (EEOC) enforces six statutes prohibiting discrimination in employment. Title VII of the Civil Rights Act of 1964, as amended, prohibits employment discrimination on the basis of race, color, sex, religion, or national origin. The Equal Pay Act of 1963, as amended, prohibits the payment of different wages to women and men working in the same establishment, performing equal work that requires equal skill, effort, and responsibility under similar working conditions, unless the pay differential is based on a factor(s) other than sex. The Age Discrimination in Employment Act of 1967 (ADEA), as amended, prohibits employment discrimination on the basis of age against people age 40 and older. Title I of the Americans with Disabilities Act of 1990 (ADA), as amended, prohibits employment discrimination against qualified individuals with disabilities. Sections 501 and 505 of the Rehabilitation Act of 1973, as amended, prohibit Federal agencies from discriminating in employment against qualified individuals with disabilities and require agencies to accommodate the special needs of persons with disabilities. The Government Employee Rights Act of 1991 extends protections against employment discrimination to certain employees who were not previously covered.

The mission of the Agency is to ensure equality of opportunity by vigorously enforcing Federal legislation prohibiting discrimination in employment. Enforcement is accomplished through investigation, conciliation, alternative methods of dispute resolution, litigation, coordination, and regulation, as well as by education, policy research, and technical assistance. In pursuing its mission of eradicating discrimination in the workplace, the Commission intends that its enforcement be certain and predictable and that its remedies be preventive and remedial in scope.

One important step toward these ends is to make sure that employees, employers, and union representatives understand their rights and obligations under the Federal laws prohibiting employment discrimination. In accordance with the President's national regulatory principles, EEOC develops regulations necessary to inform employees and employers of their rights and obligations under the statutes it enforces. EEOC further educates the public on an ongoing and proactive basis through interpretive guidelines, policy documents, management directives, and other public guidance programs.

EEOC is currently considering one significant action of a regulatory nature. It has been published for public comment.

The significant action of a regulatory nature that the Commission proposes is amendment of its regulation governing Federal sector equal employment opportunity, 29 CFR 1614.203, to reflect the 1992 amendment of section 501 of the Rehabilitation Act of 1973. Congress amended section 501 to state that the nondiscrimination standards of title I of the Americans with Disabilities Act apply to complaints under section 501 of the Rehabilitation Act. The proposed rule is titled "Federal Sector Equal Employment Opportunity" and was published for public comment (NPRM) on March 1, 2000, 65 FR 11019.

(Consistent with section 4(c) of Executive Order 12866, this statement was reviewed and approved by the Chair of the Agency. The statement has not been reviewed or approved by the other members of the Commission).

EEOC

FINAL RULE STAGE

---

149. FEDERAL SECTOR EQUAL EMPLOYMENT OPPORTUNITY

Priority:

Other Significant

Legal Authority:

PL 102-569, The Rehabilitation Act Amendments of 1992; 42 USC 2000e-16; 29 USC 794a

CFR Citation:

29 CFR 1614

Legal Deadline:

None

Abstract:

The Commission proposes to change its Federal sector equal employment opportunity regulations to implement the Rehabilitation Act Amendments of 1992. The 1992 amendments provide that the standards used to determine if title I of the Americans with Disabilities Act has been violated will apply to complaints of nonaffirmative action employment discrimination under section 501 of the Rehabilitation Act.

Statement of Need:

The Commission promulgated its latest regulation under section 501 of the Rehabilitation Act in April 1992, several months before Congress enacted the 1992 Rehabilitation Act Amendments. The Commission is thus proposing to amend its section 501 regulation, found at 29 CFR 1614.203, to implement the Rehabilitation Act Amendments.

Summary of Legal Basis:

Pursuant to sections 501 and 505 of the Rehabilitation Act, the Commission is authorized to issue such regulations as it deems necessary to carry out its responsibilities under the Act. The proposed regulatory revisions are not required by statute or court order.

Alternatives:

The Commission has reviewed comments and has considered suggested alternatives in developing this regulatory proposal.

Anticipated Cost and Benefits:

The proposed regulatory changes will enhance enforcement of the statutory requirements. Federal agencies and individuals will have a clearer understanding of their respective obligations and rights under the Rehabilitation Act. It is not anticipated that this proposal will result in increased costs.

Risks:

The proposed regulatory changes will lessen the risk of noncompliance with statutory requirements by identifying and providing detailed guidance on the appropriate legal standards governing Federal sector claims of nonaffirmative action employment discrimination under section 501 of the Rehabilitation Act. This proposal does not address risks to public health, safety, or the environment.

GENERAL SERVICES ADMINISTRATION (GSA)

Statement of Regulatory and Deregulatory Priorities

The General Services Administration (GSA) establishes Governmentwide policy for construction and operation of buildings, procurement and distribution of supplies, travel and transportation, acquisition, information technology and electronic commerce, management of advisory committees, and utilization and disposal of real and personal property.

GSA's fiscal year 2002 regulatory priorities are to complete production of the Federal Management Regulation (FMR) and to finish rewriting the Federal Travel Regulation. The FMR is being written to replace the Federal Property Management Regulations (FPMR); as each part of the FMR is published, the corresponding parts of the FPMR will be removed.

The FTR and FMR are intended to make GSA's regulations consistent and sensible and to limit the regulatory burden on Government officials and the public. GSA is rewriting them in a question and answer format to make them easier to read and understand, and non-regulatory guidance is being moved into other, less formal publications such as customer service guides.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION (NASA)

Statement of Regulatory Priorities

The National Aeronautics and Space Administration (NASA) was established by the National Aeronautics and Space Act of 1958 (the Act), 42 United States Code (U.S.C.) 2451 *et seq.*, which laid the foundation for NASA's mission. The Act authorizes NASA, among other things, to conduct space activities devoted to peaceful purposes for the benefit of humankind; to preserve the leadership of the United States in aeronautics and space science and technology; and to expand knowledge of the Earth and space. To carry out this mission, NASA is authorized to conduct research for the solution of problems of flight within and outside the Earth's atmosphere; to develop, construct, test, and operate aeronautical and space vehicles for research purposes; to operate space transportation systems, including the Space Shuttle and the International Space Station; and to perform such other activities as may be required for the exploration of space. NASA conducts activities required for the exploration of space with human-tended, robotic, and expendable vehicles and arranges for the most effective utilization of the scientific and engineering resources of the United States with other nations engaged in aeronautical and space activities for peaceful purposes.

NASA's mission, as documented in its 2000 Strategic Plan, is to advance and communicate scientific knowledge and understanding of the Earth, the solar system, and the universe; to advance human exploration, use, and development of space; and to research, develop, verify, and transfer advanced aeronautics and space technologies.

The following are narrative descriptions of the most important regulations being planned for publication in the **Federal Register** during fiscal year (FY) 2002.

The Federal Acquisition Regulation (FAR), 48 CFR chapter 1, contains procurement regulations that apply to NASA and other Federal agencies. NASA implements and supplements FAR requirements through the NASA FAR Supplement (NFS), 48 CFR chapter 18. Major revisions are not expected in FY 2002, except to conform to FAR changes that are currently being promulgated in part 12, Acquisition of Commercial Items; part 45, Government Property; part 30, Cost Accounting Standards Administration; and part 27, Patents, Data, and Copyrights.

In a continuing effort to keep the NFS current with NASA initiatives and Federal procurement policy, minor revisions to the NFS will be published. For instance, NASA is working on enhancing its risk-centered approach to acquisition by ensuring that all contracts address safety and also by applying it to non-contract instruments such as grants and cooperative agreements. NFS regulations addressing Acquisition of Investigations, part 1872, will be amended to incorporate NASA's risk-centered approach to acquisition, including safety, and to update guidance.

Additionally, NASA's risk-centered approach to acquisition includes security of unclassified information technology (IT) resources and dissemination of data produced or used in performance of research and development (R&D) contracts. The NFS will be amended to clarify NASA's requirements for IT security and the review requirements for data produced under R&D contracts including data contained in final reports.

To reduce the time and cost spent by the Agency and our industry partners in the procurement of basic and applied research under cooperative agreements, NASA is focusing on streamlining our processes. To go forward in this effort, regulations governing Cooperative Agreements with Commercial Firms at 14 CFR part 1274 will be rewritten to incorporate improvements and policy consistent with other NASA initiatives.

NASA is continuing consideration of revisions to the cross-waiver of liability regulation at 14 CFR part 1266. Specifically, NASA is considering implementation of the cross-waiver of liability provision of the intergovernmental agreement of the International Space Station and refinement and clarification of contractual cross-waivers in NASA agreements involving launch services.

BILLING CODE 7510-01-S

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION (NARA)

Statement of Regulatory Priorities

The National Archives and Records Administration (NARA) issues regulations directed to other Federal agencies and to the public. Records management regulations directed to Federal agencies concern proper management and disposition of Federal records. Through the Information Security Oversight Office (ISOO), NARA also issues Governmentwide regulations concerning information security classification and declassification programs. NARA regulations directed to the public address access to and use of our historically valuable holdings, including archives, donated historical materials, Nixon Presidential materials, and Presidential records. NARA also issues regulations relating to the National Historical Publications and Records Commission (NHPRC) grant programs.

NARA's regulatory priorities for fiscal year 2002 are: (1) updating and rewriting in plain language our research room regulations in 36 CFR part 1254; (2) evaluating possible revisions to 36 CFR part 1234 relating to electronic text documents; (3) revising regulations on transfer of electronic records to the National Archives of the United States to allow additional transfer media; and (4) updating and streamlining NARA regulations relating to the National Historical Publications and Records Commission grant program.

BILLING CODE 7515-01-S

OFFICE OF PERSONNEL MANAGEMENT (OPM)

Statement of Regulatory Priorities

As the Federal Government's human resource and personnel manager, the Office of Personnel Management's (OPM) regulatory priorities for the coming year will focus on human resource management reforms and flexibilities that will enable the Federal Government to recruit, manage, and retain the high-quality, diverse workforce needed by departments and agencies to deliver their respective missions to the American people.

The *President's Management Agenda* recognizes the critical role that human resources management must play in reforming Government, identifying it as one of five core Governmentwide strategies. It is, after all, the people who work in Government who are key to delivering citizen-centered, results-oriented, and market-based services to the American people. Consistent with its core mission, OPM anticipates a central role in implementing the *President's Management Agenda*—particularly its focus on strategic management of human capital—and stands ready to advance the agenda by way of regulation as necessary and appropriate.

Since the events of September 11, 2001, OPM's activities have focused primarily on five broad Administration priorities. We anticipate that OPM's regulatory activity over the next year will serve to facilitate implementation of the President's priorities.

War on Terrorism

Immediately following the terrorist attacks on the Pentagon and the World Trade Center, the Director of OPM communicated to all Federal departments and agencies her ability and desire to work closely with them to address immediate personnel needs. To that end, OPM has helped agencies fill the emergency vacancies in essential positions by providing flexibilities and facilitating the return to the workforce of Federal retirees wanting to help in the emergency. OPM also has worked to speed benefits to the victims of the attacks and their families, has provided guidance on helping employees deal with the traumatic events, and is serving as a central point to facilitate communication regarding anthrax and other bioterrorism threats.

In addition, OPM has provided guidance and assistance to the Office of Homeland Security on staffing issues, and intends to facilitate the placing of personnel to assist in accomplishing its mission. Congress presently is considering legislation on airport security. Regardless of whether or not airport security personnel are made Federal employees, OPM anticipates working closely with whatever department or agency is given oversight responsibility.

On all these issues, to the extent regulatory action is needed, we stand ready to promulgate regulations to facilitate successful pursuit of America's war on terrorism.

Managerial Flexibilities Act

Anticipated passage of the President's Managerial Flexibilities Act of 2001 will require OPM to promulgate new, or modify existing, regulations to implement employment restructuring assistance; voluntary early retirement; recruitment and retention incentives; results-oriented performance evaluation and compensation for senior executives; human resources management innovations; and hiring flexibilities.

Outsourcing

OPM is examining ways the private sector can add to mission delivery. OPM already has privatized two service areas—investigations and training. OPM further intends to convert positions in the Employment Service Technology Support Center to the private sector over a five-year period. We also will examine all Federal Retirement Program functions that are comparable to functions performed by commercial entities. The most sweeping long-term change under study is a comprehensive review of OPM's reimbursable services to determine if a different structure based on increased reliance on private-sector providers would be more cost-efficient.

Delayering and Restructuring

To improve OPM's organization to better deliver services to the Federal workforce, our agency customers and the American people, OPM anticipates a sweeping restructuring plan that dramatically redesigns the agency. The new plan will result in a significantly flatter, more streamlined agency that is much better positioned to focus on customer service and strategically aligned to help the President carry out his agenda. Supervisory ratios will be increased, and employees redeployed to service delivery by centralizing internal functions and terminating programs when their missions have been completed. Most of this can be done administratively, without the need for further regulatory action. However, to the extent program functions are defined by regulation, they will have to be promulgated, modified, or eliminated.

e-Government

OPM is the lead agency on three of the e-Government initiatives recently announced by OMB to accelerate Federal Government improvements in effectiveness, efficiency, and customer service. OPM is responsible for e-Training, Recruitment One-Stop, and Enterprise HR Integration. OPM currently is examining the necessary regulatory efforts needed to implement these programs.

The Office of Personnel Management will continue to accept the challenge of improving our human resource management systems in order to attract and keep the best possible talent, to promote fairness and diversity, to preserve the merit-based civil service system that serves as the cornerstone of our Democracy, and to create a Government that truly serves and produces results for our citizens.

OPM

FINAL RULE STAGE

---

150. • RETENTION ALLOWANCES

Priority:

Other Significant. Major under 5 USC 801.

Legal Authority:

5 USC 5754

CFR Citation:

5 CFR 575, subpart C

Legal Deadline:

None

Abstract:

These final regulations would provide agencies with greater flexibility in the use of retention allowances by allowing them to pay such allowances to employees who are likely to leave their position for other Federal employment under certain limited circumstances.

Statement of Need:

Agencies have specifically requested this regulatory change to provide them with additional flexibility to help retain Federal employees.

Summary of Legal Basis:

The governing United States Code provision is 5 U.S.C. 5754.

Alternatives:

Other alternatives, such as authorizing the use of special salary rates, were considered and rejected because they were either inappropriate, too costly, or did not offer the flexibility the agencies were seeking

Anticipated Cost and Benefits:

The final regulations would help agencies retain critical employees and avoid the costs related to employee turnover (e.g., reduced productivity, increased or prolonged recruitment actions, training new employees). Because the final regulations expand the circumstances under which retention allowances may be paid, it is possible that the costs associated with these payments may increase. However, since agencies have the discretion to use this incentive, we cannot specifically predict or quantify these costs.

Risks:

These final regulations would delegate to agencies increased authority to pay retention allowances to employees under certain limited circumstances. Through our monitoring and oversight activities, we will continue to ensure that agencies do not violate the merit system principles and prohibited personnel practices under 5 U.S.C. 2301 and 2302 when using these new authorities.

PENSION BENEFIT GUARANTY CORPORATION (PBGC)

Statement of Regulatory and Deregulatory Priorities

PBGC Insurance Programs

The Pension Benefit Guaranty Corporation (PBGC) administers two insurance programs for private defined benefit plans under title IV of the Employee Retirement Income Security Act of 1974 (ERISA): A single-employer plan termination insurance program and a multiemployer plan insolvency insurance program. The PBGC protects the pensions of nearly 43 million working men and women in about 38,000 private defined benefit plans, including about 1,800 multiemployer plans.

Under the single-employer program, the PBGC pays guaranteed and certain other pension benefits to participants and beneficiaries if their plan terminates with insufficient assets (distress and involuntary terminations). At the end of fiscal year 2000, the PBGC was trustee of almost 2,900 plans and paid $903 million in benefits to about 244,000 people during 2000. Another 314,000 people will receive benefits when they retire in the future.

Most terminating single-employer plans terminate with sufficient assets to pay all benefits. The PBGC has administrative responsibility for these terminations (standard terminations), but its role is limited to seeing that proper procedures are followed and participants and beneficiaries receive their plan benefits.

The multiemployer program (which covers about 9 million workers and retirees in about 1,750 insured plans) is funded and administered separately from the single-employer program and differs in several significant ways. The multiemployer program covers only collectively bargained plans involving more than one unrelated employer. The PBGC provides financial assistance (in the form of a repayable loan) to the plan if the plan is unable to pay benefits at the guaranteed level. Guaranteed benefits are generally less than a participant's full benefit under the plan (and less than the single-employer guaranteed benefit). PBGC financial assistance occurs infrequently.

The PBGC receives no funds from general tax revenues. Operations are financed by insurance premiums, investment income, assets from pension plans trusteed by the PBGC, and recoveries from the companies formerly responsible for the trusteed plans.

To carry out these functions, the PBGC must issue regulations interpreting such matters as the termination process, establishment of procedures for the payment of premiums, and assessment and collection of employer liability.

Objectives and Priorities

PBGC regulatory objectives and priorities are developed in the context of the statutory purposes of title IV: (1) to encourage voluntary private pension plans, (2) to provide for the timely and uninterrupted payment of pension benefits to participants and beneficiaries, and (3) to maintain the premiums that support the insurance programs at the lowest possible levels consistent with carrying out the PBGC's statutory obligations (ERISA section 4002(a)).

The PBGC implements its statutory purposes by developing regulations designed: (1) to assure the security of the pension benefits of workers, retirees, and beneficiaries; (2) to improve services to participants; (3) to ensure that the statutory provisions designed to minimize losses for participants in the event of plan termination are effectively implemented; (4) to encourage the establishment and maintenance of defined benefit pension plans; (5) to facilitate the collection of monies owed to plans and to the PBGC, while keeping the related costs as low as possible; and (6) to simplify the termination process.

Regulatory and Deregulatory Initiatives

The PBGC has focused on changes that would simplify the rules and reduce regulatory burden. For example, over the past few years, the PBGC:

- Reduced penalties for late premiums that are paid before the PBGC notifies the plan of the delinquency.
- Extended the time limits for various actions required to terminate a fully funded single-employer plan in a standard termination.
- Stopped the reduction of monthly benefits under its actuarial recoupment method once the nominal amount of the benefit overpayment is repaid.
- Provided participants with benefits valued up to $5,000 in PBGC-trusteed plans with the choice of receiving their benefit in the form of an annuity or a lump sum.
- Extended the filing date for PBGC premiums to match the latest Form 5500 filing date.
- Encouraged self-correction of premium underpayments by making it easier to qualify for safe-harbor penalty relief.
- Simplified its valuation assumptions by adopting a single set of assumptions for allocation purposes.
- Assured the public that it intended to continue to calculate and publish its lump sum interest rates indefinitely and amended its regulations to make it easier for practitioners to refer to those rates.
- Solicited public comment on benefit valuation and payment issues relating to terminated cash balance plans that use variable indices to determine future retirement benefits.

In FY 2001, the PBGC:

- Amended its premium regulation to allow plan administrators to pay a prorated premium for a short plan year rather than paying a full year's premium and requesting a refund (final rule, December 1, 2000).
- Amended its premium regulation to simplify and narrow the definition of "participant" for PBGC premium purposes (final rule, December 1, 2000).
- Simplified its premium forms by introducing a new "Form 1-EZ" for use by single-employer plans that are exempt from the PBGC's variable-rate premium.
- Proposed to amend its benefit payments regulations to give participants more choices of annuity benefit forms, to clarify what it means to be able to "retire" under plan provisions for certain purposes under title IV of ERISA, and to add rules on who will get certain payments the PBGC owes to a participant at the time of death (proposed rule, December 26, 2000).
- Published a proposed penalty policy to provide guidance on assessment and review of penalties and on what constitutes "reasonable cause" for a penalty waiver (proposed rule, January 12, 2001).

The PBGC is continuing to review its regulations to look for further simplification opportunities. The PBGC's regulatory plan for October 1, 2001, to September 30, 2002, consists of one significant regulatory action.

PBGC

PROPOSED RULE STAGE

---

151. ALLOCATION OF ASSETS IN SINGLE-EMPLOYER PLANS; VALUATION OF BENEFITS AND ASSETS

Priority:

Other Significant

Legal Authority:

29 USC 1302(b)(3); 29 USC 1341; 29 USC 1301(a); 29 USC 1344; 29 USC 1362

CFR Citation:

29 CFR 4044, subpart B

Legal Deadline:

None

Abstract:

The Pension Benefit Guaranty Corporation is considering amending its benefit valuation and asset allocation regulations by adopting more current mortality tables and otherwise simplifying and improving its valuation assumptions and methods.

Statement of Need:

The PBGC's regulations prescribe rules for valuing a terminating plan's benefits for several purposes, including (1) determining employer liability and (2) allocating assets to determine benefit entitlements. The PBGC's interest assumption for valuing benefits, when combined with the PBGC's mortality assumption, is intended to reflect the market price of single-premium, nonparticipating group annuity contracts for terminating plans. In developing its interest assumptions, the PBGC uses data from surveys conducted by the American Council of Life Insurers. The PBGC currently uses a mortality assumption based on the 1983 Group Annuity Mortality Table in its benefit valuation and asset allocation regulations (29 CFR parts 4044 and 4281).

In May 1995, the Society of Actuaries Group Annuity Valuation Table Task Force issued a report that recommends new mortality tables for a new Group Annuity Reserve Valuation Standard and a new Group Annuity Mortality Valuation Standard. In December 1996, the National Association of Insurance Commissioners adopted the new tables as models for determining reserve liabilities for group annuities. The PBGC is considering incorporating these tables into its regulations and making other modifications.

Summary of Legal Basis:

The PBGC has the authority to issue rules and regulations necessary to carry out the purposes of title IV of ERISA.

Alternatives:

Not yet determined.

Anticipated Cost and Benefits:

Cost estimates are not yet available. However, the PBGC expects that this regulation will not have a material effect on costs.

Risks:

Not applicable.

BILLING CODE 7709-01-S

SMALL BUSINESS ADMINISTRATION (SBA)

Statement of Regulatory Priorities

Overview

The Small Business Administration (SBA) is America's small business resource. SBA's mission is to promote and deliver financial and business development programs to America's entrepreneurs in the most efficient and effective manner possible.

With a portfolio of guaranteed business and disaster loans, SBA is the Nation's largest single financial backer of small businesses. Through our financial assistance programs, each year, SBA seeks to serve small companies by facilitating access to capital and credit. The SBA also helps entrepreneurs to start and grow their businesses through its resource-partner programs.

SBA is committed to:

- Listening to small businesses to make sure SBA is meeting the needs of the small business community;
- Working with its financial partners to improve small business access to capital through SBA's loan and venture capital programs;
- Providing technical assistance and guidance through its entrepreneurial development partners 24 hours a day;
- Establishing new and strengthening existing its public and private partnerships to encourage greater contracting and business opportunities for small businesses.
- Measuring outcomes, such as revenue growth, job creation, and business longevity, to ensure SBA operates its programs in an efficient and effective manner.

SBA's regulatory priorities for the coming year will focus on strengthening SBA's management of programs, streamlining its HUBZone Program, and increasing opportunities for women-owned businesses.

SBA's Regulatory Plan

Small Business Lending Company Regulations

SBA is currently drafting proposed regulations that will strengthen the Agency's management and oversight of the Small Business Lending Company (SBLC) Program. SBA guarantees loans through approximately 7,000 lenders, of which 14 are SBLCs that are not otherwise regulated by Federal or State authorities. Further, consistent with congressional and Administration policy, certain SBA lenders are delegated authority to make credit decisions on loans guaranteed by SBA. At the present time, all of the SBLCs are preferred lenders with authority to make such credit decisions. The SBLCs hold approximately 20 percent of the outstanding loans guaranteed by SBA and are subject to safety and soundness examinations by SBA on a 12 to 24 month cycle. This rulemaking will clarify and strengthen the existing rules governing SBLCs in the areas of monitoring, oversight and enforcement, safe and sound operations, and compliance with SBA regulations.

HUBZone Empowerment Contracting Program

SBA is proposing regulations that will incorporate changes enacted by Public Law 106-554. The amended regulations will address eligibility requirements for small business concerns owned by Native American Tribal Governments and Community Development Corporations and the addition of new HUBZone areas called redesignated areas. The proposed amendments will streamline the program to make it more efficient.

The Women-Owned Small Business Federal Contract Assistance Program

SBA is currently drafting regulations that will implement a "restricted competition" procurement program for women-owned small businesses (WOSB). It will contain provisions about how a WOSB can be certified to participate in the program, who is eligible, and how protests will be handled. Specifically, section 8(m) of the Small Business Act limits the contracting officer's authority to restrict competition to contracts not exceeding $3 million for services or $5 million in manufacturing. This proposed rule would establish a WOSB Federal Contract Assistance Program to be administered by the Office of Federal Contract Assistance for Women Business Owners within the SBA's Office of Government Contracting. This proposed rule would also encourage contracting officers to include a subcontracting participation evaluation factor in solicitations to evaluate the participation of certain small businesses in contract performance.

SBA

PROPOSED RULE STAGE

---

152. SMALL BUSINESS LENDING COMPANIES REGULATIONS

Priority:

Other Significant

Legal Authority:

15 USC 634(b)(6); 15 USC 636(a); 15 USC 636(b)

CFR Citation:

13 CFR 120.470

Legal Deadline:

None

Abstract:

This rulemaking would amend 13 CFR 120.470 to clarify and strengthen the rules regarding Small Business Lending Companies (SBLCs) monitoring and oversight for safety and soundness, compliance, and related areas.

Statement of Need:

Section 7(a) of the Small Business Act states that the Small Business Administration (SBA) may provide financing to small businesses "directly or in cooperation with banks or other financial institutions." Today, SBA guarantees loans through approximately 7,000 lenders. Of these lenders, about 14 are Small Business Lending Companies (SBLCs) that are not otherwise regulated by Federal or State chartering, licensing, or similar regulatory control. SBA examines or audits these SBLCs periodically. Congressional and Administration policy to privatize SBA lending and levels in loan volume require that SBA increase its SBLC oversight. To that end, SBA will draft regulations that strengthen the Agency's management of the SBLC Program.

Summary of Legal Basis:

Not required by statute or court order.

Alternatives:

This rulemaking amends and expands SBA's existing regulations on the SBLC Program.

Anticipated Cost and Benefits:

This rulemaking is designed to strengthen SBA's regulations regarding the SBLC Program. No additional costs to the Government or the SBLCs associated with this rulemaking will result.

Risks:

This regulation addresses no risks to the public health and safety or to the environment.

SBA

153. • THE WOMEN-OWNED SMALL BUSINESS FEDERAL CONTRACT ASSISTANCE PROGRAM

Priority:

Economically Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

15 USC 644(g)

CFR Citation:

13 CFR 127

Legal Deadline:

None

Abstract:

The Small Business Reauthorization Act of 2000 established a "restricted competition" procurement program for women-owned small businesses (WOSB). The SBA will add 13 CFR part 127 to implement this program. The Office of Contract Assistance for Women Business Owners (CAWBO) in the Office of Government Contracting is drafting proposed regulations to implement the program. The proposed rule is expected to be published in February 2002. It will contain provisions about how a WOSB can be certified to participate in the program, who is eligible, how protests will be handled, etc.

Statement of Need:

Women-owned businesses have long been regarded as the fastest growing segment of the United States business community. Although women-owned small businesses (WOSBs) in particular have increased by 78 percent between 1987 and 1996, almost twice the rate of growth of all U.S. businesses, they do not receive a commensurate share of Federal contracting dollars.

This disparity has continued despite several congressional and executive efforts over a number of years to increase Federal contracting with WOSBs. One effort that had no significant result was the 1979 Executive Order 12138 that charged Federal agencies with providing procurement assistance to WOSBs. Awards thereafter to WOSBs reached only 0.2 percent of all Federal procurements. Prior to the legislation implemented by the instant regulations, the most current legislation containing significant guidance to Federal agencies regarding increased awards with WOSBs is the Federal Acquisition Streamlining Act (FASA) of 1994. FASA established a target award of 5 percent of all Federal prime and subcontracting contract dollars to WOSBs. However, actual subsequent awards to WOSBs have never exceeded 2.5 percent of prime contract dollars and have not achieved 5 percent of subcontract dollars. In FY 2000, prime contract awards to WOSBs were below 2.3 percent of total Federal dollars, a drop from the percentage awarded to WOSBs in FY 1999.

Summary of Legal Basis:

On December 21, 2000, Congress enacted section 811 of the Small Business Reauthorization Act of 2000, Public Law 106-554, to provide contracting officials a mechanism that targeted Government programs for contracting with WOSBs. Section 811 amended the Small Business Act by adding a new section 8(m), 15 U.S.C. 637(m), authorizing contracting officers to restrict competition to eligible WOSBs for certain Federal contracts in industries that SBA has determined that WOSBs are under represented or substantially under represented in Federal procurement.

The new section 8(m) of the Small Business Act limits the contracting officer's authority to restrict competition to contracts not exceeding $3 million for services or $5 million in manufacturing. To implement the new section 8(m) of the Act, this proposed rule would establish a WOSB Federal Contract Assistance Program to be administered by the CAWBO within SBA's Office of Government Contracting. The program would be considered part of SBA's Government contracting programs set forth under part 125 of title 13 of the Code of Federal Regulations, for ease of reference, the proposed WOSB regulations would be contained in the new part 127 of title 13.

The proposed rule provides conforming amendments necessary to integrate the program into SBA's size and Government contracting regulations. The proposed rule would amend part 125.3 of the title 13 of the Code of Federal Regulations to encourage contracting officers to include a subcontracting participation evaluation factor in certain solicitations to evaluate the participation of certain small businesses in contract performance. This would provide consistency with the statutory mandate that small businesses, including WOSBs, have the maximum practicable opportunity to become subcontractors for Federal contracts exceeding $100,000 and that they be included in subcontracting plans required under section 8(d) of the Small Business Act, 15 U.S.C. 632(d).

Alternatives:

Prior to the implementation of the Women-Owned Small Business Federal Contract Assistance Program, the SBA has supported an increase in Federal prime and subcontracting to WOSBs through a number of avenues. SBA personnel from Headquarters and the district offices have provided training across the country to WOSBs through conference participation and individual counseling. Special efforts to provide this support and outreach to WOSBs have been made by the personnel of the SBA's Area Offices of the Office of Government Contracting. In addition, the Office of Government Contracting negotiates the yearly prime and subcontracting goals for WOSBs with other Federal agencies, encouraging each agency to award at least 5 percent in both prime and subcontracting dollars to WOSBs.

A major step toward an increase in Federal training and awards to WOSBs was the formation in early FY 2001 of the CAWBO. This office, part of the Office of Government Contracting, now has the primary responsibility for the yearly award of the Frances Perkins Award to deserving large businesses that have been exemplary in their support and subcontracting to WOSBs.

UMI
VOL
66
ISS
232
DE
3
2001
UMI

Through CAWBO, the Office of Government Contracting also continues to sponsor the Federal $ and Sense Program for Women, which requires Federal participants to provide procurement training and support to WOSBs through a variety of events. CAWBO personnel also work to assist WOSBs through regular meetings with Women's Advocates from most of the primary Federal agencies. Another CAWBO effort, in concert with the National Women's Business Counsel, to train and provide Federal procurement data to WOSBs has been the launch of a web site, www.WomenBiz.gov, which provides extensive information through the procurement material on-line and links to many related web sites.

These efforts to date have resulted in an increase in Federal prime contract awards to WOSBs from 0.2 percent in the early 1990s to a current 2.3 percent, but never higher than 2.5 percent. It is anticipated that the regulations contained in section 811 of the Small Business Reauthorization Act of 2000, Public Law 106-554, will now provide contracting officers a tool that will allow all agencies to reach awards of 5 percent in both prime and subcontracting to WOSBs.

Anticipated Cost and Benefits:

In October 2000, the CAWBO was established as part of the general reorganization of the Office of Government Contracting and Business Development (GC/BD). This was the beginning of FY 2001 and neither the salaries of the six members of CAWBO, nor any other CAWBO expenses, were included in the budget. However, CAWBO has the primary responsibility for implementing the regulations now in review. To the greatest extent possible, the program has been developed to utilize already existing SBA offices, personnel, and resources. Further, the cost of certification for WOSBs not currently eligible through another Federal program will be the responsibility of the applicants and will be performed in the private sector. Most of the personnel costs associated with this new program have been absorbed in FY 2001 by the Office of Government Contracting. Some additional new program costs, once regulations are approved, are overseeing the selection of certifiers for WOSBs, providing program evaluations for the certifiers and selected certified firms, and overseeing protests of certified or self-certified WOSBs. Development and ongoing costs of the tracking systems for certification and protest data are related expenses. An initial study and later reexamination of data regarding the percentages of Federal dollars being awarded in various industries to WOSBs is central to the program. Training of both WOSBs and the Federal contracting community about the new program is also paramount to the success of the program and will require some travel and related training aids.

Assistance from other SBA offices will continue to be required to support the legislation underlying this program. The initial reviews of protests will be done in the Area Offices of the Office of Government Contracting. The Office of the General Counsel has been instrumental in producing the regulations. Other agency offices are already participating in the development of program support functions. Thus, the expense of developing and implementing the regulations is being minimized through existing offices and use of private certifiers. And to the extent possible, cooperation with other agencies, the Federal procurement community, and use of the Internet for training also reduce the costs associated with the program.

Risks:

The primary risk related to the draft regulations for the Women-Owned Small Business Federal Contract Assistance Program is the possibility that the review and implementation of the regulations will not be within the time frame planned by the Agency. However, the regulations, when examined regarding their relationship to other SBA small business contracting and certification programs, should be complimentary to programs already in existence. This program for WOSBs addresses the segment of the small business community that has been statistically most underrepresented in Federal prime and subcontracting. Further, training and other support provided by SBA personnel for this and other SBA contracting programs will benefit all segments of the small business community. In addition to higher awards to WOSBs, this synergistic relationship among SBA contracting programs is expected to produce an increase in the total Federal prime and subcontracting percentages being awarded to all small businesses.

SBA

154. • HUBZONE EMPOWERMENT CONTRACTING PROGRAM

Priority:

Other Significant

Legal Authority:

15 USC 632(a); PL 105-135 sec 601 et seq; PL 106-554 sec 601 et seq

CFR Citation:

13 CFR 126

Legal Deadline:

None

Abstract:

SBA proposes to amend its regulations for the HUBZone Empowerment Contracting Program to incorporate changes enacted by Public Law 106-554. The amended regulation addresses eligibility requirements for small business concerns owned by Native American Tribal Governments and Community Development Corporations and the addition of new HUBZone areas called redesignated areas.

Statement of Need:

SBA must amend its HUBZone regulations in order to implement changes in the Small Business Act mandated by Public Law 106-553, to correct typographical errors and to streamline the program.

Summary of Legal Basis:

According to 15 U.S.C. section 657a, SBA's Administrator is charged with carrying out the HUBZone Program. On December 21, 2000, the President signed into law Public Law 106-554, which amends the HUBZone Program. To carry out the program, SBA must implement these statutory changes by amending its regulations.

Alternatives:

The Agency considered issuing policy notices explaining the changes to the statute. However, this is not sufficient because the current regulations do not address the statutory changes to the program and therefore, if the regulations are not amended, the public would be confused.

Anticipated Cost and Benefits:

The proposed amendments to the HUBZone regulation would simplify the program to make it more efficient. Therefore, the benefits would be quicker processing time of HUBZone applications.

Risks:

There is no risk to the Agency.

BILLING CODE 8025-01-S

SOCIAL SECURITY ADMINISTRATION (SSA)

Statement of Regulatory Priorities

The Social Security Administration (SSA) administers the retirement, survivors', and disability insurance programs under title II of the Social Security Act (the Act) and the Supplemental Security Income (SSI) program under title XVI of the Act. Generally, SSA's regulations do not impose burdens on the private sector or on State or local governments. Our regulations codify the requirements for eligibility and entitlement to benefits under the programs that we administer.

Our eight entries for The Regulatory Plan represent areas of major importance to the administration of the retirement, survivors', disability, and SSI benefit programs.

One of SSA's most important initiatives is to assure that Social Security Disability Insurance (SSDI) and Supplemental Security Income (SSI) beneficiaries with disabilities who want to work have the opportunity to do so. Included in this year's Plan is the final regulation that will provide more choices for people with disabilities who seek return-to-work services so that they may become self-sufficient. This regulation implements legislation, The Ticket to Work and Work Incentives Improvement Act of 1999, which removes barriers to work for individuals with disabilities.

An area of vital interest to the Agency is the continued improvement of the disability program. We are currently preparing a final regulation that implements elements of the redesigned disability claims process that have been tested and found to further redesign goals.

Providing the best service possible to our customers remains a principal objective of SSA. One of the items in the Plan, Expansion of the Use of Video Teleconference Technology in Hearings Before Administrative Law Judges of the Social Security Administration, is expected to improve customer service by providing faster access to a hearing.

Effective stewardship of SSA programs requires mechanisms to assure that benefits are used to meet the needs of beneficiaries who are not able to manage their own benefits due to legal incompetence or medical infirmity. A proposed regulation will define the amount of bonding necessary to provide adequate protection for our beneficiaries and the nature of licenses that are pertinent for organizational payees that are authorized to collect a fee for their services.

We have also included in this year's Plan, two regulations that provide SSA with additional tools to strengthen the integrity of the Social Security and SSI programs. One is a proposed regulation that implements a provision of the Foster Care Independence Act (FCIA) of 1999, authorizing SSA to obtain information from financial institutions in order to determine initial or continuing eligibility for SSI benefits. The other is a final regulation that implements another provision of the FCIA of 1999, which provides for the imposition by SSA of a penalty on any person for knowingly making false or misleading statements or misrepresenting a material fact for use in determining initial or continuing right to benefits.

Public Law 104-134, the Debt Collection Improvement Act of 1996, provided SSA with new tools to strengthen our efforts in collecting debts; one such provision concerns administrative wage garnishment. We are developing regulations, which will enable us to collect qualifying, delinquent title II and XVI debts owed by former beneficiaries who are now employed in other than Federal employment.

The final proposal on our Plan revises our privacy and disclosure rules to describe adequate safeguards against inappropriate disclosure of personal information, including electronic requests. In this same proposal, we revise our special procedures on access to medical records and add a new section about granting access to a minor's medical records for the minor's parent or legal guardian.

We continue to work diligently to improve our program and administrative regulations and to develop partnerships with large segments of the community of stakeholders interested in Social Security programs. We expect that these partnerships will contribute to the successful development of our Regulatory Plan entries.

SSA

PROPOSED RULE STAGE

---

155. PRIVACY AND DISCLOSURE OF OFFICIAL RECORDS AND INFORMATION (711P)

Priority:

Other Significant

Legal Authority:

5 USC 552; 5 USC 552a; 42 USC 1306(a); 42 USC 902(a)(5)

CFR Citation:

20 CFR 401.30; 20 CFR 401.45; 20 CFR 401.55; 20 CFR 401.150; 20 CFR 401.180

Legal Deadline:

None

Abstract:

We propose to revise our privacy and disclosure rules to:

1. Describe safeguards against inappropriate disclosure of personal information when individuals request information about themselves by electronic means (e.g., through the Internet);

2. Revise our special procedures on an individual's access to medical records;

3. Add a new section to grant direct access to a minor's medical records by the minor's parent or legal guardian acting on the minor's behalf; and

4. Fully describe the role and function of the Privacy Officer.

Statement of Need:

These revised regulations are necessary to:

1. Articulate the safeguards that ensure the appropriate procedures for access to and disclosure of personally identifiable information in the electronic environment;

2. Support the judicial interpretation which allows individuals whose medical records may potentially have an adverse effect to have access to this information;

3. Implement a consistent policy for both minors and adults in providing access to medical records; and

4. Provide the expanded regulatory support for the existing responsibilities and functions of the Privacy Officer as required by the Privacy Act and related Office of Management and Budget (OMB) guidelines.

Summary of Legal Basis:

Revisions to procedures for individual's access to medical records having a potentially adverse effect are required by Bavido v. Apfel, No. 98-4046, 2000 U.S. App. Lexis 13547, the Seventh Circuit.

Alternatives:

None.

Anticipated Cost and Benefits:

1. Description of safeguards against inappropriate disclosure of personal information by electronic means:

a. Cost—none.

b. Benefit—Increase public awareness of the safeguards employed by SSA to maintain the security, confidentiality, and integrity of the information we collect and maintain.

2. Revise our special procedures on an individual's access to medical records; and

3. Add a new section to grant direct access to a minor's medical records by the minor's parent or legal guardian acting on the minor's behalf:

a. Cost—none.

b. Benefit—regulatory guidelines will facilitate access for individuals whose medical records may have adverse effects.

4. Revised role of Privacy Officer

a. Cost—none.

b. Benefit—Increased public awareness of the privacy officer's role and responsibility in protecting the privacy and disclosure of the information SSA collects and maintains; general oversight to the Agency on privacy and disclosure activities.

Risks:

None.

SSA

156. ADMINISTRATIVE WAGE GARNISHMENT (TO REPAY A DEBT OWED TO THE SOCIAL SECURITY ADMINISTRATION) (724P)

Priority:

Other Significant

Unfunded Mandates:

Undetermined

Legal Authority:

42 USC 405; 42 USC 902; 42 USC 1383; 31 USC 3720D

CFR Citation:

20 CFR 422.311; 20 CFR 422.312

Legal Deadline:

None

Abstract:

This initiative will enable the Social Security Administration (SSA) to collect qualifying, delinquent titles II and XVI debts owed by former beneficiaries who are now employed in other than Federal employment. Administrative wage garnishment allows SSA to order an employer to deduct a percentage of the disposable pay earned by the worker/debtor, and to send that amount to SSA as payment toward satisfying the delinquent debt. Administrative wage garnishment does not require a court judgment to impose the withholding order.

Statement of Need:

This regulation is necessary in order for SSA to use administrative wage garnishment as a tool in its debt collection process.

Summary of Legal Basis:

SSA is authorized to use administrative wage garnishment by 31 U.S.C. 3720D, added by section 31001(o) of Public Law 104-134, the Debt Collection Improvement Act of 1996.

Alternatives:

None—without regulatory authority SSA would be unable to proceed with administrative wage garnishment in a manner that addresses SSA's particular needs and processes. SSA must either adopt by reference the Treasury Department's regulations on wage garnishment hearings or prescribe SSA regulations regarding such hearings consistent with those Treasury Department regulations. See 31 CFR 285.11(f)(1).

Anticipated Cost and Benefits:

Undetermined at this time.

Risks:

At this time we have not identified any risks associated with the proposal.

Abstract:

We are proposing to amend these regulations to further define "bonded or licensed in the State in which an organizational payee serves ás representative payee." We are proposing to further define the amount of bonding necessary to provide adequate protection for our beneficiaries and the nature of licenses that are pertinent for a fee-for-service organization.

Statement of Need:

Following congressional hearings, a representative payee task force was formed to improve the representative payment program; bonding and licensing of organizational payees was identified as an area in regulations that needs further definition.

Summary of Legal Basis:

None.

Alternatives:

There are no alternatives for this regulation, this regulation will further define existing rules.

Anticipated Cost and Benefits:

We are providing protection for our beneficiaries by defining an amount that an organization must be bonded for and defining the nature of licenses that are permissible. We do not anticipate any costs.

Risks:

None.

SSA

FINAL RULE STAGE

159. OASDI AND SSI; EXPANSION OF THE USE OF VIDEO TELECONFERENCE TECHNOLOGY IN HEARINGS BEFORE ADMINISTRATIVE LAW JUDGES OF THE SOCIAL SECURITY ADMINISTRATION (737F)

Priority:

Other Significant

Legal Authority:

42 USC 205(a); 42 USC 205(b); 42 USC 902(a)(5); 42 USC 1383

CFR Citation:

20 CFR 404.929; 20 CFR 404.936(b); 20 CFR 404.936(c); 20 CFR 404.936(d)(8)(New); 20 CFR 404.938; 20 CFR 416.1429; 20 CFR 416.1436(b); 20 CFR 416.1436(c); 20 CFR 416.1436(d)(8)(New); 20 CFR 416.1438

Legal Deadline:

None

Abstract:

We are amending our regulations to permit us to conduct hearings before an administrative law judge (ALJ) by video teleconference (VTC). We will add new sections to the regulations that will state the conditions for an ALJ to find good cause to change the time and place of a hearing if we schedule a VTC hearing, and the individual tells us he/she does not want a VTC hearing.

Statement of Need:

Our regulations provide for a hearing in person before an ALJ. Traditionally, this has meant that the individual requesting a hearing and the ALJ were present in the same room. These changes will allow us to schedule a VTC hearing without requiring prior written consent, and set out the right to decline such a hearing. We believe that conducting hearings by VTC will improve our efficiency and allow us to serve our customers better.

The VTC provision will aid in reducing the average processing time for hearings by eliminating much of the time some ALJ's must spend to travel to remote sites to conduct hearings face-to-face.

Summary of Legal Basis:

None.

Alternatives:

Require participation in a scheduled VTC hearing; i.e., no right to decline a VTC hearing.

Anticipated Cost and Benefits:

Improved customer service by providing faster access to a hearing.

Risks:

None.

SSA

160. TICKET TO WORK AND SELF-SUFFICIENCY PROGRAM (TICKET TO WORK AND WORK INCENTIVES IMPROVEMENT ACT OF 1999) (767F)

Priority:

Other Significant

Unfunded Mandates:

Undetermined

Legal Authority:

42 USC 902(a)(5); 42 USC 1320b-19; PL 106-170, sec 101

CFR Citation:

20 CFR 411.100 to 411.730

Legal Deadline:

Final, Statutory, December 17, 2000, One year after the date of enactment of Public Law 106-170.

Sec. 1148(l) of the Social Security Act (42 USC 1320b-19(1), as added by sec. 101(a) of PL 106-170, requires SSA to prescribe regulations to carry out the Ticket to Work and Self-Sufficiency Program.

Abstract:

These final regulations will implement the Ticket to Work and Self-Sufficiency Program under section 1148 of the Act, as added by section 101(a) of Public Law 106-170. They also will carry out provisions of sections 101(d) and (e) of Public Law 106-170 relating to the implementation of that program. One of SSA's most important initiatives is to assure that Social Security (SSDI) and Supplemental Security Income (SSI) beneficiaries with disabilities who want to work have the opportunity to do so. Individuals with disabilities face multiple barriers in attempting to return to work. The Ticket to Work and Self-Sufficiency Program, under section 1148 of the Act, removes such barriers by providing beneficiaries with disabilities with the opportunity to obtain rehabilitation, employment and support services from an approved vocational rehabilitation provider of their choice.

Statement of Need:

This regulatory action is necessary to implement the Ticket to Work and Self-Sufficiency Program under section 1148 of the Act, as added by section 101(a) of Public Law 106-170.

Regulations to implement the Ticket to Work and Self-Sufficiency Program are required under section 1148(l) of the Act and section 101(e) of Public Law 106-170. Section 101(e)(2) of Public Law 106-170 provides that the matters to be addressed in the regulations shall include the following:

(1) The form and manner in which tickets to work and self-sufficiency may be distributed to beneficiaries pursuant to section 1148(b)(1) of the Act;

(2) The format and wording of such tickets, which shall incorporate by reference any contractual terms governing service by employment networks under the Program;

(3) The form and manner in which State agencies may elect participation in the Ticket to Work and Self-Sufficiency Program pursuant to section 1148(c)(1) of the Social Security Act and provision for periodic opportunities for exercising such elections;

(4) The status of State agencies under section 1148(c)(1) at the time that State agencies exercise elections under that section;

(5) The terms of agreements to be entered into with program managers pursuant to section 1148(d) of the Act, including:

(a) The terms by which program managers are precluded from direct participation in the delivery of services pursuant to section 1148(d)(3) of the Act;

(b) Standards that must be met by quality assurance measures referred to in paragraph (6) of section 1148(d) of the Act and methods of requirement of employment networks; and

(c) The format under which dispute resolution will operate under section 1148(d)(7) of the Act;

(6) The terms of agreements to be entered into with employment

networks pursuant to section 1148(d)(4) of the Act, including:

(a) The manner in which service areas are specified pursuant to section 1148(f)(2)(A) of the Act;

(b) The general selection criteria and the specific selection criteria that are applicable to employment networks under section 1148(f)(1)(C) of the Act in selecting service providers;

(c) Specific requirements relating to annual financial reporting by employment networks pursuant to section 1148(f)(3) of the Act; and

(d) The national model to which periodic outcomes reporting by employment networks must conform under section 1148(f)(4) of the Act;

(7) Standards that must be met by individual work plans pursuant to section 1148(g) of the Act, including:

(a) The form and manner in which elections by employment networks of payment systems are to be exercised pursuant to section 1148(h)(1)(A) of the Act;

(b) The terms that must be met by an outcome payment system under section 1148(h)(2) of the Act;

(c) The terms that must be met by an outcome-milestone payment system under section 1148(h)(3) of the Act;

(d) Any revision of the percentage specified in paragraph (2)(C) of section 1148(h) of the Act or the period of time specified in paragraph (4)(B) of such section 1148(h) of the Act; and

(e) Annual oversight procedures for such systems; and

(8) Procedures for effective oversight of the Program by the Commissioner of Social Security, including periodic reviews and reporting requirements.

Summary of Legal Basis:

Section 1148(i) of the Act, as added by section 101(a) of Public Law 106-170, and sections 101(d)(5) and (e) of Public Law 106-170 require this regulatory action.

Alternatives:

None. This regulatory action is necessary to implement provisions of section 101 of Public Law 106-170.

Anticipated Cost and Benefits:

We anticipate substantial costs to start up the program and potential savings in later years. The anticipated benefits of this legislation include allowing individuals with disabilities to seek the services necessary to obtain employment and reduce their dependency on cash benefit programs, including SSI and SSDI.

Risks:

None.

SSA

161. ADMINISTRATIVE PROCEDURES FOR IMPOSING PENALTIES FOR FALSE OR MISLEADING STATEMENTS (784F)

Priority:

Other Significant

Legal Authority:

42 USC 402; 42 USC 403; 42 USC 404(a); 42 USC 404(e); 42 USC 405(a); 42 USC 405(c); 42 USC 422(b); 42 USC 423(e); 42 USC 424a; 42 USC 425; 42 USC 902(a)(5); 42 USC 1382 to 1382d; 42 USC 1382h; 42 USC 1320a-8a; 42 USC 1383

CFR Citation:

20 CFR 404.475; 20 CFR 416.1339

Legal Deadline:

Final, Statutory, June 14, 2000.

Abstract:

These final rules reflect and implement section 207 of Public Law 106-169, which provides that SSA may impose a penalty on any person who knowingly makes, or causes to be made, a false or misleading statement or representation of a material fact for use in determining any initial or continuing right to or the amount of monthly insurance benefits under title II or benefits or payments under title XVI.

Statement of Need:

This regulation is required to implement section 207 of Public Law 106-169 enacted on December 14, 1999. Public Law 106-169 provided that SSA may impose a penalty on any person who makes or causes to be made, a statement or representation of a material fact, for use in determining title II or title XVI benefit eligibility or amount, that the person knows or should know is false or misleading or omits a material fact. The penalty is nonpayment of benefits under title II and ineligibility for cash benefits under title XVI for six consecutive months for the first violation, 12 consecutive months for the second violation and 24 consecutive months for any subsequent violation.

Summary of Legal Basis:

Public Law 106-169 required SSA to develop regulatory guidelines to implement the process within six months of enactment. That regulation was issued on July 10, 2000 at 65 FR 42283 as interim final regulations which invited public comments. This regulation will finalize the interim final regulation.

Alternatives:

None.

Anticipated Cost and Benefits:

The Office of Budget estimated that administrative costs associated with this regulation would be negligible; i.e. less than $1 million. The costs are attributable to the enactment of Public Law 106-169 rather than the regulation.

Risks:

None.

SSA

162. IMPLEMENTING THE REDESIGNED DISABILITY PROCESS (816F)

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

42 USC 301

CFR Citation:

20 CFR 404; 20 CFR 416

Legal Deadline:

None

Abstract:

We plan to implement elements of the redesigned disability claims process that have been tested and found to further redesign goals. Specifically, we plan to revise the disability determination process by: (1) eliminating the reconsideration step of the appeals process; (2) enhancing the roles of the disability examiner and medical/psychological consultant to streamline the process and make more effective use of the doctor's knowledge and expertise; and (3) increasing claimant contact and explanation of the requirements for disability. We plan to implement the redesigned process in phases; the existing process will remain in effect for States that are not yet using the redesigned process.

Statement of Need:

This regulation will permit us to redesign the disability claims process to use our resources more effectively to ensure that disabled claimants are awarded benefits at the earliest point in the claims process.

Summary of Legal Basis:

None.

Alternatives:

The Agency is considering various options for phasing in the implementation of the redesigned disability claims process.

Anticipated Cost and Benefits:

Unknown at present—the cost/benefit analysis has not yet been completed.

Risks:

Not yet established.

COMMODITY FUTURES TRADING COMMISSION (CFTC)

Statement of Regulatory Priorities

The mission of the Commodity Futures Trading Commission is to protect market users and the public from fraud, manipulation, and abusive practices related to the sale of commodity futures and options and to foster open, competitive, and financially sound commodity futures and option markets. The Commission's objectives are to: (1) Foster futures and option markets that accurately reflect the forces of supply and demand for the underlying commodity and are free of disruptive activity; (2) oversee markets which can be used effectively by producers, processors, financial institutions, and other firms for the purposes of price discovery and risk shifting; (3) promote compliance with, and deter violations of, Federal commodities laws; (4) require commodities professionals to meet high standards; (5) provide a forum for effectively and expeditiously handling customer complaints against persons or firms registered under the Commodity Exchange Act; (6) ensure sound financial practices of clearing organizations and firms holding customer funds; (7) promote and enhance effective self-regulation of the commodity futures and option markets; (8) facilitate the continued development of an effective, flexible regulatory environment responsive to evolving market conditions; and (9) promote markets free of trade practice abuses.

BILLING CODE 6351-01-S

CONSUMER PRODUCT SAFETY COMMISSION (CPSC)

Statement of Regulatory Priorities

The U.S. Consumer Product Safety Commission is charged with protecting the public from unreasonable risks of death and injury associated with consumer products. To achieve this goal, the Commission:

- participates in the development or revision of voluntary product safety standards;
- develops mandatory product safety standards or banning rules when other, less restrictive, efforts are inadequate to address a safety hazard;
- obtains repair, replacement, or refund of the purchase price for defective products that present a substantial product hazard; and
- develops information and education campaigns about the safety of consumer products.

When deciding which of these approaches to take in any specific case, the Commission gathers the best available data about the nature and extent of the hazard presented by the product. The Commission then analyzes this information to determine the best way to reduce the hazard in each case. The Commission's rules require the Commission to consider, among other factors, the following criteria when deciding the level of priority for any particular project:

- frequency and severity of injury;
- causality of injury;
- chronic illness and future injuries;
- costs and benefits of Commission action;
- unforeseen nature of the risk;
- vulnerability of the population at risk;
- probability of exposure to the hazard.

Additionally, if the Commission proposes a mandatory safety standard for a particular product, the Commission is generally required to make statutory cost/benefit findings and adopt the least burdensome requirements that adequately protect the public.

The Commission's statutory authority requires it to rely on voluntary standards rather than mandatory standards whenever a voluntary standard is likely to result in the elimination or adequate reduction of the risk of injury and it is likely that there will be substantial compliance with the voluntary standard. As a result, much of the Commission's work involves cooperative efforts with other participants in the voluntary standard-setting process rather than promulgating mandatory standards.

In fiscal year 2002, the Commission's significant rulemaking activities will involve addressing risks of fire associated with ignition of upholstered furniture by small open flames. The emphasis on this rulemaking activity in the Commission's FY 2002 regulatory plan is consistent with the Commission's statutory mandate and its criteria for setting priorities.

CPSC

PROPOSED RULE STAGE

163. FLAMMABILITY STANDARD FOR UPHOLSTERED FURNITURE

Priority:

Economically Significant. Major under 5 USC 801.

Legal Authority:

15 USC 1193, Flammable Fabrics Act

CFR Citation:

16 CFR 1640

Legal Deadline:

None

Abstract:

On June 15, 1994, the Commission published an advance notice of proposed rulemaking (ANPRM) to begin a proceeding for development of a flammability standard to address risks of death, injury, and property damage from fires associated with ignition of upholstered furniture by small open-flame sources such as matches, lighters, or candles. This ANPRM was issued after the Commission granted part of a petition requesting development of a mandatory flammability standard to address risks of injury from ignition of upholstered furniture by: (1) small open-flame sources; (2) large open-flame sources; and (3) cigarettes. The Commission voted to deny that part of the petition requesting development of a mandatory standard to address hazards associated with ignition of upholstered furniture by large open-flame sources. The Commission also voted to defer a decision on that part of the petition requesting development of a standard to address cigarette ignition, and directed the staff to report to the Commission on the effectiveness of, and the extent of industry compliance with, a voluntary program to reduce risks of ignition of upholstered furniture by cigarettes. The Commission staff developed a draft standard to address ignition of upholstered furniture by small open-flame sources.

On March 2, 1998, the Commission voted to defer action on small open-flame sources and gather additional information on the potential toxicity of flame-retardant chemicals that might be used to meet a standard. A public hearing on this subject was held May 5-6, 1998. The staff is analyzing data from the hearing and completing other technical studies. In CPSC's 1999 appropriations legislation, Congress directed the Commission to contract with the National Academy of Sciences (NAS) for an independent study of potential health hazards associated with the use of flame retardant chemicals that might be used in upholstered furniture fabrics to meet a CPSC standard. The draft NAS report was completed and forwarded to Congress in April 2000; the final NAS report was published in July 2000. The report concluded that of 16 flame-retardant chemicals reviewed, 8 could be used in upholstered furniture fabrics without presenting health hazards to consumers. Additional exposure studies were recommended for the remaining eight chemicals. The report indicates that a number of suitable flame-retardant treatments are available; these include treatments already in use in various textile products, including upholstered furniture sold in the United Kingdom to meet existing U.K. flammability regulations.

CPSC is also considering possible impacts of flame-retardant chemical use on worker safety and the environment. At the CPSC staff's request, the National Institute of Occupational Safety and Health is assessing potential worker exposure to and risks from certain flame-retardant chemicals that may be used by textile and furniture producers to comply with an upholstered furniture flammability standard. The CPSC staff is also working with the Environmental Protection Agency to consider possible controls on flame-retardant compounds used in residential upholstered furniture fabrics under that agency's Toxic Substances Control Act Authority. Upon completion of its chemical risk assessment and other technical activities, the CPSC staff will present alternatives for future action by the Commission.

Statement of Need:

In 1998, approximately 480 deaths, more than 1,300 injuries, and about $191 million in property damage resulted from 9,400 residential fires in the United States in which upholstered furniture was the first item to ignite. The total societal cost attributable to upholstered furniture fires was approximately $2.8 billion in 1998. This total includes fires ignited by small open-flame sources, large open-flame sources, and cigarettes. Of these, small open-flame fires accounted for approximately 80 deaths, 350 injuries and $32 million in property losses.

Summary of Legal Basis:

Section 4 of the Flammable Fabrics Act (FFA) (15 USC 1193) authorizes the Commission to issue a flammability standard or other regulation for a product of interior furnishing if the Commission determines that such a standard is "needed to adequately protect the public against unreasonable risk of the occurrence of fire leading to death or personal injury, or significant property damage.".

The Commission's regulatory proceeding could result in several actions, one of which could be the development of a mandatory standard requiring that upholstered furniture sold in the United States meet mandatory labeling requirements, resist ignition, or meet other performance criteria under test conditions specified in the standard.

Alternatives:

The ANPRM stated that the Commission was considering the following alternatives:

(1) The Commission could issue a mandatory flammability standard if the Commission finds that such a standard is needed to address an unreasonable risk of the occurrence of fire from ignition of upholstered furniture by small open-flame sources;

(2) The Commission could issue mandatory requirements for labeling of upholstered furniture, in addition to, or as an alternative to, the requirements of a mandatory flammability standard;

(3) The Commission could terminate the proceeding for development of a flammability standard and rely on a voluntary standard if a voluntary standard would adequately address the risk of fire and substantial compliance with such a standard is likely to result; and

(4) The Commission could terminate the proceeding and withdraw the ANPRM.

Anticipated Cost and Benefits:

The estimated annual cost of imposing a mandatory standard to address ignition of upholstered furniture by small open-flame sources will depend upon the test requirements imposed by the standard and the steps manufacturers take to meet those requirements. Again, depending upon the test requirements, a small open-flame standard could also reduce cigarette-ignited fire losses, the societal cost of which was over $2 billion in 1997. For this reason, the potential benefits of a mandatory standard to address the risk of ignition of upholstered furniture by small open-flame sources could be significant, even if the standard did not prevent all such fires started by open-flame sources.

Risks:

The estimated total cost to society from all residential fires associated with upholstered furniture was $2.8 billion in 1997.

Societal costs associated with upholstered furniture fires are among the highest associated with any product subject to the Commission's authority. A standard has the potential to reduce these societal costs.

FEDERAL HOUSING FINANCE BOARD (FHFB)

Statement of Regulatory and Deregulatory Priorities

The Federal Housing Finance Board (Finance Board) is an independent agency that is charged under the Federal Home Loan Bank Act (Bank Act) with supervising and regulating the Nation's Federal Home Loan Bank (Bank) System. The Bank System comprises 12 regional Banks that are each owned by their member financial institutions and provide wholesale credit to members and certain nonmembers to be used for mortgage lending and related community lending activities. The Bank System also includes the Office of Finance, which issues Bank System consolidated obligations. The Finance Board is required to prepare the following regulatory plan pursuant to section 4 of Executive Order 12866. At this time, we do not anticipate any significant regulatory or deregulatory actions that would be required to be included in a regulatory plan.

The Finance Board's highest regulatory priorities during the coming year continue to be to ensure the safety and soundness of the Bank System and to ensure that the Banks fulfill their housing finance and community investment mission. In furtherance of these statutory mandates, the Finance Board expects to issue a solicitation of comments on the implications for the Bank System raised by structural changes that have been occurring in the membership base. This action is prompted by the receipt of several petitions, each requesting that the Finance Board permit a single depository institution to be a member of two Banks simultaneously. The solicitation would request comments on how developments in the membership base have affected the Bank System, and how permitting a single depository institution to be a member of more than one Bank might affect the Bank System.

FEDERAL MARITIME COMMISSION (FMC)

Statement of Regulatory and Deregulatory Priorities

The Federal Maritime Commission's (Commission) regulatory objectives are guided by the Agency's basic mission. The Commission's mission is to administer the shipping statutes as effectively as possible to provide an efficient, competitive, market-driven, and nondiscriminatory ocean transportation system in an environment free of unfair foreign maritime trade practices. The Commission's regulations are designed to implement each of the statutes the Agency administers in a manner consistent with this mission and in a way that minimizes regulatory costs, fosters economic efficiencies, relies on the marketplace to determine industry growth, and promotes international harmony.

Recent legislation continues to impact the Federal regulatory scheme regarding international ocean shipping. The legislation required new regulations, as well as the revision of many of the Commission's substantive regulations. One of the principal changes was the elimination of the requirement that carriers file tariffs with the Commission listing their rates and charges. Carriers are now required to publish their rates in private automated systems. The Commission continues to assess its regulations implementing this requirement, as well as other requirements of the new legislation.

Common carriers remain concerned as to the content requirements of agreements filed with the Commission. Carriers have expressed a desire for better delineation as to what matters do or do not have to be filed and have suggested that the Commission's rules should provide protections for confidential business information, provide maximum flexibility for carriers to modify cooperative arrangements, and include guidance tailored for different types of agreements. The Commission previously initiated an inquiry to solicit comments from the ocean transportation industry and the general public to assist the Commission in formulating new rules governing content requirements. This matter continues to be assessed and will be considered during calendar year 2001.

The principal objective or priority of the Agency's current regulatory plan will be to continue to assess major existing regulations for continuing need, effectiveness, burden on the regulated industry, fairness, and clarity. The Commission is scheduled to issue its 2-year study of the Ocean Shipping Reform Act of 1998 in September 2001. Findings and conclusions from that report could result in consideration of specific issues for rulemaking proposals.

The Commission continues to have under review, *inter alia*, regulations regarding passenger vessel operator financial responsibility and co-loading arrangements between non-vessel-operating common carriers. The Commission's review of existing regulations exemplifies its objective to regulate fairly and effectively while imposing a minimum burden on the regulated entities, following the principles stated by the President in Executive Order 12866.

Description of the Most Significant Regulatory Actions

The Commission currently has no actions under consideration that constitute "significant regulatory actions" under the definition in Executive Order 12866.

BILLING CODE 6730-01-6

FEDERAL TRADE COMMISSION (FTC)

Statement of Regulatory Priorities

I. REGULATORY PRIORITIES

Background

The Federal Trade Commission (FTC or Commission) is an independent agency charged with protecting American consumers from "unfair methods of competition" and "unfair or deceptive acts or practices" in the marketplace. The Commission strives to ensure that consumers benefit from a vigorously competitive marketplace. The Commission's work is rooted in a belief that free markets work — that competition among producers and information in the hands of consumers brings the best products at the lowest prices for consumers, spurs efficiency and innovation, and strengthens the economy.

The Commission pursues its goal of promoting competition in the marketplace through two different, but complementary, approaches. First, for competition to thrive, curbing deception and fraud is critical. Through its consumer protection activities, the Commission seeks to ensure that consumers receive accurate, not false or misleading, information in the marketplace. At the same time, for consumers to have a choice of products and services at competitive prices and quality, the marketplace must be free from anticompetitive business practices. Thus, the second part of the Commission's basic mission — antitrust enforcement — is to prohibit anticompetitive mergers or other anticompetitive business practices without unduly interfering with the legitimate activities of businesses. These two complementary missions make the Commission unique insofar as it is the Nation's only Federal agency to be given this combination of statutory authority to protect consumers.

The Commission is, first and foremost, a law enforcement agency. It pursues its mandate primarily through case-by-case enforcement of the Federal Trade Commission Act and other statutes. The Commission, however, is also charged with the responsibility of issuing and enforcing regulations under a number of statutes. Pursuant to the FTC Act, for example, the Commission currently has in place 13 trade regulation rules. The Commission also has adopted a number of voluntary industry guides. Most of the regulations and guides pertain to consumer protection matters, and are generally intended to ensure that consumers receive the information necessary to evaluate competing products and make informed purchasing decisions.

Gramm-Leach-Bliley Initiative

The Gramm-Leach-Bliley Act, Pub. L. No. 106-102, was enacted on November 12, 1999.[1] Title V (Privacy) Subtitle A (Disclosure of Nonpublic Personal Information), sections 501(b) and 505(b), require the Federal Trade Commission and the Securities and Exchange Commission to implement and enforce appropriate standards for financial institutions to safeguard customers' records and information (safeguards standards) by rule. The Commission has published both a request for comments and a notice of proposed rulemaking (NPRM) to further implement the statutorily mandated safeguards standards. *See* 66 FR 41162 (Aug. 7, 2001).

The Commission has proposed amending the Children's Online Privacy Protection Rule, 16 CFR part 312, to extend by two years (until April 2004) the sliding scale mechanism of verifying parental consent for collection of data about children by Web sites or online services. The Commission proposed the rule amendment because the anticipated progress in available technology of verifying such consent has not occurred. The notice of proposed rulemaking also requests comments responding to a number of questions relating to the current and anticipated availability and affordability of secure electronic mechanisms or infomediary services for obtaining parental consent. See 66 FR 54963 (Oct. 31, 2001).

Ten-Year Review Program

In 1992, the Commission implemented a program to review its rules and guides regularly. The Commission's review program is patterned after provisions in the Regulatory Flexibility Act, 5 USC 601 *et seq.* Under the Commission's program, however, rules have been reviewed on a ten-year schedule as resources permit, not just once as usually required by section 610 of the Regulatory Flexibility Act. This program is also broader than the review contemplated under the Regulatory Flexibility Act, in that it provides the Commission with an ongoing systematic approach for seeking information about the costs and benefits of its rules and guides and whether there are changes that could minimize any adverse economic effects, not just a "significant economic impact upon a substantial number of small entities." The program's goal is to ensure that all of the Commission's rules and guides remain beneficial and in the public interest.

As part of the ten-year plan, the Commission examines the effect of rules and guides on small businesses and on the marketplace in general. These reviews often lead to the revision or rescission of rules and guides to ensure that the Commission's consumer protection and competition goals are achieved efficiently and at the least cost to business. In a number of instances, the Commission has determined that existing rules and guides were no longer necessary or in the public interest. As a result of the review program, the Commission has repealed 48 percent of its trade regulation rules and 52.5 percent of its guides since 1992.

Calendar Year 2001 Reviews and Reviews in Process

As part of the Commission's ten-year review program, in 2001 the Commission continued reviews of seven rules and three industry guides. The reviews scheduled to begin in 2001 have been deferred.[2] The Commission will commence its review of those rules and guides at a later date.

All of the matters scheduled for review this year pertain to consumer protection and are intended to ensure that consumers receive the information necessary to evaluate competing products and make informed purchasing decisions. For example, the Telemarketing Sales Rule (Rule), 16 CFR part 310, was adopted pursuant to the Telemarketing and Consumer Fraud and Abuse Prevention Act, 15 USC 6101-6108. The Rule requires telemarketers to disclose certain material information; prohibits misrepresentations; limits the times of day telemarketers may call consumers; prohibits calls to a consumer who has asked not to be called again; and sets payment restrictions for the sale of certain goods and services. The Commission began its review of the Rule by holding a forum on the "do-not-call" provision, followed by a request for comments and a public forum on July 27-28, 2000. The Commission anticipates completing this

[1] The Commission previously published its final rule implementing other Gramm-Leach-Bliley requirements in its Rule on Privacy of Consumer Financial Information, 16 CFR part 313. *See* 65 FR 33646 (May 24, 2000).

[2] In publishing the regulatory review schedule each year, the Commission indicates that the tentative timetable may be modified in the future to incorporate new legislative rules, or to respond to external factors (such as changes in the law) or other considerations. *See, e.g.*, 64 FR 3668 (Jan. 25, 1999).

2001

review and reporting to the Congress on its results late this fall.

In 1999, the Commission began its regulatory review of certain aspects of the Funeral Industry Practices Rule (Funeral Rule or Rule), 16 CFR part 453. The Funeral Rule, which became effective in 1984, and was amended in 1994, requires providers of funeral goods and services to give consumers itemized lists of funeral goods and services that not only state prices and descriptions, but also contain specific disclosures. The Rule enables consumers to select and purchase only the goods and services they want, except for those which may be required by law and a basic services fee. Also, funeral providers must seek authorization before performing some services, such as embalming. In addition to an assessment of the Rule's overall costs and benefits and continuing need for the Rule, the Commission's review will examine whether changes in the funeral industry warrant broadening the scope of the Rule to include non-traditional providers of funeral goods or services and revising or clarifying certain prohibitions in the Rule. *See* 64 FR 24249 (May 5, 1999). In response to requests of industry members, the Commission determined to extend the comment period. A public workshop conference was held on November 18, 1999, to explore issues raised in the comments submitted. Staff expects to forward its recommendation to the Commission early next year.

The Commission's review of the Franchise Rule, 16 CFR part 436, is also continuing. The Commission accepted comments on an NPRM with the text of a revised rule until December 21, 1999, and rebuttal comments until January 31, 2000. The proposal addresses issues including: (1) changing the timing for making disclosures; (2) clarifying the application of the Rule to international franchise sales; (3) expanding the Rule to require additional disclosures, including pending franchiser-initiated lawsuits involving the franchise relationship, franchiser use of gag clauses and, in some instances, trademark-specific franchisee associations; (4) permitting disclosures through electronic media, including the Internet; and (5) expanding the Rule's exemptions to address sophisticated investors. In June 2001, Bureau of Consumer Protection Staff issued *Franchise and Business Opportunity Program Review 1993-2000: A Review of the Complaint Data, Law Enforcement and Consumer Education*. Staff expects to forward its report on the rulemaking to the Commission next spring.

In addition, the Commission's review of the Pay-Per-Call Rule, 16 CFR part 308, is proceeding. The Commission has held workshops to discuss proposed amendments to its Pay-Per-Call Rule including provisions to combat telephone bill "cramming" — inserting unauthorized charges on consumers' phone bills — and other abuses in the sale of products and services that are billed to the telephone including voicemail, 900-number services, and other telephone base information and entertainment services. The most recent workshop, held May 20 and 21, 2000, focused on discussions of the use of 800 and other toll-free numbers to offer pay-per-call services, the scope of the Rule, the dispute resolution process, and the need for obtaining authorization from consumers before placing charges on their telephone bills. Staff anticipates forwarding its recommendation to the Commission this winter.

The Commission completed a portion of its review of the Amplifier Rule, 16 CFR part 432, in December 2000 and, at the same time, issued a supplemental notice of proposed rulemaking (SNPRM). The SNPRM seeks comment on proposed revisions to the Rule's testing procedures to provide appropriate power output ratings for the recently introduced class of "home theater" receivers that incorporate five or more channels of amplification. The reopened comment period ended on March 30, 2001. *See* 66 FR 12915 (Mar. 1, 2001). Staff anticipates forwarding a recommendation to the Commission this fall and Commission action by the end of the calendar year, 65 FR 80798 (Dec. 22, 2000).

The reviews of the Ophthalmic Practice Rule, 16 CFR part 456, and the R-Value Rule, 16 CFR part 460, are proceeding. Staff expects to forward its recommendations to the Commission regarding these Rules early next year.

With respect to Industry Guides, the Commission continued its review of the Guides for the Household Furniture Industry (Furniture Guides), 16 CFR part 250, which were issued on December 21, 1973. The Commission requested comments about the overall costs and benefits and the continuing need for the Furniture Guides. *See* 65 FR 18933 (Apr. 10, 2000). The Furniture Guides generally advise members of the furniture industry to make affirmative disclosures of product facts, which, if known by a purchaser, would influence the purchasing decision. The specific disclosures concern identification of the types of wood and outer coverings or stuffings used in furniture. These disclosures are designed to prevent consumers from being misled that the product is different from that which is actually being offered. To that end, the Commission's request for comments included eleven questions concerning the continued utility of the Furniture Guides. The comment period, originally scheduled to close on June 9, 2000, was extended until July 10, 2000, at the request of the American Furniture Manufacturers Association. 65 FR 37317 (Jun. 14, 2000). Staff expects to forward its recommendation to the Commission before the end of the calendar year.

The Commission is continuing its review of the Guides for the Rebuilt, Reconditioned, and Other Used Automobile Parts Industry (Used Auto Parts Guides), 16 CFR part 20. The Used Auto Parts Guides, effective since 1962, advise industry members not to misrepresent the age of the product, the condition of the product, the extent of the rebuilding of the product, or that the rebuilder was the original manufacturer. Industry members must also conspicuously disclose in advertising and packaging that the products include used parts, if that is the case. The Commission's review will examine, among other things, the overall costs and benefits of the Used Auto Parts Guides and whether there is a continuing need for them. The Commission has published a Federal Register notice seeking comment on several questions concerning the Used Auto Parts Guides. *See* 63 FR 17132 (Apr. 8, 1998). Staff has completed its review of the comments and plans to forward its recommendation to the Commission this fall.

In addition, the Commission also has solicited comments on its Guide Concerning Fuel Advertising for New Automobiles (Fuel Economy Guide), 16 CFR part 259, effective in 1975. *See* 64 FR 19720 (Apr. 22, 1999). The Fuel Economy Guide is designed to prevent deceptive fuel economy advertising and to facilitate the use of fuel economy claims in advertising. Since its issuance, the Fuel Economy Guide has advised marketers to disclose the established fuel economy of the vehicle as determined by the Environmental Protection Agency (EPA) under the Automobile Information Disclosure Act, 15 USC 2206, in advertisements that make representations regarding the fuel economy of a new vehicle. These EPA fuel economy numbers also appear on window labels attached to new automobiles. The Commission amended

the Fuel Economy Guide in 1978 and 1995 to make it consistent with the Information Disclosure Act changes regarding fuel economy disclosures. Staff has completed its review of the comments and plans to forward its recommendation to the Commission this fall.

Final Actions

Since publication of the 2000 Regulatory Plan, the Commission has completed a portion of its review of the Amplifier Rule, 16 CFR part 432. The Final Rule clarifies the testing procedure for self-powered speakers, and eliminates or modifies certain testing and disclosure requirements that have outlived their usefulness to consumers. *See* 65 FR 881232 (Dec. 22, 2000).

The Commission also has completed its regulatory review of the Guides for the Jewelry, Precious Metals and Pewter Industry, 16 CFR part 23, by amending the Guides to require disclosure of permanent treatments to gemstones that significantly affect their value, including laser drilling of diamonds and certain other treatments. Although these Guides were reviewed in 1992 under the ten-year plan, the Commission responded to a petition from industry members. *See* 65 FR 78738 (Dec. 15, 2000).

Calendar Year 2002 Reviews

The specific rules and guides to be addressed under the Commission's Regulatory Review Program will be announced early next year.[3]

Summary

With regard to both content and process, the FTC's ongoing and proposed regulatory actions are compatible with the President's priorities. The actions under consideration inform and protect consumers and reduce the regulatory burdens on businesses. The Commission will continue working toward these goals. The Commission's ten-year review program is patterned after provisions in the Regulatory Flexibility Act and complies with the Small Business Regulatory Enforcement Fairness Act of 1996. The Commission's ten-year program also is consistent with section 5(a) of Executive Order 12866, 58 FR 51735 (Sept. 30, 1993), which directs executive branch agencies to develop a plan to reevaluate periodically all of their significant existing regulations. In addition, the Rule Concerning Privacy of Consumer Financial Information, 16 CFR part 313 (2001), promulgated in 2000 and effective July 1, 2001 is consistent with the Statement of Regulatory Philosophy and Principles, E.O. 12866 section 1(a), which directs agencies to promulgate only such regulations as are, *inter alia*, required by law or are made necessary by compelling public need, such as material failures of private markets to protect or improve the health and safety of the public.

As set forth in Executive Order 12866, the Commission continues to identify and weigh the costs and benefits of proposed actions and possible alternative actions, and to receive the broadest practicable array of comment from affected consumers, businesses, and the public at large. As stated above, since 1992 the Commission has repealed 48 percent of its trade regulation rules and 52.5 percent of its industry guides that existed in 1992 because they had ceased to serve a useful purpose. In sum, the Commission's regulatory actions are aimed at efficiently and fairly promoting the ability of "private markets to protect or improve the health and safety of the public, the environment, or the well-being of the American people." Executive Order 12866, sec. 1.

II. REGULATORY ACTIONS

The Commission has no rules that constitute "significant regulatory actions" under the definition in Executive Order 12866.

BILLING CODE 6750-01-S

NATIONAL INDIAN GAMING COMMISSION (NIGC)

Statement of Regulatory Priorities

The Indian Gaming Regulatory Act (IGRA or the Act), 25 U.S.C. 2701 et seq., was signed into law on October 17, 1988. The Act established the National Indian Gaming Commission (NIGC or the Commission). The stated purpose of the Commission is to regulate the operation of gaming by Indian tribes as a means of promoting tribal economic development, self-sufficiency, and strong tribal governments. It is the Commission's intention to provide regulation of Indian gaming to adequately shield it from organized crime and other corrupting influences, to ensure that the Indian tribe is the primary beneficiary of the gaming operation, and to assure that gaming is conducted fairly and honestly by both the operator and players.

The NIGC's regulatory priorities for the next fiscal year are to:

1. Develop technical amendments to the Minimum Internal Control Standards;
2. Develop standards for constructing and maintaining gaming facilities operated on Indian lands;
3. Revise the definitions to exclude "electronic or electromechanical facsimile," and
4. Develop regulations to establish processes for the classification, review, and approval of games and devices used in tribal gaming.

NIGC

PROPOSED RULE STAGE

164. DEFINITIONS: ELECTRONIC OR ELECTROMECHANICAL FACSIMILE

Priority:

Other Significant

Legal Authority:

25 USC 2701 et seq.

CFR Citation:

25 CFR 502

Legal Deadline:

None

Abstract:

The rule will remove the definition of "electronic and electromechanical facsimile" now set forth at 25 CFR 502.8.

Statement of Need:

In several recent decisions, Federal courts have not relied on the Commission's definition of electronic or electromechanical facsimile. Instead, courts have relied exclusively on the terms contained in the Indian Gaming Regulatory Act (IGRA) and have applied a plain language interpretation of the phrase. To ensure consistency with developments in case law and a uniform approach to the term by the Commission and the courts, the Commission has determined that the definition set forth at 25 CFR 502.8 should be removed.

Summary of Legal Basis:

IGRA expressly authorizes the Commission to "promulgate such regulations and guidelines as it deems appropriate to implement the provisions of the [Act.]" (25 U.S.C. 2706(b)(10)). The Commission relies on this section of the statute to define terms set forth in the Act and to redefine terms as necessary to implement the Act.

Alternatives:

The Commission is evaluating other alternatives, including the status quo, and considering public comments to the proposals before determining which is the most worthy.

Anticipated Cost and Benefits:

The potential benefit of this regulatory action is consistency with development in case law and a uniform approach to the term by the Commission and the courts.

Risks:

There are no known risks to this regulatory action.

NIGC

165. ENVIRONMENT AND PUBLIC HEALTH AND SAFETY

Priority:

Other Significant

Unfunded Mandates:

Undetermined

Legal Authority:

25 USC 2710(b)(2)(E)

CFR Citation:

25 CFR 573

Legal Deadline:

None

Abstract:

It is necessary for the National Indian Gaming Commission to promulgate regulations which ensure that tribal gaming facilities are constructed and maintained in a manner that protects the environment and the public health and safety.

Statement of Need:

The Indian Gaming Regulatory Act (IGRA) requires that tribal gaming ordinances or resolutions submitted for the Chairman's approval ensure that "the construction and maintenance of the gaming facility, and the operation of that gaming is conducted in a manner which adequately protects the environment and the public health and safety." 25 U.S.C. 2710(b)(2)(E). The Commission has determined that standards are needed to ensure compliance with this statutory requirement.

Summary of Legal Basis:

The regulations proposed today rely on the Commission's authority to issue environment, public health and safety regulations. This criteria is set forth in 25 U.S.C. 2710(b)(2)(E). IGRA expressly authorizes the Commission to "promulgate such regulations and guidelines as it deems appropriate to implement the provisions of the [Act]." (25 U.S.C. 2706(b)(10)). The

Commission relies on these sections of the statute to authorize the promulgation of regulations to ensure that gaming facilities on Indian lands are constructed, maintained and operated in a manner that adequately protects the environment and public health and safety.

Alternatives:

The Commission is evaluating alternatives to the proposed rule while considering public comments.

Anticipated Cost and Benefits:

The potential benefits to this regulatory action are to establish and define for the regulated community the environmental, public health and safety standards it must follow in order to comply with the IGRA, regulations promulgated thereunder, and tribal gaming ordinances. This regulatory action will provide the regulated public with guidance as to the standards the Chairman will use to determine what constitutes an environmental, public health, or safety problem sufficient to warrant an enforcement action.

Risks:

There are no known risks to this regulatory action.

NIGC

166. TECHNICAL AMENDMENTS TO THE MINIMUM INTERNAL CONTROL STANDARDS

Priority:

Other Significant. Major status under 5 USC 801 is undetermined.

Legal Authority:

25 USC 2702; 25 USC 2706(b)(10)

CFR Citation:

25 CFR 542

Legal Deadline:

None

Abstract:

The National Indian Gaming Commission anticipates that there will be a need to make technical changes to the minimum internal control standards in response to changes in technology and the gaming industry. Because these standards are established by Federal regulation, it is necessary to make the changes to the current standards, which should result in better internal control standards with minimal anticipated costs.

Statement of Need:

The Indian Gaming Regulatory Act (IGRA) establishes a comprehensive system for regulating gambling activities on Indian lands. Following a thorough rulemaking process, the Commission published Minimum Internal Control Standards (MICS), 25 C.F.R. part 542, in 1999. In the period since publication, there have been changes in Indian gaming and gaming technology that need to be reflected in the MICS. Additionally, there are technical errors in the existing regulation that require correction. The Commission has determined that these changes and corrections are needed to ensure that Indian gaming continues to be adequately regulated, while maintaining the ability to adopt to, and take advantage of, technological changes in the gaming industry.

Summary of Legal Basis:

The purpose of IGRA is clearly stated in its declaration of policy: "to provide a statutory basis for the regulation of gaming by an Indian tribe adequate to shield it from organized crime and other corrupting influences, to ensure that the Indian tribe is the primary beneficiary of the gaming operation, and to assure that gaming is conducted fairly and honestly by both the operator and players...." 25 U.S.C. 2702(2). In order to accomplish these and the other stated purposes of IGRA, the Commission was expressly authorized to "promulgate such regulations and guidelines as it deems appropriate to implement the provisions of the [Act]." 25 U.S.C. 2706(b)(10). The Commission relies on these sections of the statute to authorize the promulgation of Minimum Internal Control Standards in order to ensure the integrity of gaming on Indian lands and to safeguard this source of tribal revenues.

Alternatives:

The Commission sees no alternative but to revise its current Minimum Internal Control Standards for gaming operations on Indian lands.

Anticipated Cost and Benefits:

The potential benefits of this regulatory action are to revise the current Minimum Internal Control Standards to reflect the types of gaming occurring on Indian lands, to allow the Indian gaming industry to take advantage of technological changes occurring in the gaming industry so that it may be more competitive, and to clarify areas of the existing standards that, based on comments received, have led to conflicting interpretations and applications.

Risks:

There are no known risks to this regulatory action.

NIGC

FINAL RULE STAGE

167. GAME CLASSIFICATION

Priority:

Other Significant

Legal Authority:

25 USC 2702; 25 USC 2703; 25 USC 2705; 25 USC 2706; 25 USC 2710; 25 USC 2713

CFR Citation:

25 CFR 504

Legal Deadline:

None

Abstract:

This rule will establish processes for the classification, review, and approval of games and devices used in tribal gaming.

Statement of Need:

Over the course of the past couple of years, the NIGC has received numerous requests for advisory opinions on the classification of a particular game or device. The Commission has through an informal process issued several advisory opinions. However, given the growing number of requests and the need for some degree of predictability and certainty in the industry regarding the classification of games or devices, the Commission believes it is necessary to develop a formal process. Consequently, the Commission will use the rulemaking process to promulgate regulations in this area.

Summary of Legal Basis:

The Indian Gaming Regulatory Act specifically defines both Class II and Class III gaming (25 U.S.C. 2703). The Act also expressly authorizes the Commission to "promulgate such regulations and guidelines as it deems appropriate to implement the provisions of this Act." (25 U.S.C. 2706(b)(10)). The Commission relies on these sections of the statute to authorize the development by regulation of a process of formal classification of particular games and devices.

Alternatives:

At this time, the only identified alternative is to continue with the informal process of issuing advisory opinions regarding particular games.

Anticipated Cost and Benefits:

The potential benefits to this regulatory action are to bring more clarity and predictability to the industry regarding classification. Those engaged in Indian gaming need to have some degree of certainty regarding the legal consequences of playing a particular game. For those tribes without tribal-State compacts, the need is even greater to know with as much certainty as possible the classification of a particular game or device. The anticipated costs of implementing a classification system are unknown at this time.

Risks:

There are no known risks to this regulatory action.

Semiannual Regulatory Agenda, October 2001

AGENCY: Office of the Secretary, USDA.

ACTION: Semiannual regulatory agenda.

SUMMARY: This agenda provides summary descriptions of significant and not significant regulations being developed in agencies of the U.S. Department of Agriculture (USDA) in conformance with Executive Order 12866 "Regulatory Planning and Review." The agenda also describes regulations affecting small entities as required by section 602 of the Regulatory Flexibility Act, Public Law 96-354. This agenda also identifies regulatory actions that are being reviewed in compliance with section 610(c) of the Regulatory Flexibility Act. We invite public comment on those actions.

USDA has attempted to list all regulations and regulatory reviews pending at the time of publication except for minor and routine or repetitive actions, but some may have been inadvertently missed. There is no legal significance to the omission of an item from this listing. Also, the dates shown for the steps of each action are estimated and are not commitments to act on or by the date shown.

For this edition of the USDA regulatory agenda, the most important significant regulatory actions are included in part II of this issue of the **Federal Register**. The Regulatory Plan entries are listed in the table of contents below and are denoted by a bracketed bold reference, which directs the reader to the appropriate sequence number in part II.

FOR FURTHER INFORMATION CONTACT: For further information on any specific entry shown in this agenda, please contact the person listed for that action. Requests for copies of the agenda should include a self-addressed, stamped envelope and be directed to: Regulatory Agenda, OBPA, Office of the Secretary, Room 118-E, Jamie Whitten Building, U.S. Department of Agriculture, Washington, DC 20250, (202) 720-1272.

Dated: October 19, 2001.

Jacquelyn Y. Chandler,

Chief, Legislative and Regulatory and Automated Systems Staff.

168. • COTTON FUTURES ACT: CHANGING THE DESTINATION OF SPOT MARKETS (CN-01-004)

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 156; PL 94-455, 90 Stat. 1841-1846; PL 102-287, Stat. 1844

CFR Citation: 7 CFR 27

Legal Deadline: None

Abstract: The U.S. Cotton Futures Act authorizes the Secretary of Agriculture to determine the five most appropriate spot cotton markets to designate for settlement of cotton futures contracts. Regional changes in current commercial sales of cotton makes it necessary to change the designation of spot market to more accurately reflect the commercial market prices and qualities of cotton for use in determining settlement differences for cotton traded on the cotton exchange

169. GENERAL SPECIFICATIONS FOR DAIRY PLANTS APPROVED FOR USDA INSPECTION AND GRADING

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1621 to 1627

CFR Citation: 7 CFR 58

Legal Deadline: None

Abstract: The proposed rule would: (1) Lower the maximum allowable bacterial estimate for manufacturing-grade producer milk from 1,000,000 per milliliter to 500,000 per milliliter; (2) lower the maximum allowable somatic cell count from 1,000,000 to 750,000 cells per milliliter; (3) lower the maximum permitted bacterial estimate in commingled milk from 3,000,000 per milliliter to 1,000,000 per milliliter; (4) modify the follow-up procedures when producer herd milk exceeds the maximum allowable bacterial estimate; (5) delete the laboratory screening test for somatic cells in producer-held milk samples (no change for goat milk); and (6) make editorial changes where necessary.

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1621

CFR Citation: 7 CFR 59

Legal Deadline: None

Abstract: The Agricultural Marketing Service is amending the Livestock Reporting Act of 1999 regulations. The amendments would: (1) Amend regulations requiring lamb packers to report negotiated purchases of live lamb and sales of carcass lamb; (2) adjust requirements for reporting of imported and domestic boxed lamb sales; and (3) make adjustments to input data collection forms. The Act was implemented April 2, 2001, and requires packers to report purchase and sales transactions for cattle, swine, sheep, boxed beef, and lamb meat.

172. • REGULATIONS GOVERNING THE CALIFORNIA PRUNE/PLUM (TREE REMOVAL) DIVERSION PROGRAM, 2001-2002 CROP YEAR (FV-01-81-01 PR)

Priority: Other Significant

Legal Authority: 7 USC 612c

CFR Citation: 7 CFR 81

Legal Deadline: None

Abstract: Under the California Prune/Plum (Tree Removal) Diversion Program for the 2001-2002 crop year, producers would voluntarily remove prune/plum trees to reduce acreage and help the California dried plum industry address its severe oversupply problems. The goal of the program is to remove the greatest number of trees with the greatest production potential prior to the 2002 crop for the least overall cost. The program is expected to bring supplies closer in line with market needs and provide some relief to producers faced with low prices, packer closures, and contract cancellations. Section 32 funds would be used to cover tree removal costs.

177. VOLUNTARY SHELL EGG REGULATIONS; REPACKAGING OF SHELL EGGS UNDER USDA'S GRADING PROGRAM

Priority: Other Significant

Legal Authority: 7 USC 1621 to 1627

CFR Citation: 7 CFR 56

Legal Deadline: None

Abstract: Currently about one-third of the Nation's table eggs are marketed under the voluntary shell egg-grading program. Shell egg processors that choose to use this service pay a fee to have graders in their plants monitor processing operations and verify the grade and size of eggs packaged into packages bearing the USDA grade shield. The proposal would provide that, in order to be officially identified with a USDA consumer grade shield, shell eggs must not be more than 15 days old (or some other period between 15 and 30 days if justified by public comment) and must not have been previously shipped for retail sale.

178. TOBACCO FEES AND CHARGES FOR PERMISSIVE INSPECTION: FEE INCREASE (TB-00-04 FR)

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 511 et seq

CFR Citation: 7 CFR 29

Legal Deadline: None

Abstract: The U.S. Department of Agriculture (the Department) is proposing to increase the fees and charges currently in force for permissive grading of quota and nonquota tobacco to reflect the increased costs of operating the program. The Tobacco Inspection Act requires the Secretary to fix and collect fees and charges for the voluntary inspection and certification of tobacco, and fees must cover, as nearly as practicable, the Department's costs for performing these services. The Agricultural Marketing Service is proposing that the base hourly rate be

USDA—AMS **Final Rule Stage**

revised to $47.40, the overtime rate shall be revised to $54.22, and Sunday and holiday rate will be revised to $69.38. These fees would cover expenses and maintain a reserve that would meet any reasonable contingency.

179. TOBACCO FEES AND CHARGES FOR MANDATORY INSPECTION: FEE INCREASE

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 511 et seq

CFR Citation: 7 CFR 29

Legal Deadline: None

Abstract: The U.S. Department of Agriculture (the Department) is increasing the fees and charges for mandatory inspection and certification of producer tobacco sold at designated auction markets. The current fee of $.0083 per pound has been in effect since 1995. The new rate will be $.0100 per pound. Due to reduced quotas, the volume of tobacco delivered for inspection has declined. An increase of $.0017 per pound is necessary to adequately fund the level of service the industry desires.

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 612c

CFR Citation: 7 CFR 80

Legal Deadline: None

Abstract: The Agricultural Marketing Service is proposing to establish a Fresh Russet Potato Diversion Program for the 2000 crop. The proposed program will assist fresh Russet potato growers faced with oversupplies and low prices by diverting potatoes to charitable institutions, or use as livestock feed, ethanol production, or to render them nonmarketable and dispose of in conformance with Federal, State, and local regulations. AMS expects to publish a final rule in early fall.

Priority: Other Significant

Legal Authority: 7 USC 6501 through 6522

CFR Citation: 7 CFR 205

Legal Deadline: None

Abstract: AMS is proposing to revise the regulatory provisions for labeling agricultural products as organically produced and handled (7 CFR part 205). AMS will propose production standards for mushroom, apiculture, and greenhouse production systems and handling standards for apiculture products. The proposed standards will incorporate the recommendations of the National Organic Standards Board (NOSB) finalized at its October 2001 meeting. In June 2001, the NOSB released and accepted public comment on a draft version of mushroom and greenhouse standards. Concurrently, the NOSB implemented a task force to develop production and handling standards for apiculture.

Priority: Other Significant

Legal Authority: 7 USC 6501 through 6522

CFR Citation: 7 CFR 205

Legal Deadline: None

Abstract: AMS is proposing to revise the regulatory provisions for labeling of agricultural products as organically produced and handled (7 CFR part 205). AMS proposes to incorporate the term "aquatic animal" in the definition of livestock and to establish production and handling standards for operations that capture aquatic animals from the wild. AMS has defined "aquatic animal" as any finfish or shellfish used for human consumption, whether taken from regulated but free roaming marine and fresh water populations (wild captured) or propagated and raised in a controlled or selected environment (aquaculture). Production standards for operations producing aquatic animals will incorporate requirements for livestock origin, feed ration, health care, living conditions, and recordkeeping. Handling standards for such operations will address prevention of commingling or organically produced commodities and prevention of contact between organically produced and prohibited substances.

197. • LIVESTOCK MANDATORY REPORTING: CONFIDENTIALLY GUIDELINE (LS-01-10)

Priority: Substantive, Nonsignificant
Legal Authority: 7 USC 1621
CFR Citation: None
Legal Deadline: None

Abstract: The Agricultural Marketing Service (AMS) is proposing to modify the reporting guideline used to protect the identity of firms and preserve the confidentiality of proprietary business information submitted by the Department of Agriculture (USDA) under the Livestock Mandatory Reporting (LMR) program. The proposed modification in the confidentiality guideline would continue to preserve the confidential nature of reported livestock transactions, while enable AMS to issue more frequent and comprehensive reports on livestock and meat, and provide all segments of the livestock and meat industries with a greater volume of relevant information on which to base market decisions.

Department of Agriculture (USDA)
Farm Service Agency (FSA) — **Proposed Rule Stage**

198. REGULATORY STREAMLINING OF THE FARM SERVICE AGENCY'S DIRECT FARM LOAN PROGRAMS

Priority: Other Significant
Legal Authority: 5 USC 301; 7 USC 1989; 42 USC 1480
CFR Citation: 7 CFR 7; 7 CFR 18
Legal Deadline: None

Abstract: The Farm Service Agency (FSA) direct farm loan programs are still using the regulations and handbooks from the former Farmers Home Administration and still share many of its regulations, forms, and handbooks with the Rural Housing Service, Rural Utilities Service, and the Rural Business-Cooperative Services of the Rural Development Agency. This is very cumbersome and confusing to both Agency employees and the general public. This action will move all the direct farm loan program regulations from 7 CFR chapter 18 to 7 CFR chapter 7 and will allow FSA the opportunity to rewrite and re-engineer its direct farm loan program regulations. This action also consolidates a number of actions that were previously included in the regulatory agenda under separate RINs: 0560-AE04, 0560-AE07, 0560-AE09, 0560-AE11, 0560-AE13, 0560-AE14, 0560-AE15, 0560-AE37, 0560-AE87, 0560-AE88, 0560-AE90, 0560-AE98, and 0560-AE99.

199. IMPLEMENTATION OF THE U.S. WAREHOUSE ACT OF 2000

Priority: Other Significant
Legal Authority: PL 106-432
CFR Citation: 7 CFR 735 to 742
Legal Deadline: NPRM, Statutory, February 7, 2001.
Final, Statutory, May 8, 2001.

Abstract: The U.S. Warehouse Act of 2000 replaced the existing statutes governing federally licensed warehouses. This action implements that Act and will re-write all the CFR parts governing warehouses. This will

USDA—FSA

Proposed Rule Stage

make U.S. agriculture more competitive in both domestic and foreign markets through efficiencies and cost savings provided by today's computer technology and information management systems.

The Congress originally enacted the USWA in 1916, and amended it in 1919, 1923, and 1931. However, since that time, the authorizing legislation for this program has seen little change.

The Warehouse Act of 2000 makes this program more relevant to today's agricultural marketing system. The statute and its regulations authorize and standardize electronic documents and allow their transfer from buyer to seller across State and international boundaries. This new paperless flow of agricultural commodities from farm gate to end-user will provide significant savings and efficiencies.

The new USWA allows federally licensed warehouse operators to issue electronic warehouse receipts for any approved agricultural product, an authority previously granted to cotton, as well as electronically transmit other business documents, such as grade and weight certificates, certificates, bills of lading, export evidence certificates, and business-related documents required by letters of credit.

The USWA is paid for through user fees. Therefore, implementation of the USWA is basically budget neutral statute.

200. • INTEREST ASSISTANCE PROGRAM

Priority: Substantive, Nonsignificant

Legal Authority: Consolidated Farm and Rural Development Act (CONACT)

CFR Citation: 7 CFR 762

Legal Deadline: None

Abstract: The Consolidated Farm and Rural Development Act authorizes the Farm Service Agency to establish and carry out an interest rate reduction program, which provides an interest subsidy for guaranteed loans. The existing Interest Assistance Program is cumbersome and administratively expensive for lenders, causing many of them not to participate. The lenders that do participate use it extensively for many of their clients, resulting in an unbalanced and regional use of the program, and not always for those producers most in need of the assistance.

Our proposal is to reduce administrative burden for the lender, with the elimination of the annual needs test, to encourage non-participating lenders to utilize the program. We also propose to reduce the number of years that a producer can receive an interest subsidy and revise the way this is determined. This reduced term will target the program to addressing short-term cash flow problems, and discourage use of the program for major expansion, capital improvements or other longer term purposes.

There will be no change in program funding. However, some allocated funds will be redirected to reach producers more in need of assistance.

201. • NON-RECOURSE COTTON LOAN AND LOAN DEFICIENCY PAYMENT PROGRAMS; UPLAND COTTON FIRST HANDLER MARKETING CERTIFICATE PROGRAM; AND SEED COTTON RECOURSE LOAN PROGRAM

Priority: Other Significant

Legal Authority: 7 USC 7231; 7 USC 7234 - 7237

CFR Citation: 7 CFR 1427

Legal Deadline: None

Abstract: Changes are proposed to the regulations that implement the upland cotton non-recourse loan and loan deficiency payment (LDP) programs at 7 CFR 1427, subpart A. These changes are being proposed to improve the accuracy and timeliness of producer transactions and are not foreseen as changing the number of program applications or the total value of program outlays. Rather, payment applications and loan settlements will be simply processed in less time, at less cost to the Commodity Credit Corporation (CCC) and the cotton industry, and with a greater degree of accuracy. Additional editorial changes to these regulations are included to improve the precision of the regulations.

It also is proposed that regulations for the Upland Cotton First Handler Marketing Assistance Program at 7 CFR 1427, subpart B, be deleted because they no longer apply to the cotton program. When the cotton marketing loan program was established, the statute limited the loan repayment rate to no less than 70 percent of the loan level. If the world price fell below that minimum level, the difference between the world price and the minimum loan repayment level was to be payable with first handler marketing certificates provided by regulations at subpart B. Because there is no longer any statutory minimum to the loan repayment rate, the regulations at 7 CFR 1427, subpart B are no longer needed.

Finally, one change is proposed to 7 CFR 1427, subpart D, that adds an additional eligibility requirement for the seed cotton loan.

Expected Effects.

1.Reduced administrative burden for loan repayments for both FSA and cotton merchants.

2.Quicker release of loan collateral by CCC to the market.

USDA—FSA

Proposed Rule Stage

3.Reduced CCC outlays for classification information currently purchased from the Agricultural Marketing Service to represent some cotton. For the 2000 crop, CCC paid approximately $230,000 for classification information. There could be a corresponding increase in outlays for classification information by ginners or warehouses that consistently have omitted this information from bale lists submitted to CCC.

4.Purchase of software by about 25 ginners and purchase of hardware and software by 6 to 8 ginners.

202. • OCEAN FREIGHT CLAIMS ADMINISTRATIVE APPEAL PROCESS

Priority: Substantive, Nonsignificant

Legal Authority: 7 U.S.C. 1431; 7 U.S.C. 1736o; 15 U.S.C. 714 et seq.; PL 480

CFR Citation: 7 CFR 1405; 7 CFR 1499; 22 CFR 211

Legal Deadline: None

Abstract: This rule will establish an administrative appeals procedure that would be used by the Commodity Credit Corporation (CCC) with respect to ocean transportation cargo loss and damage claims arising under shipments of agricultural commodities made available by CCC under various foreign donation programs. Whether or not title to the commodities has passed from CCC to a cooperating sponsor, which may be a foreign government, private voluntary organization, or private entity, CCC either retains the right or may be assigned the right to initiate, prosecute, and with certain limited exceptions retain the proceeds of cargo loss and damage claims. This proposed rule sets forth the administrative appeal system to be used in resolving these claims. The proposed rule would require that any recipient of CCC-donated commodities must include in the contract for the ocean transportation of the commodities a provision that the ocean carrier must agree to participate in this administrative appeal process.

The current process requires CCC to file suit against ocean carriers in U.S. District Court to pursue claims that CCC is not able to settle through negotiations. CCC currently does not have an established administrative appeal process to handle the internal review of these cargo claims before the claims are referred to the U.S. Department of Justice for collection through litigation. The total amount of these claims is approximately $20 million including $10 million that has been referred to the Department of Justice. Based upon a review of the programs under which these claims arise, CCC has determined that an administrative appeals system is necessary in order to: (1) Provide a more uniform treatment of these types of claims; (2) handle these types of claims in a manner that is more consistent with the manner in which other CCC claims are handled; and (3) ensure compliance with the Debt Collection Improvement Act of 1996.

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301; 7 USC 1989

CFR Citation: 7 CFR 1951

Legal Deadline: None

Abstract: The Agency has found that a Disaster Set Aside (DSA) [7 CFR part 1951, subpart T) is often used to correct defaults when the account should have been serviced under the delinquent account restructuring regulations in 7 CFR part 1951, subpart S, commonly referred to as "Primary Loan Servicing," (PLS). Current regulations are not clear on when a DSA is not appropriate versus PLS. When finalized, the rule approved under this workplan will amend the regulations under 7 CFR part 1951 to require that Primary Loan Servicing be considered before a loan default is corrected using a DSA.

206. • 2002-CROP PEANUTS NATIONAL POUNDAGE QUOTA FOR QUOTA PEANUTS

Priority: Other Significant

Legal Authority: 7 USC 1358-1; PL 101-624; PL 103-66; PL 104-127

CFR Citation: 7 CFR 729; 7 CFR 1421; 7 CFR 1446

Legal Deadline: Other, Statutory, December 15, 2001, Announcement of Quota.

Abstract: The objective of the peanut quota is to balance supply with demand at a level that will assure stable supplies for domestic use and assure producers a stable income. This action is required by statute, which provides a formula for computing the national quota based on the Secretary's estimate of the amount of peanuts required for domestic food and related uses for the 2002 marketing year. The 2002 marketing year is from August 1, 2002, through July 31, 2003. The Peanut Program, which includes the poundage quota, price support, and export policies, will result in gross outlays of $42.6 million that are expected to be offset by repayments and assessments in FY 2002 and subsequent years for a net cost of 0.

207. • 2002-CROP MARKETING QUOTAS AND PRICE SUPPORT LEVELS FOR FIVE KINDS OF TOBACCO

Priority: Other Significant

Legal Authority: 7 USC 1312; 7 USC 1445

CFR Citation: 7 CFR 723; 7 CFR 1464

Legal Deadline: Other, Statutory, March 1, 2002, Announcement of marketing quotas.

Abstract: Marketing quotas/acreage allotments and price support are required by statute for these kinds of tobacco: Fire-cured (type 21), Fire-cured (types 22-23), Dark Air-cured (types 35-36), Virginia sun-cured (type 37), and Cigar Filler and Binder (types 42-44 and 53-55). Quotas and allotments are determined by statutory formula to balance supply with demand to assure stable supplies for domestic and export use. Marketing quotas are implemented if approved by producers in referenda. Producers approved quotas for the 2002 crops of fire-cured (types 21-23), dark air-cured (types 35-36) and sun-cured (type 37) in March 2001. Cigar filler and binder (types 42-44 and 53-55) were approved in March 1999. Price support levels are also set by statutory formula. The Secretary may reduce the level at the request of producer associations, and may limit increases to 65 percent of the formula increase. Gross loan outlays of $1 million are expected in FY 2002, to be offset by loan redemptions and no-net-cost assessments in FY 2002 and subsequent years, for a net cost of 0.

208. PART 1946 MEDIATION; SUBPART A—AGRICULTURAL LOAN MEDIATION PROGRAM

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1989; 7 USC 301; PL 103-354, sec 282; PL 106-472, sec 306

CFR Citation: 7 CFR 1946 subpart A

Legal Deadline: Final, Statutory, October 13, 1994.

Abstract: Legislation expanded the State Mediation Programs to include wetland determinations, conservation compliance, and other issues the Secretary deems appropriate. This action will establish procedures for certification and for administering the matching grant program, and set out the Department's duties to participate in such programs. The USDA Reorganization Act of 1994 requires mediation to be a part of the informal hearing process when an officer, employee, or committee of an agency makes an adverse decision. The legislation also requires certification of a State's Mediation Program in order to participate in mediation pursuant to a State's Certified Mediation Program and to enable a State to receive a Federal matching grant(s) to be used for the operation and administration of the program. The Agriculture Improvement Act of 1992 increased the percentage of grants to 70 percent from 50 percent of the cost of a State's program, limited to $500,000, whichever is the lesser. The Reorganization Act of 1994 extended the mediation program authority through fiscal year 2000. The Grain Standards and Warehouse Improvement Act of 2000 (Pub. L. 106-472) re-authorizes the mediation program by extending it until 2005, clarifies that funds appropriated by Congress to the mediation program be used for farm credit cases, including USDA direct and guaranteed loans and loans from commercial entities, and stresses that mediation services can facilitate counseling services to prepare farmers prior to mediation.

209. DAIRY RECOURSE LOAN PROGRAM

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 7252

CFR Citation: 7 CFR 1430

Legal Deadline: None

Abstract: Section 142 of the Federal Agriculture Improvement and Reform Act of 1996 (7 U.S.C. 7252) requires USDA, through the CCC, to offer recourse loans for dairy products beginning on January 1, 2000. The objective of the program is to assist processors in managing their inventories of eligible dairy products and thereby increase price stability for the dairy industry. The current regulations were promulgated as final without public review or comment, as mandated, as part of the implementation of the Federal Agriculture Improvement and Reform Act of 1996. A notice of proposed rulemaking sought public review and comment on the terms and conditions of the dairy recourse loan program as currently provided in the regulations. Industry representatives have questioned the advisability of several provisions in the current regulation. No cost is expected.

210. LAMB MEAT ADJUSTMENT ASSISTANCE PROGRAM

Priority: Other Significant

Legal Authority: 7 USC 612c

CFR Citation: 7 CFR 784

Legal Deadline: None

Abstract: This program will provide monetary assistance to eligible sheep and lamb producers who have recently experienced record low prices and poor market conditions due the recent surge of low-priced, imported lamb meat. Lamb meat is being imported into the United States in such increased quantities as to be a substantial cause of threat of serious injury to the domestic lamb meat industry. During the first year of the program, benefits will be provided to eligible sheep and lamb producers throughout the United States based on the number of rams purchased, the number of sheep enrolled in the National Sheep Improvement Program, and the cost of

USDA—FSA **Final Rule Stage**

lambing facility improvements during the period August 1, 1999, through July 31, 2000. During the second and third year, benefits will be provided to eligible sheep and lamb producers throughout the United States based on the number of slaughter lamb and feeder lamb marketed, grade, weight, and muscling during the period August 1, 2000, through July 31, 2002. The expected cost is $30 million.

211. REDUCTION OF AMORTIZED SHARED APPRECIATION RECAPTURE INTEREST RATE

Priority: Other Significant

Legal Authority: PL 87-128; PL 106-387

CFR Citation: 7 CFR 761; 7 CFR 1910; 7 CFR 1927; 7 CFR 1941; 7 CFR 1943; 7 CFR 1945

Legal Deadline: None

Abstract: The Farm Service Agency is amending the regulations regarding Shared Appreciation Agreement recapture amortization and reamortization. This modification is necessary because the Agriculture, Rural Development, Food and Drug Administration and Related Agencies Appropriations Act amended the Consolidated Farm and Rural Development Act to reduce the rate applicable to amortizations from the current Homestead Protection Program Rate (currently 6.5%) to 1% less than that rate. No change in outlays is expected.

212. COLLECTING GUARANTEED LOSS PAYMENTS FROM FSA FARM LOAN PROGRAM BORROWERS

Priority: Substantive, Nonsignificant

Legal Authority: 31 USC 3716

CFR Citation: 7 CFR 762

Legal Deadline: None

Abstract: This action will revise FSA regulations to provide that any amounts paid by FSA on account of a guaranteed loan borrower will constitute a Federal debt owed to FSA by the guaranteed loan borrower. The rule will not affect any guaranteed borrowers who have had loss claims paid on their guaranteed loans at the present time. Under the new rule, when farmers apply for a guaranteed loan, they will sign a loan application, which includes a section entitled "Federal Debt," in which they agree that any amounts paid by FSA on account of the liabilities of the guaranteed loan borrower will constitute a Federal debt owed to FSA by the guaranteed loan borrower. In such cases, FSA may use all remedies available to it, including offset under the Debt Collection Improvement Act, to collect the debt from the borrower. It will affect only those guaranteed borrowers who have a loss claim paid by FSA to the lender from whom they received a guaranteed loan. Currently, there are approximately 40,000 guaranteed farm loan borrowers with 67,000 loans. Approximately 1,200 loss claims are paid on guaranteed loans per year, and approximately 100 of those loans are discharged in bankruptcy, leaving approximately 1,100 loans that could be considered for offset.

213. • TOBACCO MARKETING QUOTAS, CARDS, PENALTY PROVISIONS, RECORDKEEPING AND REPORTING

Priority: Other Significant

Legal Authority: 7 U.S.C. 1311 et seq.

CFR Citation: 7 CFR 723

Legal Deadline: None

Abstract: This action will amend several sections of the tobacco marketing quota regulations to accommodate the implementation of an improved tobacco market reporting system, consisting mainly of non-auction receiving stations, which are common delivery points for non-auction purchases of flu-cured and burley tobacco. The new reporting system is necessary because an extremely large percentage of the 2001 flue-cured and burley crops is expected to be sold non-auction through private contact arrangements. The new system will allow for electronic reporting and paperwork reduction and will facilitate the tracking and monitoring of producer marketings, which will aid in assuring the integrity of the marketing quota system. Receiving stations are technically dealers, but a system similar to the warehouse system is needed due to the large volume of transactions. Warehouse operators and receiving stations will be given advance information through the flue-cured and burley tobacco designation programs as to the amount of tobacco that will be

USDA—FSA **Final Rule Stage**

marketed and the farms from which the tobacco will be delivered. Some cost-savings will accrue to producers, warehouses and receiving stations, and USDA due to more efficient collection of marketing information.

214. • 2002-CROP MARKETING QUOTA AND PRICE SUPPORT LEVEL FOR BURLEY TOBACCO

Priority: Other Significant

Legal Authority: 7 USC 1314; 7 USC 1445

CFR Citation: 7 CFR 723; 7 CFR 1464

Legal Deadline: Other, Statutory, February 1, 2002, Announcement of marketing quotas.

Abstract: The burley tobacco marketing quota and price support are required by statute. The purpose of the quota and price support is to balance supply with demand at levels assuring stable supplies for domestic and export use at prices that are considered sufficient for producers. The national quota is based on cigarette manufacturers' intentions, 3-year average exports, a loan stocks adjustment, and a discretionary adjustment of plus or minus 3 percent. The price support level is based on a formula that averages market prices (2/3 weight) and a cost index (1/3 weight), plus discretion to limit any increase to 65 percent of the formula increase. Producers approved the program in a referendum for this kind of tobacco held in February 2001. Net receipts of $10 million in FY 2003 are expected to be offset by loan repayments and no-net-cost assessments in FY 2003 and subsequent years, for a net cost of 0.

241. • ELIMINATION OF 30-DAY PAST-DUE PERIOD FOR FARM LOAN PROGRAM BORROWERS

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301; 7 USC 1989; 31 USC 3716; 42 USC 1480

CFR Citation: 7 CFR 1951

Legal Deadline: None

Abstract: Currently, borrowers are considered "past due" for the first 30 days after a missed Farm Loan Program (FLP) payment and are then "delinquent." This is not consistent with the terminology used by Farm Programs (FP), which considers borrowers "delinquent" immediately after a missed payment. This action will eliminate the 30-day past due period prior to delinquency. In addition to clarification and consistency, this change would allow FLP borrowers to receive debt write-down on the day after a missed payment, assuming all other primary loan servicing criteria are met, instead of waiting 31 days. This change will also clarify the use of the word delinquent with regard to all servicing and offsets. The rule will not affect the statutorily required "90 days past due" criteria that is currently used to determine the onset of primary loan servicing. This rule will not significantly affect costs for either the government or borrowers.

242. • TOBACCO MARKETING QUOTAS, ACREAGE ALLOTMENTS AND PRODUCTION ADJUSTMENT

Priority: Other Significant

Legal Authority: 7 USC 1311 et seq; 7 USC 1445

CFR Citation: 7 CFR 1464

Legal Deadline: None

Abstract: This rule will require that burley tobacco producers designate their quota tobacco to a specific auction warehouse, buying company, or dealer as a condition for receiving price support. This action is a recommendation of the Burley Tobacco Advisory Committee and will establish a Grower Designation Program for burley tobacco similar to a program for flue-cured tobacco that has been in operation since 1974. The purpose of the program will to be to improve the marketing of burley tobacco by enabling more efficient staffing of warehouses with warehouse employees and government inspectors. Designation of burley tobacco is expected to take place June 1, 2001, through August 1, 2001.

243. • AMENDMENT TO THE REGULATIONS FOR DETERMINING ACREAGE FOR SKIP-ROW COTTON

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1373; 7 USC 1374; 7 USC 7201; 15 USC 714(b) and (c); 21 USC 889

CFR Citation: 7 CFR 718.107

Legal Deadline: None

Abstract: This action will amend the regulations for determining acreage for acreage-based program payments such as crop insurance and disaster payments. Program regulations provide that cotton acreage planted in a "skip-row" pattern should be factored when determining program payments. The current regulations defining skip rows allows some producers to take advantage of the provisions and devise cotton planting patterns that are considered solidly planted, and thus inflate their program payment acreage. This rule will close that loophole. Program payments using acreage determinations based on skip-row planting patterns will be more equitably distributed and crop insurance payments will be more accurate.

247. • SUGAR PAYMENT-IN-KIND (PIK) DIVERSION PROGRAM

Priority: Economically Significant

Legal Authority: 7 U.S.C. 1308a

CFR Citation: None

Legal Deadline: None

Abstract: Sugar Program costs may increase because the FY 2001 Appropriations Act requires that CCC offer nonrecourse loans, which provide processors with the option of forfeiting sugar pledged as collateral. Processors may continue to exercise this option given the outlook for continued excess supply of sugar in domestic markets, a 793,000-ton, raw value, CCC sugar inventory, and the absence of a CCC inventory disposal plan. The risk, magnitude, and cost of potential forfeitures would be reduced if the Secretary has the ability, by means of a Sugar PIK Diversion Program, to replace sugar on the domestic market made from harvested sugar beets with sugar from CCC's inventory. A Sugar PIK Diversion Program would help restore balance to the sugar market and reduce CCC's sugar acquisition and storage costs. Without implementation of this Program, domestic sugar supplies are expected to exceed domestic demand requirements, leaving prices at low levels and increasing the likelihood of a second consecutive year of forfeitures in FY 2001. These forfeitures of sugar would increase CCC's current monthly storage costs of almost $1.4 million.

This option would enable the Secretary to achieve savings of $6.66 million annually based on the results of the FY 2000 PIK Diversion Program. The FY 2000 PIK Program produced a $555,000 reduction in monthly CCC storage costs and diverted about 7 percent of sugarbeet acreage from production. Reintroduction of the PIK Program in FY 2001 has received encouragement from growers and processors, who strongly supported the FY 2000 PIK Diversion Program.

248. ANIMAL WELFARE: MARINE MAMMALS; NONCONSENSUS LANGUAGE AND INTERACTIVE PROGRAMS

Priority: Other Significant

Legal Authority: 7 USC 2131 to 2159

CFR Citation: 9 CFR 3

Legal Deadline: None

Abstract: The U.S. Department of Agriculture regulates the treatment of certain marine mammals under the Animal Welfare Act. The present standards for treatment of these animals have been in effect for over 10 years. During this time, advances have been made and new information has been developed with regard to the housing and care of marine mammals. We intend to develop amendments to the marine mammal standards on which consensus was not reached during negotiated rulemaking conducted between September 1995 and July 1996. The amendments would be to standards affecting variances, indoor facilities, outdoor facilities, space requirements, and water quality, as well as swim-with-the-dolphins programs. These actions appear necessary to ensure that the minimum standards for the humane handling, care, treatment, and transportation of marine mammals in captivity are based on current general, industry, and scientific knowledge and experience.

249. PLANT PEST REGULATIONS; UPDATE OF CURRENT PROVISIONS (SECTION 610 REVIEW)

Priority: Other Significant

Legal Authority: 7 USC 450; 7 USC 2260; 7 USC 7711 to 7712; 7 USC 7714; 7 USC 7718; 7 USC 7731; 7 USC 7734; 7 USC 7751; 7 USC 7754; 19 USC 1306; 21 USC 111; 21 USC 114a; 21 USC 136 to 136a; 31 USC 9701; 42 USC 4331 to 4332

CFR Citation: 7 CFR 330

Legal Deadline: None

Abstract: APHIS is undertaking rulemaking to amend its plant pest regulations by: (1) Setting out the criteria that will be used by APHIS when considering whether an organism is a plant pest; (2) adding a permit category for organisms that would be released into the environment for purposes such as the biological control of weeds; (3) establishing a notification system that could be used in place of permits for the importation and interstate movement of regulated organisms; and (4) revising or amending existing portions of the regulations to clarify or update requirements, eliminate redundancy, and make the regulations easier for the public to use. This action will serve as a follow-up to the advance notice of proposed rulemaking that APHIS published in the Federal Register on September 27, 1996, to solicit input on the need for regulatory changes and alternative methods of addressing plant pest risk.

250. PHYTOSANITARY TREATMENT BY IONIZING ENERGY OF IMPORTED FRESH FRUITS AND VEGETABLES

Priority: Other Significant

Legal Authority: 7 USC 7701 to 7772

CFR Citation: 7 CFR 305; 7 CFR 319.56

Legal Deadline: None

Abstract: This rulemaking would establish ionizing energy (irradiation) as a new treatment alternative for the importation of certain fresh fruits and vegetables. Ionizing energy would be allowed as an alternative to mitigation measures that are required to control certain species of fruit flies in a variety of imported fruits and vegetables. If this proposal is adopted, importers of certain fruits and vegetables will have an additional alternative to the currently approved treatments, such as fumigation and cold treatment, for treating their articles. No net societal gains and losses other than small price-related changes are expected from this rulemaking.

251. IMPORTATION OF SOLID WOOD PACKING MATERIAL

Priority: Economically Significant. Major under 5 USC 801.

Legal Authority: 7 USC 166; 7 USC 450; 7 USC 7701 to 7772

CFR Citation: 7 CFR 319

Legal Deadline: None

Abstract: APHIS is undertaking rulemaking to strengthen restrictions on the importation of solid wood packing material (e.g., crates, dunnage, wooden spools, pallets, packing blocks) into the United States. Imported solid wood packing material (SWPM) has been linked to introductions of exotic plant pests, such as the pine shoot beetle and the Asian longhorned beetle. These and other plant pests that could be carried by imported SWPM pose a serious threat to U.S. agriculture and to natural, cultivated, and urban forests. SWPM accompanies nearly all types of imported commodities, from fruits and vegetables to machinery and electrical equipment.

252. BLOOD AND TISSUE COLLECTION AT LIVESTOCK SLAUGHTERING ESTABLISHMENTS

Priority: Other Significant

Legal Authority: 21 USC 111 to 113; 21 USC 114a to 114a-1; 21 USC 115 to 117; 21 USC 120 to 126; 21 USC 134b; 21 USC 134f

CFR Citation: 9 CFR 71

Legal Deadline: None

Abstract: We are considering establishing requirements for the collection of blood and tissue samples from livestock (horses, cattle, bison, sheep, and swine) and poultry at slaughter establishments when it is necessary for disease surveillance. Under this proposal, any person who moves an animal interstate for slaughter could only move the animal to a slaughter establishment that has been approved by the Administrator. The Administrator would approve a slaughter establishment after determining that it is not necessary to conduct testing at the establishment or determining that it is necessary to conduct testing at the establishment and the establishment provides space and facilities to collect blood and tissue samples for disease testing. This collection of blood and tissue samples would enable us to identify animals at slaughter that are affected by various communicable diseases. This change would affect persons moving animals interstate for slaughter, slaughter plants that receive animals in interstate commerce, and in cases where an animal that tests positive can be successfully traced back to its herd or flock of origin, the owners of such herds or flocks. The long-term effects of this change would be to improve surveillance programs for animal diseases and to contribute to the eventual control or eradication of such diseases.

253. PHYTOSANITARY CERTIFICATES FOR IMPORTED FRUITS AND VEGETABLES

Priority: Other Significant

Legal Authority: 7 USC 166; 7 USC 450; 7 USC 7701 to 7772; 21 USC 136 to 136a

CFR Citation: 7 CFR 319.56 to 319.56-8

Legal Deadline: None

Abstract: Currently APHIS does not require a phytosanitary certificate to accompany fruits and vegetables imported into the United States except for certain fruits and vegetables grown in designated foreign regions. This proposed rule would amend our regulations to require that a phytosanitary certificate accompany all fruits and vegetables imported into the United States, with certain exceptions. This proposal would include commercial produce imported into the United States, as well as fruits and vegetables brought in by travelers. We would exempt from this requirement fruits and vegetables that are dried, cured, frozen, or processed, as well as fruits and vegetables that travelers and shoppers bring into the United States for personal use through land ports-of-entry located along the Canadian and Mexican borders. If implemented, this proposal would require changes in the practices of importers and travelers who bring produce into the United States from other countries.

254. BEES, BEEKEEPING BYPRODUCTS, AND BEEKEEPING EQUIPMENT (SECTION 610 REVIEW)

Priority: Other Significant

Legal Authority: 7 USC 281; 7 USC 7701 to 7772

CFR Citation: 7 CFR 319; 7 CFR 322

Legal Deadline: None

Abstract: We propose to revise the regulations for the importation of honeybees and honeybee semen. Among other things, we propose to allow, under certain conditions, the importation into the United States of honeybees from Australia and honeybees and honeybee germ plasm from New Zealand. We also propose changes to make these regulations more consistent with standards established by the Office International des Epizooties, to update them to reflect current research and terminology, and to simplify them and make them more useful.

In addition, we propose to combine the regulations for the importation of honeybees and honeybee semen with the regulations established to prevent the introduction of exotic bee diseases and parasites through the importation of bees other than honeybees, certain beekeeping byproducts, and used beekeeping equipment. This change would make the regulations more useful by consolidating all of the requirements related to the importation of bees, beekeeping byproducts, and used beekeeping equipment into one part.

258. • SALMONELLA ENTERITIDIS PHAGE-TYPE 4; REMOVE IMPORT RESTRICTIONS

Priority: Other Significant

Legal Authority: 7 USC 450; 7 USC 7711 to 7714; 7 USC 7751; 7 USC 7754; 19 USC 1306; 21 USC 111; 21 USC 114a; 21 USC 134a to 134c; 21 USC 134f; 21 USC 136 to 136a; 31 USC 9701; 42 USC 4331 to 4332; 7 CFR 2.22; 7 CFR 2.80; 7 CFR 371.4

CFR Citation: 9 CFR 94

Legal Deadline: None

Abstract: We are proposing to amend the regulations to remove import restrictions on eggs (other than hatching eggs) of poultry, game birds, and other birds from regions where Salmonella enteritidis phage-type 4 exists. Previously, Salmonella enteritidis phage-type 4 had not been isolated in the United States; therefore, those import restrictions were necessary to help prevent Salmonella enteritidis phage-type 4 from being introduced into this country. However, Salmonella enteritidis phage-type 4 is now known to be present in the United States. This proposed rule would eliminate unnecessary trade restrictions on other regions where Salmonella enteritidis phage-type 4 exists.

262. IMPORTATION OF FUJI APPLES FROM THE REPUBLIC OF KOREA

Priority: Other Significant

Legal Authority: 7 USC 166; 7 USC 450; 7 USC 7701 to 7772; 21 USC 136 to 136a

CFR Citation: 7 CFR 319.56-2cc

Legal Deadline: None

Abstract: This action would amend the regulations that allow Fuji variety apples to be imported into the United States. It would allow Fuji variety apples to be imported from the Republic of Korea under a systems approach, including strict cultural control conditions, from certified orchards. This action is in response to a request from the Republic of Korea. We reviewed scientific studies and data on the Republic of Korea's pest management practices in export orchards and believe that the conditions to which the importation of Fuji variety apples from certified orchards in the Republic of Korea would be subject would reduce the risk of pest introduction to a negligible level.

265. COMMERCIAL TRANSPORTATION OF EQUINES TO SLAUGHTER

Priority: Other Significant

Legal Authority: 7 USC 1901

CFR Citation: 9 CFR 70; 9 CFR 88 (New)

Legal Deadline: None

Abstract: This action would establish regulations pertaining to the commercial transportation of equines to slaughter. The purpose of these regulations is to establish minimum standards to ensure the humane movement of equines to slaughter via commercial transportation. We are proposing these regulations to fulfill our responsibility under the 1996 Farm Bill to regulate the commercial transportation of equines to slaughter by persons regularly engaged in that activity within the United States.

266. IMPORTATION OF UNSHU ORANGES

Priority: Other Significant

Legal Authority: 7 USC 166; 7 USC 450; 7 USC 7701 to 7772; 21 USC 136 to 136a

CFR Citation: 7 CFR 319.28

Legal Deadline: None

Abstract: We are proposing to amend the regulations governing the importation of citrus fruit to allow, under certain conditions, Unshu oranges grown on Kyushu Island, Japan, to be imported into the United States. We are also proposing to amend the regulations for importing Unshu oranges from Honshu Island, Japan, by requiring fumigation using methyl bromide prior to exportation and by allowing the fruit to be imported into commercial citrus-producing areas of the United States. In addition, we are proposing to remove the requirement for individually wrapping Unshu oranges imported from Japan or the Republic of Korea. These actions would relieve restrictions on the importation into and distribution within the United States of Unshu oranges without presenting a significant risk of introducing citrus canker or other diseases or pests of plants.

Legal Authority: 7 USC 166; 7 USC 7711 to 7712; 7 USC 7714; 7 USC 7731; 7 USC 7735; 7 USC 7751 to 7754; sec 301.75-15 also issued under sec 204, title II, PL 106-113; 113 Stat. 1501A-293; sec 301.75-15 and 301.75.16 also issued under sec 203; title II, PL 106-224, 114 Stat. 400 (7 USC 1421 note)

CFR Citation: 7 CFR 301.74-5

Legal Deadline: None

Abstract: APHIS has published an interim rule amending its plum pox regulations to provide for the payment of compensation to the owners of commercial stone fruit orchards and fruit tree nurseries who had stone fruit trees or nursery stock destroyed in order to control plum pox. The payment of these funds is necessary in order to reduce the economic impact of the plum pox quarantine on affected commercial stone fruit growers and fruit tree nursery owners. APHIS anticipates finalizing this interim rule after addressing the comments received.

268. ANIMAL WELFARE; POLICY ON ENVIRONMENT ENHANCEMENT FOR NONHUMAN PRIMATES

Priority: Other Significant

Legal Authority: 7 USC 2131 to 2159

CFR Citation: 9 CFR 3.81

Legal Deadline: None

Abstract: APHIS' Animal Welfare Act regulations require that dealers, exhibitors, and research facilities that maintain nonhuman primates develop and follow a plan for environment enhancement adequate to promote the psychological well-being of nonhuman primates.

APHIS is preparing a final policy statement to provide guidance on what we believe must be considered and included in the plan in order for dealers, exhibitors, and research facilities to adequately promote the psychological well-being of nonhuman primates. This final policy statement addresses the comments received in response to our draft policy statement.

269. • IMPORTATION PROHIBITIONS BECAUSE OF BOVINE SPONGIFORM ENCEPHALOPATHY

Priority: Other Significant

Legal Authority: 7 USC 450; 7 USC 7711 to 7714; 7 USC 7751; 7 USC 7754; 18 USC 1306; 21 USC 111; 21 USC 134b to 134c; 21 USC 134f; 21 USC 136 to 136a; 31 USC 9701; 7 CFR 2.22; 7 CFR 2.80; 7 CFR 371.4

CFR Citation: 9 CFR 94.18; 9 CFR 95.1; 9 CFR 95.4; 9 CFR 95.29 (New)

Legal Deadline: None

Abstract: This interim rule prohibits, with limited exceptions, the importation of certain animal materials and their derivatives, and any products they are used in, from regions considered to present an unacceptable risk of introducing bovine spongiform encephalopathy (BSE) into the United States. Additionally, it requires that those materials, when imported from regions not considered at risk for BSE, be accompanied by Government certification regarding the species, region of origin, processing, and handling of the materials and the animals from which they were derived. These actions are necessary to ensure that materials containing the BSE agent are not imported into the United States.

270. • INTERSTATE MOVEMENT OF SWINE WITHIN A PRODUCTION SYSTEM

Priority: Other Significant

Legal Authority: 21 USC 111 to 113; 21 USC 114a to 114a-1; 21 USC 115 to 117; 21 USC 120 to 126; 21 USC 134b; 21 USC 134f; 7 CFR 2.22; 7 CFR 2.80; 7 CFR 371.4

CFR Citation: 9 CFR 71; 9 CFR 85

Legal Deadline: None

Abstract: We are establishing an alternative to the current requirements for moving swine interstate. Under this alternative, persons may move swine interstate without meeting individual swine identification and certain other requirements if they move the swine within a single swine production system, and if swine producers participating in that system sign agreements with the Animal and Plant Health Inspection Service and involved State governments to monitor the health of animals moving within the swine production system and to facilitate traceback of these animals if necessary. This action will facilitate the interstate movement of swine while continuing to provide protection against the interstate spread of swine diseases. This action will affect persons engaged in swine production against the interstate spread of swine diseases. This action will affect persons engaged in swine production who regularly move swine interstate in their business operations.

Legal Deadline: None

Abstract: This ruling will effectuate a comprehensive civil rights regulation implementing the following laws: The Equal Credit Opportunity Act (ECOA); title VI of the Civil Rights Act of 1964; title VIII of the Civil Rights Act of 1968, as amended by the Fair Housing Amendments Act of 1988 (The Fair Housing Act); section 504 Federally Conducted and Federally Assisted Programs; title IX of the Education Amendments of 1972; Age Discrimination Act of 1975; and Executive Orders 11246 and 12898 (Environmental Justice). The revised regulations will provide detailed guidelines for field offices for improved enforcement and compliance with these laws, which heavily impact the Agency's programs. Mechanisms for monitoring compliance by field offices and recipients of Federal financial assistance at all levels will decrease the Agency's vulnerability that exist due to noncompliance with recently enacted Civil Rights legislation.

Legal Deadline: None

Abstract: The Rural Housing Service proposes to consolidate regulations pertaining to section 515 Rural Rental Housing, section 514 Farm Labor Housing Loans, section 516 Farm Labor Housing Grants, and section 521 Rental Assistance Payments. Fourteen published regulations will be reduced to one regulation and handbooks for program administration. This will simplify loan origination and portfolio management for applicants, borrowers, and housing operators as well as Rural Development field staff. This will also provide flexibility for program modifications to reflect current and foreseeable changes. It will also reduce regulations that address solely internal Agency program administration. Finally, the regulation will be more

297. SELF-HELP TECHNICAL ASSISTANCE GRANTS

Priority: Substantive, Nonsignificant

Legal Authority: 5 USC 301; 42 USC 1480

CFR Citation: 7 CFR 1944; 7 CFR 3551

Legal Deadline: None

Abstract: The regulations for 7 CFR 1944-I "Self-Help Technical Assistance Grants" is being rewritten and renumbered to 7 CFR 3551. Changes are proposed for clarification of policy and procedures relative to the: 1) Application procedure, which is changing to an annual competitive grant process; 2) labor contribution of participating families; 3) monitoring of grantee progress through Self-Help Automated Reporting and Evaluation System (SHARES); and 4) define the roles of Technical and Management Assistance Contractors.

298. DIRECT SECTION 502 AND 504 SINGLE-FAMILY HOUSING PROGRAM

Priority: Other Significant. Major under 5 USC 801.

Legal Authority: 5 USC 301; 7 USC 1989; 42 USC 1480; 31 USC 3700

CFR Citation: 7 CFR 1806; 7 CFR 1900; 7 CFR 1944; 7 CFR 1951; 7 CFR 1955; 7 CFR 1956; 7 CFR 1965; 7 CFR 3550

Legal Deadline: None

Abstract: The Rural Housing Service reopened the comment period on four sections of this regulation seeking potential changes to the definition of modest housing and calculation of payment subsidies. The Agency has reviewed comments and will be publishing minor corrections and clarifications in the existing regulation. In addition, the Agency will provide an updated definition of modest housing moving away from reliance on the section 203(b) mortgage limits set by the Department of Housing and Urban Development. The Agency will use more localized data and provide clearer guidance to ensure compliance with our mission to finance housing that is decent, safe, sanitary, and modest. No changes in the payment subsidy are anticipated.

300. OPERATING ASSISTANCE FOR MIGRANT FARMWORKER PROJECTS

Priority: Substantive, Nonsignificant

Legal Authority: 7 USC 1989; 42 USC 1484; 42 USC 1486; 42 USC 1490a; PL 105-276, sec 599c

CFR Citation: 7 CFR 1944, subpart D; 7 CFR 1930, subpart C

Legal Deadline: None

Abstract: Regulation implements the provisions of Public Law 105-276, enacted October 21, 1998, which amended section 521 of the Housing Act of 1949. This amendment provides that, for migrant farmworker housing projects financed under section 514 or 516 of the Housing Act, the Secretary may, at the request of the owner, permit amounts provided for rental assistance under section 521 to be used to provide assistance for the costs of operating the project.

301. TECHNICAL ASSISTANCE TO ENCOURAGE THE DEVELOPMENT OF DOMESTIC AND MIGRANT FARM LABOR HOUSING

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1484; 42 USC 1486

CFR Citation: 7 CFR 1944, subpart D

Legal Deadline: None

Abstract: Section 514 of title V of the Housing Act of 1949 authorizes USDA to make loans for farm labor housing. Section 516 of the Act authorizes USDA to make grants for the same purpose. These authorities are implemented through 7 CFR part 1944, subpart D. Section 516 also authorizes USDA to provide financial assistance to private and public nonprofit agencies to encourage the development of farm labor housing. Recipients of this financial assistance, in turn, assist other organizations obtain loans and grants for the construction of farm labor housing. This regulation change will incorporate the "technical assistance" provision of the statute into 7 CFR 1944. The amount of assistance is limited by statute to 10 percent of the total section 516 allocation.

302. • 7 CFR 3565, GUARANTEED RURAL RENTAL HOUSING, SECTION 538 STATUTORY CHANGES

Priority: Substantive, Nonsignificant

Legal Authority: 42 USC 1484; 42 USC 1486; PL 106-569

CFR Citation: 7 CFR 3565

Legal Deadline: None

Abstract: Section 538 of title V of the Housing Act of 1949 authorizes the Secretary of Agriculture to make commitments to guarantee loans for the development of housing and related facilities. By this authority, the Rural Housing Service administers the Guaranteed Rural Rental Housing Program. Program regulations have been issued at 7 CFR part 3565. The regulations are being revised to implement statutory changes that were made to section 538 of the Housing Act of 1949. The Act was amended by Public Law 106-569 on December 27, 2000. These regulatory revisions are required by the statutory change and the revisions to the regulation will only restate the statutory requirements.

306. GENERAL ADMINISTRATIVE REGULATIONS; SUBPART D; APPLICATION FOR CROP INSURANCE

Priority: Other Significant

Legal Authority: 7 USC 1506(l)

CFR Citation: 7 CFR 400

Legal Deadline: None

Abstract: The Federal Crop Insurance Corporation amends the General Administrative Regulations by revising the "Collection of Information and Data (Privacy Act)" statement found on the general crop insurance application. The proposed amendments to the statement include defining "substantial beneficial interest" as those persons whose interest in the policyholder is in excess of 10 percent. Other minor changes have been made to more fully comply with provisions of the Privacy Act.

311. GENERAL ADMINISTRATIVE REGULATIONS; ACTUAL PRODUCTION HISTORY

Priority: Other Significant

Legal Authority: 7 USC 1506 (l); 7 USC 1506 (p)

CFR Citation: 7 CFR 400

Legal Deadline: None

Abstract: To revise actual production history regulations to reflect changes in calculation of approved APH yields as mandated by the Agricultural Risk Protection Act of 2000. Revisions will include: Assigned yields for crops produced on land not farmed before (added land), rotations to crops not previously produced (new crops), and for prevented planting acreage if planted to a substitute crop; adjustments for successful pest control efforts and for organic crops destroyed to maintain organic certification; and substitution of 60 percent of the transitional yield for low actual yields if producers elect that option.
